EXTRA CENSUS BULLETIN.

THE AREAS OF THE UNITED STATES,

THE

SEVERAL STATES AND TERRITORIES,
AND THEIR COUNTIES.

BY

HENRY GANNETT, E. M.,

GEOGRAPHER AND SPECIAL AGENT TENTH CENSUS.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1881.

39261

DEPARTMENT OF THE INTERIOR,
CENSUS OFFICE.

Washington, D. C., September 30, 1881.

Hon. FRANCIS A. WALKER,

Superintendent of Census:

SIR: I have the honor to transmit to you herewith, for publication as an Extra Census Bulletin, tables showing the approximate areas of the United States, the several states, and their counties.

The necessity for revising the figures which have popularly passed as the areas of the states presented itself early in the progress of my geographical work in connection with the Census. Of several states a number of estimates of area have been in use, differing from one another by thousands of square miles, and none of them, perhaps, traceable to any authentic source. Many of the results were palpably wrong, being so far from the truth that it is a source of surprise that they were not corrected before.

The methods by which I have obtained the areas are fully set forth in the body of the bulletin. I may say, however, that, while most of the areas can be considered as only approximations, yet they are as close approximations as the maps and the determinations of geographical positions, of boundary lines, etc., will permit.

The details of this work were carried out by Mr. F. DeY. Carpenter, to whom I am also indebted for the formula for the area of a "square degree", the unit of computation.

Very respectfully yours,

HENRY GANNETT, E. M.,
Geographer Tenth Census.

APPROXIMATE AREAS OF THE UNITED STATES, THE SEVERAL STATES, AND THE TERRITORIES.

The question, What constitutes the area of the United States? is by no means a simple one. Our jurisdiction extends to a line three nautical miles from the shore, but this strip of sea cannot properly be regarded as a portion of the country. Supposing our boundary to be restricted to the sea-coast, there remains a question regarding the bays and estuaries of the sea. To what extent should the coast line be followed strictly, and where should we begin to jump across the indentations made by the sea? In this matter one can only follow his own judgment, making in each case as natural a decision as possible, as no criterion whatever can be established. In this way I have defined the coast limits, showing by the red line on the accompanying map what I have taken as the *gross area* of the country and of the states, severally.

Method of measurement.

Taking first the United States (with the exception of Alaska) as a whole, its area was determined by summing up the square degrees, *i. e.*, the regions comprised between consecutive parallels and meridians. Along the coast and the boundary lines of the country the areas of the fractional square degrees were obtained by direct measurement by means of scales, in every case measuring the smaller portion, whether land or water, to avoid, as far as possible, the errors incident to the projections and scales of the maps.

The Atlantic, Pacific, and Gulf coasts were measured on charts of the Coast Survey; the shore lines of the great lakes on those of the United States Lake Survey; and the boundary with Mexico on the maps of the Mexican Boundary Commission. The northern boundary follows the parallel of 49° to the Lake of the Woods. Thence to lake Superior is a weak place where we are dependent upon the map of Hind's exploration. The northern boundary, east of the portion covered by the charts of the Lake Survey, was measured on the maps of the several international boundary commissions. A second weak spot exists on the eastern boundary of Maine, from Schoodic lake to the Atlantic coast. This is covered by no *authentic* map, but measurements made on several different maps agree very closely.

We find, then, that the whole contour of the country is given by surveys whose accuracy is unquestioned, excepting in the two spots above mentioned, *i. e.*, from Lake of the Woods to lake Superior, and from Schoodic lake to the Atlantic. The measurements, made with the utmost care and several times repeated, can embody but very slight errors, and it is not probable that the two weak places in the boundary allow any considerable error.

The areas of the square degrees were computed by the following formula, derived by Mr. F. DeY. Carpenter:

$$\text{Area} = \frac{\pi}{90} (M' - M) NRm \sin \frac{1}{2} (L' - L) \cos \frac{1}{2} (L' + L),$$

in which M' and M are the longitudes of the limited meridians, $M' - M$ being in degrees or fractions of a degree; N is the normal to the middle latitude, in miles; R the radius of curvature of the meridian at the middle latitude, in miles; L' and L the limiting latitudes; and $m = 1.004285$. The resulting area is in square miles.*

The areas of the square degrees entirely comprised within the limits of the country, and of those whose areas are more than one-half within, were computed by the above formula. From the latter were subtracted the portions lying without our limits, as determined by direct measurement, and to the whole were added the results of measurements of the remaining portions, *i. e.*, those not included in the computed square degrees.

