GENERAL

This report presents statistics for the United States on birthplace, residence in 1965, and residence in 1970 for persons 5 years old and over. The data are based on the 1970 Census of Population. Legal provision for this census, which was conducted as of April 1, 1970, was made in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code.

A major portion of the information compiled from the 1970 Census of Population appears in Volume I, **Characteristics of the Population,** which focuses on the presentation of data for States, counties, places, and other areas of the United States. The present report is part of Volume II, **Subject Reports,** wherein most reports concentrate on the presentation of national and regional data for a particular subject. For a description of Volumes I and II, as well as other elements of the data dissemination program of the 1970 Population and Housing Census, see Appendix E, "Publication and Computer Summary Tape Program."

The content and procedures of the 1970 census were determined after evaluation of the results of the 1960 census, consultation with a wide variety of users of census data, and extensive field pretesting. A number of changes were introduced in 1970 to improve the usefulness of the census results. For the characteristics shown in this report, the changes do not, however, affect to any appreciable extent the comparability of the 1970 data with those for 1960.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information will also appear in later reports of the 1970 census.

Organization of the text.—The text consists of this introduction and Appendixes A through E, which appear after the tables. The introduction contains information relating specifically to the principal subject of this report, such as definitions of terms and editing procedures. Appendix A provides general information concerning the presentation of data in this series of reports and the collection and processing procedures of the 1970 census. Appendix B describes the various area classifications (e.g., urban and rural residence, urbanized areas, etc.) and also explains the residence rules used in counting the population. Appendix C provides brief definitions and explanations of subjects covered in cross-classifications in this report and other reports in this series. Appendix D presents information on sources of error in the data, sampling variability, ratio estimation, and editing procedures. Appendix E summarizes the data dissemination program.

Content of the tables.—Tables 1 through 6 present summary data for the United States as a whole for persons 5 years old and over according to whether or not they were living in their State of birth in 1965 and 1970. Characteristics include age, sex, race, Spanish heritage, years of school completed, enrollment status, relative progress in school, employment status, major occupation group, family income in 1969, and children ever born. Tables 7 through 11 show specific streams of movement in terms of State or division of residence in 1970, division of residence in 1965, and division of birth. Age, sex, and race of persons in these streams of movement are shown. Tables 12 and 13 provide information on division of residence in 1970, division of residence in 1965, and division of birth for persons 25 to 64 years old, cross-classified by age, sex, race, and years of school completed.

Sample size.—The statistics presented in this report are based on a 15-percent sample adjusted to represent the total population. An explanation of the ratio estimation procedure and information on the sampling variability associated with the data are contained in Appendix D.

RELATED MATERIALS

1970 census reports.—The reports in Volume I of the 1970 Census of Population, **Characteristics of the Population,** contain statistics on residence in 1965, State of birth, and year moved into present house for each State. Residence in 1965 and State of birth are also shown for the urban and rural parts of each State, for standard metropolitan statistical areas, urbanized areas, places, and counties.

These data are summed to national and regional totals in the Volume I United States Summary report.

Volume II report PC(2)-2E, **Migration Between State Economic Areas,** presents data on inmigrants and outmigrants by age and sex for each of the 510 State economic areas (SEA's) into which the country is divided and a 510-by-510 matrix of SEA of residence in 1965 by SEA of residence in 1970.

Additional data on residence 5 years ago are given for census tracts in the PHC(1) series on **Census Tracts** issued for individual SMSA's. Data on year moved into present house according to various housing characteristics are presented for individual SMSA's in the HC(2) series on **Metropolitan Housing Characteristics** issued for individual SMSA's.

