

## INDEX TO OCCUPATIONS.

---

### INSTRUCTIONS FOR USING THE "INDEX TO OCCUPATIONS."

**Occupational designations and symbols.**—Each full return of an occupation, as "Farmer—general farm," is called an "occupational designation." Each occupational designation given in the "Index to Occupations" is divided into two parts or columns, corresponding with columns 18 and 19 of the population schedule. In the first column the occupation of the person is given, and in the second the industry or establishment in which the person works. Preceding each occupational designation is a "punch symbol" composed of four figures. The first two figures in each entire symbol stand for the occupation of the person, and are called the "occupation symbol;" the last two figures stand for the industry or business in which the person is employed, and are called the "industry symbol." For example, the symbol for "Cashier—bank" is 10-6-0-x. The "10-6" stands for "Cashier," the "0-x" for "bank."

Whenever the occupational designation given in the index is exactly the same as on the schedule, write the symbol preceding it.

**Industry index.**—Whenever the word "Index" is printed in place of the "industry symbol" and the letter "X" in place of the industry, look up the industry returned on the schedule, and its symbol, in the "Industry Index." Thus, suppose you find "Accountant—railroad (steam)" on the schedule. Referring to the "Index to Occupations," you find the "occupation symbol" for accountant to be "10-4." Turning to the "Industry Index," you find that the "industry symbol" for "Railroad (steam)" is "x-5," making the entire symbol to be written "10-4-x-5." Only the important industries are listed in the "Industry Index." The occupations in the other industries are enumerated in the occupation index. *An occupation symbol followed by the word "Index" does not mean that wherever the occupation following it occurs in any of the industries listed in the "Industry Index" it necessarily has this same symbol. All exceptions are listed in the*

occupation index, and it is necessary, therefore, that you should always consult the list given there before referring to the "Industry Index."

**Occupations not covered by index.**—In case the occupation returned on the schedule is not found in the occupation index or is not covered by the "Industry Index," refer the assignment of a symbol to your section chief.

**Use of dotted line.**—In general, whenever a dotted line, ".....," is used in the industry column of the occupation index in place of the industry or establishment, write the symbol given, regardless of what the return may be in column 19 of the schedule. Thus, "Actor," "Actor—theater," and "Actor—vaudeville," each should be given the same symbol, "0-0-6-x." In case, however, of an unusual or contradictory return, as "Artist—tonsorial," "Baker—dial," or "Doctor—dentist," determine the proper symbol from the evidence on the schedule.

**Use of parentheses.**—The terms given in parentheses in the industry column of the occupation index, such as "(any company)," "(any)," "(steam)," etc., usually will not be found in the corresponding column of the schedule. They are used to explain or qualify what immediately precedes them. Thus, in the occupational designation, "Agent—insurance (any)" the "(any)" signifies that every insurance agent is to be given the symbol "11-0-1-x," although one agent may be returned "Agent—life insurance," another, "Agent—fire insurance," another, "Agent—marine insurance," etc.

**Use of (N. S.)**—Many of the occupational designations are followed in the second column of the index by "(N. S.)," as, "Shearer—cloth (N. S.)." In other cases (N. S.) stands alone in the second column, as, "Sexton—(N. S.)." The "(N. S.)" in these cases means that the occupation is *not specified*, otherwise than as written in the index.

**Use of groups.**—For convenience a few occupations and a few industries or places of business have been given in the occupation index in groups. Examples are:

"Clergyman, minister, or rector."

"Pastor, preacher, or priest."

"Judge, justice, or magistrate."

"Mail or letter carrier."

"Merchant or dealer."

Learn these groups, and in writing symbols treat each member of a group as though it stood alone in the column. In case of the first group, for example, the symbol to be written is "0-4-6-x," whether the return on your schedule is "Clergyman," "Minister," or "Rector."

**Equivalent terms.**—A separate designation is not always given in the occupation index for each of the different ways of returning the

same occupation or industry. In the following cases—and in these cases only—you may write the symbols for equivalent terms:

Under "*Merchant or dealer (retail)*," the term "*store*" or the term "*seller*," when used in column 18, should be considered to be equivalent to "*merchant*" or "*dealer*."

The designations "*Farmer—general farm*," "*Farmer—farm*," "*Farmer—home farm*," "*Farmer—rented farm*," and "*Farmer—own farm*" are equivalents.