The areas of the several states and territories were determined in a similar manner. In cases, such as those of Colorado, Wyoming, and Utah, where a state or territory is limited on all sides by parallels and meridians, the exact determination of its area is an easy matter. In cases where the square degree is divided by the boundary line into two or more parts, these parts were distributed between or among the states by direct measurement from

* For a full discussion of this formula, see article by Mr. Carpenter, in *Van Nostrand's Engineering Magazine*, for December, 1880, p. 457.

AREAS OF THE STATES AND TERRITORIES.

the best available maps, the sum of the parts being made to equal the whole, as determined by computation. The great source of error in the areas of the states is due, not to errors of measurement, which may be regarded as trifling, but to uncertainty in the location of the boundary lines between them. Until these shall have been accurately established, all measurements of certain states can be regarded as only approximations. Thus the position of the boundary between Virginia and West Virginia is not known within several miles, leaving sufficient latitude for an error of several hundred square miles in each state. Whatever may ultimately be taken from the area of one, by a correct location of this boundary, will be added to the other.

Another point to be considered is that of errors in surveying and marking those boundaries which, by law, have been established on certain lines, such as parallels or meridians. It is well known that many state and territorial boundaries have been very badly surveyed, in some cases the errors amounting to miles. In such cases I have accepted as the boundary that established by law, as it is, of course, impossible to define the locations of the boundary stakes.

The following table gives the total areas of the states and territories, as defined on the map and in the notes following the table, the area of coast waters, of rivers, etc., of lakes and ponds, of total water area, and the net land surface of the states and territories:

SUMMARY OF AREAS OF STATES, TERRITORIES, ETC., IN SQUARE MILES.

	Gross areas.	Coast waters (bays, gulfs, sounds, etc.).	Rivers and smaller streams.	Lakes and ponds.	Total water surface.	Total land surface.
Total	3,025,600	17,200	14,500	23,900	55,600	2,970,000
Alabama	52,250	440	260	10	710	51,540
Arizona	113,020	80	20	100	112,920
Arkansas	53,850	540	285	825	53,025
California	155,280	540	240	1,600	2,380	155,980
Colorado	103,025	270	10	280	103,645
Connecticut	4,090	25	80	40	145	4,245
Dakota	149,100	610	790	1,400	147,700
Delaware	2,050	30	60	90	1,960
District of Columbia	70	10	10	60
Florida	58,630	1,800	380	2,250	4,440	54,240
Georgia	59,475	150	300	45	495	59,980
Idaho	84,860	200	310	510	84,350
Illinois	56,650	515	135	650	56,000
Indiana	36,350	330	110	440	36,910
Indian territory	64,690	600	600	64,090
Iowa	56,025	450	100	550	55,475
Kansas	82,080	380	380	81,700
Kentucky	40,400	375	25	400	40,000
Louisiana	48,720	1,000	540	1,700	3,300	45,420
Maine	33,040	545	300	2,300	3,145	29,895
Maryland	12,210	1,850	500	2,350	9,860
Massachusetts	8,315	125	60	90	275	8,040
Michigan	58,915	260	1,225	1,485	57,430
Minnesota	83,365	360	3,800	4,160	79,205
Mississippi	46,810	20	340	100	470	46,340
Missouri	69,415	630	50	680	68,735
Montana	146,080	410	360	770	145,310
Nebraska	76,855	630	40	670	76,185
Nevada	110,700	35	925	960	109,740
New Hampshire	9,305	80	220	300	9,005
New Jersey	7,815	205	120	35	360	7,455
New Mexico	122,580	115	5	120	122,460
New York	49,170	350	300	900	1,550	47,620
North Carolina	52,250	3,260	250	160	3,670	48,580
Ohio	41,060	140	160	300	40,760
Oregon	96,030	50	500	920	1,470	94,560
Pennsylvania	45,215	200	30	230	44,985
Rhode Island	1,250	135	10	20	165	1,085
South Carolina	30,570	215	180	5	400	30,170
Tennessee	42,050	200	100	300	41,750
Texas	265,780	2,510	800	180	3,490	262,290
Utah	84,970	80	2,700	2,780	82,190
Vermont	9,565	50	380	430	9,135
Virginia	42,450	1,760	520	25	2,325	40,125
Washington	69,180	1,360	560	360	2,300	66,880
West Virginia	24,780	135	135	24,645
Wisconsin	56,040	420	1,170	1,590	54,450
Wyoming	97,890	85	230	315	97,575
Unorganized territory	4,740	4,740
Delaware bay	620	620	620
Raritan bay and lower New York bay	100	100	100

