# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 10, 1951

QUITMAN COUNTY, MISSISSIPPI

(65-060) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 5, 1951

RANKIN COUNTY, MISSISSIPPI

(65-061) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star ( $^{\lambda}$ ) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS-

For release September 5, 1951

SCOTT COUNTY, MISSISSIPPI

(65-082) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1949, does not include acres for farms with less than 15 bushels harvested.

For 1950, does not include acres for farms reporting less than 1/2 acre.

Reported in Salli fractions.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release August 30, 1951

SHARKEY COUNTY, MISSISSIPPI

(85-083) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1949, does not include acres for farms with less than 15 bushels harvested. For 1950, does not include acres for farms reporting less than 1/2 sere.

# FARMS, FARM, CHARACTERISTICS, FARM PRODUCTS

For release August 30, 1951

SIMPSON COUNTY, MISSISSIPPI

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star  $\binom{x}{2}$  represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 4, 1951

SMITH COUNTY, MISSISSIPPI

(65-065) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a tata (\*\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release August 30, 1951

STONE COUNTY, MISSISSIPPI

(65-066) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

<sup>1</sup> For 1949, does not include acres for farms with less than 15 bushels harvested.
2 For 1950, does not include acres for farms reporting less than 1/2 acre.

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 13, 1951

SUNFLOWER COUNTY, MISSISSIPPI

(65-067) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1949, does not include acres for farms with less than 15 bushels harvested.
For 1950, does not include acres for farms reporting less than 1/2 acre.

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 27, 1951

TALLAHATCHIE COUNTY, MISSISSIPPI

(65-068) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

### 1950 CENSUS OF AGRICULTURE

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release August 29, 1951

TIPPAH COUNTY, MISSISSIPPI

(65-070) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release August 30, 1951

TISHOMINGO COUNTY, MISSISSIPPI

(65-071) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sumple of approximately 20 percent of the farms.

2For 1950, does not include acres for farms reporting less than 1/2 acre.
4Exported in small fractions.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 4, 1951

TUNICA COUNTY, MISSISSIPPI.

(65-(372) Series A050-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data: from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 4, 1951

UNION COUNTY, MISSISSIPPI

(65-087) Series AC50-1

.

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1950, does not include acres for farms reporting less than 1/2 acre.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release June 28, 1951

WALTHALL COUNTY, MISSISSIPPI

(65-074) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release July 5, 1951

WARREN COUNTY, MISSISSIPPI

(65-075)Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the busis of reports from a sample of approximately 20 percent of the farms.

### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 1, 1951

WAYNE COUNTY, MISSISSIPPI

(65-077) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

<sup>1</sup> For 1949, does not include acres for farms with less than 15 bushels harvested.
2 For 1950, does not include acres for farms reporting less than 1/2 acre.
3 Heported in small fractions.

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release August 30, 1951

WEBSTER COUNTY, MISSISSIPPI

(65-078) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

#### 1950 CENSUS OF AGRICULTURE

## FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 5, 1951

WILKINSON COUNTY, MISSISSIPPI

(65-079) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

For 1949, does not include acres for farms with less than 15 bushels harvested. For 1950, does not include acres for farms reporting less than 1/2 acre. \*Reported in small fractions.

### 1950 CENSUS OF AGRICULTURE

#### FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

For release September 10, 1951

WINSTON COUNTY, MISSISSIPPI

(65-080) Series A050-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

#### 1950 CENSUS OF AGRICULTURE

## FARMS, FARM, CHARACTERISTICS, FARM PRODUCTS

For release August 30, 1951

YALOBUSHA COUNTY, MISSISSIPPI

(65-081) Series AC50-1

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1930 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.

2 Reported in small forester.

#### 1950 CENSUS OF AGRICULTURE

# FARMS, FARM CHARACTERISTICS, FARM PRODUCTS

for release September 5, 1951

YAZOO COUNTY, MISSISSIPPI

This release presents figures from the 1950 Census of Agriculture, together with available comparative data from the 1945 Census of Agriculture. The figures from the 1950 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1950 and 1945 are based upon the tabulation of reports for all farms in the county. However, the 1950 data for items followed by a star (\*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms.
