CORRECTION NOTE

As stated on page III, chapter C corresponds to the PC(1)-C individual State reports. After completion of the computer tabulation on which the PC(1)-C reports were based, a misclassification was discovered between the farm and nonfarm components of the rural population. This misclassification did not affect the data for the rural area as a whole, or for urban areas or the State as a whole. Certain portions of the tabulations were reprocessed for presentation in chapter C and corrected farm-nonfarm figures are presented here. As a result of this reprocessing, however, the distributions by certain characteristics for the total rural population implicit in the farm-nonfarm data presented in tables 48 to 58, 70 to 80, and 134 to 137 may not always be consistent with the area-wide totals shown in chapter C; these differences, which are relatively minor, may occur in the data on school enrollment, residence in 1965, occupation, income, and poverty.

Because of apparent processing errors, the following income information is not shown in table 89 for the total and urban part of the Rhode Island portion of the Fall River SMSA and the Rhode Island portion of the Fall River urbanized area: Mean family income, mean income per family member, mean income of families with female head, mean income for all families and unrelated individuals, mean other income for families and per capita income of persons. The effect of these errors on the income data shown in this report is minor.