ALABAMA.

Includes Mobile bay, half of Perdido bay, and half of the boundary portions of the Perdido and Chattahoochee rivers.

AUTHORITIES.—For Gulf coast, Coast Survey maps; for east and west boundaries, Land Office maps, Coast Survey "sketches", and Engineer Office maps. The north boundary is taken at latitude 35° . The south boundary, from Perdido river to Chattahoochee river, follows the parallel of 31° .

ARIZONA.

Includes half of boundary portion of Colorado river.

AUTHORITIES.—For the Colorado river, Wheeler's maps; for the Mexican boundary, maps of the Mexican Boundary Survey.

ARKANSAS.

Includes half of boundary portion of Red river, Mississippi river, and St. Francis river.

AUTHORITIES.—South boundary taken at $33^{\circ} 00'$; north boundary taken at $36^{\circ} 30'$. For the east boundary, Land Office maps and Coast Survey "sketches", after comparison with Engineer Office maps; for Red river, Texas land office maps; for boundary with Indian territory, Ruffner's map of Indian territory.

CALIFORNIA.

Includes bays of San Francisco, False, and San Diego. Includes half of boundary portion of Colorado river. Includes the portion of lake Tahoe within state line.

AUTHORITIES.—For the Pacific coast, Coast Survey maps; for the Nevada boundary south of latitude 39° , Wheeler's maps; for the Colorado river, Wheeler's maps; for the boundary with lower California, Mexican Boundary Survey.

COLORADO.

Is limited on all sides by parallels of latitude and meridians of longitude, and its area is simply a matter of computation.

CONNECTICUT.

Includes the various inlets and river-mouths along the shores of Long Island sound.

AUTHORITIES.—For Long Island sound, the Coast Survey maps; for the west boundary, French's map of New York and Colton's map of Connecticut; for the north boundary, Walling and Gray's atlas of Massachusetts; for the east boundary, Colton's map of Connecticut and Thompson's map of Rhode Island.

DISTRICT OF COLUMBIA.

Includes boundary portion of the Potomac river.

AUTHORITY.—McClelland's map of the District of Columbia.

DAKOTA.

Includes half of boundary rivers and lakes.

AUTHORITY.—For boundary rivers and lakes, Land Office map of Dakota, after comparison with Engineer Office map.

DELAWARE.

Includes half of the boundary portion of the Delaware river as far south as Cohansey creek; also Rehoboth bay and Indian river.

AUTHORITIES.—For the Atlantic coast, Delaware bay, and the Delaware river south of latitude $39^{\circ} 30'$, the Coast Survey maps; for the Delaware river north of $39^{\circ} 30'$, the Geological Survey map of New Jersey; for the remaining boundaries, Colton's maps and the Eclectic Geography maps.

FLORIDA.

Includes half of Perdido bay and half of the boundary portions of Perdido, Chattahoochee, and St. Mary's rivers; also Pensacola bay, Santa Rosa sound, Choctawhatchee bay, St. Andrew's bay, St. Joseph's bay, Apalachicola bay, Oklokonee bay, Tampa bay, Charlotte harbor, Oyster bay, and the inlets, lagoons, and sounds of the Atlantic coast.

AUTHORITIES.—For the coast line, the Coast Survey maps; for the north boundary, the Land Office maps and the Coast Survey "sketches".

GEORGIA.

Includes half of the boundary portions of Chattahoochee, St. Mary's, and Savannah rivers, and half of Cumberland sound and Tybee roads; also St. Andrew's sound, St. Simon's sound, Altamaha sound, Doboy sound, Sapelo sound, St. Catherine sound, Ossabaw sound, and Warsaw sound.

