

POPULATION : CONNECTICUT

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Connecticut gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for towns of over 25,000 inhabitants; Table III for towns of 10,000 to 25,000; Table IV for towns of 2,500 to 10,000; and Table V for wards of cities of 50,000 or more.

A series of summary tables (numbered 1 to 16) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, it is desirable that the two classes be distinguished in presenting census data. The Bureau of the Census has undertaken to do this by classifying as urban the population of all incorporated places of 2,500 inhabitants or more. In New England, however, where many

villages of considerable size are not separately incorporated, it was deemed best to classify also towns of 2,500 or more inhabitants as urban, although this classification is not very satisfactory because such towns generally include more or less population that is essentially rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Connecticut, 395,649, or 35.5 per cent, are native whites of native parentage; 374,489, or 33.6 per cent, are native whites of foreign or mixed parentage; 328,759, or 29.5 per cent, are foreign-born whites; and 15,174, or 1.4 per cent, are negroes. The corresponding percentages in 1900 were 41, 31.1, 26.1, and 1.7, respectively, the proportion of native whites of native parentage having decreased during the decade. In each county of the state the foreign-born whites constitute a considerable proportion (from 24.5 to 31.7 per cent) of the population, and in each the percentage of native whites of foreign or mixed parentage exceeds that of foreign-born whites. (See maps on a following page.)

Of the urban population, 33.1 per cent are native whites of native parentage; of the rural, 56.4 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 34.9 and 22.3 per cent, respectively. The percentage of foreign-born whites is 30.6 in the urban population and 20.1 in the rural.

Sex (Tables 2 and 12).—In the total population of the state there are 563,642 males and 551,114 females, or 102.3 males to 100 females. In 1900 the population was about equally divided between the sexes. Among native whites the ratio is 96.8, and among foreign-born whites 116.7, to 100. In the urban population there are 101.7 males to 100 females, and in the rural, 107.8.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—77.3 per cent were born in Connecticut and 22.7 per cent outside the state; of the native white population, 22.1 per cent were born outside the state; and of the native negro, 50.7 per cent. Persons born outside the state constitute approximately the same proportion of the native population in urban as in rural communities.

Foreign nationalities (Tables 5 and 13).—Of the foreign-born white population, persons born in Ireland represent 17.8 per cent; Italy, 17.3; Russia, 16.5; Germany, 9.5; Canada, 8.1; Austria, 7.2; England, 6.8; Sweden, 5.5; Hungary, 4.2; Scotland, 2.1; all other countries, 4.9. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Ireland contributed 25.9 per cent; Italy, 12.8; Russia, 11.9; Germany, 11.1; Canada, 8.5; England, 7.5; Austria, 5.4; Sweden, 4.9; Hungary, 3.1; Scotland, 2.1; France, 0.7; Denmark, 0.7.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 347,692, representing 31.2 per cent of the population. Of such males, 34.4 per cent are native whites of native parentage, 20 per cent native whites of foreign or mixed parentage, 44.1 per cent foreign-born whites, and 1.4 per cent negroes. Of the 153,168 foreign-born white males of voting age, 60,608, or 39.6 per cent, are naturalized. **Males of militia age—18 to 44—number 257,996.**

Age (Tables 7, 8, and 14).—Of the total population, 10.1 per cent are under 5 years of age, 17.6 per cent from 5 to 14 years, inclusive, 18.8 per cent from 15 to 24, 31.7 per cent from 25 to 44, and 21.6 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 5.9 per cent of this class being under 15 years of age, while 75 per cent are 25 years of age and over. Of the native whites of foreign or mixed parentage, 32.3 per cent are 25 and over and of the native whites of native parentage, 55.2 per cent.

Of the urban population, 47 per cent are under 25 years of age, 32.2 per cent from 25 to 44, and 20.7 per cent 45 and over. The corresponding percentages for the rural are 42.2, 27.4, and 30, respectively, thus showing that the proportion under 45 is smaller in the rural population, while the proportion of older people is larger.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 298,454, of whom 192,497, or 64.5 per cent, attended school. In addition to these, 11,492 persons under 6 and 2,966 of 21 and over attended school. For boys and for girls from 6 to 20 years, inclusive, the percentage attending school was 64.5. For children from 6 to 14 years, inclusive, the percentage attending school was 92.3. The percentage for children of this age was the same (92.6) among native whites of native parentage and native whites of foreign or mixed parentage, and it was slightly lower for foreign-born whites (89.2). (See Table I.) There is little difference between urban and rural communities as regards school attendance, although the percentage in school for children from 6 to 14 is slightly higher in the urban, and for those from 15 to 20 slightly higher in the rural.

Illiteracy (Table 10).—There are 53,665 illiterates in the state, representing 6 per cent of the total popu-

lation 10 years of age and over, as compared with 5.9 for 1900. The percentage of illiteracy is 15.4 among foreign-born whites, 6.3 among negroes, and 0.6 among native whites.

For all classes combined, the percentage illiterate in urban communities (6) is somewhat higher than that in rural communities (5.2), although for each class separately the percentage is higher in the rural.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is only 2.2. (See Table I.)

