# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

for release April 17, 1951

MATHEWS COUNTY, VIRGINIA

(53-058) Series A050-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, entrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1950, does not include acres for farms reporting less than 1/2 acre.

\*\*Eess than one acre.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release May 5, 1951

MECKLENBURG COUNTY, VIRGINIA

(53-059)

Series AC50-1

This release presents figures from the 1950 Consus of Agriculture, together with smiletle comparative data from the 1945 Consus of Agriculture. The figures from the 1950 Consus are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report tarrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Acres grown alone and grown with other crops.

For 1949, does not include acress for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

\*Less than 1 acre.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release March 23, 1951

MIDDLESEX COUNTY, VIRGINIA

(53-060) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 11, 1951

MONTGOMERY COUNTY, VIRGINIA

(53-661) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with aveilable comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For release May 8, 1951

NANSEMOND COUNTY, VIRGINIA

(53-062) Series A050-1

边 联元

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Acres grown alone and grown with other crops.

For 1949, does not include acresge for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

\*\*Hess than 1 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 18, 1951

NELSON COUNTY, VIRGINIA

(53-063) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 3, 1951

NEW KENT COUNTY, VIRGINIA

(53-064) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (a) represent satimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Acres grown alone and grown with other crops.

For 1949, does not include acreage for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 19, 1951

NORFOLK COUNTY, VIRGINIA

(53-065) Series A050-.

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation or reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from sample of approximately 20 percent of the farms.

For 1949, does not include acresge for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

#### Preliminary

## 1950 CENSUS OF AGRICULTURE

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

por release April 23, 1951

NORTHAMPTON COUNTY, VIRGINIA

(53-066) Series A050-1

This release presents figures from the 1950 Gensus of Agriculture, together with scallable comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, surrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 18, 1951

NORTHUMBERLAND COUNTY, VIRGINIA

(53-067) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

lacres grown alone and grown with other crops.

For 1949, does not include acreage for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 3, 1951

NOTTOWAY COUNTY, VIRGINIA

(53-068) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

1Acres grown alone and grown with other crops.

2For 1949, does not include acreage for farms with less than 15 bushels harvested.

3For 1950, does not include acres for farms reporting less than 1/2 acre.

\*Less than 1 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 12, 1951

ORANGE COUNTY, VIRGINIA

(53-069) Series AC50-1

This release presents figures from the 1950 Densus of Agriculture; together with available comparative data from the 1940 Densus of Agriculture. The figures from the 1950 Densus are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all ferms in the county. However, the 1950 data for items Collowed by a star (\*) represent astimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Acres grown alone and grown with other crops.

For 1949, does not include acress for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

\*Less than 1 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release March 24, 1951

PAGE COUNTY, VIRGINIA

(53-070) Series A050-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1950, does not include acres for farms reporting less than 1/2 acre.

\*Less than 1 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 18, 1951

PATRICK COUNTY, VIRGINIA

(53-071) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with evailable comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the ecunty. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 19, 1951

PITTSYLVANIA COUNTY, VIRGINIA

(53-072) Series A050-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1950, does not include acres for farms reporting less than 1/2 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 16, 1951

POWHATAN COUNTY, VIRGINIA

(53-073) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Acres grown alone and grown with other crops.

For 1949, does not include acreage for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

Whese than one acre.

FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 2, 1951

PRINCE EDWARD COUNTY, VIRGINIA

(93-074) Series A050-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every occurty in the United States. A similar report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1942 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (A) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Inventory items are for April 1, 1950 and Vanuary 1, 1945; and production items are for the calendar years 1949 and 1944.

For 1950, does not include acres for farms reporting less than 1/2 acre.

\*Less than 1 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 26, 1951

PRINCE GEORGE COUNTY, VIRGINIA

(53-075) Series A050-1

This release presents figures from the 1950 Census of Agriculture, together with evailable comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1949, does not include acreage for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

for release April 19, 1951

PRINCE WILLIAM COUNTY, VIRGINIA

(53-076) Series A050-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample or approximately 20 percent of the farms.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 25, 1951

PRINCESS ANNE COUNTY, VIRGINIA

(53-077) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

		, and the design years 1949 and 1944,

For 1949, does not include acresge for farms with less than 15 bushels harvested.

or 1950, does not include acres for farms reporting less than 1/2 acre.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 12, 1951

PULASKI COUNTY, VIRGINIA

(53-078) Series AC50-1

This release presents figures from the 1950 Gensus of Agriculture, together with available comparative data from the 1945 Gensus of Agriculture. The figures from the 1950 Gensus are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 14, 1951

RAPPAHANNOCK COUNTY, VIRGINIA

(53-079)

Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (A) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release March 23, 1951

RICHMOND COUNTY, VIRGINIA

(53-080) Series AC50-1

This release presents figures from the 1950 Census of agriculture, together with available comparative data from the 1945 Census of agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A climitar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the mata for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. Sowever, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

larres grown alone and grown with other crops.
For 1949, does not include acresse for farms with less than 15 bushels harvested.
For 1950, does not include acres for farms reporting less than 1/2 acre.
\*\*Less than 1 acre.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

for release April 25, 1951

ROANOKE COUNTY, VIRGINIA

(53-081) Series A050-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, extraing State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Acres grown alone and grown with other crops.

For 1949, does not include acreage for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 27, 1951

ROCKBRIDGE COUNTY, VIRGINIA

(53-082) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1950, does not include acres for farms reporting less than 1/2 acre.

\*Less than 1 acre.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 25, 1951

ROCKINGHAM COUNTY, VIRGINIA

(53-083) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star ( $^{\star}$ ) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1950, does not include acres for farms reporting less than 1/2 acre.

\*Less than 1 acre.

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 18, 1951

RUSSELL COUNTY, VIRGINIA

(53-084) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

W Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

lacres grown alone and grown with other crops.

For 1949, does not include acreage for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

\*Less than 1 acre.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 16, 1951

SCOTT COUNTY, VIRGINIA

(53-085) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 19, 1951

SHENANDOAH COUNTY, VIRGINIA

(53-086) Series A050-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Acres grown alone and grown with other crops.

For 1949, does not include acresse for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

\*Less than 1 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 14; 1951

SMYTH COUNTY, VIRGINIA

(53-087)

Series AC50-1.

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will, be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 23, 1951

SOUTHAMPTON COUNTY, VIRGINIA

(53-088) Series A050-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 19, 1951

SPOTSYLVANIA COUNTY, VIRGINIA

(53-089) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the published of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release March 24, 1951

e i de la compositor de

STAFFORD COUNTY, VIRGINIA

(53-090)

Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based lipon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Acres grown alone and grown with other crops.

For 1949, does not include acreage for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

ess than 1 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 19, 1951

SURRY COUNTY, VIRGINIA

(53-C91) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (%) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Acres grown slone and grown with other crops.

For 1949, does not include acreage for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 23, 1951

SUSSEX COUNTY, VIRGINIA

(53-092) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Acres grown alone and grown with other crops.

For 1949, does not include acresge for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

Mess than 1 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 19, 1951

TAZEWELL COUNTY, VIRGINIA

(53-093) Series AC50-1

This release presents figures from the 1950 Gensus of Agriculture, together with available comparative data from the 1945 Gensus of Agriculture. The figures from the 1950 Gensus are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 16, 1951

WARREN COUNTY, VIRGINIA

(53-094) Series A050-1

This release presents figures from the 1950 Gensus of Agriculture, together with available comparative data from the 1945 Gensus of Agriculture. The figures from the 1950 Gensus are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release April 17, 1951

WARWICK COUNTY, VIRGINIA

(53-095) Series AG50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Gensus of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.