AUTHORITIES.—For south and west boundaries, the Land Office maps and Coast Survey "sketches"; for the Atlantic coast, the Coast Survey charts; for the boundary with South Carolina, the Coast Survey "sketches". The north boundary is taken at latitude 35° .

IDAHO.

For west boundary and authorities, see Oregon and Washington. Boundary with Montana, summit of Bitter Root mountains.

AUTHORITY.—Engineer Office map.

ILLINOIS.

Includes half of boundary portion of Mississippi and Wabash rivers, but none of Ohio river.

AUTHORITIES.—The north boundary is taken at latitude $42^{\circ} 29' 30''$; for the lake Michigan coast, the Lake Survey maps; for the other boundaries, the Land Office and Engineer Office maps.

AREAS OF THE STATES AND TERRITORIES.

INDIANA.

Includes half of boundary portion of Wabash river, but none of the Ohio river.

AUTHORITIES.—For the shore of lake Michigan, the Lake Survey maps; for the remaining boundaries, the Land Office and Engineer Office maps.

INDIAN TERRITORY.

Includes half of boundary portion of Red river.

AUTHORITY.—Ruffner's map of Indian territory.

(Includes "Greer County", disputed territory with Texas.)

IOWA.

Includes half of boundary rivers.

AUTHORITIES.—For the east, south, and west boundaries, the Land Office and Engineer Office maps. The north boundary is taken at latitude $43^{\circ} 30'$.

KANSAS.

Includes half of boundary portion of Missouri river.

AUTHORITY.—Land Office map checked by Engineer Office map.

KENTUCKY.

Includes half of boundary portion of Mississippi and Big Sandy rivers and all of boundary portion of the Ohio river.

AUTHORITIES.—For the south boundary, the Coast Survey "sketches" and Killebrew's map of Tennessee; for the north and west boundaries, the Land Office and Engineer Office maps; for the east boundary, Colton's maps and the Eclectic Geography maps.

LOUISIANA.

Includes half of Sabine lake and half of the boundary portions of Sabine, Mississippi, and Pearl rivers. Includes the bays of Vermillion, Cote Blanche, Terrebonne, Timbalier, and Barataria, and the lakes of Calcasieu, Pontchartrain, and Borgne.

AUTHORITIES.—For the western boundary, the Texas land office map; for the Gulf coast, the Coast Survey maps; for Pearl river, the Land Office maps, checked by the Engineer Office map; for the Mississippi river, the Land Office maps and Coast Survey "sketches", checked by Engineer Office maps.

MAINE.

Includes half of the boundary portions of the St. John, St. Croix, and Piscataqua rivers. Includes only such arms of the sea as are decidedly landlocked.

AUTHORITIES.—For the coast, the Coast Survey maps; for the eastern boundary, the maps of the British Boundary Survey and Walker and Miles' atlas of Canada; for the northern and northwestern boundaries, the maps of the British Boundary Survey; for the boundary with New Hampshire, Walling and Hitchcock's atlas of New Hampshire.

MARYLAND.

Includes Assateague bay, Isle of Wight bay, Tangier sound, the interior portion of Chesapeake bay, and the boundary portion of the Potomac river.

AUTHORITIES.—For the Atlantic coast, Chesapeake bay, the Potomac river south of the District of Columbia, and the boundary with southern Delaware, the Coast Survey maps; the north boundary taken at latitude $39^{\circ} 43' 26''$; for the remaining boundaries, Colton's maps and the maps of the Eclectic Geography.

MASSACHUSETTS.

Includes Boston harbor.

AUTHORITIES.—For the coast, the Coast Survey maps; for the north boundary, Walling and Gray's atlas of Massachusetts and Walling and Hitchcock's atlas of New Hampshire; for the remaining boundaries, Walling and Gray's atlas of Massachusetts.

MICHIGAN.

Includes half of Montreal and Menominee rivers; includes half of St. Mary's, St. Clair, and Detroit rivers; includes Anchor bay and Huron bay, but no other portion of lake St. Clair, the great lakes, or their tributary bays. The straits of Mackinac are not included.

