## PRISONERS AND JUVENILE DELINQUENTS 1910

GENERAL TABLES

# LETTER OF TRANSMITTAL. 

DEPARTMENT OF COMMERCE,<br>Bureau of the Census,<br>Washington, D. C., December 20, 1918.

Sir:
I have the honor to transmit herewith certain general tables relative to prisoners and juvenile delinquents enumerated by the special census of these classes taken in the year 1910. This census included all persons confined under sentence in prisons, penitentiaries, jails, or workhouses, or other penal or reformatory institutions on January 1, 1910, and all persons committed under sentence to such institutions during the yenr 1910. A similar special census of prisoners and juvenile dolinquents was taken in the year 1904. The total number of prisoners and juvenile delinquents enumerated on January 1,1910 , was 136,472 , and the total number of commitments during the year 1910 was 493,934 . These totals include 24,794 inmates of reformatories for juvenile delinquents enumerated on January 1, 1910, and 14,147 persons committed to such institutions.

With one exception, the tables herewith submitted relate only to the prisoners or juvenile delinquents enumerated on January 1, 1910. It is, however, the intention of the burean to publish later in the final report on this subject similar tables relative to the commitments made during the year. The final report will include also tables of rates and percentages, designed to bring out the significance of the valuable data which have been obtained by this special census of prisoners.

By way of caution it, should be noted that the totals published in the special report on prisoners for the year 1904 are not directly comparable with those obtained at the census of 1910, bocause the latter includes a class of prisoners not included in the earlier census, namely, those imprisoned for nonpayment of fine. The question of the actual increase in prison population and commitmonts is one which will be taken up in the final report on this subject, where comparable figures will be presented.

The work of taking this census of prisoners and juvenile delinquents was conducted under the supervision of Dr. Joseph A. Hill, expert special agent in the Buraau of the Census, and the returns were tabulated by the division of agriculture.

Respectifully,

## 7nyygarris

Director of the Census.

## LIST OF TABLES.

Pago.
Table 1.-Prisoners and juvenile delinquents, 1910: Summary by individual institutions. ..... $x$
