CENSUS BULLETIN

No. 11.

WASHINGTON, D. C.

October 25, 1900.

POPULATION OF CITIES HAVING 25,000 INHABITANTS OR MORE IN 1900.

This bulletin, prepared under the direction of Mr. William C. Hunt, chief statistician for population, gives the population of the 159 cities having 25,000 inhabitants or more in 1900, according to the official count of the returns of the Twelfth Census, taken as of June 1, 1900.

The 159 cities combined have a population in 1900 of 19,694,625, as compared with a population for the same of 14,855,489 in 1890, and of 9,938,927 in 1880.

The absolute increase in the population of these cities from 1890 to 1900 was 4,839,136, or 82,426 less than absolute increase from 1880 to 1890, when it was 4,921,562. The percentage of increase in population of the 1596 from 1890 to 1900 was 32.5 as against 49.5 from 1880 to 1890.

The combined population of the 159 cities at each of the three census periods is distributed in table 1 by cla sizes, giving, in addition, the number of cities included under each class, respectively.

TABLE 1.—POPULATION OF CITIES HAVING 25,000 INHABITANTS OR MORE IN 1900, ACCORDING TO CLASSIFIED SIZES.

CLASSIFIED SIZES.	Num- ber of		POPULATION.		INGREASE FF TO 190	ком 1800 00.	INCREASE FI TO 189	
	cities.	1900	1890	1880	Number.	Per cent,	Number.	Per cent.

As shown by the above summary, there are 19 cities which have 200,000 inhabitants or more in 1900, 19 cities which have between 100,000 and 200,000 inhabitants, 40 cities which have between 50,000 and 100,000 inhabitants, and 81 cities which have between 25,000 and 50,000 inhabitants. There were 124 cities in 1890 which had a population of 25,000 or more, but of these cities Brooklyn and Long Island City now form a part of New York city, showing a net gain of 37 cities in 1900, as compared with 1890. Of the 124 cities in 1890, 16 had 200,000 inhabitants or more, 12 had between 100,000 and 200,000 inhabitants, 30 had between 50,000 and 100,000 inhabitants, and 66 had between 25,000 and 50,000 inhabitants.

In 1880 there were but 20 cities which contained more than 100,000 inhabitants, but in 1890 this number had increased to 28, and in 1900 to 38.

In 1900 there are 78 cities of 50,000 inhabitants or more as compared with 58 in 1890 and 35 in 1880.

The combined population in 1900 of the 19 cities of the first class is 11,795,809 as against a population in 1890 of 8,879,105, representing an increase during the 10 years of 2,916,704, or 32.8 per cent. The same cities showed an increase from 1880 to 1890 of 2,567,452, or 40.6 per cent.

The 19 cities of the first class comprise New York, which, with more than 3,000,000 inhabitants, properly stands by itself; 2 cities, Chicago and Philadelphia, each of which has a population in excess of a million; 3 cities, St. Louis, Boston, and Baltimore, which have a population of half a million each; 5 cities, Cleveland, Buffalo, San Francisco, (CP 25 M)

Cincinnati, and Pittsburg, which have a population of between 300,000 and 400,000 each; and 8 cities, New Orleans, Detroit, Milwaukee, Washington, Newark, Jersey City, Louisville, and Minneapolis, which have a population of between 200,000 and 300,000 each. The aggregate population represented by each of these 5 subgroups is summarized in table 2.

TABLE 2.—POPULATION OF CITIES HAVING 200,000 INHABITANTS OR MORE IN 1900, ACCORDING TO CLASSIFIED SIZES.

CLASSIFIED SIZES.			POPULATION.	·	INCREASE 1890 TO		INCREASE FROM 1880 TO 1890.		
Chasifin sides	of cities.	1900	1890	1880	Number.	Per cent.	Number.	Per cent.	
otals	19	11,795,809	8, 879, 105	6,311,653	2, 916, 704	32.8	2, 567, 452	40.6	
,000,000 and over ,000,000 and under 2,000,000 ,00,000 and under 1,000,000 ,00,000 and under 400,000 ,00,000 and under 300,000	1 2 3 5 8	8,487,202 2,992,272 1,645,087 1,724,455 1,996,798	2, 492, 591 2, 146, 814 1, 334, 686 1, 351, 539 1, 553, 475	1, 901, 845 1, 350, 355 1, 045, 670 960, 767 1, 053, 516	372, 916	37.8 39.3 23.2 27.5 28.5	591, 246 796, 459 289, 016 890, 772 499, 959	31.0 58.9 27.6 40.6 47.4	

The 19 cities of the second class have a combined population in 1900 of 2,412,538, and show an increase of 33.3 per cent from 1890 to 1900, as against an increase of 79.2 per cent from 1880 to 1890.

The 40 cities of the third class have a combined population in 1900 of 2,709,338, as against a population in 1890 of 2,067,169, which is equivalent to an increase during the decade of 31 per cent, as compared with an increase of 51 per cent during the preceding ten years.

The 81 cities of the fourth class have a combined population in 1900 of 2,776,940, having gained since 1890 676,381 in number, or 32.2 per cent, as against an increase of 68.7 per cent from 1880 to 1890.

The 19 cities of the first class are the only group of cities which show a larger numerical increase during the past decade than during the ten years from 1880 to 1890, although the four groups show very even percentages of increase from 1890 to 1900, varying from 31.0 to 33.3 per cent, the percentage of increase for the 159 cities combined being 32.5.

Table 3 shows the population of the 159 cities, arranged according to their relative rank in 1900, at each of the last three censuses, together with the increase by number and per cent during the two decades ending in 1890 and 1900, respectively.

Table 3.—POPULATION OF CITIES HAVING 25,000 INHABITANTS OR MORE IN 1900, ARRANGED ACCORDING TO POPULATION.

[The first column under each census year shows the order of the cities named when arranged according to population.]

¹ Decrease.

Since the announcement through the newspaper press of the population of cities having 25,000 inh bitants or more at the present census, the following changes have been made:

Buffalo, N. Y.—Population increased from 352,219 to 352,887, owing to an increase in the population of ward 22 from 15,419 to 15,587.

JOLIET, JLL.—Population decreased from 50,720 to 29,353, owing to a decrease in the population of ward 6 from 5,386 to 4,019.

PHILADELPHIA, PA.—Population of ward 22 decreased from 64,832 to 64,655 and the population of ward 24 increased from 53,023 to 53,200. This makes no change in the total population of the city.

ROCHESTER, N. Y.—Population increased from 162,435 to 162,608, owing to an increase in the population of ward 14 from 9,048 to 9,221.

St. Paul, Minn.—Population decreased from 163,632 to 163,065, owing to a decrease in the population of ward 11 from 5,047 to 4,480.