AUTHORITIES.—For the great lakes and their connecting waters, the Lake Survey maps; for the Wisconsin boundary, the Land Office maps; for the south boundary, the Land Office, Engineer Office, and Lake Survey maps.

MINNESOTA.

Includes half of the lakes, straits, and rivers along the British boundary, except Rainy lake and Lake of the Woods; includes half of lake Travers, Big Stone lake, lake Pepin, lake St. Croix, and St. Louis bay; includes half of the boundary portions of Red river, Mississippi river, and St. Croix river.

AUTHORITIES.—For the coast of lake Superior, the Lake Survey maps; for the British boundary, Hinds' maps and the maps of the Northern Boundary Survey; for the east and west boundaries, the Land Office and Engineer Office maps. The south boundary is taken at latitude $43^{\circ} 30'$.

MISSISSIPPI.

Includes half of boundary portions of Mississippi and Pearl rivers; includes bay of St. Louis.

AUTHORITIES.—For the Gulf coast, Coast Survey maps; for east and west boundaries, the Land Office maps and Coast Survey "sketches" in connection with the Engineer Office maps. The north boundary is taken at latitude 35° .

AREAS OF THE STATES AND TERRITORIES.

7

MISSOURI.

Includes half of all boundary rivers.

AUTHORITY.—Land Office maps, after comparison with the Engineer Office map and Killebrew's map of Tennessee.

MONTANA.

AUTHORITY.—For boundary with Idaho (summit of Bitter Root mountains), Engineer Office map.

NEBRASKA.

Includes half of boundary rivers.

AUTHORITY.—For natural boundaries, Land Office maps, in connection with Engineer Office map.

NEVADA.

Includes half of boundary portion of Colorado river. Includes the portion of lake Tahoe within state line.

AUTHORITIES.—For southwest and south boundaries, Wheeler's maps.

NEW HAMPSHIRE.

Includes all of boundary portion of the Connecticut river and half of Piscataqua rivers.

AUTHORITIES.—For the north boundary, the maps of the British Boundary Survey; for the south boundary, Walling and Hitchcock's atlas of New Hampshire, and Walling and Gray's atlas of Massachusetts; for the east and west boundaries, Walling and Hitchcock's atlas of New Hampshire.

NEW JERSEY.

Includes all bays and inlets of the Atlantic between cape May and Sandy Hook; also Newark bay and half of the boundary portions of the Delaware and Hudson rivers, half of New York bay, and half of Kill von Kull and Staten Island sound. No portion of Delaware bay, Raritan bay, or Sandy Hook bay is included.

AUTHORITIES.—For Delaware bay, the Atlantic coast, Raritan bay, Staten Island sound, and New York harbor, the Coast Survey maps; for the Hudson river and the boundary with New York, the map of the New Jersey Geological Survey, and French's map of New York; for the Delaware river, the New Jersey Geological Survey map and Colton's maps.

NEW MEXICO.

Includes half of boundary portion of Rio Grande.

AUTHORITY.—For the boundary with Mexico, Mexican Boundary Survey. The remainder of the territory is limited by parallels and meridians.

NEW YORK.

Includes half of Niagara river and of the boundary portions of the St. Lawrence and Hudson rivers, and of Staten Island sound. Includes Chaumont bay, the New York portion of lake Champlain, the Narrows, East river, and half of New York bay. Includes, on Long Island, Jamaica bay, Hempstead bay, South Oyster bay, Great South bay, Belleport bay, Moriches bay, Shinnecock bay, Peconic bay, Huntington bay, Oyster bay, and Flushing bay.

AUTHORITIES.—For lake Erie and lake Ontario, the Lake Survey maps; for the northern boundary, the maps of the British Boundary Survey; for the eastern boundary, the Coast Survey maps of lake Champlain, Walling and Gray's atlas of Massachusetts, French's map of New York, and Colton's maps; for the Atlantic coast and Long Island sound, the Coast Survey maps; for the boundary with New Jersey, the New Jersey Geological Survey map. The south boundary is taken at latitude 42°.

NORTH CAROLINA.

Includes Pamlico sound, Albemarle sound, and Currituck sound.

AUTHORITIES.—For the Atlantic coast, the Coast Survey charts; for the north, south, and west boundaries, the Coast Survey "sketches".

