### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release August 29, 1951

HANCOCK COUNTY, MISSISSIPPI

(65-028) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based / upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

2por 1950, does not include acres for farms reporting less than 1/2 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release August 29, 1951

HARRISON COUNTY, MISSISSIPPI

(65-024) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Pror 1949, does not include scres for farms with less than 15 bushels harvested.

Pror 1930, does not include scres for farms reporting less than 1/2 acre.

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 1, 1951

HINDS COUNTY, MISSISSIPPI

(65-025) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

<sup>1</sup>For 1949, does not include acres for farms with less than 15 bushels harvested.
2For 1950, does not include acres for farms reporting less than 1/2 acre.
2For reported in small fractions.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 4, 1951

HOLMES COUNTY, MISSISSIPPI

(85-026) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1930 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 10, 1951

HUMPHREYS COUNTY, MISSISSIPPI

(65-027) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1949, does not include acres for farms with less than 15 bushels harvested.
For 1950, does not include acres for farms reporting less than 1/2 acre.
\*Reported in small fractions.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 4, 1951

ISSAQUENA COUNTY, MISSISSIPPI

(65-028) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release August 30, 1951

JACKSON COUNTY, MISSISSIPPI

(65-080) Series AC50-1

This release presents figures from the 1950 Gensus of Agriculture, together with available comparative data from the 1945 Gensus of Agriculture. The figures from the 1950 Gensus are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, darrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms

#### Preliminary

# 1950 CENSUS OF AGRICULTURE

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release July 5, 1951

JASPER COUNTY, MISSISSIPPI

(65-031) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, cerrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

pr release August 29, 1951

JEFFERSON COUNTY, MISSISSIPPI

(65-032) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together ith available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, sarrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 1, 1951

JEFFERSON DAVIS COUNTY, MISSISSIPPI

(65-033) Series AC50-1

This release presents figures from the 1950 Gensus of Agriculture, together with available comparative data from the 1945 Gensus of Agriculture. The figures from the 1950 Gensus are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, Carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based lipon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 1, 1951

JONES COUNTY, MISSISSIPPI

(65-034)Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. Hovever, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 10, 1951

KEMPER COUNTY, MISSISSIPPI

(65-035) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (A) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 5, 1951

LAFAYETTE COUNTY, MISSISSIPPI

(65-036) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 1, 1951

NESHOBA COUNTY, MISSISSIPPI

(65-050) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1943 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

1For 1949, does not include acres for farms with less than 15 bushels harvested.
2For 1950, does not include acres for farms reporting less than 1/2 acre.
\*Reported in small fractions.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 5, 1951

NEWTON COUNTY, MISSISSIPPI

(65-051) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a ster (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 4, 1951

NOXUBEE COUNTY, MISSISSIPPI

(65-052) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data: from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed ty a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1949, does not include acres for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

\*Reported in small fractions.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 5, 1951

OKTIBBEHA COUNTY, MISSISSIPPI

(65-053) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data. from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1949, does not include acres for farms with less than 15 bushels harvested.
For 1950, does not include acres for farms reporting less than 1/2 acre.
Herograd in small fractions,

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 4, 1951

PANOLA COUNTY, MISSISSIPPI

(65-054) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Ifor 1949, does not include aggs for farms with less than 15 bushels harvested.
For 1950, does not include aggs for farms reporting less than 1/2 aggs.
Reported in small fractions.

# U. S. DEPARTMENT OF COMMERCE

#### Preliminary

# 1950 CENSUS OF AGRICULTURE

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release July 14, 1951

PEARL RIVER COUNTY, MISSISSIPPI

(65-055) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

PERRY COUNTY, MISSISSIPPI

(65-056) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

1 For 1949, does not include acres for farms with less than 15 bushels harvested.
2 For 1950, does not include acres for farms reporting less than 1/2 acre.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

release August 29, 1951

PIKE COUNTY, MISSISSIPPI

(65-057) Series AC50-1

This release presents figures from the 1950 Census of agriculture, together available comparative data from the 1945 Census of Agriculture. The figures the 1950 Census are preliminary and are subject to revision. A similar report be released for every county in the United States. A preliminary report, ying State totals only, will be issued following the publication of figures all of the counties in the State. After that, final figures for this county for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (%) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

Pror 1949, does not include acres for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 1, 1951

PONTOTOC COUNTY, MISSISSIPPI

(65-058) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

r release September 10, 1951

PRENTISS COUNTY, MISSISSIPPI

This release presents figures from the 1950 Census of Agriculture, together ith available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report ill be released for every county in the United States. A preliminary report, irrying State totals only, will be issued following the publication of figures or all of the counties in the State. After that, final figures for this county of for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.