The designations "*Laborer—general farm*," "*Laborer—farm*," "*Laborer—farm hand*," "*Laborer—farm servant*," "*Helper—general farm*," "*Hired hand—general farm*," and "*Hired man—general farm*" are equivalents.

Distinct from the above, but equivalent to each other, are the terms "*Laborer—home farm*," "*Helper—home farm*," "*Hired hand—home farm*," and "*Hired man—home farm*."

The term "*Foreman (or overseer)—home farm*," is equivalent to "*Foreman (or overseer)—general farm*."

#### Other equivalents:

Alkali factory .....	Soda factory or works.
Boat-building company .....	Shipyards.
Bookkeeper (office) .....	Bookkeeper (N. S.).
Cartage company .....	Truck or transfer company.
Casket factory .....	Furniture factory.
Correspondent (any factory or store) ..	Clerk.
Drill hand .....	} ..... Driller.
Drill press (hand, operator, etc.) .....	
Drug manufacturing company .....	Chemical factory or works.
Gas fitter .....	} ..... Plumber.
Pipe fitter .....	
Steam fitter .....	
Lumber camp .....	Log camp.
Machine hand .....	} ..... All equivalents.
Machine operator .....	
Machine worker .....	
Machine tender .....	
Mill .....	} ..... All equivalents.
Works .....	
Factory .....	
Manufactory .....	
Motor car factory or works .....	Automobile factory.
Office work or worker .....	Clerk.
Pickle factory .....	Fruit cannery.
Sash and door factory .....	Planing mill.
Shipbuilding company .....	Shipyards.
Stenographer (office) .....	Stenographer (N. S.).
Table factory .....	Furniture factory.
White-lead company .....	Paint factory or works.

The symbols for the occupations of *employees* in *wholesale* and *retail stores* are the same *except for the managers and superintendents*. The managers and superintendents have the same symbols as the proprietors. In wholesale stores the symbol is "0-0-3-x". In retail stores the symbols vary with the kind of goods the stores deal in. See pages 162-164 of the index.

**Inverted forms.**—Where the return is correct, but reversed on the schedule—the industry or business being given in column 18 and the occupation in column 19—treat it as though it were written in proper form. Likewise, when an occupational designation is written in the inverted form in the occupation index, as "Fixer—looms," you may treat it as though it were written in the natural order as "Loom fixer."

**Participial forms of return.**—Treat participial forms of return, in column 18 of the schedule, as though they were the noun forms. For example, "Caning chairs" should be treated as though it were written "Caner, chairs," "Chopping—cross-ties" as though it were written "Chopper—cross-ties," "Farming—general farm" as though it were written "Farmer—general farm," etc. (See next paragraph.)

**Farmer or farm laborer.**—In every case in which a person is returned as a *farmer* or as a *farm laborer*, in column 18 of the schedule, determine from the evidence in the other columns whether or not the return is correct. Occasionally you will find that the head of the family has been returned as "Farm laborer—working out," as "Farm laborer—home farm," or as "Farm laborer—general farm," and that a farm schedule has been returned for him. In other cases you will find that a man who is not the head of the family and who has no farm schedule returned for him is returned as a "Farmer," in column 18. In both the above cases the evidence on the schedule is rather contradictory; but, while actual cases like the above are unusual, they are entirely possible. Therefore great caution must be used in such cases. If the enumerator seems not to have discriminated between "Farmer" and "Farm laborer" and to have thrown the farm workers indiscriminately into one class or the other, edit columns 18 and 19 according to the evidence in the other columns; but if the enumerator seems to have discriminated carefully between "Farmer" and "Farm laborer," accept his return of the occupation even though it is unusual.

**"Laborer odd jobs," etc.**—In case a person *living in an unincorporated place* (see heading of the schedule) is returned as "Laborer odd jobs," "Odd jobs," or "Working out," give him the symbol for farm laborer, unless it is evident that he is working in a railroad gang, a lumber camp, or at some other nonagricultural work.

**Children returned as farm laborers.**—A farm child 16 years of age or under who is enumerated with the home family and is

returned as a *farm laborer* should be considered as working on the *home farm* unless there is evidence to the contrary.

**Housekeeper.**—In case the wife of the head of the family, or the mother of a large family of minor children, is returned as "Housekeeper," give her the symbol "N. G.," unless there is evidence that she is working out. In case an adult woman, other than the wife, or the mother of a large family of minor children, is returned as "Housekeeper," and there is no evidence to the contrary, give her the housekeeper symbol (3-3-7-x). In case a young girl 18 years of age or under is returned as "Housekeeper," give her the symbol for a house servant (0-3-7-x), (unless there is evidence that she is simply doing housework at home, in which case give her the symbol "N. G.").

