Uses and limitations of the data V
Comparability with other data V

GENERAL

This report presents detailed statistics for the United States on the presence and duration of work disability for the noninstitutional population 18 to 64 years old classified by various demographic, social, and economic characteristics. The statistics are based on the 1970 Census of Population. Legal provision for this census, which was conducted as of April 1, 1970, was made in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

A major portion of the information compiled from the 1970 Census of Population appears in Volume I, **Characteristics of the Population**, which focuses on the presentation of data for States, counties, places, and other areas of the United States. The present report is part of Volume II, **Subject Reports**, wherein most reports concentrate on the presentation of national and regional data for a particular subject. For a description of Volumes I and II, as well as other elements of the data dissemination program of the 1970 Population and Housing Census, see Appendix E, "Publication and Computer Summary Tape Program."

The content and procedures of the 1970 census were determined after evaluation of the results of the 1960 census, consultation with a wide variety of users of census data, and extensive field pretesting. A number of changes were introduced in 1970 to improve the usefulness of the census results.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in later reports of the 1970 census.

Organization of the text.—The text consists of this introduction and Appendixes A through E, which appear after the tables. The introduction contains information relating specifically to the principal subject of this report, such as definitions of terms and editing procedures. Appendix A provides general information concerning the presentation of data in this series of reports and the collection and processing procedures of the 1970 census. Appendix B describes the various area classifications (e.g., urban and rural residence, urbanized areas, etc.) and also explains the residence rules used in counting the population. Appendix C provides brief definitions and explanations of subjects covered in cross-classifications in this report and other reports in this series. Appendix D presents information on sources of error in the data, sampling variability, ratio estimation, and editing procedures. Appendix E summarizes the data dissemination program.

Sample size.—All statistics in this report are based on the 5-percent sample inflated to represent the total population (see "Data Collection Procedures" in Appendix A). An explanation of the ratio estimation procedure and information on the sampling variability associated with the data are contained in Appendix D.

RELATED MATERIALS

1970 census reports.—Statistics on work disability, based on the 5-percent sample, are presented for the United States, regions, divisions, States, standard metropolitan statistical areas, urbanized areas, and places of 50,000 or more in chapters C and D of 1970 Census of Population, Volume I, **Characteristics of the Population.** The statistics in chapter C are restricted to the noninstitutional population 16 to 64 years old who are not enrolled in school; in chapter D the data refer to the total noninstitutional population 16 to 64 years old. In this report the data refer to the total noninstitutional population 18 to 64 years old. Part 1 of Volume I includes chapters C and D for the United States as a whole; the remaining parts of Volume I are for each State, the District of Columbia, Puerto Rico, and selected outlying areas. Chapters C and D were originally published separately in paperbound Series PC(1)-C reports, **General Social and Economic Characteristics**, and Series PC(1)-D reports, **Detailed Characteristics.**

In addition to the present report, several Volume II reports on other subjects include cross-classifications by presence of work disability.

Unpublished data.—For most of the Volume II reports, statistics in addition to those published in the report are available on a reimbursable basis from computer tape files. Data shown for the United States as a whole are available for regions, divisions, and States, and, in a number of instances, the data for some characteristics were tabulated in greater detail than shown in the reports. Requests for unpub-

lished data, giving a specific description of the figures desired, may be made by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Inquiries concerning unpublished data should be transmitted to the Bureau as soon as possible because tape files are not maintained indefinitely.

DEFINITIONS AND EXPLANATIONS OF PRINCIPAL SUBJECT

The definitions and explanations below relate only to the principal subject of this report. Brief definitions of other items that appear in cross-classifications in the tables of this report are presented in Appendix C.

Work Disability

The data on work disability were derived from answers to question 28 (see facsimile of questionnaire item below).

Data were obtained for persons 14 through 64 years old in the 5-percent sample but are presented in this report for persons 18 to 64 years old. The information was used to identify persons hindered in their labor force activities by a health or physical condition. The question refers to a serious illness that has lasted (or is likely to last) for a relatively long time, or a serious physical or mental impairment or handicap. Also determined was whether or not such persons were able to work at all and for how long each person had been limited in his working ability.

Severity of work disability.--A person was classified as with "partial work disability" if he indicated that he did have a health or physical condition which limited the kind or amount of work he was able to do, but that this condition would not or did not prevent him from holding a job. A person was classified as with "complete work disability" if his health or physical condition did prevent him from working at a job.

Duration of work disability.—The determination of how long a person has had the health or physical condition was made for persons with partial as well as complete work disability. The duration categories are as follows: less than 6 months, 6 to 11 months, 1 to 2 years, 3 to 4 years, 5 to 9 years, and 10 years or more.

28a. Does this person have a health or physical condition which limits the kind or amount of work he can do at a job?
If 65 years old or over, skip to question 29.

○ Yes
○ No

b. Does his health or physical condition keep him from holding any job at all?

○ Yes
○ No

c. *If "Yes" in a or b*— **How long has he been limited in his ability to work?**

○ Less than 6 months
○ 6 to 11 months
○ 1 to 2 years
○ 3 to 4 years
○ 5 to 9 years
○ 10 years or more

Uses and Limitations of the Data

The data in this report may be used to study the association of work disability with such economic factors as labor force participation, work experience, occupation, and type and amount of income received. One may also determine the differences between the population with no work disability and that with work disability in regard to marital status, education, family status, and other social and demographic factors. The data cannot, however, be used to estimate the total number of persons with work disability since the persons included in this report comprise only the noninstitutional population 18 to 64 years old.

In table 4 of this report, data are presented for employment status by presence of work disability. In the category "complete work disability," some persons are classified as employed or unemployed. The definition of complete work disability, however, makes this classification definitionally illogical. It is possible, therefore, that these persons misinterpreted the disability questions and reported a complete work disability when they should have indicated a partial work disability.

Comparability with Other Data

The 1970 census was the first census to include a question on work disability. There is some evidence that the level of work disability as measured by the 1970 census is substantially lower than that obtained in 1966 through an independent survey conducted by the Bureau of the Census for the Social Security Administration. An intensive evaluation of these differences is underway, and the results will be published in Series PHC(E), **Evaluation Reports.**

Table 1. **Duration of Work Disability for Persons 18 to 64 Years Old With Disability by Type of Residence, Race, Spanish Origin, Sex, and Age: 1970**

[Excludes inmates of institutions. Data based on 5-percent sample, see text. For meaning of symbols, see text]

[1]The total number of persons with earnings is less than the sum of persons with wage or salary income and with self-employment income because some persons have both types of income. [2]Includes persons with either or both nonfarm and farm self-employment income.

Table 9. **Presence and Duration of Work Disability for Persons 18 to 64 Years Old by Earnings in 1969, Type of Earnings, Race, Spanish Origin, Sex, and Age: 1970**—Continued

[Excludes inmates of institutions. Data based on 5-percent sample, see text. *For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text*]

United States	Total	No work disability	With work disability								
			Total	Partial work disability							Complete work disability
				Total	Less than 6 months	6 to 11 months	1 to 2 years	3 to 4 years	5 to 9 years	10 years or more

[1]The total number of persons with earnings is less than the sum of persons with wage or salary income and with self-employment income because some persons have both types of income. [2]Includes persons with either or both nonfarm and farm self-employment income.

Table 9. **Presence and Duration of Work Disability for Persons 18 to 64 Years Old by Earnings in 1969, Type of Earnings, Race, Spanish Origin, Sex, and Age: 1970**—Continued

[Excludes inmates of institutions. Data based on 5-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]
