THE 1950 CENSUSES - HOW THEY WERE TAKEN PRINCIPAL DATA COLLECTION FORMS

DESCRIPTION OF FORMS

- Form P1 1950 Census of Population and Housing Schedule (page 4-7)
- Size 19" x 22", both sides
- Color white paper (25% rag with titanium dioxide added to increase opacity to 89%), green ink

Number printed - 10,000,000

Use - This schedule was the basic questionnaire used by the enumerator in collecting the information. The front includes space for population information for 30 persons with a separate line for each person enumerated. The reverse side, the Housing schedule, contains spaces for information for 12 dwelling units which housed the persons enumerated on the Population side of the form. Questions at the bottom of the schedule (21-33c) were asked for the 1 person in 5 whose name fell on the sample lines indicated in black. There were five printings to vary the sample lines. The person whose name fell on the last sample line was also asked the additional questions from 34 on.

Distribution - Included in Enumerator's portfolio.

Form P2 - Individual Census Report (page 8)

Size - 13%" x 9½", both sides

Color - white paper, blue ink

Number printed - 14,700,000

- Use Form P2 was used to obtain Census data concerning a person when the enumerator was not able to obtain the information directly. It was used for obtaining information about lodgers, for enumerating transients staying in hotels, tourist camps, "Y's," flophouses, missions, etc., for persons in general hospitals and in selected types of institutions, and for persons residing in barrack type structures on military reservations. The form had a gummed flap so that it could be sealed after it was filled out and then left with a third party to be given to the enumerator. The information collected on this form was transferred to the PI schedule.
- Distribution The form was left by the enumerator with neighbors, hotel clerks, or the heads of the various hotels and institutions mentioned above to be distributed to the persons concerned. Occasionally the form was completed by the use of records for certain classes of institutionalized or hospitalized persons.

Form P3 - Infant Card (page 9)

Size - 8" x 10½"

Color - buff card, green ink

- Number printed 3,000,000
- Use This form was used by the enumerator to obtain special information for infants born between January 1, and April 1, 1950. It was designed to be used in testing the completeness of the enumeration of infants and the completeness of birth registration, a project undertaken in cooperation with the National Office of Vital Statistics.

Distribution - Included in Enumerator's portfolio.

Form P4 - Crews of Vessels Report (page 10) Size - 14" x 9%"

- Color yellow paper, green ink
- Number printed 1,000,000
- Use Form P4 was designed to obtain information on officers and crew members of American vessels who were living aboard ship, whether in harbor or at sea on April 1, 1950.
- Distribution Self-sealing forms were mailed directly to the captain of each government operated vessel and to the operator of each private line. The operator of the line shipped the forms to the captain of each vessel. The captain of each ship distributed the report to the crew members, each of whom filled out his own report. Upon completion, all reports for the vessel were packaged and sent to Washington.

Form P6 - Confidential Report on Income (page 11)

Size - 12" x 7¼"

Color - white paper, blue ink

Number printed - 5,300,000

Use - Form P6 was furnished to persons whose names fell on sample lines, who did not wish to divulge their incomes to the enumerators. The respondent was given Form P6 to fill out, seal, and mail directly to Washington. The form was self-sealing and pre-addressed.

Distribution - Included in Enumerator's portfolio.

Form P5 - Overseas Census Report (page 12-13)

Size - 8" x 10½"

Color - white paper, green ink

Number printed - 1,300,000

- Use Form P5 was used for the enumeration of members of the Armed Forces and civilian employees stationed abroad, their families living with them outside continental United States, and civilian American citizens who were residing overseas on April 1, 1950.
- Distribution The forms were mailed to all military installations outside the territorial limits of the United States and its possessions and to foreign service offices abroad. Members of the Armed Forces, and civilian employees of the Department of Defense stationed abroad were enumerated by that Department. The Department of State handled the enumeration of all other government employees and other civilians residing abroad.

Form P8 - Indian Reservation Schedule (page 14)

Size - 16" x 10½"

Color - white paper, black ink

Number printed - 175,000

Use - This schedule, completed by the enumerator at the same time as and in addition to the regular P1, was filled for each household on a Federal Indian Reservation to provide the Bureau of Indian Affairs of the Interior Department with special information. Personnel from the Census field offices called upon the Reservation officials to make arrangements for the actual enumeration. Distribution - Included in Enumerator's portfolio.