Marital condition (Tables 11 and 15).—In the population 15 years of age and over 39.3 per cent of the males are single and 33.6 per cent of the females. The percentage married is 55.3 for males and 54.6 for females, and the percentage widowed 4.8 and 11.2, respectively. The percentages of those reported as divorced, 0.3 and 0.4, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is smaller for women than for men is due largely to the fact that women marry younger. Thus 5.7 per cent of the females from 15 to 19 years of age are married, as compared with 0.5 per cent of the males, and 39.6 per cent of the females from 20 to 24 years are married, as compared with 18.5 per cent of the males. In the next age group, 25 to 34 years, the difference is not so great, the percentages being 68.9 for females and 59.8 for males, while in the age group 35 to 44 the difference practically disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 63.2 for males and 66.2 for females; native whites of native parentage, 56.7 and 51.8, respectively; native whites of foreign or mixed parentage, 39.4 and 42.9, respectively; negroes, 56.5 for males and 51.1 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married for females is slightly higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Connecticut is 181,911, and the total number of families 246,659, there being 135.6 families to each 100 dwellings. (See Table I.) The average number of persons per dwelling is 6.1, and the average number per family, 4.5.

POPULATION : DELAWARE

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Delaware gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportion urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of four general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for Wilmington, the one city of more than 25,000 inhabitants; Table III for the three smaller cities of more than 2,500; and Table IV for wards of Wilmington.

A series of summary tables (numbered 1 to 13) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural. Nine-tenths of Delaware's urban population is in the city of Wilmington.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time from September 1, 1909, to the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Delaware, 127,809, or 63.2 per cent, are native whites of native parentage; 25,873, or 12.8 per cent, are native whites of foreign or mixed parentage; 17,420, or 8.6 per cent, are foreign-born whites; and 31,181, or 15.4 per cent, are negroes. The corresponding percentages in 1900 were 63.9, 12, 7.4, and 16.6, respectively, the comparison indicating little change since 1900 in the color, nativity, and parentage composition of the population. In New Castle County the percentages of foreign-born whites (13.1) and of native whites of foreign or mixed parentage (19.5) are much higher than in the other two counties of the state, the percentages for Kent being 2.6 and 3.9, and for Sussex, 0.9 and 1.3, respectively.

Of the urban population, 52.9 per cent are native whites of native parentage; of the rural population, 72.7 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 21.2 and 5.1 per cent, respectively. The percentage of foreign-born whites is 14.5 in the urban population and 3.2 in the rural; the percentage of negroes is 11.5 in the urban and 19 in the rural.

Sex (Table 2).—In the total population of the state there are 103,435 males and 98,887 females, or 104.6 males to 100 females. In 1900 the ratio was 104 to 100. Among native whites the ratio is 101.6 to 100; among foreign-born whites 132.4. In the urban population there are 100.4 males to 100 females, and in the rural, 108.6.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—74.2 per cent were born in Delaware and 25.8 per cent outside the state; of the native white population, 25.5 per cent were born outside the state, and of the native negro, 27.2 per cent. Persons born outside the state constitute a much larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Table 5).—Of the foreign-born white population of Delaware, persons born in Ireland represent 22.9 per cent; Russia, 19.7; Italy, 16.6; Ger-

many, 14.8; England, 8.9; Austria, 5.7; Canada, 2.9; Scotland, 2; all other countries, 6.5 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Ireland contributed 32.4 per cent; Germany, 17.5; Russia, 12.5; England, 10.6; Italy, 10.6; Austria, 3.2; Canada, 2.2; Scotland, 2.1 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 61,887, representing 30.6 per cent of the population. Of such males, 60.9 per cent are native whites of native parentage, 10.3 per cent native whites of foreign or mixed parentage, 14.2 per cent foreign-born whites, and 14.6 per cent negroes. Of the 8,776 foreign-born white males of voting age, 3,707, or 42.2 per cent, are naturalized. Males of militia age—18 to 44—number 44,634.

Age (Tables 7, 8, and 12).—Of the total population, 9.9 per cent are under 5 years of age, 19 per cent from 5 to 14 years, inclusive, 19.1 per cent from 15 to 24, 29.4 per cent from 25 to 44, and 22.4 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 5 per cent of this class being under 15 years of age, while nearly four-fifths (77.8 per cent) are 25 years of age and over. Of the native whites of foreign or mixed parentage, only a little over two-fifths (43 per cent) are 25 and over and of the native whites of native parentage approximately one-half (51 per cent).

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 32.5 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 26.5 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 57,932, of whom 35,304, or 60.9 per cent, attended school. In addition to these, 467 persons under 6 and 559 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 61.3; for girls, 60.6. For children from 6 to 14 years, inclusive, the percentage attending school was 81.9. The percentage for children of this age among native whites of native parentage and native whites of foreign or mixed parentage (83.4 in each case) was higher than among negroes (76) or foreign-born whites (75.9). (See Table I.) There is little difference between urban and rural communities as regards the percentage of school attendance for the ages from 6 to 14, but of persons from 15 to 20 years, inclusive, 24.6 per cent in urban and 34.9 per cent in rural communities were reported as attending school.

Illiteracy (Table 10).—There are 13,240 illiterates in the state, representing 8.1 per cent of the total population 10 years of age and over, as compared with 12 per cent in 1900. The percentage of illiteracy is

25.6 among negroes, 19.8 among foreign-born whites, and 2.9 among native whites.

For all classes combined the percentage illiterate is higher in the rural than in the urban population (9.6 and 6.5, respectively), but for foreign-born whites it is much higher in the urban.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is only 2.9. (See Table I.)

