According to the new urban definition, the urban population comprises persons residing in urban territory but not necessarily in an urban place, which is defined as an incorporated place of 2,500 or more, or an unincorporated place of 2,500 or more located outside an urbanized area. Under the old definition, incorporated places of 2,500 or more and places urban under special rule are classified as urban places. There were no places urban under special rule in New Mexico.

¹ Total for 1800 is exclusive of population of area taken to form part of Colorado Territory in 1861, but it includes population of area organized as part of the Territory of Arizona in 1803. No estimate of population in 1850 is available for territory acquired from Mexico through the Gadsden Purchase (1853), annexed to New Mexico in 1854.
