

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

August 28, 1950

Washington 25, D. C.

Series PC-2, No. 26

### POPULATION OF NEW HAMPSHIRE, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of New Hampshire as of April 1, 1950, was 529,880, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 38,356, or 7.8 percent, over the 491,524 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, each town, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

August 29, 1950

Washington 25, D. C.

Series PC-2, No. 27

### POPULATION OF MISSISSIPPI, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Mississippi as of April 1, 1950, was 2,173,373, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a loss of 10,423, or 0.5 percent, from the 2,183,796 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

Series PC-2, No. 28

### POPULATION OF MASSACHUSETTS, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Massachusetts as of April 1, 1950, was 4,664,284, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 347,563, or 8.1 percent, over the 4,316,721 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, each town, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

August 30, 1950

Washington 25, D. C.

Series PC-2, No. 29

### POPULATION OF LOUISIANA, BY PARISHES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Louisiana as of April 1, 1950, was 2,667,022, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 303,142, or 12.8 percent, over the 2,363,880 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each parish, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

Series PC-2, No. 30

### POPULATION OF IOWA, BY COUNTIES

#### APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Iowa as of April 1, 1950, was 2,612,598, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 74,330, or 2.9 percent, over the 2,538,268 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Kentucky as of April 1, 1950, was 2,921,708, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 76,081, or 2.7 percent, over the 2,845,627 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, and because of other revisions.

### POPULATION OF WASHINGTON, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Washington as of April 1, 1950, was 2,363,289 according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 627,098, or 36.1 percent, over the 1,736,191 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

September 6, 1950

Washington 25, D. C.

Series PC-2, No. 32

Revised copy follows precedes this copy

### POPULATION OF WASHINGTON, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Washington as of April 1, 1950, was 2,367,942, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 631,751, or 36.4 percent, over the 1,736,191 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

September 6, 1950

Washington 25, D. C.

Series PC-2, No. 33

### POPULATION OF ARKANSAS, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Arkansas as of April 1, 1950, was 1,901,631, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a loss of 47,756, or 2.4 percent, from the 1,949,387 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

September 6, 1950

Washington 25, D. C.

Series PC-2, No. 34

### POPULATION OF GEORGIA, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Georgia as of April 1, 1950, was 3,433,190, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 309,467 or 9.9 percent, over the 3,123,723 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

October 5, 1950

Washington 25, D. C.

Series PC-2, No. 35 Rev.

### POPULATION OF NEW JERSEY, BY COUNTIES

#### APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of New Jersey as of April 1, 1950, was 4,822,528 according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 662,363, or 15.9 percent, over the 4,160,165 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

September 7, 1950

Washington 25, D. C.

Series PC-2, No. 36

### POPULATION OF MICHIGAN, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available.)

The population of Michigan as of April 1, 1950, was 6,308,794, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 1,052,688, or 20.0 percent; over the 5,256,106 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

September 11, 1950

Washington 25, D. C.

Series PC-2, No. 37

### POPULATION OF MINNESOTA, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available.)

The population of Minnesota as of April 1, 1950, was 2,968,135, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 175,835, or 6.3 percent, over the 2,792,300 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

September 11, 1950

Washington 25, D. C.

Series PC-2, No. 38

### POPULATION OF WISCONSIN, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available.)

The population of Wisconsin as of April 1, 1950, was 3,421,316, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 283,729, or 9.0 percent, over the 3,137,587 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

September 11, 1950

Washington 25, D. C.

Series PC-2, No. 39

### POPULATION OF KANSAS, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Kansas as of April 1, 1950, was 1,894,390, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 93,362, or 5.2 percent, over the 1,801,028 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

September 11, 1950

Washington 25, D. C.

Series PC-2, No. 40

### POPULATION OF ILLINOIS, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Illinois as of April 1, 1950, was 8,684,513, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 787,272, or 10.0 percent, over the 7,897,241 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

September 13, 1950

Washington 25, D. C.

Series PC-2, No. 41

### POPULATION OF OHIO, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Ohio as of April 1, 1950, was 7,899,095, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 991,483, or 14.4 percent, over the 6,907,612 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

September 13, 1950

Washington 25, D. C.

Series PC-2, No. 42

### POPULATION OF MAINE, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Maine as of April 1, 1950, was 910,456, according to a preliminary county of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 63,230, or 7.5 percent, over the 847,226 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, each town, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

## 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

September 14, 1950

Washington 25, D. C.

Series PC-2, No. 43

Revised copy follows this copy

POPULATION OF TEXAS, BY COUNTIES  
APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Texas as of April 1, 1950, was 7,672,432, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 1,257,608, or 19.6 percent, over the 6,414,824 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

# 1950 CENSUS OF POPULATION

## PRELIMINARY COUNTS

September 14, 1950

Washington 25, D. C.

Series PC-2, No. 43 Rev.

### POPULATION OF TEXAS, BY COUNTIES APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Texas as of April 1, 1950, was 7,677,832 according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 1,263,008, or 19.7 percent, over the 6,414,824 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of

persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, the inclusion of crews of vessels docked within an area but not included in the preliminary count, and because of other revisions.

POPULATION OF MISSOURI, BY COUNTIES  
APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of Missouri as of April 1, 1950, was 3,933,636, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 148,972, or 3.9 percent, over the 3,784,664 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, and because of other revisions.

Series PC-2, No. 45

POPULATION OF NEW MEXICO, BY COUNTIES  
APRIL 1, 1950

(The figures in this report are preliminary counts of population as compiled in field offices and supersede those for the same areas which have been published in Series PC-1. Figures for some areas not published in Series PC-1 are also included in this report. Additional reports in Series PC-2 will be issued as preliminary counts for other States become available)

The population of New Mexico as of April 1, 1950, was 677,152, according to a preliminary count of the returns of the 1950 Decennial Census of Population, reported today by Roy V. Peel, Director, Bureau of the Census, Department of Commerce. This figure represents a gain of 145,334, or 27.3 percent, over the 531,818 inhabitants of the State enumerated in the 1940 Census.

The preliminary population counts shown below represent the number of persons enumerated in the State, each county, and each incorporated place of 1,000 or more, but not the final verified population totals. The final population totals may differ from the preliminary counts because of the allocation to the place of usual residence of persons who were enumerated elsewhere, and because of other revisions.
