Letter of transmittal of chief statistician for agriculture to the Director of the Census .......................................................... xi

STATISTICS OF AGRICULTURE.

INTRODUCTION ............................................................................ xii-xvi
Law authorizing census ............................................................ xiii
Schedules and enumeration .................................................... xiii
Definition of the word "farm" as used in census reports ........... xiii
Relation of the statistics of agriculture to those of population .. xv
Arrangement of data by geographic divisions ...................... xvi

Agricultural progress of fifty years ....................................... xvi-xxxv
Increase in the number of farms ........................................... xvi
Increase in farm acreage ....................................................... xlviii
Average size of farms .......................................................... xxl
Increase in improved farm land ............................................ xxii
Increase in value of farm property ....................................... xxiii
Capital invested in agriculture compared with that in manufactures xxiv
Increase in value of farm land ............................................. xxv
Value of implements and machinery on farms .................... xxix
Value of live stock on farms ................................................. xxxi
Relative values of land and buildings, implements and machinery, and live stock xxxiv

Buildings on farms .............................................................. xxxvi-xxxxvii
Value of buildings ............................................................. xxxvi
Average values of land and buildings .................................... xxxvi
Changes in the center of agriculture in the United States........ xxxvii-xli
Westward movement of agriculture ..................................... xxxvii
Methods of determining centers and median points ............. xxxix
Position of centers and median points ................................... xl

Classification of farms .......................................................... xlii-xliii
Classification by area .......................................................... xlii
Classification by principal source of income ....................... xliii
Classification by reported value of products of 1899 not fed to live stock xliv
Classification by tenure ......................................................... xliii
Classification by color or race of farmer ............................... xlix

Farms classified by area ........................................................ xliii-lix
Farms of specified area, by geographic divisions ................. xliii
Changes in twenty years in the size of farms ...................... xlii
Farms of specified area, classified by other characteristics ... xli
Acreage of farms of specified area ..................................... xlix

Geographic distribution of farms by average size ................. 1
Property of farms of specified areas ................................... 1
Land and buildings of farms of specified areas .................. 1

Implements and machinery, and live stock on farms of specified areas ................................................................. li

Farms classified by principal source of income ..................... lii-liv
Number of farms of specified principal sources of income, by geographic divisions lii
Farms of specified principal sources of income classified by other characteristics liv
Areas of farms of specified principal sources of income lv
Property of farms of specified principal sources of income lvii
Buildings, implements and machinery, and live stock, of farms of specified principal sources of income lviii

Farms classified by reported value of products of 1899 not fed to live stock lx
Character of farms with no reported income ......................... lxi
Number of farms of specified incomes, by geographic divisions lxii
Farms of specified incomes, classified by other characteristics lxiii
Acreage and value of farms of specified incomes ................ lxiv
CONTENTS—PART I.

STATISTICS OF AGRICULTURE—Continued.

Introduction—Continued.

Farmers classified by tenure ........................................... lxvi-1xxv
- Farms of specified tenures, by geographic divisions .................. lxvi
- Farms of specified tenures, classified by other characteristics .......... lxvii
- Tenure of farms and of farm families compared ........................ lxviii
- Changes of twenty years in farm tenure ................................. lxxvii
- Changes in farm population and farm tenure ............................ lxxviii
- Farm tenure and age of farmers ......................................... lxxx
- Acreage of farms of specified tenures ................................... lxxxi
- Value of farms of specified tenures ..................................... lxxxii
- Statistics of farms of mixed tenures ..................................... lxxxiv

Ownership of rented farms ................................................. lxxxv-xlil
- Sources of information and methods of work ............................. lxxxv
- Number, acreage, and value of rented farms ............................ lxxxvi
- Rented farms classified by number of farms possessed by individual owners lxxxvii
- Rented farms of individual owners classified by area ................... lxxxix
- Rented farms of individual owners classified by value ................ xci