YORK, PA.—Population increased from 33,654 to 33,708, owing to an increase in the population of ward 12 from 4,540 to 4,594.

As shown by table 3, New York, under the act of consolidation which became effective January 1, 1898, has grown to be a city of very nearly 3,500,000 inhabitants in 1900, as compared with a population for what was formerly New York city of a little more than 1,500,000 in 1890, and of substantially 1,200,000 in 1880. The population of the territory now comprised within the present limits of New York was, approximately, 2,500,000 in 1890 and 1,900,000 in 1880. It is the premier city of the country in point of population, a position which it has uniformly held at each decennial census since and including 1790.

Chicago, with practically 1,700,000 inhabitants, and Philadelphia, with not quite 1,300,000 inhabitants, hold the second and third places in 1900, the same as in 1890, although at the census of 1880 their positions were reversed, Philadelphia then having very nearly 850,000 inhabitants as compared with not much more than 500,000 for Chicago.

St. Louis, Boston, and Baltimore, the next largest cities, have not changed their rank in 1900 as compared with 1890, and each of these three cities now has a population somewhat in excess of half a million. Boston was the fourth city in rank in 1880, but was passed by St. Louis in 1890, while Baltimore has occupied the sixth place at each of the three census periods considered.

Cleveland and Buffalo have both increased materially in population during the last ten years, and now take precedence over San Francisco and Cincinnati, which in 1890 were the seventh and eighth places in point of population. Pittsburg also shows a large increase in population since 1890, and is now the eleventh largest city in the country, having exchanged places with New Orleans.

Among the most notable changes in the rank of cities which have taken place in 1900, as compared with 1880, may be mentioned that of Seattle, which has advanced from the 150th to the 48th place; that of Los Angeles from the 135th to the 36th place; that of Duluth from the 156th to the 72d place; that of Kansas City, Kans., from the 153d to the 76th place; and that of Portland, Oregon, from the 106th to the 42d place. Other noticeable changes in rank from 1880 to 1900 are Birmingham, from 154 to 99; Tacoma, from 155 to 103; Spokane, from 157 to 105; Dallas, from 137 to 88; and Saginaw, from 136 to 89.

The total population represented by the 159 cities is distributed by states in table 4, as follows:

TABLE 4.—COMBINED POPULATION OF THE 159 CITIES HAVING 25,000 INHABITANTS OR MORE IN 1900, DISTRIBUTED BY STATES.

The following named states and territories in 1900 do not contain any city with a population of 25,000 or more: Arizona, Idaho, Indian Territory, Mississippi, Nevada, New Mexico, North Carolina, North Dakota, Oklahoma, South Dakota, Vermont, and Wyoming.

Of the whole number of cities having 25,000 inhabitants or more in 1900, 70 are found in the North Atlantic division, 48 in the North Central division, 18 in the South Central division, 12 in the Western division, and 11 in the South Atlantic division. Massachusetts has the largest number of such cities, namely, 20, and is followed by Pennsylvania with 18 and New York with 12.

The most significant growth of cities, shown by the above table, is that for the three cities in the state of Washington, namely, Seattle, Spokane, and Tacoma. These three cities combined had only 4,981 inhabitants in 1880, but their population had increased to 98,765 in 1890, and to 155,233 in 1900, the increase during the past decade being equivalent to 57.1 per cent.

Nebraska is the only state in which the combined population of the cities contained therein shows a decrease from 1890 to 1900.

Of the total population represented by the 159 cities in 1900 (19,694,625), 10,098,696, or 51.3 per cent, is contained in the 70 cities situated in the North Atlantic division, and 6,071,861, or 30.8 per cent, in the 48 cities situated in the North Central division, leaving only 3,524,068, or 17.9 per cent, for the remaining cities situated in the other three geographical divisions.

Table 5 shows the population of each city having 25,000 inhabitants or more in 1900, arranged by states, giving in each case the population by wards or equivalent subdivisions.

As already stated, Brooklyn and Long Island City are included as a part of the territory now comprised in what is commonly known as Greater New York, the area of New York city having been materially increased under the act of January 1, 1898, by which Kings county, coextensive with the city of Brooklyn, Richmond county, and the larger part of Queens county became a part of that city.

The city of New York in 1890 comprised all of what is now the borough of Manhattan and all of what is now the borough of Bronx, except the territory lying to the west of the East river annexed on January 1, 1898.

Under the act of 1894 the towns of Flatbush, Flatlands, Gravesend, and New Utrecht were absorbed by the city of Brooklyn, the town of Flatbush becoming the 29th ward, the town of New Utrecht the 30th ward, and the towns of Flatlands and Gravesend the 31st ward of the city. The city thus became coextensive with Kings county, and on January 1, 1898, the city of Brooklyn became the borough of Brooklyn, one of the five boroughs of Greater New York.

Richmond county, or what is commonly known as Staten Island, under the provisions of the same act became the borough of Richmond, and Queens borough was also organized from what was Long Island City, the towns of Flushing, Jamaica, and Newtown, and a small portion of the town of Hempstead, all of which were civil divisions of Queens county. The remaining towns of the county, Oyster Bay, North Hempstead, and the greater part of the town of Hempstead, were taken to form the new county of Nassau. The 1st ward of Queens borough comprises what was formerly Long Island City, the 2d ward what was formerly Newtown town, the 3d ward what was formerly Flushing town, the 4th ward what was formerly Jamaica town, and the 5th ward that part of Hempstead town included in the borough of Queens. It is impossible to state definitely the population in 1890 of that part of the town of Hempstead taken into the borough, but in order to determine, approximately, the population in 1880 and 1890 of the area included within the present limits of the borough of Queens, it can be assumed that one-fifth of the population of the town of Hempstead was contained in that portion of the town now comprised within the borough.

Table 6 shows the results for the five boroughs comprising Greater New York, including a statement of the approximate population for the same areas in 1880 and 1890, and the increase for each borough during the last two decades.

TABLE 6.—POPULATION OF NEW YORK CITY BY BOROUGHS: 1880 TO 1900.

BOROUGHS.		POPULATION.		INCREASE 1890 TO		INCREASE FROM 1880 TO 1890.		
	1900	1890	1880	Number.	Per cent.	Number.	Per cent.	
New York city	3, 437, 202	2, 492, 591	1,901,845	944, 611	37.8	591, 246	81.0	
Manhattan borough Bronx borough Brooklyn borough Richmond borough Queens borough	200,507 f 1,166,582 67,021	1,515,301 838,547 51,693 87,050	1, 206, 299 599, 495 38, 991 56, 560	535, 299 328, 035 15, 328 65, 949	35.3 39.1 29.6 75.7	309, 002 239, 052 12, 702 30, 490	25, 6 39, 8 32, 5 53, 9	

As shown by the above summary, the boroughs of Manhattan and Bronx, or what was formerly New York city, increased 35.3 per cent from 1890 to 1900, as against an increase of 25.6 per cent from 1880 to 1890. The percentage of increase in Brooklyn borough was substantially the same from 1890 to 1900 as in the ten years preceding, being 30.1 per cent and 39.8 per cent, respectively, while Richmond borough increased 29.6 per cent from 1890 to 1900 and 32.5 per cent from 1890 to 1890. The largest percentage of increase is shown in Queens borough, which increased 75.7 per cent from 1890 to 1900, as against 53.9 per cent from 1880 to 1890.