- 1 -

Form P50 - Letter: Survey of Residential Financing (page 15)

Size - 8" x 10½"

Color - white paper, black ink

Number printed - 750,000

- Use This form requested the occupants of rental properties to give the name and address of the owner or rental agent of the property. This report was self-sealing and addressed to the local Census district supervisor.
- Distribution This form was mailed to residents of renter occupied houses or apartments which were selected to be covered in the sample.
- Form P51 Owner-Occupied: Survey of Residential Financing (page 16-19)

Size - 8 page booklet - 5 3/4" x 9 1/8"

Color - yellow paper, brown ink

Number printed - 375,000

- Use This form was used to collect data on mortgaged properties containing 1 to 4 dwelling units, at least one of which was occupied by an owner.
- Distribution This form, accompanied by return envelopes addressed to the local district office, was mailed to the owners of approximately 56,000 properties. Follow-up letters were mailed to owners whose reports were not received after one week, and again after two weeks.
- Form P52 Owner-Occupied: Survey of Residential Financing (not shown here since it is identical with the P51 except for color)
- Size 8 page booklet, 5 3/4" x 9 1/8"

Color - green paper, black ink

Number printed - 190,000

- Use This form was used for properties, reported as not mortgaged in the general enumeration which contained 1 to 4 dwelling units at least one of which was occupied by an owner. The form was used to find out how many of the properties reported as not mortgaged were later reported as mortgaged and to obtain information on the mortgaged properties.
- Distribution This form was mailed to the owners of approximately 30,500 properties with the same follow-up procedure as for Form P51.
- Form P53 Renter-Occupied: Survey of Residential Financing (not shown here since the inquiries were similar to those on Form P51)
- Size 8 page booklet, 5 5/8" x 9 1/4"
- Color white paper, green ink

Number printed - 1,000,000

- Use Form P53 was used when the property contained 1 to 4 dwelling units none of which was occupied by an owner, or when the property contained 5 or more dwelling units. In either case, any or all of the dwelling units might have been vacant.
- Distribution This form was mailed to approximately 125,000 renters with the same follow-up procedure as for Forms P51 and P52.

Form P54 - Mortgagee: Survey of Residential Financing (page 20-21)

Size - 4 page booklet, 6" x 9 5/8"

Color - white paper, black ink

Number printed - 450,000

Use - This form was used to collect information from the mortgagees listed on the completed Forms P51, P52 and P53.

Distribution - A list of the properties arranged by lenders was compiled from completed Forms P51, P52 and P53, and the lenders were sent a Form P54 for each property. Follow-ups were made by mail, phone, and where necessary, personal interview.

Form A1 - Agriculture Questionnaire (page 22-25) Size - 22" x 19", both sides Color - white paper, brown ink Number printed - 8,496,000 regular questionnaires and 8,554,600 self-mailer questionnaires

- Use An A1 questionnaire was required for every farm, every place of 3 or more acres and for every place with certain specialized agriculture operations. The enumeration was conducted jointly with that for Population and Housing. To take account of differences in agriculture in the various parts of continental United States, 41 variations of this form were used. Each variation had five different printings to make provision for sample selection.
- Distribution The self-mailer forms, accompanied by an explanatory letter, were mailed to the farm operators in 37 states, with instructions to answer as many questions as possible before the enumerator would arrive to help complete the form. In other areas the enumerator conducted direct interviews for the entire schedule using the regular agriculture questionnaires included in his portfolio.

Form A2 - Special Agriculture Questionnaire (page 27)

Size - 11" x 8½"

Color - white paper, brown ink

Number printed - 1,275,000

- Use The Form A2 was a short form used by the enumerator in urban areas to determine whether a regular agriculture questionnaire A1 was required. If the latter form was required, the place was re-visited by an enumerator trained in the use of the long form.
- Distribution Included in Enumerator's portfolio.
- Form A3 Landlord-Tenant Operations Questionnaire (page 28-29)
- Size 22" x 17", one side only
- Color white paper, brown ink
- Number printed 1,045,000
- Use This form was filled out by the enumerator for each landlord renting two or more farms to tenants in the 14 Southern States where a large proportion of the farms is operated by the tenants. The enumerator visited the landlord first and completed the A3 form before visiting each tenant to obtain the A1 questionnaire.