Farmers classified by color or race of farmer .......................... xcd-xlxx
- Number of white and colored farmers, by geographic divisions ...... xcdii
- Farms operated by farmers of specified race classified by other characteristics . xcdv
- Number and character of farms operated by white farmers .......... xcdvii
- Number and character of farms operated by negro farmers .......... xcdviii
- Farms operated by negroes classified by other characteristics ..... xcdix
- Number and character of farms operated by Indian farmers ......... xcdx
- Number and acres of farms operated by Chinese, Japanese, and Hawaiian farmers xcdxi

Value of farm products in 1899 ............................................ cxx-cxxvii
- Imperfections of former census reports ................................. cxx
- Value of animal products ............................................... cxxi
- Value of crops ................................................................... cxxii
- Incompleteness of the report of farm products .......................... cxxiii
- Value of all farm products by states and territories .................... cxxiv
- Products of farms of specified groups ................................... cxxv
- Additions to farm wealth ................................................... cxxvi

Farm labor ................................................................. cxxvii-cxxxv
- Expenditures for labor in 1899 ............................................ cxxviii
- Income from farm labor ..................................................... cxxix
- Farm machinery, animal power, and farm income ....................... cxxx
- Farm labor and horses on farms of specified groups ................. cxxxiii
- Labor and horses on American and European farms .................. cxxxiv
- Labor in agriculture and in manufactures ................................ cxxxv

Fertilizers ................................................................. cxxxvi-cxliii
- General use of fertilizers .................................................. cxxxvi
- Crop rotation ................................................................. cxxxvii
- Increase in farm expenditures for fertilizers ........................... cxxxviii
- Geographic distribution of expenditures for fertilizers .......... cx
- Expenditures for fertilizers on farms of specified groups ........... cxli

Domestic animals ........................................................... cxl-xlvi
- Methods of enumeration, classification, and number ................... cxlili
- Domestic animals not on farms or ranges ................................ cxlili
- Domestic animals on military reservations ................................ cxliv
- Domestic animals on farms of specified areas ........................ cxlvi
- Domestic animals on farms of specified principal sources of income .......... cxlv

Value of domestic animals: 1880 to 1900 ................................ cxlv
- Livestock farms ............................................................. cxlvii

Meat cattle ................................................................. ccl-clxxv
- Introduction into the United States ..................................... ccl
- Improvement of stock by importations of pure-bred cattle ........... ccl
- Classification of meat cattle ............................................. ccl
- Number of meat cattle in 1900 .......................................... ccl
- Steers ........................................................................... ccl
- Number ................................................................. ccl
- Recent changes in the age for marketing fattened steers ............. ccl
- Cows and heifers .......................................................... ccl
- Number ................................................................. ccl
- Average life of dairy cows ................................................. ccl
- Relative numbers of cows and heifers and other cattle ............... ccl
CONTENTS—PART I.

Horses—Continued.

Improved breeds of horses................................................. cxci
Horses and farm machinery.............................................. cxxi
Horses on farms classified by area..................................... cxxi
Horses on farms of specified principal sources of income........ cxxi
Horses on farms of specified tenures.................................. cxxi
Horses on farms of white and colored farmers...................... cxxi
Increase in number of horses since 1890................................. cxxii

Asses and burros.............................................................. cxev–cxvii
Number and value of asses................................................ cxxv
Asses and burros on farms of specified tenures, areas, and principal sources of income.......................................................... cxxvi
Asses and burros on farms of white and colored farmers............ cxxvi
Number of asses and burros by states and territories: 1890 and 1900 cxxvii

Mules............................................................................ cxviii–cxl
Number and value of mules................................................ cxxxviii
Number of horses and mules to 100,000 acres of farm land........... cxxxviii
Mules on farms of specified areas....................................... cxxxix
Mules on farms of specified principal source of income............. cxxxix
Mules on farms of specified tenures.................................... cxxxix
Mules on farms of white and colored farmers.......................... cxxxix
Number of mules by geographic division................................. cxxxix