NOTE.—The north and south boundaries have been surveyed at different times, but have not been permanently marked. On the Coast Survey maps they appear to follow, as closely as possible, the route of the most recent survey, and this location has been accepted in determining the area of the state.

OHIO.

Includes none of boundary portion of Ohio river. Includes Maumee bay and Sandusky bay.

AUTHORITIES.—For the lake Erie shore, the Lake Survey maps; for the other boundaries, the Land Office maps, the Engineer Office maps, Colton's maps, and Von Steinwehr's map of West Virginia.

OREGON.

Includes the bays of Nehalem, Tillamook, Oyster, Yaquina, Coos. Includes half of boundary rivers of Columbia and Snake. East boundary, south of the mouth of Owyhee river, is supposed to follow the meridian of 117° 01' 30".

AUTHORITIES.—For the coast line, the Coast Survey maps; for the Snake river boundary, the Land Office maps; for Columbia river boundary, the Land Office maps.

PENNSYLVANIA.

Includes half of boundary portion of Delaware river.

AUTHORITIES.—For the east boundary, the Geological Survey map of New Jersey and French's map of New York. The south boundary taken at latitude $39^{\circ} 43' 26''$. For the west boundary, the Land Office map of Ohio, Colton's maps, and the Eclectic Geography maps; for the lake Erie coast, the Lake Survey maps. The north boundary is taken at latitude 42° .

RHODE ISLAND.

Includes Narraganset bay and Jakonnet river.

AUTHORITIES.—For the coast line, the Coast Survey maps; for the boundary with Massachusetts, Walling and Gray's atlas of Massachusetts; for the boundary with Connecticut, Thompson's map of Rhode Island and Colton's map of Connecticut.

SOUTH CAROLINA.

Includes half of Savannah river and Tybee roads. Includes Port Royal sound, St. Helena sound, and Charleston harbor.

AUTHORITIES.—For the coast line, the Coast Survey maps; for the boundaries with Georgia and North Carolina, the Coast Survey "sketches".

TENNESSEE.

Includes half of boundary portion of Mississippi river.

AUTHORITIES.—The south boundary is taken at latitude 35° . For the east boundary, the Coast Survey "sketches"; for the north boundary, the Coast Survey "sketches" and Killebrew's map of Tennessee; for the west boundary, the Land Office maps and Killebrew's map of Tennessee, in connection with the Engineer Office map.

TEXAS.

(Greer county not included.)

Includes half of boundary portions of the Rio Grande, Sabine river, and Red river, and half of Sabine lake. Includes Laguna del Madre, Corpus Christi bay, Aransas bay, San Antonio bay, Matagorda bay, Galveston bay, and other coast lakes and bays.

AUTHORITIES.—For the Rio Grande, the maps of the Mexican Boundary Survey; for the Gulf coast, the maps of the Coast Survey; for the eastern boundary, from Red river to Sabine pass, the Texas land office map; for the Red river boundary, Ruther's map of Indian territory.

AREAS OF TEXAS.

Texas land office map, 1879, 269,694 square miles (this includes Greer county, 2,622 square miles); Roessle's map, 268,634 square miles; Land Office report, 1878, 274,356 square miles; Census of 1870, 274,356 square miles; Census of 1880, 265,780 square miles, excluding Greer county.

UTAH.

Is limited on all sides by parallels and meridians; hence its area is a simple matter of computation.

VERMONT.

Includes the Vermont portion of lake Champlain and none of the boundary portion of the Connecticut river.

AUTHORITIES.—For the north boundary, the maps of the British Boundary Survey; for the east boundary, Walling and Hitchcock's atlas of New Hampshire; for the south boundary, Walling and Gray's atlas of Massachusetts; for the west boundary, the Coast Survey maps of lake Champlain, French's map of New York, Colton's map of Vermont, and Walling and Hitchcock's atlas of New Hampshire.

VIRGINIA.

Includes no portion of the Potomac River. Includes the various inlets along the Atlantic coast and the interior portion of Chesapeake bay, from Smith's island to the sea.

AUTHORITIES.—For the boundary with North Carolina, the Coast Survey sketch maps; for the Atlantic coast, Chesapeake bay, and the Potomac river below Washington, the Coast Survey maps; for the remaining boundaries, Colton's maps and the Eclectic Geography maps.