Reports from earlier censuses.—Like the 1970 census, the 1960 census contains questions on place of birth and residence 5 years prior to the census date. An approach similar to that used in 1970 was followed in the publication of migration data from the 1960 census. The Volume I State reports present data on mobility status, place of birth, and year moved into present house for States, by urban and rural residence, standard metropolitan statistical areas (SMSA's), urban places of 10,000 or more, and counties. More detailed data are given in the Volume II reports PC(2)-2A, **State of Birth;** PC(2)-2B, **Mobility for States and State Economic Areas;** PC(2)-2C, **Mobility for Metropolitan Areas;** PC(2)-2D, **Lifetime and Recent Migration;** and PC(2)-2E, **Migration Between State Economic Areas.** Additional statistics on the mobility of the population are included in a few other PC(2) and PC(3) reports.

In both the 1950 and 1940 censuses, a number of special reports on mobility of the population were published. The statistics for 1950 relate to residence 1 year earlier, rather than 5 years earlier; those for 1940 relate to a 5-year period but differ in other respects from the 1960 and 1970 statistics.

Current Population Survey.—Sample data on mobility during the preceding year have been collected annually since 1948 in the Current Population Survey and have been published mostly in **Current Population Reports,** Series P-20. Earlier surveys at irregular intervals cover other periods back to 1940.

Estimates of net migration.—For each State and county, the Census Bureau published estimates of net migration over the 1960-70 decade. These estimates were prepared by the "residual method"; specifically, population change due to natural increase (the difference between births and deaths) was subtracted from total population change over the decade as implied by the two censuses, leaving population change due to net migration as a residual. The estimates obtained by the residual method, therefore, include net immigration from abroad as well as migrants who were born or died during the decade. In contrast, the data in the present report include persons who lived abroad 5 years earlier but do not include persons who left the United States during the 5-year period from 1965 to 1970 or migrants who were born (ages under 5) or died during this period. The estimates of 1960-70 net migration for States and counties were published in **Current Population Reports,** Series P-25, No. 461, "Components of Population Change by County: 1960 to 1970."

The residual method was also used to estimate the net migration component of population change in the central cities and in the area outside central cities for each standard metropolitan statistical area of the country. The estimates of net migration for metropolitan areas were published in 1970 Census of Population and Housing, **General Demographic Trends for Metropolitan Areas, 1960 to 1970,** PHC(2)-1, "United States Summary."

It should be noted, however, that estimates of net migration, as residual values, reflect the net effects of any errors in the data used, such as differences in the completeness of enumeration between censuses, boundary changes, improper allocation of births and deaths by place of residence, and many others.

Unpublished data.—For most of the Volume II reports, statistics in addition to those published in the report are available on a reimbursable basis from computer tape files. Data shown for the United States as a whole are available for regions, divisions, and States, and, in a number of instances, the data for some characteristics were tabulated in greater detail than shown in the reports. Requests for unpublished data, giving a specific description of the figures desired, should be made in writing to the Director, Bureau of the Census, Washington, D.C. 20233. Inquiries concerning unpublished data should be transmitted to the Bureau as soon as possible since tape files are not maintained indefinitely.

DEFINITIONS AND EXPLANATIONS OF PRINCIPAL SUBJECTS

The definitions and explanations below relate only to the principal sub-

jects of this report. Brief definitions of other items that appear in cross-classifications in the tables of this report are presented in Appendix C.

Place of birth.—The statistics on place of birth were derived from answers to question 13 which was asked of all persons in the 15-percent and 5-percent samples (see facsimile of questionnaire item below).

Data on the State of birth of the native population have been collected in each census beginning with that of 1850. For the more recent censuses, State of birth has been published for the native population of the urban, rural-nonfarm, and rural-farm parts of States, and of individual cities above a specified minimum size. In this report, the native population is classified into the following groups: persons born in the State in which they were residing at the time of the census; persons born in a different State; and persons born in Puerto Rico, in an outlying area of the United States, abroad of native parents or at sea, and persons whose State of birth was not reported. Respondents were instructed to report place of birth in terms of the mother's usual State of residence at the time of the birth rather than in terms of the location of the hospital if the birth occurred in a hospital.