Marital condition (Tables 11 and 13).—In the population 15 years of age and over, 37.9 per cent of the males are single and 29.4 per cent of the females. The percentage married is 56.1 for males and 58.6 for females, and the percentage widowed 5.1 and 11.4, respectively. The percentages of those reported as divorced, 0.2 and 0.3, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that they marry younger. Thus 10.5 per cent of the females from 15 to 19 years of age are married, as compared with 0.9 per cent of the males, and 48.6 per cent of the females from 20 to 24 years are married, as compared with 23.4 per cent of the males. In the next age group, 25 to 34 years, the difference is not so great, the percentages being 73.8 for females and 63 for males, while in the age group 35 to 44 the difference practically disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is, in fact, more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those over 15 years of age are as follows: Foreign-born whites, 60.7 for males and 67.1 for females; native whites of native parentage, 58 and 59.6, respectively; native whites of foreign or mixed parentage, 46.7 and 50.5, respectively; negroes, 51 for males and 54.6 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married is slightly higher for males, and decidedly higher for females in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Delaware is 43,183, and the total number of families 44,951, indicating that in very few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.7, and the average number per family 4.5.

POPULATION : DISTRICT OF COLUMBIA

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for the District of Columbia gave the number of inhabitants by districts and police precincts and the decennial increase and the density of population. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—This second bulletin contains a general table (Table I) presenting statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, for the District of Columbia as a whole and for each of the nine districts shown on the map on a following page. The districts are as follows:

WASHINGTON (ORIGINAL LIMITS).

District 1, Northwest.—The area south of Florida Avenue between North Capitol Street and Rock Creek, north of the Mall and the Capitol Grounds.

District 2, Northeast.—The area between the Anacostia River (Eastern Branch) and North Capitol Street, north of East Capitol Street and south of Florida Avenue and Benning Road.

District 3, Southwest.—The area south of the Mall and the Capitol Grounds, west of South Capitol Street and north of the Potomac River.

District 4, Southeast.—The area south of East Capitol Street, east of South Capitol Street and north of the Anacostia River (Eastern Branch).

GEORGETOWN (ORIGINAL LIMITS).

District 5.—The area comprising what was formerly known as Georgetown.

FORMER WASHINGTON COUNTY.

District 6.—The area west of Rock Creek, exclusive of Georgetown.

District 7.—The area between North Capitol Street extended and Rock Creek, north of Florida Avenue.

District 8.—The area between North Capitol Street extended and the Anacostia River (Eastern Branch), north of Florida Avenue and Benning Road.

District 9.—The area south and east of the Anacostia River (Eastern Branch).

A series of summary tables (numbered 1 to 10) reproduces from the general table the more important totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is

scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

The population of the District of Columbia is essentially urban or suburban in character, and no attempt has been made to define the small areas which might be classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time from September 1, 1909, to the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of the District of Columbia, 236,128, or 71.3 per cent, are whites, and 94,446, or 28.5 per cent, negroes. The corresponding percentages in 1900 were 68.7 and 31.1, respectively. In 6 of the 9 subdivisions into which the District has been divided, 15 to 25 per cent of the population is negro, and in the 3 remaining divisions the percentages are 35.9, 36.3, and 41, respectively.

Native whites of native parentage constitute 50.4 per cent of the total population and 70.6 per cent of the white population. Native whites of foreign or mixed parentage constitute only 13.6 per cent of the total population and foreign-born whites 7.4 per cent.

Sex (Table 2).—In the total population there are 158,050 males and 173,019 females, or 91.3 males to 100 females. In 1900 the ratio was 90 to 100. Among the whites there are 94.9 males to 100 females; among the negroes, 82.2. For all native whites combined the ratio is 93.1 to 100, as compared with 113 to 100 for the foreign-born whites.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—45.5 per cent were born in the District of Columbia and 54.5 per cent elsewhere in the country; of the native white population, 53.3 per cent were born outside the District, and of the native negro, 57.1 per cent.

Foreign nationalities (Table 5).—Of the foreign-born white population of the District, persons born in Ireland represent 21.9 per cent; Germany, 21.3; Russia, 13.9; Italy, 11.3; England, 10.8; Canada, 4.6; Scotland, 2.9; France, 2.1; Austria, 1.9; Sweden, 1.5; Greece, 1.4; Switzerland, 1.2; other countries, 5.1 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Ireland contributed 27.8 per cent; Germany, 26.4; England, 11.1; Russia, 8.3; Italy, 6.6; Canada, 3.9; Scotland, 2.9; France, 1.5; Austria, 1.2; Sweden, 1 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 103,761, representing 31.3 per cent of the population. Of such males, 73 per cent are white and 26.6 per cent negro. Native whites represent 61.7 per cent of the total number and foreign-born whites 11.3 per cent. Of the 11,738 foreign-born white males of voting age, 6,474, or 55.2 per cent, are naturalized. Males of militia age—18 to 44—number 78,349.

Age (Table 7).—Of the total population, 8.1 per cent are under 5 years of age, 15 per cent from 5 to 14 years, inclusive, 18.9 per cent from 15 to 24, 36.1 per cent from 25 to 44, and 21.5 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 4.6 per cent of this class being under 15 years of age, while nearly five-sixths (83.1 per cent) are 25 years of age and over. The negro population as compared with the native white comprises a smaller percentage under 20 years of age and a larger percentage from 20 to 44 years of age, inclusive.

