¹This table includes all incorporated places having at least 2,500 inhabitants, so far as they have been returned by the census enumerators separate from the population of the townships, precincts, districts, etc., of which they form a part. It also includes two unincorporated places in Alaska, one unincorporated place in Hawaii, and all towns in the New England states which have a population of at least 2,500, but which do not contain an incorporated place with that amount of population. No attempt was made at the Twelfth Census to ascertain the population of unincorporated places.