Director of the Census

CENSUS BULLETIN.

No. 12.

WASHINGTON, D. C.

November 3, 1900.

POPULATION OF VERMONT BY COUNTIES AND MINOR CIVIL DIVISIONS.

This bulletin, prepared under the direction of Mr. WILLIAM C. HUNT, chief statistician for population, gives the aggregate population of Vermont by counties and minor civil divisions, according to the official count of the returns of the Twelfth Census, taken as of June 1, 1900.

Vermont was admitted as a state March 4, 1791. Table 1 shows the population of Vermont at each census from 1790 to 1900, inclusive, together with the increase by number and per cent during each decade.

TABLE	I.—POPULATION	OŁ,	VERMONT:	1790 1	.'O	1900.

	3	inorease.			
CENSUS YEARS.	Population.	Number.	Per cent.		
1900	848, 641	11,219	3.3		
1890	332, 422	136	(1)		
1880	332, 286	1,735	0,5		
1870	330,551	15, 453	4.9		
1860	315,098	978	0,3		
1850	314, 120	22,172	7.5		
1840	291,948	11,296	4.0		
1830	280,652	44,686	18.9		
1820	235, 966	18,071	8.2		
1810	217,895	63,430	41.0		
1800	154,465	69,010	80.8		
1790	85, 425				

¹ Less than one-tenth of 1 per cent.

The population of the state in 1900 is 343,641 as against 332,422 in 1890, representing an increase during the decade of 11,219, or 3.3 per cent. Vermont had a population in 1790 of 85,425 and in 1800 of 154,465, showing an increase during the first ten years of its history as a state of more than 80 per cent. During the next decade there was a further increase of more than 40 per cent, giving a total population in 1810 of 217,895. Since that census, however, its growth has been very slow, and, with the exception of the decade from 1820 to 1830, when the population increased very nearly 19 per cent, the percentage of increase during each census period was considerably less than 10 per cent, and for the three decades from 1850 to 1860, from 1870 to 1880, and from 1880 to 1890 it was less than 1 per cent.

The population of the state has increased in the 110 years from 1790 to 1900 a little more than four fold.

The total land surface of Vermont is, approximately, 9,135 square miles, the average number of persons to the square mile at the censuses of 1890 and 1900 being as follows: 1890, 36.3; 1900, 37.6.

Table 2 shows the population of Vermont by counties at each census from 1790 to 1900, inclusive, while table 3, which immediately follows, shows, for each county, the increase (or decrease) by number and per cent during the ten years from 1890 to 1900.

(C P 15 M)

¹ Decrease.

There has been but one territorial change in the counties of Vermont since 1890, namely, part of Washington annexed to Caledonia.

Of the 14 counties of the state only 8 have increased in population during the decade, and of these only 3 show an increase of more than 10 per cent, namely, Washington, 23.6 per cent; Grand Isle, 16.1 per cent; and Chittenden, 11.8 per cent.

Of the 6 counties showing decreases in population the largest percentage of decrease is that for Essex, or 15.2

Table 4 shows the population of Vermont by minor civil divisions, so far as it was separately returned at the censuses of 1890 and 1900.

¹ Rutland city organized from part of Rutland town in 1893.
2 Part of Harris gore given to Caledonia county since 1890.
3 Includes Harris gore (population 15 in 1890), abolished since 1890.
4 Barre village, formerly in Barre town, incorporated as a city since 1890.

<sup>Exclusive of Barre village.
Part of Harris gore annexed since 1890.
Formerly Montpeller town; incorporated as a city since 1890.</sup>

There are 48 incorporated cities and villages in Vermont, for which the population in 1900 is separately returned, and these incorporated places are presented in table 5 in alphabetical order, being abstracted from table 4, in which they are presented in detail under the counties in which they are severally situated.

TABLE 5.—POPULATION OF THE INCORPORATED CITIES AND VILLAGES OF VERMONT: 1890 AND 1900.

Of the above named 48 incorporated cities and villages there are only 13 that have a population of more than 2,000 in 1900, and of these only 2 that have a population of more than 10,000, namely, Burlington, with 18,640, and Rutland, with 11,490 inhabitants.

Director of the Census.

CENSUS BULLETIN.

No. 13.

WASHINGTON, D. C.

November 8, 1900.

POPULATION OF MASSACHUSETTS BY COUNTIES AND MINOR CIVIL DIVISIONS.

This bulletin, prepared under the direction of Mr. WILLIAM C. Hunt, chief statistician for population, gives the aggregate population of Massachusetts by counties and minor civil divisions, according to the official count of the returns of the Twelfth Census, taken as of June 1, 1900.

Massachusetts was one of the original 13 states. Table 1 shows the population of Massachusetts at each census from 1790 to 1900, inclusive, together with the increase by number and per cent during each decade.

TABLE 1.-POPULATION OF MASSACHUSETTS: 1790 TO 1900.

		INCREASE,			
GENSUS YEARS.	Population.	Number.	Per cent		
1900	2, 805, 346	566, 408	25, 2		
1890	2, 238, 943	455, 858	25, 5		
1880	1,783,085	325, 734	22, 8		
1870	1, 457, 351	226, 285	18. 9		
1860	1,231,066	236, 552	23, 7		
1850	994, 514	256, 815	34. 8		
1840	737, 699	127, 291	20, 8		
1830	610, 408	87, 249	16, (
1820	523, 159	51,119	10.8		
1810	472,040	49, 195	11. 6		
1800	422, 845	44,058	11.0		
1700	878, 787				

The population of the state in 1900 is 2,805,346 as compared with a population in 1800 of 2,238,948, showing an increase during the last ten years of 566,403, or 25.2 per cent. This is practically the same rate of increase as was shown for the preceding decade, when it was 25.5 per cent. This rate of increase has been exceeded but once in the history of the state, namely, from 1840 to 1850, when the population increased 34.8 per cent.

The present population of the state is very nearly seven and one-half times as large as the population reported at the first census in 1790, when it was 378,787.

The total land surface of Massachusetts is, approximately, 8,040 square miles, the average number of persons to the square mile at the censuses of 1890 and 1900 being as follows: 1890, 278.4; 1900, 848.9.