Distribution - Included in Enumerator's portfolio.

- Form I-1 Irrigation Questionnaire (Single-Farm) (page 30-31)
- Size 22" x 17", one side only
- Color white paper, brown ink

Number printed - 385,000

Use - The enumerator filled out the I-1 at the same time that he filled out the Agriculture and Population and Housing questionnaires. The I-1 was designed for use for farms having their own irrigation supply works which are used to get irrigation water from a source of supply into the farm's irrigation ditches and pipeline when the irrigation works supplied water for an acre or more of farm land in most years.

Distribution - Included in Enumerator's portfolio.

Form I-2 - Irrigation Questionnaire (Multiple-Farm) (page 32-35)

Size - 22" x 17", both sides

- Color white paper, brown ink
- Number printed 210,500 regular questionnaires and 4,500 self-mailer questionnaires.
- Use The I-2 was used for the enumeration of irrigation enterprises supplying water to several farms. Irrigation technicians, recruited from the Soil Conservation Service, were used as enumerators. The list of names of enterprises supplying water to ten or more farms was compiled from various sources.
- Distribution Questionnaires were mailed to the enterprises ten days before the projects were visited, so that the information would be available at the time of the

DISCRIPTION OF FORMS

enumerator's visit. The location of enterprises supplying water to 2 to 9 farms were obtained from the A1's and enumerated by technicians.

Form D1 - Drainage Questionnaire (County Drains) (page 36) Size - 10%" x 16", one side only

Color - buff paper, brown ink

Number printed - 1,200

- Use The D1 questionnaire was used in those 9 states in which the drainage of agricultural lands was performed by local county governments or similar organizations.
- Distribution Special enumerators obtained the information from county records or county officials. No direct enumeration was used in obtaining the information for this questionnaire.
- Form D2 Drainage Questionnaire (Drainage Enterprises) (page 37)

Size - 17" x 14", one side only

Color - white paper, brown ink

- Number printed 25,000
- Use The D2 was used in 31 states in which the drainage of agricultural lands was performed by corporate or private enterprises.
- Distribution Special enumerators were trained and equipped for obtaining the information needed to complete this form.
- Form A 11 Special Questionnaire for Producers of Cut Flowers and Flowering or Foliage Plants (page 38-41) Size - 7 page booklet, 10%" x 7%"
- Color green paper, black ink
- Number printed 260,000
- Form A 12 Special Questionnaire for Nurseries (not reproduced - detail is similar to that shown on Form A 11) Size - 7 page booklet, 10 1/4" x 7 7/8" Color - buff paper, black ink Number printed - 135,000
- Form A 13 Special Questionnaire for Bulb Farms (not reproduced - detail is similar to that shown on Form A 11) Size - 4 page booklet, 10 1/4" x 7 7/8" Color - white paper, green ink Number printed - 25,000
- Form A 14 Special Questionnaire for Flower Seed Farms (not reproduced - detail is similar to that shown on Form A 11)
- Size 4 page booklet, 10 1/4" x 7 7/8"

Color - pink paper, black ink

Number printed - 1,500

- Use These forms were used to obtain information on four specialized horticulture operations.
- Distribution The questionnaires were mailed to the respective farms on the basis of mailing lists, compiled initially on the basis of state inspection records and trade association membership, which were checked against the A1 agriculture questionnaires received for the operators of nurseries, greenhouses, and similar enterprises.

OTHER FORMS USED IN THE 1950 CENSUSES

In addition to the major forms listed above, the following forms were also used in the enumeration:

Experimental Areas

Four basic population and housing questionnaires were used in experimental tests of alternative enumeration procedures: **P10** - Population and Housing Schedule (line schedule) **P11** - Population and Housing Schedule (household) **P12A, P12B, P12C** - Population and Housing Schedules **P13A, P13B, P13C** - Population and Housing Schedules

The letter designations for the P12 and P13 indicate the different methods in which the form was used. The questions were designed to yield the same information as those on the P1 schedule (page 4-7).

Post - Enumeration Survey

A post-enumeration survey was designed to determine the completeness of the national count and the accuracy of the Census with respect to various characteristics.