Foreign-born persons were asked to report their country of birth according to international boundaries as recognized by the United States government on April 1, 1970. Since numerous changes in boundaries of foreign countries have occurred in the last century, some foreign-born persons may have reported their country of birth in terms of boundaries that existed at the time of their birth or emigration, or in accordance with their own national preference.

Residence in 1965.—The data on residence in 1965 were derived from answers to question 19 which was asked of all persons in the 15-percent sample of the population (see facsimile of questionnaire item below).

Respondents who reported that they lived in a different house on April 1, 1965, were instructed to report their usual place of residence on that date. In accordance with the census concept of usual residence, persons in college or in the Armed Forces in 1965 were instructed to report as their 1965 residence the place where they were attending college or where they were stationed.

Residence in 1965 was used in conjunction with residence in 1970 to determine the extent of residential mobility of the population. In this report, nonmovers and intrastate movers are combined into the category "same State." Interstate migrants, "different State," are classified in some tables according to their geographic division of residence in 1965.

The category "abroad" includes those with residence in a foreign country, Puerto Rico, or an outlying area of the United States in 1965, including Armed Forces stationed overseas. Persons 5 years old and over who indicated that they had moved into their present residence after April 1, 1965, but for whom sufficiently complete and consistent information regarding residence on April 1, 1965, was not collected, are included in the group "State of 1965 residence not reported." When no information was reported for the person himself, information for other members of the family was used, if available. The category "State of 1965 residence not reported" also includes persons who gave no information on residence on April 1, 1965, but were classified as having moved into their present house since that date on the basis of the final edited information reported for ques-

13a. Where was this person born? *If born in hospital, give State or country where mother lived. If born outside U.S., see instruction sheet; distinguish Northern Ireland from Ireland (Eire).*

O This State

OR

_____

(Name of State or foreign country; or Puerto Rico, Guam, etc.)

19a. Did he live in this house on April 1, 1965? *If in college or Armed Forces in April 1965, report place of residence there.*

O Born April 1965 or later } *Skip to 20*
O Yes, this house ..... }
O No, different house

b. Where did he live on April 1, 1965?

(1) State, foreign country, U.S. possession, etc. _____

(2) County _____

(3) Inside the limits of a city, town, village, etc.?

O Yes O No

(4) *If "Yes,"* name of city, town, village, etc. _____

tion 18, "When did this person move into this house (or apartment)?" (All nonresponses on the latter question were allocated.)

In the present report, persons reporting State but not county or city of residence in 1965 were classified according to the information available on State of residence. In the Volume I reports and in most other Volume II reports, where the tabulations required complete information on county or city of residence in 1965, persons reporting only State of residence were assigned to the category "moved, residence in 1965 not reported."

The number of persons who were living in a different State in 1965 is considerably less than the total number of moves during the 5 years. Some persons in the same house at the two dates had moved during the 5-year period but by the time of enumeration had returned to their 1965 residence. Other persons who were living in a different State had made two or more intermediate moves.

Inmigrants and outmigrants.—The terms "inmigrants" and "outmigrants" have been used with reference to migrants into or out of particular areas. Inmigrants to an area are migrants who moved into that area from elsewhere in the United States between 1965 and 1970 and were still living there in 1970. Outmigrants from an area are migrants who were living in the area in 1965 and moved out to some other area in the United States where they were living in 1970. Inmigrants and outmigrants for any area exclude migrants within that area. For example, inmigrants and outmigrants for a particular State do not include migrants between its counties. Thus, the sum of the inmigrants to all counties in any State will be greater than the number of inmigrants to that State.

Table 1. **Place of Birth and State of Residence in 1965 and 1970 of the Population 5 Years Old and Over by Age, Sex, Race, and Spanish Heritage: 1970**

[Data based on 15-percent sample, see text. For minimum base for derived figures (percent, median, etc.) and meaning of symbols, see text]