(OP 15 M)

Table 2 shows the population of Massachusetts by counties at each census from 1790 to 1900, inclusive, while table 3, which immediately follows, shows, for each county, the increase (or decrease) by number and per cent during the ten years from 1890 to 1900.

¹ Decrease,

There has been no territorial change in the counties of Massachusetts since 1890.

Of the 14 counties in the state all but 2 have increased in population during the decade, the counties showing the largest percentages of increase being Bristol, 35.1 per cent; Middlesex, 31.2 per cent; Hampden, 29.3 per cent; Norfolk, 27.3 per cent; and Suffolk, 26.1 per cent.

The 2 counties showing a decrease are Barnstable and Nantucket.

Table 4 shows the population of Massachusetts by minor civil divisions, as returned at the censuses of 1890 and 1900.

Part given to Stoneham town since 1890.
 Part of Dedham town taken to form Westwood town since 1890.

There are 33 incorporated cities in Massachusetts, and these incorporated places are presented in table 5 in alphabetical order, being abstracted from table 4, in which they are presented in detail under the counties in which they are severally situated.

TABLE 5.—POPULATION OF THE INCORPORATED CITIES OF MASSACHUSETTS: 1890 AND 1900.

OITIES.	POPUL	ATION.		POPUL	ATION.		POPUL	ATION.
offics,	1900	1890	CITIES.	1900	1890	OITIES.	1900	1890
Beverly city Boston city Brockton city Cambridge city Chelsea city Chicopec city Everet city Fall River city Fitchburg city Gloucester city Haverhill city	40, 063 91, 886 34, 072 19, 167 24, 336 104, 863 31, 531	10, 821 448, 477 27, 294 70, 028 27, 909 14, 050 11, 068 74, 898 22, 037 24, 651 27, 412		94, 969 68, 518 83, 664 13, 609 18, 244 12, 962 62, 442	85, 637 44, 654 77, 696 55, 727 23, 031 13, 805 11, 079 8, 519 40, 783 13, 947 24, 879	North Adams city Northampton city Pittsfield city Quincy city Salem city Somerville city Springfield city Taunton city Waltham city Woburn city Worcester city	18, 643 21, 766 23, 899 35, 956 61, 643 62, 059 81, 036	16,074 14,990 17,281 16,723 30,801 40,152 44,179 25,448 18,707 13,499 84,655

Of the above named 33 cities 8 have between 12,000 and 20,000 inhabitants; 5 have between 20,000 and 25,000 inhabitants; and 20 have more than 25,000 inhabitants.

Table 6 gives for each of the 20 cities having upwards of 25,000 inhabitants in 1900, the population at each census from 1790 to 1900, inclusive, so far as the population is separately stated in the census reports at each decennial period. Table 7, which immediately follows, shows for each city the increase by number and per cent during each of the tenyear periods.

¹ Decrease. ² Less than one-tenth of 1 per cent.

All of the above named cities show an increase in population since 1890, the largest percentages being 53.5 for Somerville and 53.2 for New Bedford, and the smallest 5.9 for Gloucester. Boston, with 560,892 inhabitants in 1900, shows an increase of 25 per cent since 1890, which is a slightly higher rate of increase than that for the preceding decade, when it was 23.6 per cent. Worcester, the second largest city in the state, has a population in 1900 of 118,421 as compared with 84,655 in 1890, constituting an increase during the ten years of 33,766, or 39.8 per cent. Fall River, with 104,863 inhabitants, is the third city in the state, and shows an increase since 1890 of nearly 41 per cent. Lowell, with 94,969, and Cambridge, with 91,886 inhabitants rank fourth and fifth among the cities of the state, the next largest city being Lynn, with a population in 1900 of 68,513.

CENSUS BULLETIN.

No. 14.

WASHINGTON, D. C.

November 10, 1900.

POPULATION OF COLORADO BY COUNTIES AND MINOR CIVIL DIVISIONS.

This bulletin, prepared under the direction of Mr. WILLIAM C. Hunt, chief statistician for population, gives the aggregate population of Colorado by counties and minor civil divisions, according to the official count of the returns of the Twelfth Census, taken as of June 1, 1900.

Colorado was organized as a territory February 28, 1861, and admitted as a state August 1, 1876. Table 1 shows the population of Colorado at each census from 1860 to 1900, inclusive, together with the increase by number and per cent during each decade.

TABLE 1.-POPULATION OF COLORADO: 1800 TO 1900.

	N. 3.11	INCREASE.			
OENSUS YEARS.	Population.	Number.	Per cent.		
1900	539, 700	127, 502	30.9		
1890	412, 198	217,871	112.1		
1880	191,327	154, 463	387.4		
1870	89,864	5,587	16.2		
1860	84,277	,			

The population of the state in 1900 is 539,700 as compared with a population in 1890 of 412,198, representing an increase during the decade of 127,502, or 30.9 per cent. A small part of this increase is due to the fact that there were 985 Indians and 66 other persons, or a total of 1,051 persons, on Indian reservations, etc., in Colorado, who were specially enumerated in 1890 under the provisions of the census act, but were not included in the general population of the state at that census.

Colorado had in 1860 a population of 34,277 and in 1870 a population of 39,864, but in 1880, the first census taken after its admission as a state, it had grown to 194,827, representing an increase in ten years of 154,463, or 387.4 per cent. During the decade from 1880 to 1890, its population was again increased by considerably more than 100 per cent, giving a total in 1890, as previously stated, of 412,198.

The population of Colorado in 1900 is very nearly sixteen times as large as the population given for 1860, the first year in which its population is given in the census report.

The total land surface of Colorado is, approximately, 103,645 square miles, the average number of persons to the square mile at the censuses of 1890 and 1900 being as follows: 1890, 3.9; 1900, 5.2.

Table 2 shows the population of Colorado by counties at each census from 1870 to 1900, inclusive, while table 3, which immediately follows, shows, for each county, the increase by number and per cent during the ten years from 1890 to 1900.

1 Decrease.

The following territorial changes in the counties of Colorado have been made since 1890: Part of Chaffee annexed to Fremont since 1890; Mineral organized from parts of Hinsdale, Rio Grande, and Saguache in 1893; Teller organized from parts of El Paso and Fremont in 1899.

Of the 57 counties in the state, 42 show increases in population since 1890, and in some of them the percentages of increase are very large, namely, Otero, 174.8 per cent; Archuleta, 156.2 per cent; Bent, 132.2 per cent; Mesa, 117.5 per cent; Delta, 116.5 per cent; Morgan, 104.1 per cent; Montezuma, 100.0 per cent; Prowers, 91.2 per cent; Hinsdale, 86.6 per cent; and San Miguel, 84.9 per cent.