- PE-101 Coverage Questionnaire The PE-101 was designed to obtain information on household size, possible missed persons, and possible missed agricultural operations.
- PE-102 Housing Questionnaire The PE-102 was designed to inquire about selected housing characteristics and was used to enumerate missed households.
- PE-103 Individual Questionnaire (long form) The PE-103 was designed to check the data for "sample persons."
- PE-104 Individual Questionnaire (short form) The PE-104 was designed to check information on "non-sample persons."
- PE-105 Agriculture Questionnaire The PE-105 combined coverage and content checks for places having agricultural operations.
- PE-106 Supplementary Agriculture Questionnaire
- PE-109 Individual Census Report

Territories and Possessions

The forms listed below were variations of the regular enumeration forms and were adapted to serve the particular needs of the area being enumerated:

Alaska -	P82 - Population and Housing Schedule	
	P83 - Individual Census Report	
	P84 - Infant Card	
	A5 - Agriculture Questionnaire	
Hawaii -	P87 - Population and Housing Schedule	
	P88 - Individual Census Report	
	P89 - Infant Card	
	A8 - Agriculture Questionnaire	
Puerto Rico -	P93 - Population and Housing Schedule	
	P94 - Individual Census Report	
	P95 - Infant Card	
	A9a - Agriculture Questionnaire for Farms	5
	A9b - Agriculture Questionnaire for	
	Parcelas	
Virgin Islands -	P97 - Population and Housing Schedule	
	P98 - Individual Census Report	
	P99 - Infant Card	
	A10 - Agriculture Questionnaire	
American Samoa -	P80 - Population Schedule	
	P81 - Individual Census Report	
	A6 - Agriculture Questionnaire	
Guam -	P85 - Population Schedule	
	P86 - Individual Census Report	
	A7 - Agriculture Questionnaire	
Panama Canal		
Zone -	P91 - Population Schedule	
	P92 - Individual Census Report	

Small Overseas Island Possessions of the United States (Canton, Midway, Johnston, Swan, and Wake) -P100 - Population Schedule P90 - Individual Census Report

Form P50 - Survey of Residential Financing

Budget Bureau No. 41-5035. Approval expires December 31, 1950.

DEPARTMENT OF COMMERCE BUREAU OF THE CENSUS WASHINGTON 25

DEAR FELLOW CITIZEN:

In the recent enumeration of the 1950 Census your house or apartment was reported as a rental unit. In connection with the 1950 Housing Census, the Bureau of the Census needs the name and address of the owner or rental agent of the house or apartment which you occupy, in order to secure further housing information from him. Please enter the name and address below and mail today.

Sincerely yours,

Roy Deel

The A1 schedule appeared in 41 variations. A master table showing the details of the variations is being prepared and will be published in Volume II - General Report, of the 1950 United States Census of Agriculture. This inquiry is authorized by Act of Congress (46 Stat. 21; 13 USC 201-218) which requires that a report be made. The information furnished is accorded Bureau of the Budget No. 41-450. confidential treatment, subject to the provisions of law. The Census report cannot be used for purposes of taxation, investigation, or regulation. Approvalenties December31, 1950.

	DEPARTMENT OF COMMERCE—BUREAU OF THE CENSUS WACHINGTON	This questionnaire should be filled for-	nould be filled for-		
FORM	SPECIAL AGRICULTURE QUESTIONNAIRE Seventeenth Decennial Census 1950 of the United States: 1950	 Every farm. Every place of 3 of 3. Every greenhouse Every place under (a) There are 1 	r more acres regardless or nursery regardless o 3 acres (regardless of 00 or more poultry, or 30	 Every farm. Every place of 3 or more acres regardless of whether it is considered a farm. Every greenhouse or nursery regardless of whether the place contains 3 or more acres. Every place under 3 acres (regardless of whether it is considered a farm) on which— (a) There are 100 or more poultry, or 300 dozens or more eggs were produced in 1949. 	d a farm. 18 3 or more acres farm) on which— 5 produced in 1949
	Agriculture Questionnaire Number	(b) There are	3 or more hives of bees