School attendance (Table 8).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 79,249, of whom 50,859, or 64.2 per cent, attended school. In addition to these, 1,529 persons under 6 and 2,300 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 64.6; for girls, 63.8. For children from 6 to 14 years, inclusive, the percentage attending school was 86.7. The percentage for children of this age was highest among native whites of foreign or mixed parentage, 88.7, although the percentage for native whites of native parentage, 87.8, was only slightly lower; for foreign-born whites the percentage was 86.4; and for negroes, 83.7. (See Table I.)

Illiteracy (Table 9).—There are 13,812 illiterates in the District of Columbia, representing 4.9 per cent of the total population 10 years of age and over, as

compared with 8.6 per cent in 1900. The percentage of illiteracy is 13.5 among negroes, 8.2 among foreign-born whites, and 0.5 among native whites. It is 0.6 for native whites of native parentage, and 0.4 for native whites of foreign or mixed parentage.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the proportion of illiterates is very small, only 1 per cent. (See Table I.)

Marital condition (Table 10).—In the population 15 years of age and over, 40.2 per cent of the males are single and 34.5 per cent of the females. The percentage married is 53.8 for males and 48.8 for females; and the percentage widowed 5.2 and 15.7, respectively. The percentages of those reported as divorced, 0.4 and 0.6, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that they marry younger. Thus 7.9 per cent of the females from 15 to 19 years of age are married, as compared with 0.8 per cent of the males; and 40.7 per cent of the females from 20 to 24 years are married, as compared with 21.2 per cent of the males. In the next age group, 25 to 34 years, the difference largely disappears. In the age group 35 to 44 the percentage married is greater among the males, while in the age group 45 and over it very greatly exceeds that for females. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is in fact more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 57.6 for males, 54.5 for females; native whites of native parentage, 53 and 48.8, respectively; native whites of foreign or mixed parentage, 50.4 and 49.4, respectively; and negroes, 55.6 for males and 47 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life.

Dwellings and families.—The total number of dwellings in the District of Columbia is 58,513, and the total number of families 71,339, indicating that in a considerable number of cases two or more families occupy the same dwelling. (See Table I.) The average number of persons per dwelling is 5.7, and the average number per family 4.6.

POPULATION : FLORIDA

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Florida gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for the two cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of Jacksonville, the only city of more than 50,000.

A series of summary tables (numbered 1 to 14) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated

places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Florida, 443,634, or 58.9 per cent, are whites, and 308,669, or 41 per cent, negroes. The corresponding percentages in 1900 were 56.3 and 43.7, respectively. In 28 of the 47 counties negroes constitute from 25 to 50 per cent of the population, and in 10 the population is more than one-half negro. (See map on a following page.)

Native whites of native parentage constitute almost one-half (49.7 per cent) of the total population of the state and 84.3 per cent of the white population. Native whites of foreign or mixed parentage constitute only 4.8 per cent of the total population, and foreign-born whites 4.5 per cent.

Of the urban population, 37.1 per cent are native whites of native parentage; of the rural, 54.8 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 11.1 and 2.1 per cent, respectively. The percentage of foreign-born whites is 11.2 in the urban population and 1.7 in the rural; the percentage of negroes is 40.4 in the urban and 41.2 in the rural.

Sex (Table 2).—In the total population of the state there are 394,166 males and 358,453 females, or 110 males to 100 females. In 1900 the ratio was 108.7 to 100. Among the whites there are 110.2 males to 100 females; among the negroes, 109.5. For all native whites combined the ratio is 107 to 100, as compared with 157.6 to 100 for the foreign-born whites. In the urban population there are 102.8 males to 100 females, and in the rural, 113.1.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—65 per cent were born in Florida and 35 per cent outside the state; of the native white population, 35.5 per cent were born outside the state, and of the native negro, 34.3 per cent. Persons born outside the state constitute a much larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Table 5).—Of the foreign-born white population of Florida, persons born in Cuba represent 26.3 per cent; Italy, 13.4; Spain, 12.4; England, 8.6; Germany, 7.2; West Indies (except Cuba and Porto Rico), 5.6; Canada, 5; Ireland, 3.2; Turkey, 3.1; Greece, 2.6; Sweden, 2.2; all other countries, 10.5 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Cuba contributed 22.5 per cent; Germany, 10.7; Italy, 10.6; England, 10.6; Spain, 7.9; West Indies (except Cuba and Porto Rico), 7; Ireland, 5.3; Canada, 5.1; Scotland, 2.4; Sweden, 2.2 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 214,195, representing 28.5 per cent of the population. Of such males, 58 per cent are whites and 41.9 per cent negroes. Native whites represent 49.9 per cent of the total number and foreign-born whites 8.1 per cent. Of the 17,445 foreign-born white males of voting age, 5,959, or 34.2 per cent, are naturalized. Males of militia age—18 to 44—number 171,688.

Age (Tables 7, 8, and 12).—Of the total population, 12.9 per cent are under 5 years of age, 22.8 per cent from 5 to 14 years, inclusive, 20.5 per cent from 15 to 24, 28.5 per cent from 25 to 44, and 14.9 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 8.9 per cent of this class being under 15 years of age, while nearly three-fourths (72.3 per cent) are 25 years of age and over. The negro population comprises a somewhat smaller proportion of children under 15 than the native white population of native parentage.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 34.3 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 26.2 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 243,917, of whom 128,659, or 52.7 per cent, attended school. In addition to these, 2,547 persons under 6 and 2,149 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 51.8; for girls, 53.7. For children from 6 to 14 years, inclusive, the percentage attending school was 66. The percentage for children of this age among native whites of foreign or mixed parentage was 76.1; among native whites of native parentage, 72.1; among foreign-born whites, 63.5; and among negroes, 57.1. (See Table I.) In urban communities the percentage of children of that age attending school was 73.3 and in rural 63.6.

