<sup>1</sup> Percentage increases are computed on basis of change in population since preceding census date, and period covered therefore is not always exactly 10 years. Adjustments for differences in census date must be made if strictly comparable figures are desired for each decade.

<sup>2</sup> Figures given for various census years represent the area of all land within the present boundaries of continental United States which was under the jurisdiction of the United States on the date in question, including in some cases considerable areas of land not then organized or settled and not covered by the census.

<sup>3</sup> Revised figure of 39,818,449 for the 1870 population includes adjustments for underenumeration in the Southern States. Unadjusted data are used in this and subsequent tables because revised figures for States, urban-rural residence, etc., are not available. On the basis of the revised figure the population increased by 8,375,128, or 26.0 percent, between 1860 and 1870, and by 10,337,334, or 26.0 percent, between 1870 and 1880.

<sup>1</sup> Some persons in areas classified as urban under special rules according to the old urban definition are classified as rural according to the new definition. (See table 3.) Gross difference in urban or rural population resulting from the change in definition, therefore, exceeds the difference shown.

<sup>2</sup> Base of percent is population under old definition.

NUMBER OF INHABITANTS

Table 15.—URBAN AND RURAL POPULATION OF CONTINENTAL UNITED STATES, BY REGIONS, DIVISIONS, AND STATES, AND OF ALASKA, HAWAII, AND PUERTO RICO: 1790 TO 1950

[For description of new and old urban definitions, see text. Insofar as possible, population is that of present area of State; see table 6. Minus sign (—) denotes decrease. Percent not shown where less than 0.1 or where base is less than 100]