#### IRRIGATION

# Form I-1 - Irrigation Questionnaire - (Right)

ontia) trestmen	t, subject to the provisions of law. The Census report cannot be used for purpo	oses of	taxation, investigation, or regulation. Bureau of the Budget No. 41-464. Approval expires December 21, 1966.
Office Use Only	Section VL-COST OF IRRIGATION WATER, 1949	Office Use	EXPLANATIONS AND INSTRUCTIONS
	(If electric motors are reported in question 10) 21. What was the total cost of electricity for pumping for irrigation last year?   None \$	Only	This questionnaire is to be used in the following States: Arizona Idaho Nevada South Dakota Arkansas Kansas New Mexico Texas California Louisiana North Dakota Utah Colorado Montana Okiahoma Washington Filorida Nebraska Oregon Wyoming
<u>Аляя</u> <u>Туре</u>	23. What was the total cost of repairs, maintenance, and replacements for irrigation pumps, motors, ditches, or other irrigation Works hast year?	B -	<ul> <li>WHEN TO TAKE THIS QUESTIONNAIRE.—This questionnaire is to be filled for each farm in the above States for which the answer to question 227 in the Agriculture Questionnaire is "Yes," with the following three acceptions— <ol> <li>If the access in rightack by the farm's own irrightion supply works in most years is less than 1 acre, or,</li> <li>If the farm's own irrightion supply works consist ONLY of a supply ditch or pipe line that is less than 1 mile in length and also is used to get water to the farm</li> </ol> </li> </ul>
enterprise 1 Drainage basin	17       18         (If water is reported in question 15 (a) as obtained through these works from another irrigation enterprise)—       18         24. How much did this farm pay for the water obtained through these works from the (enterprise reported in question 16.9 ( □ None \$	с   	<ul> <li>from a partnership ditch, ditch company, or other irrigation enterprise, or,</li> <li>(3) If the farm's own irrigation supply works consist ONLY of a small reservoir or "overnight pond" that merely regulates the daily delivery of water to the farm from an irrigation enterprise.</li> <li>But DO fill this questionnaire for ANY irrigation works including any length of ditch or pipe line, that are operated by this farm individually to obtain water from a stream, well, or other original source to irrigate 1 areo or more of land in most years.</li> </ul>
Type water	(Include all types of payments, such as assessments, water tolls, construction, bonds and interest, operation and maintenance, etc.) 19	×	If the answer to question 227 in the Agriculture Questionnaire is "Yes," make sufficient inquiry to determine whether the above exceptions apply before filling out this questionnaire.
Acreage group	Section VII.—SEASON OF IRRIGATION, 1949 20	- × ×	Report in a single I-1 Questionnaire all individually operated irrigation supply works used to obtain irrigation water for any land reported in a single Agriculture Questionnaire. For example, if water is pumped from a well on one part of the farm and other water is obtained by gravity on another part, both sets of irrigation works should be reported in one I-1 Questionnaire for the farm. Section ILIRRIGATION SUPPLY WORKS AND EQUIPMENT, 1950
	Section VIIILOCATION OF LAND AND WORKS, 1950		Report irrigation works and equipment as of January 1, 1950.
<b></b>	(If the land irrigated by these works (reported in questions 17 and 18) is less that acres, skip questions 26 and 27.) 26. Where is the land that was irrigated by these [] None outside this E. D works located?	E. D.	Do not include ditches, pumps, or other works used primarily for drainage, but do include works, such as pumps, that are used primarily to utilize drainage water for irrigation. Include works or equipment maintained ohiefly for irrigation use, even if not used for irrigation last year; in such cases make a note under REMARKS as to which works or equipment were not used in 1949, and why.
	(a) If all or part is located outside this E. D., give number of acres of such la township and range numbers and by country. If located in more that township, list each township and give the acreage in each. If townshi range location is not available, give the best possible description of the lo that you can.	n one p and cation	A DIVERSION DAM (question 6) is an obstruction placed in a natural stream to divert the water into a ditch or to form a pool of water for pumpling. Report as a diversion dam any mease of diverting water by gravity from any natural channel even if the means consist only of making an opening in the bank of the channel with a shovel. Do not report bacdgates or diversion baces in canals or ditches as diversion dams. Also do not report STORAGE dams (dams used to form reservoirs) as diversion dams.
		·····	Section IIISOURCE OF WATER, 1949
	Other description of location	E. D. ditch,	The water supply may come from two or more sources—for example, part from a stream and part from a well. If the supply was from more than one source, check each of these sources in question 12. If stored water was obtained from a reservoir (artificial lake or enlarged natural lake) report as the source the principal STREAM from which the stored water came. Check "Matural stream" for storm water from any natural run-off channel, even though water flows in the channel only during or after storms. If the stream or channel has no name, report "No name."
	Kind of Works:		Stored water (question 14) is water that must be held in a reservoir to make the water available for use when needed. Stored water does not include natural flow water that merely flows through a reservoir nor water released from a reservoir to replace natural flow water.
	Other description of location		The information on works reported in Section II and the information on sources of water reported in Section III must be consistent. For example, if water from a stream is reported in question 12 of Saction III, either a diversion dam or pump to get the water out of the stream should be reported in Section II, or question 15 should show water obtained from another enterprise that has a diversion dam or pump to get the water out of the stream.
	REMARKS:		Section IV.—CAPITAL INVESTMENT
			Do not include purchase cost of works or equipment used more for other purposes than for irrigation-for example, do not include a tractor used for pumping irrigation water if it was used more for other farm work.
			If diversion dams, pumps, or other works or equipment are merely replaced with new ones of similar type, do not roport the cests an ave capital investment. But if items are replaced with new ones of materially different or improved type, report the additional cost over and above the cost of merely making a replacement of similar type. For example, if a bursh diversion dam is replaced with a new brush diversion dam, do not report the cost as new investment. But if it is replaced with a concrete dam, report as new investment the part of the cost in creases of the cost of a bursh dam.
			Include the estimated value at prevailing wage rates of any work done by the farm operator since January 1, 1940, in new construction or enlargement and improvement of irrigation supply works. Do not include costs for the farm distribution system within the farm boundaries.
			Section V.—FARMS AND ACREAGE IRRIGATED, 1949
			In question 18, only the acreage actually irrigated last year with water supplied by these irrigation works should be reported as "acres irrigated." Do not report land in roads, ditches, or other uses to which water was not applied.
	ENUMERATOR'S RECORD		Section VL-COST OF IRRIGATION WATER, 1949
	State E. D. No		Report all costs or water OBTAINED THROUGH THESE WORKS last year, including water delivered to other farms.
	(Enumerator) (Month) (Day)	, 1950	Including water derivered to other harms. In question 23, include the estimated value at prevailing wage rates of any work done by the farm operator in the maintenance or repairs of these works. DO NOT INCLUDE costs of distributing and applying the water to the land, nor of maintaining the farm 1, distribution system. If an unusually large expenditure was maile for repairs or
	Checked by Date (Mouth) (Day)	, 1950	instribution system. If an unusually large expenditure was made for repairs or replacements, explain what it was for under "REMARKS."