Illiteracy (Table 10).—There are 77,816 illiterates in the state, representing 13.8 per cent of the total population 10 years of age and over, as compared with the much higher figure, 21.9 per cent, in 1900. The percentage of illiteracy is 25.5 among negroes, 10.5 among foreign-born whites, and 5 among native

whites. It is 5.2 for native whites of native parentage and 2.2 for native whites of foreign or mixed parentage.

For all classes combined, illiterates are fewer in urban than in rural communities, 8.4 per cent as against 16.2. For native whites the percentage illiterate is 1.1 in urban communities as compared with 6.4 in rural; for negroes the percentages are 15.4 and 30.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 9.9. (See Table I.)

Marital condition (Tables 11 and 13).—In the population 15 years of age and over, 36.4 per cent of the males are single and 23.5 per cent of the females. The percentage married is 56.3 for males and 63.8 for females, and the percentage widowed 5.2 and 11.2, respectively. The percentages of those reported as divorced, 0.6 and 0.8, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that women marry younger. Thus 21.5 per cent of the females from 15 to 19 years of age are married, as compared with 1.6 per cent of the males; 64.1 per cent of the females from 20 to 24 years are married, as compared with 29.4 per cent of the males; and among those from 25 to 34 years the percentages are 81.2 and 65.7, respectively. In the next age group, 35 to 44, the difference practically disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is in fact more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 58.6 for males, 67.9 for females; native whites of native parentage, 57.7 and 64.1, respectively; native whites of foreign or mixed parentage, 48.3 and 56.1, respectively; negroes, 54.9 for males and 63.7 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married is slightly higher for males, and decidedly higher for females, in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Florida is 165,818, and the total number of families 171,422, indicating that in very few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.5, and the average number per family, 4.4.

NOTES REGARDING CHANGES IN BOUNDARIES, ETC.

COUNTIES.

BREVARD.—Part of Volusia annexed in 1879; part taken to form part of Osceola in 1887; part taken to form St. Lucie in 1905. (See also Note 1.)

CITRUS.—Organized from part of Hernando in 1887.

DADE.—Part taken to form Palm Beach in 1909. (See also Note 2.)

DE SOTO.—Organized from part of Manatee in 1887.

HERNANDO.—Parts taken to form Citrus and Pasco in 1887.

HILLSBORO.—Part annexed to Polk in 1874.

LAFAYETTE.—Part annexed to Taylor in 1877.

LAKE.—Organized from parts of Orange and Sumter in 1887.

LEE.—Organized from part of Monroe in 1887.

LEVY.—Part of Marion annexed in 1877.

MANATEE.—Part taken to form De Soto in 1887.

MARION.—Part annexed to Levy in 1877.

MONROE.—Part taken to form Lee in 1887.

ORANGE.—Part of Sumter annexed in 1872; parts taken to form parts of Lake and Osceola in 1887.

OSCEOLA.—Organized from parts of Brevard and Orange in 1887.

PALM BEACH.—Organized from part of Dade in 1909. (See also Note 2.)

PASCO.—Organized from part of Hernando in 1887; part annexed to Polk between 1890 and 1900.

COUNTIES—continued.

POLK.—Part of Hillsboro annexed in 1874 and part of Pasco annexed between 1890 and 1900.

ST. LUCIE.—Organized from part of Brevard in 1905. (See also Note 1.)

SUMTER.—Part annexed to Orange in 1872 and part taken to form part of Lake in 1887.

TAYLOR.—Part of Lafayette annexed in 1877.

VOLUSIA.—Part annexed to Brevard in 1870.

NOTE 1.—*Brevard and St. Lucie Counties combined.*—Total population: 1910, 8,792; 1900, 5,158; increase, 1900-1910, 3,634; per cent of increase, 70.5. Rural population—1910, 8,792; same territory in 1900, 5,158; per cent of increase, 70.5. Rural population—1900, 5,158.

NOTE 2.—*Dade and Palm Beach Counties combined.*—Total population: 1910, 17,510; 1900, 4,955; increase, 1900-1910, 12,555; per cent of increase, 253.4. Urban population—1910, 5,471; same places in 1900, 1,631; per cent of increase, 225.5. Rural population—1910, 12,039; same territory in 1900, 3,274; per cent of increase, 267.7. Rural population—1900, 4,955. Per cent in places of 2,500 or more in 1910, 31.2.

CITIES.

TAMPA.—Parts of precincts 6 (comprising part of Fort Brook town), 27, 30, 31, 39, 40, 41, and 42 annexed in 1907.

POPULATION : GEORGIA

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Georgia gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of Atlanta, the only city of more than 50,000.

A series of summary tables (numbered 1 to 15) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Georgia, 1,431,802, or 54.9 per cent, are whites, and 1,176,987, or 45.1 per cent, negroes. The corresponding percentages in 1900 were 53.3 and 46.7, respectively. In 49 of the 146 counties negroes constitute from 25 to 50 per cent of the population, and in 66 counties the population is more than 50 per cent negro. (See map on page 41.)