The 15 counties showing a decrease in population are Baca, Cheyenne, Clear Creek, Custer, Dolores, Eagle, Kiowa, Kit Carson, Ouray, Park, Phillips, Pitkin, Sedgwick, Washington, and Yuma.

Table 4 shows the population of Colorado by minor civil divisions, so far as it was separately returned at the consuses of 1890 and 1900.

² Precincts 6 and 7 annexed since 1890.

Of the above named 165 incorporated places there are only 27 that have a population in 1900 of more than 2,000, and of these only 7 have a population of more than 5,000, namely, Denver city, with 183,859; Pueblo city, with 28,157; Colorado Springs city, with 21,085; Leadville city, with 12,455; Cripple Creek town, with 10,147; Bonder city, with 6,150; and Trinidad city, with 5,345 inhabitants.

Denver and Pueblo are the only cities in Colorado that have a population in 1900 of more than 25,000, and for these 2 cities a summary is presented in table 6, showing their population from 1860 to 1900, inclusive, together with the increase by number and per cent during each decade.

TABLE 6.—POPULATION OF DENVER AND PUEBLO: 1860 TO 1900.

		DENVER.		рикві.о.				
CENSUS YEARS. Population		Inci	ease.	Donulation	Increase,			
	t opanium.	Number.	Per cent.	Population,	Number.	Per cent.		
1990. 18(0. 1880. 1870.	183, 859 106, 713 85, 629 4, 759 4, 749	27, 146 71, 084 30, 870 10	25, 4 199, 5 648, 6 0, 2	28, 157 21, 558 3, 217 666	8,509 21,341 2,551	14, 6 663, 8 883, 0		

As shown by the above summary, Denver had a population of less than 5,000 in 1860 and in 1870, but during each of the next two decades it materially increased, showing a total population in 1880 of 35,629 and in 1890 of 106,713; it has in 1900 a population of 133,859, representing an increase during the last ten years of 27,146, or 25.4 per cent. Pueblo had a little more than 600 inhabitants in 1870 and less than 3,500 in 1880, but its population had increased in 1890 to 24,558 and in 1900 to 28,157, showing an increase from 1890 to 1900 of about 15 per cent.

Millau Cols Errico

Director of the Census.

CENSUS BULLETIN.

No. 15.

WASHINGTON, D. C.

November 16, 1900.

POPULATION OF HAWAII BY ISLANDS AND DISTRICTS.

This bulletin, prepared under the direction of Mr. William C. Hunt, chief statistician for population, gives the aggregate population of Hawaii by islands and districts, according to the official count of the returns of the Twelfth Census, taken as of June 1, 1900.

The Hawaiian Islands were annexed to the United States by the Act of Congress approved July 7, 1898, which act took effect in Hawaii August 12, 1898. The Act of Congress approved April 30, 1900, made provision for a territorial government, and under this act Mr. Sanford B. Dole, formerly President of the provisional government, took the oath of office as Governor on June 14, 1900.

The first census of the Hawaiian Islands was taken in 1832, and was followed by censuses in 1836, 1850, 1853, and 1860. These censuses are said to have been very simple and rudimentary in character, and a census taken at regular periods was not provided for until 1865, when the Legislative Assembly made it "the duty of the Board of Education, every sixth year, counting from the year 1860, to make a complete census of the inhabitants of the Kingdom, to be laid before the King and Legislature for their consideration."

Under the terms of this requirement a census of the Hawaiian Islands was taken every six years from 1866 to 1896, inclusive. The present census, that of 1900, has been taken as a part of the work of the Twelfth Census of the United States, the Director of the Census having been authorized and directed by section 7 of the census act to make suitable provisions for the enumeration of the population and products of the Hawaiian Islands, and to employ for the purpose either supervisors and enumerators or special agents, as he should deem necessary.

The census of Hawaii was accordingly taken by special agents, under the supervision of Mr. Alatau T. Atkinson, as chief special agent, Mr. Atkinson having previously served as the general superintendent of the Hawaiian census in 1896.

(CP 15M)

The census of Hawaii in 1900, as previously stated, was taken as of June 1 of that year, but the censuses from 1866 to 1896, inclusive, were taken as of different dates as follows: 1866—December 7; 1872—December 27; 1878—December 27; 1890—December 28; 1896—September 27. No information is available concerning the dates as of which the censuses prior to 1866 were taken. Table 1 shows the population of Hawaii at each census from 1832 to 1900, inclusive, together with the number and per cent of increase (or decrease) during each census period.

TABLE 1.—POPULATION OF HAWAII: 1832 TO 1900.

		INCREASE.			
GENSUS YEARS.	Population.	Number.	Per cent.		
1900	154,001	44, 981	41.2		
1896	109,020	19,030	21.1		
1890	89,990	9,412	11.6		
1884	80,578	22, 593	38.9		
1878	57, 985	1,088	1.9		
1872	56, 897	16,062	19.6		
1866	62, 959	16,741	19.6		
1860	69,700	13,438	14.7		
1853	73, 138	111,027	1 13.1		
1850	84, 165	124,414	1 22,4		
1836	108, 579	121,734	1 16.6		
1832	1 30, 313				

¹ Decrease.

The first census of the Hawaiian Islands, taken in 1832, showed a population of 130,313, but each succeeding census up to and including 1872 showed a loss, the census returns in 1872 giving a population of only 56,897, representing a loss since 1832 of 73,416, or 56.3 per cent.

The census of 1878 showed only a slight increase over that of 1872, but during the next six years the population increased rapidly, and the census of 1884 showed a population of 80,578, or an increase since 1878 of very nearly 39 per cent. From 1884 to 1890 the population of the islands increased 11.6 per cent and from 1890 to 1896, 21.1 per cent, giving a population in 1896 of 109,020. During the four years from 1896 to 1900 the percentage of increase has nearly doubled, the present census showing a population of 154,001, representing an increase over that reported in 1896 of 44,981, or 41.2 per cent. During the last ten years, from 1890 to 1900, or substantially the same interval as for the census of the United States proper, there has been an increase in population of 64,011, or 71.1 per cent.

The total land surface of the Hawaiian Islands is, approximately, 6,449 square miles, the average number of persons to the square mile at the last three censuses being as follows: 1890, 18.9; 1896, 16.9; 1900, 28.8.

Table 2 shows the population of Hawaii in detail by islands at each census from 1866 to 1900, inclusive, while table 3, which immediately follows, shows, for each island or group of islands, the increase (or decrease) by number and per cent during each period.

TABLE 2.—POPULATION OF HAWAII IN DETAIL BY ISLANDS: 1866 TO 1900.

¹ Decrease.