Form I-2 - Irrigation Questionnaire - (Back)

#### EXPLANATIONS AND INSTRUCTIONS

All questions are to be answered .- If exact information is not available. please give the best possible estimate. Use the space for REMARKS when additional space is needed to explain the answer to any question; number the explanation to correspond to the question. Any unusual or abnormal answer should be explained. The shaded blocks in the questionnaire are for Census Office use

Interrelated enterprises .--- In many cases, two or more enterprises are closely related in their source of water, area irrigated, use of works, or otherwise. For example, an irrigation district may supply water to one or more lateral companies that deliver the water to farms, or one enterprise may own an interest in a reservoir or canal operated by another enterprise. A separate report is to be made for each separately managed enterprise that operates irrigation works to deliver water either to farms or to other irrigation enterprises. In order to assure complete enumeration and also to prevent duplication, all relationships to other enterprises should be clearly shown in questions 15, 20, and 25. or explained under REMARKS. A report should be made for an enterprise even though it delivers no water direct to farms, if it supplies water to one or more other irrigation enterprises

Even though no irrigation water was delivered last year because of water shortage or other reasons, an enterprise should be reported if it is a going concern, has works capable of delivering water, and normally does deliver water for irrigation. In such cases omit the questions in Sections III. V. VI. and VII.

Section L-NAME AND TYPE OF ENTERPRISE, 1950

Questions 1 and 2.-If the enterprise itself has no name, give the name or names of the owners.