Native whites of native parentage constitute 53.3 per cent of the total population of the state, and 97.2 per cent of the white population. Native whites of foreign or mixed parentage constitute only 1 per cent of the total population, and foreign-born whites 0.6 per cent.

Of the urban population, 52.4 per cent are native whites of native parentage; of the rural, 53.5 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 3.6 and 0.3 per cent, respectively. The percentage of foreign-born whites is 2.2 in the urban population and 0.2 in the rural; the percentage of negroes is 41.7 in the urban and 46 in the rural.

Sex (Table 2).—In the total population of the state there are 1,305,019 males and 1,304,102 females, or 100.1 males to 100 females. In 1900 the ratio was 99.1 to 100. Among the whites there are 102.4 males to 100 females; among the negroes, 97.2. Among native whites the ratio is 101.9 to 100, as compared with 171.4 to 100 for the foreign-born whites. In the urban population there are 92.6 males to 100 females, and in the rural, 102.1.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—91.2 per cent were born in Georgia and 8.8 per cent outside the state; of the native white population, 10.6 per cent were born outside the state, and of the native negro, 6.8 per cent. Persons born outside the state constitute a much larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 12).—Of the foreign-born white population of Georgia, persons born in Russia represent 21.4 per cent; Germany, 20.1; Ireland, 11; England, 10.9; Greece, 6.2; Canada, 5.2; Italy, 3.6; Scotland, 3.5; Turkey, 3.2; all other countries, 14.9 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 24.2 per cent; Ireland, 18.5; Russia, 13.4; England, 11.9; Canada, 4.6; Scotland, 4.3; Greece, 2.7; Italy, 2.4; France, 2 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 620,616, representing 23.8 per cent of the population. Of such males, 57 per cent are white and 43 per cent negroes. Native whites represent 55.6 per cent of the total number and foreign-born whites 1.4 per cent. Of the 8,513 foreign-born white males of voting age, 4,023, or 47.3 per cent, are naturalized. Males of militia age—18 to 44—number 497,095.

Age (Tables 7, 8, and 13).—Of the total population, 14.4 per cent are under 5 years of age, 25.4 per cent from 5 to 14 years, inclusive, 20.7 per cent from 15 to 24, 24.7 per cent from 25 to 44, and 14.6 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 5.4 per cent of this class being under 15 years of age, while nearly four-fifths (79.9 per cent) are 25 years of age and over.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 32.5 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 22.7 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 925,865, of whom 480,378, or 51.9 per cent, attended school. In addition to these, 7,863 persons under 6 and 6,540 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 51; for girls, 52.7. For children from 6 to 14 years, inclusive, the percentage attending school was 65.6. The percentage for children of this age among native whites of foreign or mixed parentage was 84.5; among foreign-born whites, 76; among native whites of native parentage, 74.8; and among negroes, 55.4. (See Table I.) In urban communities the percentage of children of that age attending school was 74.2, and in rural, 64.

Illiteracy (Table 10).—There are 389,775 illiterates in the state, representing 20.7 per cent of the total population 10 years of age and over, as compared with 30.5 per cent in 1900. The percentage of illiteracy is 36.5 among negroes, 7.8 among native whites, and 6 among foreign-born whites. It is 8 for native whites

of native parentage and 1.6 for native whites of foreign or mixed parentage.

Illiteracy is greater in rural than in urban communities for the total population—23.2 per cent as against 12—and also for each class of the population except foreign-born whites, whose literacy, since most of them arrive in this country when past the school age, is not determined by their immediate environment.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 14.1. (See Table I.)

Marital condition (Tables 11 and 14).—In the population 15 years of age and over, 34.2 per cent of the males are single and 26.5 per cent of the females. The percentage married is 60.4 for males and 60.2 for females, and the percentage widowed, 4.8 and 12.5, respectively. The percentages of those reported as divorced, 0.3 and 0.5, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that women marry younger. Thus 19.7 per cent of the females from 15 to 19 years of age are married, as compared with 3.1 per cent of the males, and 61.6 per cent of the females from 20 to 24 years of age are married, as compared with 38.9 per cent of the males. In the next age group, 25 to 34 years, the difference largely disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages married among those 15 years of age and over are as follows: Foreign-born whites, 58.7 for males, 63.4 for females; native whites of native parentage, 60.2 and 61.2, respectively; native whites of foreign or mixed parentage, 50.2 and 49.5; negroes, 60.9 and 59.3.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married is somewhat higher for males, and decidedly higher for females in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Georgia is 530,631, and the total number of families 553,264, indicating that in comparatively few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.9, and the average number per family, 4.7.

NOTES REGARDING CHANGES IN BOUNDARIES, ETC.