**Own income.**—If the return in columns 18 and 19 is "Own income," write the symbol for "Own income" (19-9-x-x). In case a farmer, merchant, or other person is returned as "Retired," or as having no occupation, consult columns 26 to 29. If you find that the person owns a farm or a home, write the symbol for "Own income" (19-9-x-x). If the person does not own a farm or a home, write "N. G." In case a person is returned as a "Pensioner," write "N. G.," regardless of farm or home ownership.

**Motor shops, and Railroad shops.**—An occasional enumerator has returned the *automobile factory* operatives as operatives in "motor" factories, and operatives in railroad roundhouses and repair shops as operatives in "railroad shops." Other enumerators give the name "motor" factories only to factories manufacturing motor engines, and the name "railroad shops" only to shops manufacturing railroad cars, etc. Refer all cases of persons returned as employed in "motor" factories, or in "railroad shops," to your section chief before assigning symbols.

**Two occupations for same person.**—Whenever two occupations connected by "and" are returned for the same person, as "Farmer and agent," "Editor and lawyer," treat them as though only the first-named occupation were given.

**Qualified occupations.**—Often a separate designation is not given in the index for a form of return differing from the more common form only by having a qualifying adjective. Thus, for example, "Laborer—*wire* nail factory," is not given a separate designation from "Laborer—nail factory," and should be given the same symbol; but great care must be exercised in all such cases. For example, "Driver, *logs*—log camp" and "Driver, team—log camp" are distinct and separate occupations and should be given separate symbols. However, qualified returns of bosses, foremen, overseers, managers, and superintendents—as "Overseer, *spinning room*—Cotton mill"—are to be treated in every case as though not qualified.

should

Overseer spinning room

**Prepositions "of," "in," "at," etc.**—Pay no attention to the preposition connecting the two words of an occupational designation in such returns as "Grader of lumber," "Laborer in cotton factory," "Clerk at post-office," etc.

**Distinctions to be observed.**—Be careful to distinguish between the following:

- A blast furnace or iron rolling mill and an iron manufacturing establishment;
- An iron foundry and a brass foundry;
- A railroad repair shop or roundhouse and a car shop;
- A wool or felt hat factory and a straw-hat factory;
- A tin-plate mill and a tinware factory;
- A steam railroad and a street railway;
- A person working in his "own shop" and one working in a factory;
- A locomotive engineer and a stationary engineer;
- A wholesale and a retail merchant or dealer;
- A jeweler in a jewelry factory and a jeweler in a watch factory;
- A farm laborer working on the home farm and a farm laborer working out.

**Not specified.**—In the index you will find enumerated both simple and qualified designations for "Employee," "Hand," "Maker," and "Worker." Following these enumerated designations you will find "Employee (N. S.)—X," "Hand (N. S.)—X," "Maker (N. S.)—X," or "Worker (N. S.)—X," as the case may be. The (N. S.) in these cases means that the occupational return in column 18 is simply "Employee," "Hand," "Maker," or "Worker" without further qualification, and that nothing is given in column 19 except the place in which the person works. The form of return referred to would be simply "Employee—cotton factory," "Hand—tobacco factory," etc. In case of such unqualified forms of return of employee, hand, maker, or worker, *always refer first to the enumerated designations.* If you fail to find the return there, consult the "Index" form of designation.

**"Not specified" railroad occupations.**—All *not specified* railroad occupations should be put under "x-5," steam railroad.

**"Not specified" hat factory occupations.**—All *not specified* hat factory occupations should be put under "2-6," wool or felt hat factory. But do not consider a "hat factory" not specified without first referring the cases to your section chief. Often he can determine whether it is a wool-hat factory or a straw-hat factory.

**"Not specified" mine workers.**—Do not put mine workers into the "Mine (not specified)" group, under the industry symbol "0-6," without first referring the cases to your section chief. Often he can determine the kind of mine.

## INDUSTRY INDEX.

SYMBOL.	INDUSTRY.
3-7	Agricultural implements.
x-x	Automobile factory.
2-8	Bakery (any bakery).
0-x	Bank.
4-3	Bicycle factory (or company).