Sheep and wool.................................................................. ccii–ccxvii
Early history of the sheep industry in the United States............. ccii
Sheep and wool from 1810 to 1840......................................... ccii
Changes in the industry in the last half century...................... ccii
Number of sheep and lambs in 1900...................................... cciv
Classification of sheep by age and sex................................ ccciv
Range sheep as distinguished from farm sheep....................... ccciv
Character of farms keeping sheep, and size of flocks............... ccciv
Sheep on farms of specified areas...................................... ccciv
Sheep on farms of specified principal sources of income......... ccciv
Sheep industry on farms of specified tenures......................... ccciv
Race of farmers reporting sheep.......................................... ccciv
Total and average value of sheep and lambs in 1900.................. cccv
Lamb crop of 1909.......................................................... cccv
Number and value of sheep and lambs sold on farms and ranges in 1899 cccvi
Domestic wool supply........................................................ cccvi
Wool shorn fall of 1899 and spring of 1900............................... cccvi
Double shearing and average weight of fleeces......................... cccvi
Wool shorn from sheep sold for slaughter............................. cccvi
Possible erroneous reports of wool shorn............................... cccvi
Pulled wool................................................................. cccvii
Consumption of wool in 1900.............................................. cccvii
Statician of sheep and wool: 1850 to 1900............................... cccviii
Changes in location of flocks........................................... cccviii
Changes in wool clip since 1850......................................... cccviii

Goats and mohair.................................................................. cccxvi–cccxxviii
Angora goats........................................................................ cccxvi
Number of goats in 1900.................................................... cccxvi
Goats on farms classified by area, principal source of income, tenure, and race of farmer.................................................. cccxvi
Mohair.................................................. cccxviii–cccxxi

Swine................................. cccxxi–cccxxviii
Origin of breeds in the United States..................................... cccxxi
Number and value........................................................ cccxxi
Swine on farms classified by area, principal source of income, tenure, and race of farmer.................................................. cccxxi
Number of swine in 1900 and in preceding census years compared cccxxi

Income from sales of live stock............................................. cccxxii–cccxxiii

Poultry and eggs.......................................................... cccxii–cccxxiii
Origin and breeds of domestic fowls................................... cccxiii
Improved poultry stock.................................................. cccxiii
Poultry raising.......................................................... cccxiii
Turkeys.......................................................... cccxiii
Ducks.......................................................... cccxiii
Geese.................................................. cccxiii
The producer and the market................................................ cccxiii
Diseases.................................................. cccxiii
Artificial incubation.................................................. cccxiii
Brooders.................................................. cccxiii
CONTENTS—PART I.

STATISTICS OF AGRICULTURE—Continued.

Introduction—Continued.

Poultry and eggs—Continued.

Poultry raising .......................................................... cxxxv
Cold storage ............................................................. cxxxvi
Cold storage and prices ................................................ cxxxvi
Location of storage houses .......................................... cxxxvii

Poultry on farms June 1, 1900 ....................................... cxxxvii
Value of poultry, June 1, 1900 ....................................... cxxxvii
Poultry on farms classified by area ............................... cxxxviii
Poultry on farms of specified principal sources of income ... cxxxviii
Poultry on farms by race of farmer and by tenure ........... cxxxviii
Value of poultry raised in 1899 .................................... cxxxix
Egg production in 1899 ................................................ cxxxix
Price of eggs .................................................................. cxxx

Unenumerated poultry not on farms ................................ cxxxx

Bees, honey, and wax .................................................... cxxxxi

History and products of the bee .................................... cxxxxi
Bees, honey, and wax, census of 1900 ............................. cxxxxii
Value of loss on farms of specified areas ....................... cxxxxii

Bees on farms of specified principal sources of income .... cxxxxiv
Value of loss on farms of white and colored farmers of specified tenure ............... cxxxxv

Preceding census reports ............................................... cxxxxv

GENERAL TABLES.