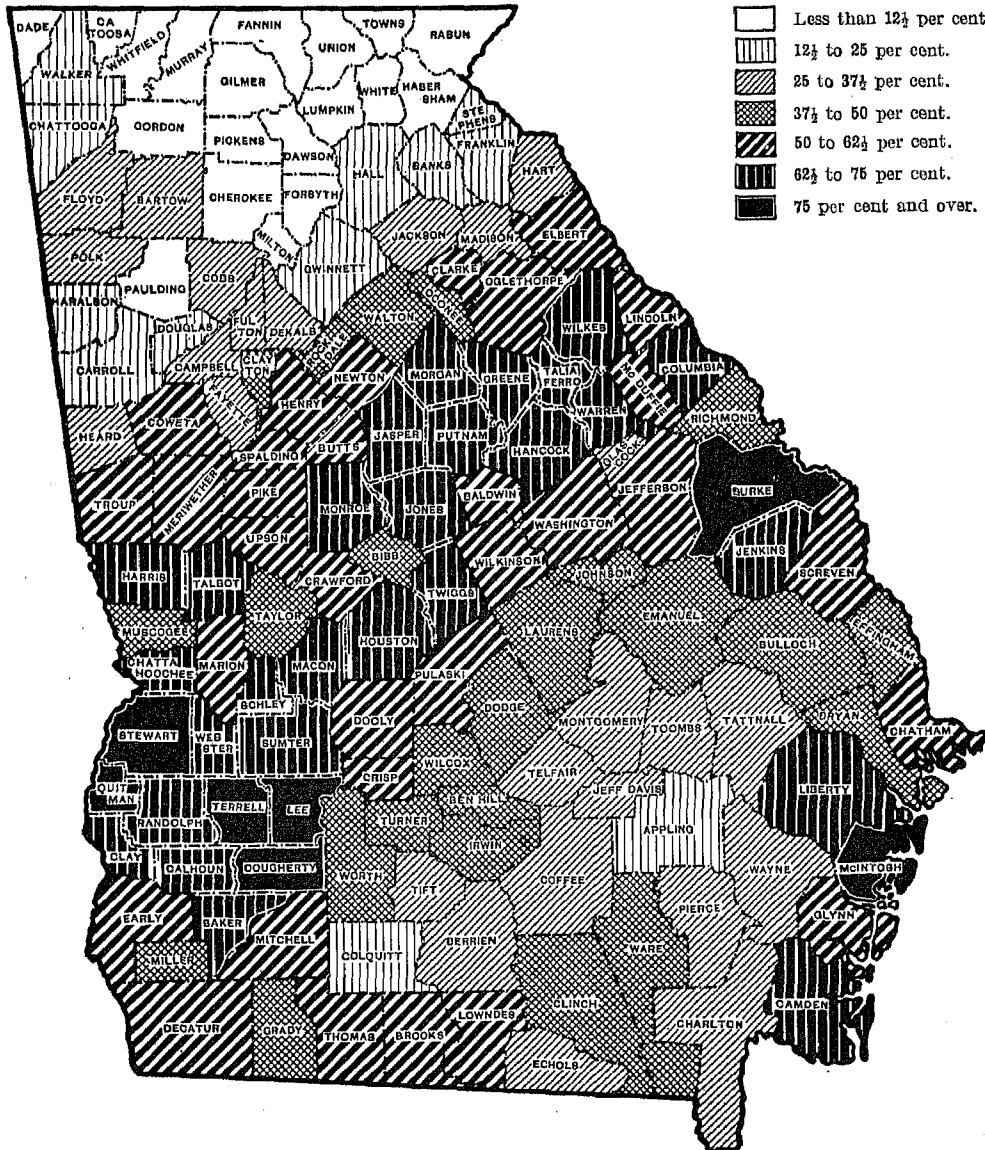

COUNTIES.