Question 3 .--- Give the name or names of the person or persons supplying the information and their titles or positions if employees of the enterprise, or their relationship to it, such as "Partner," "Part owner," or "Water user."

Question 4 .- Cooperative or mutual enterprises are those controlled and operated by two or more water users primarily to supply water to their OWN farms, with the exception of "District" enterprises that are organized under special State laws. If 50 percent or more of the acreage irrigated is not in the farms of the water users that control and operate the enterprise, the enterprise should be classified as "Commercial." Cooperative or mutual enterprises include the operation of irrigation supply works or equipment by two or more farms in "partnership"; by groups of water users informally associated under verbal or written agreements; by mutual irrigation companies or water companies; by water-user associations; by "lateral" companies; and by the community ditches or "acequias" in the Southwest that were organized originally in accordance with old Spanish, Mexican, or Indian customs. Cooperative or mutual enterprises may be either unincorporated or incorporated.

District enterprises are public corporations established under special State laws. Included are irrigation districts, and also types of districts such as water improvement, water conservation, and reclamation, which in some States are in addition to irrigation districts and in other States are in lieu of them. Reclamation districts, organized under State laws, should not be confused with U.S. Bureau of Reclamation projects.

Commercial enterprises are privately operated (by individuals, partnerships, or corporations) and more than 50 percent of the acreage irrigated is in farms of water users that do not share in the control and operation of the enterprise. In some cases commercial enterprises are public utilities regulated by a State commission or by the governing board of a county.

U.S. Bureau of Reclamation enterprises are those operated by the U.S. Bureau of Reclamation. If the operation of works constructed by the Bureau of Reclamation has been transferred entirely to a water-user organization, classify the enterprise according to the type of water-user organization, such as "District" or "Cooperative or mutual." If part of the works of an irrigation project are operated by the Bureau of Reclamation and part by a water-user organization, separate reports should be made for the parts operated by each.

U.S. Office of Indian Affairs enterprises are those operated by the U.S. Office of Indian Affairs.

w٤

fa

State enterprises are those operated by a State agency of any kind.

City enterprises are those operated by a city or town, usually in combination with a domestic water supply. If a city water enterprise supplies water for irrigation of 100 acres or more of farm land, a report should be made for it as an irrigation enterprise.

#### Section II.-IRRIGATION WORKS AND EQUIPMENT, 1950

Report irrigation works and equipment as of January 1, 1950.

Canals, pumps, or other works used only for drainage should be excluded, but works, such as pumps, that are used to reclaim drainage water for Tt. irrigation should be reported. Joint ownership of works with any other enterprise should be clearly explained in question 15, and multiple uses of works in question 16, with supplemental explanation under REMARKS if necessary. Include irrigation works or equipment not used last year but maintained for future use

Question 9.- A diversion dam is an obstruction placed in a natural stream to divert the water into a ditch or to form a pool of water for pumping. Diversion dams vary from a few loose rocks to permanent concrete structures. Do not report headgates or diversion boxes in canals or ditches as diversion dams. Also do not report storage dams (dams used W٤ ta: to form reservoirs) as diversion dams.

#### Section III .- SOURCE OF WATER, 1949

Question 17 .- The water supply may come from two or more sources for example, part from a stream and part from a well. If the supply was from more than one source, check each of these sources in question 17. If stored water was obtained from a reservoir (artificial lake or enlarged natural lake), report as the source the principal stream from which the stored water came. Check "Natural stream" for storm water from any natural run-off channel, even though water flows in the channel only during or after storms. If the stream or channel has no name, report "No name."

Question 19 .- Stored water is water that must be held in a reservoir to make it available for use when needed. It does not include natural flow del water that merely flows through a reservoir nor water released from a reservoir to replace natural flow water. DO

The information on works reported in Section II and the information on the sources of water reported in Section III, must be consistent. For example, of if water from a stream is reported in question 17 of Section III, either a is i diversion dam or pump to get the water out of the stream should be reported fe€ in Section II or question 20 should show water obtained from another cut enterprise that has the diversion dam or pump to get the water out of the "c. stream. me

#### etion IV .-- NEW CAPITAL INVESTMENT; FINANCING

Question 21.-If there are no records of investment costs during the RI period January 1, 1940, to December 31, 1949, or if the owners did all or part of the construction work, the best possible estimate of cost should be reported, including the estimated value of work done by the owners. Include any filing and legal fees for acquisition of water rights and the purchase price of water rights, if any were purchased. Do not include investment cost of works used only for drainage, but include the cost of pumps or other works used to reclaim drainage water for irrigation. If any of the new works are used for other purposes, such as domestic water supply, hydroelectric power, or drainage, as well as for irrigation, report only the estimated part of the investment cost chargeable to irrigation.