This table shows that all the islands have increased materially in population since 1890, with the exception of Molokai and Lanai islands which show a combined loss of 11.3 per cent. The largest percentage of increase reported is 87.5 for Oahu island, in which the city of Honolulu is situated.

Table 5 shows, for each census from 1866 to 1900, inclusive, the population of Hawaii by districts, certain of the islands being divided into districts, equivalent to the minor civil divisions of which the counties of the United States are composed.

The city of Honolulu is coextensive with the district of Honolulu, in Oahu island, and is practically the only city waii. Table 6 shows the population of Honolulu from 1866 to 1900, inclusive, together with the increase by er and per cent during each census period.

TABLE 6.-POPULATION OF HONOLULU: 1866 TO 1900.

		INOREASE.			
OENSUS YEARS.	Population.	Number.	Per cent.		
1900	89, 806	9,386	31.3		
1896	29,920	7,018	30.6		
1890	22,907	2, 420	11.8		
1884	20, 487	6, 373	45.1		
1878	14, 114	1 738	14.9		
1872	14,852	1,831	9.8		
1866	13,521				

1 Decrease.

The population of Honolulu in 1866 was 13,521, as compared with a population in 1900 of 39,806, or an increase actically threefold in 34 years. The largest percentage of increase during any one period was 45.1 from 1878 34.

Ionolulu had a population in 1890 of 22,907, showing an increase from 1890 to 1900 of 16,309, or 71.5 per cent.

CENSUS BULLETIN.

No. 16.

WASHINGTON, D. C.

November 20, 1900.

POPULATION OF FLORIDA BY COUNTIES AND MINOR CIVIL DIVISIONS.

This bulletin, prepared under the direction of Mr. William C. Hunt, chief statistician for population, gives the aggregate population of Florida by counties and minor civil divisions, according to the official count of the returns of the Twelfth Census, taken as of June 1, 1900.

Florida was organized as a territory March 30, 1822, and admitted as a state March 3, 1845. Table 1 shows the population of Florida at each census from 1830 to 1900, inclusive, together with the increase by number and per cent during each decade.

61374745 7177 A 119	Population.	INCREASE.			
CENSUS YEARS.	Population.	Number.	Per cent.		
1900	528,542	137, 120	35.0		
1890	391,422	121,929	45, 2		
1880	269,493	81,745	43.5		
1870	187,748	47,324	33.7		
1860	_ 140,424	52,979	60.5		
1850	87,445	32,968	60.5		
1840	_ 54,477	19,747	56.8		
1830	34,730		~		

TABLE 1.—POPULATION OF FLORIDA: 1830 TO 1900.

The population of the state in 1900 is 528,542 as compared with a population of 391,422 in 1890. This shows an increase during the ten years of 137,120, or 35.0 per cent, as against an increase of 45.2 per cent from 1880 to 1890 and of 43.5 per cent from 1870 to 1880. Florida had a population in 1830 of 34,730 and each succeeding census to 1860 showed an increase of more than 50 per cent, the total population of the state in 1860 being 140,424. From 1860 to 1870 the population increased only 33.7 per cent, this being the smallest rate of increase shown for any decade.

The population of Florida in 1900 is more than fifteen times as large as the population given for 1830, the first census taken after its organization as a territory in 1822.

The total land surface of Florida is, approximately, 54,240 square miles, the average number of persons to the square mile at the censuses of 1890 and 1900 being as follows: 1890, 7.2; 1900, 9.7.

Table 2 shows the population of Florida by counties at each census from 1830 to 1900, inclusive, while table 3, which immediately follows, shows, for each county, the increase (or decrease) by number and per cent during the ten years from 1890 to 1900.

The only territorial change which has been made in the counties of Florida since 1890 is that part of Pasco has been annexed to Polk.

Of the 45 counties in the state all but 3 show increases in population since 1890, and 6 counties show over 100 per cent of increase, namely Dade, 475.4 per cent; Calhoun, 205.2 per cent; Hillsboro, 141.0 per cent; Citrus, 125.1 per cent; Lee, 117.1 per cent; and Liberty, 103.5 per cent.

The 3 counties showing a decrease in population are Lake, Monroe, and Orange.

Table 4 shows the population of Florida by minor civil divisions, so far as it was separately returned at the censuses of 1890 and 1900.

(CP 15M)

Of the above named 92 incorporated places there are only 14 that have a population in 1900 of more than 2,000, and of these only 4 have a population in excess of 5,000, namely, Jacksonville, with 28,429; Pensacola, with 17,747; Key West, with 17,114; and Tampa, with 15,839 inhabitants.

Part taken to form part of precinct 12 since 1890.
 Precinct 14 organized from part of precinct 5 since 1890.
 Precinct 18 organized from part of precinct 6 since 1890.
 Organized from parts of precincts 1 and 4 since 1890.
 Organized from parts of precincts 1 and 2 since 1890.

Jacksonville is the only city in Florida that has a population in 1900 of more than 25,000, and for this city a summary is presented in table 6, showing its population from 1850, the first year in which it is separately stated in the census report, to 1900, inclusive, together with the increase by number and per cent during each of the ten-year periods.

TABLE 6.—POPULATION OF JACKSONVILLE: 1850 TO 1900.

CENSUS YEARS.	Population.	INCR	EASE.
CEMBUS 1 EARS,	ropuission.	Number.	Per cent.
1900	28, 429	11,228	65, 2
1890	7,650	9, 551 738	124.8 10.6
1870	6,912 2,118	4,794 1,078	226.3 102.6
1850	1,045		

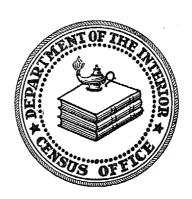

This summary shows that the population of Jacksonville, starting with 1,045 in 1850, increased to 6,912 in 1870, to 17,201 in 1890, and to 28,429 in 1900. There has been an increase since 1890 of 11,228, or 65.2 per cent, as compared with an increase from 1880 to 1890 of 9,551, or 124.8 per cent.

Director of the Census.

Twelfth Census of the United States BULLETIN No. 17

DOMESTIC ANIMALS IN BARNS AND INCLOSURES, NOT ON FARMS OR RANGES

Statistics of Agriculture

WASHINGTON CENSUS OFFICE

EXPLANATORY NOTE.

The geographical groups of states used in the following bulletin are those established by the Eleventh Census. The divisions of the United States included in each group are as follows:

North Atlantic division; Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont.

South Atlantic division; Delaware, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, West Virginia.

North Central division; Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, Wisconsin.

South Central division; Alabama, Arkansas, Indian Territory, Kentucky, Louisiana, Mississippi, Oklahoma, Tennessee, Texas. Western division; Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming.

CENSUS BULLETIN.

No. 17.

WASHINGTON, D. C.

November 23, 1900.