WASHINGTON.

Strait of Juan de Fuca and gulf of Georgia are excluded, but the islands in the same are included. The waters of Puget sound, Admiralty inlet, Hood's canal, Gray's harbor, and Shoalwater bay are included. Half of the boundary portions of Columbia and Snake rivers are included. The east boundary, north of the mouth of Clearwater river, is supposed to follow the meridian of $117^{\circ} 01' 30''$.

AUTHORITIES.—For the coast line, the Coast Survey maps; for Snake river boundary, the Land Office maps; for Columbia river boundary, the Land Office maps.

WEST VIRGINIA.

Includes half of the boundary portion of the Big Sandy river and all of the boundary portion of the Ohio river.

AUTHORITIES.—Colton's maps, the Eclectic Geography maps, and the Land Office map of Ohio.

WISCONSIN.

Includes half of lake Pepin, lake Saint Croix, lac Desert, and St. Louis bay, and half of the boundary portions of the Mississippi, Saint Croix, Montreal, and Menominee rivers. Includes Chaquamegon bay. Does not include any portion of Green bay or Sturgeon bay.

AUTHORITIES.—For the shores of the Great Lakes and Green bay, the Lake Survey Maps; for the west boundary, the Land Office and Engineer Office maps; for the boundary with Michigan, the Land Office maps; the south boundary is taken at latitude $42^{\circ} 29' 30''$.

AREAS OF THE STATES AND TERRITORIES.

9

WYOMING.

Is limited on all sides by parallels and meridians; hence its area is a simple matter of computation.

"PUBLIC LANDS."

(Unattached territory.)

Longitude 100°-103°; latitude 36° 30'-37° 00'.

Is limited on all sides by parallels and meridians, and its area is therefore a matter of computation.

WATER AREAS.

The areas of included bodies of water, as bays and other inlets of the sea, lakes, ponds, etc., were, in most cases, determined by direct measurement from maps.

The accuracy and completeness of this statement of water areas differs in different states with the scale and general correctness of the maps used. In a few cases they were found in print in such form as to show that they had been carefully determined.

The water surface of Maine has been carefully measured by Mr. Walter Wells, and the results are published in "Water Power of Maine". That of New Jersey has been measured with great care by Professor Cooke, the state geologist, who has published the measurements in his report on "Geology of New Jersey", 1863. In all states surveyed by the General Land Office, these areas were taken from the plats on file in the Land Office. In cases of these states the results are to be regarded as excellent.

In the unsettled portions of the west, where the land surveys have not yet extended, the areas were taken from the best maps to be had. The maps of Hayden's, King's, Powell's, and Wheeler's surveys have assisted greatly in completing the work.

The area of river surface has proved a very difficult matter to determine, even approximately. In case of states which have been entirely surveyed by the General Land Office, and of which the plats, on a large scale, are accessible, the areas of the larger streams were measured from them by taking the mean breadth and the length. This, of course, ignores the stage of water, but, as the surveys were made at all times of the year, it may be assumed as "medium stage". From such material the river surface of these states has been determined, and was found to range from one square mile in 90 of total area to one in 3,163, but averaging for the states of the Mississippi valley about one in 200. This has served as a basis for estimating that of the other states.

Following is a list of the principal inland lakes of the United States, with their areas:

Lakes.	State.	Area in square miles.	Authority.	Lakes.	State.	Area in square miles.	Authority.
Abert.....	Oregon.....	73	Land Office maps.	Chautauqua.....	New York.....	17	French's map.

"A" refers to Water-Power of Maine, by Mr. Walter Wells.

AREAS OF COUNTIES.

The areas of counties given in the following table are the results of direct measurements from the best county maps, corrected arbitrarily in order to make them add up to the areas of the states. In the states surveyed by the General Land Office, in which county lines follow the boundaries of survey townships, the areas are susceptible of being deduced with a great degree of accuracy. In other states, where the county lines are located by minor natural or artificial points, such as houses, fences, roads, or small streams, the probabilities are against their being correctly drawn on even the best maps, and the areas are correspondingly uncertain. This is the case in most of the states on the Atlantic border, with West Virginia, Kentucky, and Tennessee, in the interior.
