¹Value of land, with improvements, except buildings, \$13,058,007,995; value of buildings, \$3,556,639,496. The Twelfth Census was the first to collect separate statistics of buildings on farms.

²Including value of live stock on ranges as well as on farms. Value of domestic animals, \$2,979,197,586. This figure is more nearly comparable than that in the table with the returns for value of live stock at earlier censuses.

³Including estimated value of live stock on ranges.

⁴Values for 1870 were reported in depreciated currency. To reduce to specie basis of other years they must be diminished one-fifth.

⁵Including only the reported value of live stock on farms.

¹ Prior to 1890 asses and burros were enumerated with mules.

² For purposes of comparison, spring calves, colts, and lambs are not included in the total numbers of neat cattle, horses and mules, and sheep, respectively, for 1900. In 1850 they were excluded from reports by instructions to enumerators. For other census years, no instructions were given concerning them. It is probable that a few, but not all, were reported. For figures for the total number of domestic animals on farms and ranges in 1900, see Table 122.

³ Including estimated number of range animals separately reported.

⁴ No separate report or estimate of range animals.