DOMESTIC ANIMALS NOT ON FARMS OR RANGES.

This bulletin has been prepared under the direction of Mr. Le Grand Powers, chief statistician for agriculture. It presents the results of one part of the special inquiries relating to live stock, authorized by Congress, in an Act, amendatory to the law relating to the Twelfth Census, approved February 1, 1900.

By that amendment the census authorities were directed to collect statistics, not authorized by the original Act, relating to two classes of domestic animals. The first class consists of live stock upon the unfenced public domain or ranges, of the West and South; the second, of domestic animals not located on what are popularly known as farms or ranges. In the second class are included all domestic animals in cities, towns, and villages; in stock yards; all employed in manufacturing, lumbering and mining industries, and kindred enterprises; and all used for pleasure or profit by individuals other than farm proprietors.

In this bulletin are presented statistics of the animals in the second class. Similar statistics have never before been collected in the United States. In the census of 1860, the assistant marshals who collected the census data were requested, each in his own subdivision, to prepare, in the course of the enumeration, estimates of the number of animals of each recognized class not found upon farms. The request, it appears, was quite generally complied with. The results will be found upon page 192 of the agricultural volume for that census. In 1870, the Superintendent of the Census, as he states in his report, sought to place himself in possession of all statistical data of a positive character obtainable upon the subject, and upon the basis of such data made estimates of the number of horses and neat cattle not on farms. The results are given on page 75 of the agricultural volume for that census.

In table 5 of the present bulletin is found a summary, by states and territories, of horses and neat cattle reported by the enumerators in 1900, and also of the corresponding estimates made in 1860 and 1870. A careful study of the table will demonstrate the fact that the estimates of 1860 and 1870 were far from accurate. The estimates for horses were, however, more nearly correct than those for neat cattle.

The enumerators generally reported animals on farms on the regular farm schedule, and other live stock on a specially prepared schedule, although in a few instances some animals were reported on one schedule that should properly have been on the other. These errors, however, are purely formal, and are generally easily detected. Most of the reports of animals, which were improperly made on the schedule for live stock not on farms or ranges, have been transferred to their proper places. The reports improperly made on the regular farm schedules cannot, however, be corrected until all those schedules have been prepared for tabulation. It was deemed unwise to delay, for several months, the publication of these tables in order to include the further statistics to which reference has just been made.

The aggregate number of barns or inclosures reporting domestic animals not on farms or ranges, June 1, 1900, was 1,878,207. This was substantially one-third of the total number of farms at the same time in the United States. Of these barns and inclosures, 784,560 contained neat cattle; 1,855,636, horses; 51,808, mules; 6,522, asses and burros; 7,564, sheep; 452,928, swine; and 21,527, goats. The number of various kinds of domestic animals in these barns and inclosures was reported as follows: Neat cattle, 1,466,970; horses, 2,833,877; mules, 162,115; asses and burros, 12,870; sheep, 156,470; swine, 1,592,861; and goats, 47,652.

(CP 15 M)

Detailed reports are made of all these animals under the classification adopted for the Twelfth Census. The results are given in table 1, for the states and territories; in table 2, for the various cities and groups of cities containing over 25,000 inhabitants; and in table 3 for the counties. Table 4 presents for the states and territories the average number of animals in an inclosure; table 6 gives the number of the various animals for each 100,000 inhabitants in the cities for which statistics are printed in table 2; and table 7 is an exhibit of the percentages of inclosures with the various kinds of animals.

As can be seen by a glance at table 4, the average number of neat cattle to an inclosure is smallest in the North Atlantic states and largest in the South Central. In the former it is 1.6 and in the latter 2.5. In the North Atlantic and North Central states there is very little variation in the average number of animals to a barn or inclosure. That average varies from 1.5 to 1.8, with the single exception of Illinois, in which the average is 2.3. The higher average of Illinois is due to the presence in Chicago of stock yards, and in Peoria of extensive feed yards. Of the individual states, Florida reports the largest number of neat cattle to an inclosure. This is 3.6. Louisiana comes next with 3.5; Mississippi and Indian Territory follow with 3.2; Arkansas, 2.9; New Mexico and Colorado, 2.8; Alabama, 2.7; and Texas, 2.5. In the states and territories just mentioned, and to a certain extent in all of the South Atlantic, South Central, and Western states, many animals graze at large upon unfenced land, which is usually spoken of in the West as a "range." All the larger herds and flocks of this kind were reported either on the regular farm schedules or on the special schedule for live stock on ranges, or have been transferred thereto in the tabulation of the data printed in this bulletin. Many smaller herds and flocks of this description reported by the enumerators on the schedule for live stock not on farms or ranges, have not been transferred. When the probable income derived from the animals thus kept was insignificant, they were allowed to remain on the schedules as reported. The existence of these small flocks and herds, most of the time running at large, is a cause of the high average number of neat cattle to an inclosure shown by the accompanying table, in the states and groups of states mentioned. Excluding them, the relative number of neat cattle kept in barns or fenced inclosures is doubtless about the same in the Southern and Western states as in the other great divisions. The average number of neat cattle to an inclosure is smaller in group C, cities of 25,000 to 50,000 inhabitants, than in either of the other groups of cities, or in the United States as a whole. In the smaller cities it approximates 1.7; in the country it is 1.9. For the group of cities containing 50,000 to 100,000 inhabitants each, the average is 2.7, while for the largest cities it is 3.0.

The average number of horses to a barn or inclosure, is lowest in the South Central and highest in the North Atlantic states. In the former it is 1.8, and in the latter 2.4. This is the reverse of the relative figures for neat cattle. This variation is doubtless due to the greater value of land in the larger cities and to the urban sanitary regulations adopted with reference to the keeping of live stock. Both of these factors tend to concentrate the keeping of animals in cities in fewer inclosures as the cities increase in size. This is seen by noting the averages for inclosures containing horses in Manhattan borough and the large cities. For Manhattan borough the average is 19.9; Brooklyn, 4.8; Boston, 7.7; and Philadelphia, 4.7; while that for the country is only 2.1.

The average number of mules to an inclosure is smallest in the North Central and South Central states, in both of which it is 2.7. It is largest in the North Atlantic division, where it is 7. This high average in the last mentioned division is caused by the large number of mules kept in connection with the mines of Pennsylvania.

The sheep tabulated in this bulletin are largely those reported in connection with stock or feed yards in the various parts of the country. They also include a few of those kept on June 1 by individuals who own farms, and at certain seasons of the year have the animals running at large on unfenced land. The grazing of small flocks on unfenced land is quite common in some of the Gulf states of the South. The location of the animals reported accounts for the large average number of sheep to an inclosure. It ranges from 13.2 in the Western states to 31.9 in the North Central. The high averages for Alabama, 42.0; Florida, 40.7; and Georgia, 59.2, represent the average size of the flocks running at large in those states; those for Illinois, New York, Ohio, and Indiana, and for cities containing over 100,000 inhabitants represent sheep kept in feed yards, or in stock yards for slaughter.