Farms............................................................................... 2-141

Table 1.—Farms, June 1, 1900, classified by color of farmer, and area, with average size in acres, by states and territories.. 2-3

Table 2.—Farms, June 1, 1900, of white and colored farmers, and of specified area, principal source of income, and value of products of 1899 not fed to live stock, classified by tenure, by states and territories. 4-17

Table 3.—Farms, June 1, 1900, of white and colored farmers, and of specified area, classified by principal source of income, by states and territories .................................................. 18-20

Table 4.—Farms, June 1, 1900, of white and colored farmers, and of specified area, tenure, and principal source of income, classified by value of products of 1899 not fed to live stock, by states and territories. 30-47

Table 5.—Per cent of all farms, June 1, 1900, in each of specified groups classified by tenure, value of products of 1899 not fed to live stock, principal source of income, and area, by states and territories ................. 48-49

Table 6.—Per cent of farms, June 1, 1900, of white farmers, in each of specified groups classified by tenure, value of products of 1899 not fed to live stock, principal source of income, and area, by states and territories. 50-51

Table 7.—Per cent of farms, June 1, 1900, of colored farmers, in each of specified groups classified by tenure, value of products of 1899 not fed to live stock, principal source of income, and area, by states and territories. 52-53

Table 8.—Per cent of farms, June 1, 1900, operated by white and colored farmers, respectively, in groups classified by tenure and area, by states and territories ........................................... 54-55

Table 9.—Per cent of farms, June 1, 1900, operated by white and colored farmers, respectively, in groups classified by value of products of 1899 not fed to live stock, and principal sources of income, by states and territories .......... 56-57

Table 10.—Farms, June 1, 1900, classified by acreage, tenure, and color of farmer, with averages and percentages, by counties ... 58-141

Farm areas, values, and expenditures ................................ 142-307

Table 11.—Number and acreage of farms, value of specified classes of farm property, value of products, and expenditures for labor and fertilizers, with averages, by states and territories .......................................................... 142-144

Table 12.—Classification, by tenure, of the number and acreage of farms, value of specified classes of farm property, value of products, and expenditures for labor and fertilizers, with averages, by states and territories .......................................................... 144-155

Table 13.—Classification, by tenure, for farms of white farmers, of the number and acreage of farms, value of specified classes of farm property, value of products, and expenditures for labor and fertilizers, with averages, by states and territories .......... 156-174

Table 14.—Classification, by tenure, for farms of colored farmers, of the number and acreage of farms, value of specified classes of farm property, value of products, and expenditures for labor and fertilizers, with averages, by states and territories .......... 175-180

Table 15.—Classification, by area, of the number and acreage of farms, value of specified classes of farm property, value of products, and expenditures for labor and fertilizers, with averages, by states and territories .......... 180-200

Table 16.—Classification, by principal source of income, of the number and acreage of farms, value of specified classes of farm property, value of products, and expenditures for labor and fertilizers, with averages, by states and territories .......... 200-205

Table 17.—Classification, by value of products not fed to live stock, of the number and acreage of farms, value of specified classes of farm property, value of products, and expenditures for labor and fertilizers, with averages, by states and territories .......... 205-230

Table 18.—Per cent of the number of farms, acres in farms, and value of specified classes of farm property, June 1, 1900, of the value of products and expenditures for labor and fertilizers in 1899, in groups of farms classified by color of farmer, tenure, value of products not fed to live stock, principal source of income, and area, by states and territories .......... 230-248

Table 19.—Number and acreage of farms and value of specified classes of farm property, June 1, 1900, with value of products of 1899 not fed to live stock, and expenditures in 1899 for labor and fertilizers, by counties .......... 248-300
## CONTENTS—PART I.

