1909

1899

* NO PRODUCTION
1. CHANGES IN ACREAGE OF ALL CEREALS, BY STATES: 1899–1909

2. ALL CEREALS—ACREAGE, BY STATES: 1909
1. Changes in Yield of Corn Crop Per Acre, by States: 1899-1909

2. Corn—Acreage, by States: 1909
1. WHEAT—ACREAGE, BY STATES: 1909

The heavy lines (---) show geographic divisions.

2. OATS—ACREAGE, BY STATES: 1909

The heavy lines (---) show geographic divisions.
1. COTTON—ACREAGE, BY STATES: 1909

The heavy lines (——) show geographic divisions.

2. FRUITS AND NUTS—VALUE, BY STATES: 1909

The heavy lines (——) show geographic divisions.
The following example will illustrate the manner of reading the chart:

To find the rainfall of Texas:

1. Begin with the extreme eastern portion of the chart, where the rainfall is low. Draw a line marked 20 inches over the state of Texas.
2. Draw another line marked 0.6 inches over the state of Texas, passing midway between the two lines. This line represents the rainfall in the state of Texas, which is about 30 inches per year.
3. Draw a line marked 0.2 inches over the state of Texas, passing midway between the two lines. This line represents the rainfall in the state of Texas, which is about 15 inches per year.
4. Draw a line marked 0.1 inches over the state of Texas, passing midway between the two lines. This line represents the rainfall in the state of Texas, which is about 7.5 inches per year.
5. Draw a line marked 0.05 inches over the state of Texas, passing midway between the two lines. This line represents the rainfall in the state of Texas, which is about 3.75 inches per year.

The amount of rainfall that falls in dry years ranges from 50 to 60 per cent of the normal; in very wet years the rainfall may be 100 to 150 per cent of the normal.
PER CENT OF TOTAL LAND AREA IRRIGATED, AND PER CENT OF NUMBER OF FARMS IRRIGATED, IN ARIZONA, BY COUNTIES: 1909