If works are merely replaced with new ones of similar type, do not report the cost as new capital investment. But if items are replaced with new ones of materially different or improved type, report the additional cost over and above the cost of merely making a replacement of similar type. For example, if a brush diversion dam is replaced with a new brush diversion dam, do not report the cost as new investment. But if it is replaced with a concrete dam, report as new investment the part of the cost in excess of the cost of a brush dam.

#### Section V .-- FARMS AND ACREAGE IRRIGATED, 1949

If precise information as to the number of farms or the acreage irrigated is not available, please give estimates.

Question 24 .--- If a landowner has one or more tenants or managers, the land operated by each is considered a farm.

#### IRRIGATION

#### Form I-2 - Irrigation Questionnaire - (Back)

Questions 25 and 26 .-- Farms to which this enterprise supplies water, but to which the water is delivered through an independently operated lateral or some other enterprise, are to be reported in question 25 and not reported in question 26. This will prevent duplicate reporting. Those farms will be reported in question 26 of the questionnaires of the independently operated laterals or other enterprises. For the same reason questions 27 to 35 are to be answered only for the farms, reported in question 26, on which this enterprise delivered the water directly into the farm distribution systems. Give estimated figures for these farms, if necessary. If this enterprise delivers all water to independently operated laterals or other enterprises, the answers to questions 26 to 35 inclusive should be "None."

in se rt

at

ed he ny

.

****

REMARKS: ....

Question 27 .--- Irrigated land is land to which water was applied for agricultural purposes by artificial means at any time during the year 1949. It includes land on which water was applied to the surface of the ground and and on which water was applied beneath the surface by subirrigation. Land fooded during high-water periods should be classed as irrigated only if water was purposely applied to the land for agricultural purposes by dama, canals, or other works. Regulation of the "water table" of land by drainage anals, or other works. Regulation of the "water table" of land by drainage orks should not be included as irrigation.

#### Section VL-COST OF WATER TO FARMS, 1949

Question 30.-Report all payments to this irrigation enterprise last year by the water users on the farms to which this enterprise delivered water direct (the farms in question 26) including all water assessments, taxes, tolls, etc. Do not include payments for the farms reported in question 25 for nterprises, even by the water user.

Question 31. li question 26 to ot water to these fa farms last year in

#### Secti

**ng** ," Question 34. pir pw of any measuring delivered to each

Question 35. ossible, but alter the unit of measu of measure of qu is the quantity su feet. Commonly cubic-feet-per-sec c. f. s."); gallon erely "inches" (

these units of rate-of-flow unless the length of time of the flow is known also; so, if these units are used in answering question 35, the number of hours of flow must be given. If the time of flow is given in days, give also the average number of hours of flow per day.

The quantity of water to be reported in question 35 is the quantity delivered into the distribution system of the farms reported in question 26. If the quantity delivered to farms is not known, but the quantity diverted or otherwise obtained is known, deduct estimated conveyance loss of water to arrive at the estimated quantity delivered to farms.

In some cases the most feasible basis of estimating quantity of water delivered to farms may be to estimate the average depth, in feet, of water applied, and to multiply this by total acreage irrigated to obtain total acre-feet.

Question 36 .- If water was obtained from a reservoir, report the quantity of water withdrawn from the reservoir, not the quantity diverted into the reservoir. Report the quantity withdrawn as obtained from (a) surface sources, (b) ground water, or (c) other enterprises, as the case may be, according to the source from which the water was obtained when diverted into the reservoir, either during last year or in a previous year.

#### Section VIII.-LOCATION OF LAND AND WORKS, 1950

Question 38 .- If precise information is not available as to the part of any item located in each county, give either the estimated amount or the estimated percent of the item in each county.