### GENERAL TABLES—Continued.

**Number, Acreage, and Value of Rented Farm.**

<table>
<thead>
<tr>
<th>Table</th>
<th>Description</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>20</td>
<td>Number and acreage, June 1, 1900, of farms of &quot;part owners&quot; and of &quot;owners and tenants,&quot; classified by color of farmer, by states and territories.</td>
<td>308-317</td>
</tr>
<tr>
<td>21</td>
<td>Rent of farms with owners reported, June 1, 1900, and owners of such farms, classified by residence of owners and by the states and territories in which farms are located.</td>
<td>308</td>
</tr>
<tr>
<td>22</td>
<td>Number, acreage, and value of rented farms, June 1, 1900, classified by residence of owners, by the states and territories in which farms are located.</td>
<td>309</td>
</tr>
<tr>
<td>23</td>
<td>Number, acreage, and value of rented farms with owners reported, June 1, 1900, classified by the number of farms held by individual owners, and by the states, territories, and foreign countries in which owners reside.</td>
<td>310-311</td>
</tr>
<tr>
<td>24</td>
<td>Number, acreage, and value of rented farms with owners reported, and the number of individuals, farms, or corporations holding title to such farms, June 1, 1900, classified by the number of acres owned, and by the states, territories, and foreign countries in which owners reside.</td>
<td>312-313</td>
</tr>
<tr>
<td>25</td>
<td>Number, acreage, and value of rented farms with owners reported, and the number of individuals, farms, or corporations holding title to such farms, June 1, 1900, classified by the value of the farms owned, and by the states, territories, and foreign countries in which owners reside.</td>
<td>314-315</td>

MAPS AND DIAGRAMS—PART I.

[The maps and diagrams are grouped at the end of the analytical text and immediately preceding the general tables.]

**Farms:**

- Center of the number of farms at each census: 1850 to 1900. Map. Plate 1.
- Center of the number of farms in 1900. Map. Plate 2.
- Average size of farms in 1900, by counties. Map. Plate 3.
- Total number of farms at each census: 1850 to 1900. Diagram. Plate 4.
- Average size of farms in 1900, by states and territories. Diagram. Plate 5.
- Average size of farms at each census: 1850 to 1900. Diagram. Plate 6.
- Number of farms in 1900 classified by tenure, by states and territories. Diagram. Plate 7.
- Proportion of the number of farms of different tenures: 1890 and 1900. Diagram. Plate 8.
- Percentages of the number of farms of specified tenures, variously classified. Diagram. Plate 9.
- Percentages of the number of farms of specified incomes, variously classified. Diagram. Plate 10.

**Land in Farms:**

- Center of the number of acres in farms at each census: 1850 to 1900. Map. Plate 11.
- Center of the number of acres in farms in 1900. Map. Plate 2.
- Proportion of improved land to total area in 1890, by counties. Map. Plate 5.
- Number of acres in farms of white and colored farmers in 1900, by states and territories. Diagram. Plate 7.

LETTER OF TRANSMITTAL.

DEPARTMENT OF THE INTERIOR,
CENSUS OFFICE,
Washington, D. C., June 14, 1902.

SIR:

I have the honor to transmit for publication Part I of the Report on Agriculture. This part, which constitutes Volume V of the census reports, relates to farms, live stock, and animal products. Part II, which constitutes Volume VI of the census reports, relates to crops and irrigation.

I am greatly indebted to Henry Gannett, the geographer of the census, for the maps and diagrams contained in this volume, all of which have been prepared in the division of geography under his supervision. I take pleasure also in acknowledging the assistance rendered, in revision and proof reading, by the division of methods and results, under the direction of Walter F. Willcox, chief statistician for that division.

Both Part I and Part II of the Report on Agriculture are now completed and ready for publication. By such completion, the division of agriculture complies with the provision of law directing the publication of the reports of the census, prior to June 30, 1902. The completion and publication of this work prior to that date, and within two years from the close of the work of the enumerators, has called for the employment of a very large number of clerks. In the direction of their work, as well as in planning the work of the division, invaluable assistance was rendered by my corps of assistants, consisting of H. T. Newcomb (chief of division until his resignation, April 8, 1901), Hart Monsen (present chief of division), W. H. Olcott, R. H. Merriam, Henry Farquhar, C. H. Prescott, F. M. Woodward, and C. B. Hurrey. I can not speak too highly of the zeal and devotion to duty manifested by every one of them, and also of the efficient and painstaking work of the large number of clerks who have been employed in the division. It is, therefore, a pleasure as well as a duty to make acknowledgment of my appreciation of the services rendered by them.

Very respectfully,

[Signature]

Chief Statistician for Agriculture.

HON. WILLIAM R. MERRIAM,
Director of the Census.