Florida reports the largest average number of swine to an inclosure, which is 8.3. That state has many swine running at large. The existence of similar herds in some other states of the South accounts for the other high state averages in that section, and also that of the South Central division as a whole. Stock yard interests give a corresponding average to Illinois and the North Central states.

Goats are more numerous actually and relatively in the South Central division than in the other portions of the United States. In that division the average number reported to an inclosure is 3.9, while in the North Atlantic it is

The number of different kinds of animals to an inclosure presents but little variation in the several divisions of the country. It is smallest in the North Atlantic states, where it is 1.3, and largest in the South Central, where it is 1.7. In general it is smallest in states in which there is large urban population, and largest in states or territories in which there are no great cities. It is only 1.1 in the cities containing over 50,000 inhabitants; 1.2 in cities containing between 25,000 and 50,000 inhabitants; and 1.5 for the remainder of the United States.

The number of all kinds of domestic animals proportioned to population exhibits in the different states and cities a great variation, as can be seen by a glance at table 6. Most of those variations are due to local causes and conditions. There are, however, certain general causes, among which the most important is the size of cities. Horses, mules, and neat cattle, including dairy cows, are least numerous in the larger cities and most numerous in the smaller ones. Sheep and swine are, however, relatively more numerous in the larger cities than in the smaller. Their greater number is due to the location, in cities like Chicago, of large stock yards and packing houses.

In this connection attention is called to the fact that the most important variation in the work of the local enumerators is found in their reports of dairy cows. Some enumerators quite generally reported them upon the regular farm schedule, and others upon the specially prepared schedule for live stock not on farms. This variation in the methods of work followed by the various enumerators is not of a character to lessen the reliability of the totals reported upon the two schedules. It does modify that obtained by tabulating the data secured on either one of the two schedules. Thus the large relative number of dairy cows given in table 6 for some cities is, doubtless, in part caused by the fact that the enumerators for those cities reported many cows upon the schedules for live stock not on farms which should have been given upon the regular farm schedules. The small relative number of cows in some other cities is also doubtless due to the reverse error. These variations caused by different methods of reporting will all disappear when the results obtained by tabulating the data of the two schedules are combined in the final report of the census. When that is done there will remain only the variations first mentioned—those caused by the size of cities and by the amount of suburban territory within their corporate limits. The above remark with reference to dairy cows will apply, though with less force, to all the other domestic animals reported in these tables.

Attention has been called to the fact that the various enumerators differed in their judgment as to what animals should be reported upon the regular farm schedules and what upon the other schedules. The census of 1900 differs in this respect from those of preceding decades in one particular only. In other decades when an enumerator decided that a given place was not a farm, he made no report of its animals, the land upon which they were kept or the crops raised upon that land. As a result, there were omissions and improper reports upon the regular farm schedules, as in the Twelfth Census. Of the animals improperly omitted from the farm schedule, there was in preceding decades no report of any kind. In the census of 1900 it is otherwise. The animals not reported upon one schedule as the result of an error of judgment on the part of the enumerator, are generally included upon the other. The only omissions found in the combined work are those which are the result of the positive carelessness or neglect of the men or women appointed to gather the necessary data.

For cities with over 100,000 inhabitants, as can be seen by table 6, Kansas City and Memphis report the largest relative number of horses and mules, respectively; Chicago, the largest relative number of sheep; Indianapolis, of swine; and New Orleans and Milwaukee, of goats.

Table 7 presents for certain cities, groups of cities, and the larger divisions of the country, an exhibit of the relative number of barns and inclosures in which the various domestic animals are kept. Those percentages show how a densely populated city has relatively very few of these barns containing domestic animals other than horses. In cities with large suburban areas within their corporate limits, the relative number of inclosures with horses is much less, and that of inclosures with neat cattle is greater. Thus the percentage for inclosures with horses in Manhattan is 97.9, while in Brooklyn it is 96.4; in Greater New York it is 98.3; Cincinnati, 88.0; and in Richmond borough of New York, it is only 84.8. The corresponding percentage for inclosures with neat cattle is for Manhattan, 1.9; Brooklyn, 4.2; Greater New York, 8.4; Cincinnati, 14.1; and for Richmond borough, 28.9.

For cities containing over 100,000 inhabitants, the percentage for horses is 90.1, and for neat cattle, 12.5. In cities with over 50,000 and under 100,000 the percentage for horses was 84.7, and for neat cattle 22.6. In those with over 25,000 and under 50,000 it was, for horses 84.4, and for neat cattle 25.4. In the territory outside of cities with over 25,000 the percentage for horses was 69.0 and for cattle 46.6.

In cities with over 100,000 inhabitants, the relative number of barns or inclosures in which swine are kept is expressed by the percentage 1.0, while in the territory outside of the cities of over 25,000 inhabitants, that percentage is 28.5. The relative numbers for goats are the reverse of those for swine. The percentage of inclosures with goats for the largest cities is 3.2, while in the territory outside of cities it is only .8. In a few cities the relative number of inclosures with goats is quite large. Such is the case with Queens borough of Greater New York, in which it is 10.7.

Subdivisions B and C of table 7 illustrate quite forcibly some of the factors which determine the relative number of inclosures containing various kinds of animals. Subdivision B presents by geographical divisions the percentages for the inclosures with various kinds of animals in the cities with over 25,000 inhabitants. Subdivision C gives in like manner the percentages for the territory exclusive of those cities. The percentages of inclosures with horses are large in the cities, and smaller in the town and country districts. The percentages of neat cattle and swine vary in the opposite manner.

¹ Cities of over 100,000 inhabitants. ² Cities of over 50,000 and less than 100,000 inhabitants.

Cities of over 25,000 and less than 50,000 inhabitants.
 Less than one-tenth of one per cent.

Attention is again requested to the fact mentioned in the introduction to this bulletin, that certain enumerators reported domestic animals on the regular farm schedule, which should have been reported upon the schedule for live stock not on farms or ranges. The foregoing tables must, in consequence, be regarded as in a measure provisional. At the present stage of work in the Census Office, it is impossible to detect and include all such cases, and all, therefore, have been omitted. When that work has been completed, the Census Office will publish a supplemental table regarding the animals not on farms or ranges, but returned on the farm schedule. This will include, in addition, live stock in transit June 1, 1900, and not reported by the enumerators, together with animals in the stock and feed yards of certain cities, such as Jersey City, St. Louis, and Kansas City, which were also omitted by the enumerators.

Millian Coll Erricons.

Director of the Census.