- APPLING.—Part taken to form part of Jeff Davis in 1905. (See also Note 1.)
- BANKS.—Part of Jackson annexed between 1870 and 1880.
- BEN HILL.—Organized from parts of Irwin and Wilcox in 1906. (See also Note 2.)
- BERRIEN.—Part taken to form part of Tift in 1905. (See also Note 2.)
- BULLOCH.—Part taken to form part of Jenkins in 1905. (See also Note 3.)
- BURKE.—Part taken to form part of Jenkins in 1905. (See also Note 3.)
- CAMPBELL.—Part taken to form Douglas in 1870; part of Fayette annexed in 1870.
- CARROLL.—Part of Douglas annexed in 1877.
- CLARKE.—Part taken to form Oconee in 1875; part of Oglethorpe annexed in 1906.
- CLAYTON.—Part annexed to Fulton in 1908.
- COFFEE.—Part taken to form part of Jeff Davis in 1905. (See also Note 1.)
- COLUMBIA.—Part taken to form part of McDuffie in 1870.
- CRISP.—Organized from part of Dooly in 1905. (See also Note 2.)
- DECATUR.—Part taken to form part of Grady in 1905. (See also Note 4.)
- DODGE.—Organized from parts of Montgomery, Pulaski, and Telfair in 1870.
- DOOLY.—Parts taken to form Crisp and part of Turner in 1905. (See also Note 2.)
- DOUGLAS.—Organized from part of Campbell in 1870; part annexed to Carroll in 1877.
- EMANUEL.—Parts taken to form parts of Jenkins and Toombs in 1905. (See also Note 3.)
- FAYETTE.—Part annexed to Campbell in 1870.
- FRANKLIN.—Part taken to form part of Stephens in 1905. (See also Note 5.)
- FULTON.—Part of Clayton annexed in 1908.
- GRADY.—Organized from parts of Decatur and Thomas in 1905. (See also Note 4.)
- HABERSHAM.—Part taken to form part of Stephens in 1905. (See also Note 5.)
- HENRY.—Part taken to form part of Rockdale in 1870.
- IRWIN.—Parts taken to form parts of Tift and Turner in 1905, and part of Ben Hill in 1906. (See also Note 2.)
- JACKSON.—Parts annexed to Banks between 1870 and 1880.
- JEFF DAVIS.—Organized from parts of Appling and Coffee in 1905. (See also Note 1.)
- JENKINS.—Organized from parts of Bulloch, Burke, Emanuel, and Screven in 1905. (See also Note 3.)
- LIBERTY.—Part of McIntosh annexed in 1871.
- MCDUFFIE.—Organized from parts of Columbia and Warren in 1870.
- MCINTOSH.—Part annexed to Liberty in 1871.
- MONTGOMERY.—Parts taken to form part of Dodge in 1870 and part of Toombs in 1905. (See also Note 3.)
- NEWTON.—Part taken to form part of Rockdale in 1870.
- OCONEE.—Organized from part of Clarke in 1875.
- OGLETHORPE.—Part annexed to Clarke in 1906.
- PULASKI.—Part taken to form part of Dodge in 1870.
- ROCKDALE.—Organized from parts of Henry and Newton in 1870.
- SCREVEN.—Part taken to form part of Jenkins in 1905. (See also Note 3.)
- STEPHENS.—Organized from parts of Franklin and Habersham in 1905. (See also Note 5.)
- TATFNALL.—Part taken to form part of Toombs in 1905. (See also Note 3.)
- TELEFAIR.—Part taken to form part of Dodge in 1870.
- THOMAS.—Part taken to form part of Grady in 1905. (See also Note 4.)
- TIFT.—Organized from parts of Berrien, Irwin, and Worth in 1905. (See also Note 2.)
- TOOMBS.—Organized from parts of Emanuel, Montgomery, and Tattnall in 1905. (See also Note 3.)
- TURNER.—Organized from parts of Dooly, Irwin, Wilcox, and Worth in 1905. (See also Note 2.)
- WARREN.—Part taken to form part of McDuffie in 1870.
- WILCOX.—Parts taken to form part of Turner in 1905 and part of Ben Hill in 1906. (See also Note 2.)
- WORTH.—Parts taken to form parts of Tift and Turner in 1905. (See also Note 2.)
- NOTE 1.—*Appling, Coffee, and Jeff Davis Counties combined.*—Total population: 1910, 40,321, 1900, 28,505; increase, 1900-1910, 11,816; per cent of increase, 41.5. Urban population—1910, 3,580; same places in 1900, 617; per cent of increase, 475.4. Rural population—1910, 36,741; same territory in 1900, 27,888; per cent of increase, 31.9. Rural population—1900, 28,505. Per cent in places of 2,500 or more in 1910, 8.8.
- NOTE 2.—*Ben Hill, Berrien, Crisp, Dooly, Irwin, Tift, Turner, Wilcox, and Worth Counties combined.*—Total population: 1910, 136,268, 1900, 89,413; increase, 1900-1910, 46,855; per cent of increase, 52.4. Urban population—1910, 11,678; same places in 1900, 5,290; per cent of increase, 120.8. Rural population—1910, 124,590; same territory in 1900, 84,123; per cent of increase, 48.1. Urban population—1900, 3,473; rural population—1900, 85,940. Per cent in places of 2,500 or more in 1910, 8.0. Per cent in places of 2,500 or more in 1900, 3.9.
- NOTE 3.—*Bulloch, Burke, Emanuel, Jenkins, Montgomery, Screven, Tattnall, and Toombs Counties combined.*—Total population, 1910, 160,007, 1900, 128,351; increase, 1900-1910, 31,656; per cent of increase, 24.2. Urban population—1910, 5,258; same places in 1900, 3,227; per cent of increase, 62.9. Rural population—1910, 154,749; same territory in 1900, 125,624; per cent of increase, 23.2. Rural population—1900, 128,351. Per cent in places of 2,500 or more in 1910, 3.3.
- NOTE 4.—*Decatur, Grady, and Thomas Counties combined.*—Total population: 1910, 76,573, 1900, 60,530; increase, 1900-1910, 16,043; per cent of increase, 26.5. Urban population—1910, 10,944; same places in 1900, 7,963; per cent of increase, 37.4. Rural population—1910, 65,629; same territory in 1900, 52,567; per cent of increase, 24.8. Urban population—1900, 7,963; rural population—1900, 52,567. Per cent in places of 2,500 or more in 1910, 14.3. Per cent in places of 2,500 or more in 1900, 13.2.
- NOTE 5.—*Franklin, Habersham, and Stephens Counties combined.*—Total population: 1910, 37,756, 1900, 31,304; increase, 1900-1910, 6,452; per cent of increase, 20.6. Urban population—1910, 3,120; same places in 1900, 2,170; per cent of increase, 43.4. Rural population—1910, 34,636; same territory in 1900, 29,128; per cent of increase, 18.9. Rural population—1900, 31,304. Per cent in places of 2,500 or more in 1910, 8.3.

INCORPORATED PLACES.

- ALBANY.—Part of Militia District No. 1097 (East Albany village) annexed in 1910.
- ATLANTA.—Part of Militia District No. 1379 (Edgewood town) and part of No. 1666 annexed in 1909; part of No. 530 (Oakland City town), part of No. 1511 (Battle Hill town), and part of No. 1348, Fulton County, annexed in 1910; and parts of No. 1362, Fulton County, annexed in 1905 and 1910.
- CARROLLTON.—Part of Militia District No. 714 annexed in 1908.
- MACON.—Parts of Militia District No. 1085 annexed in 1903, 1908, and 1910 and parts of Nos. 481 and 514 annexed in 1910.
- ROME.—Parts of Militia District No. 919 (East Rome and North Rome towns) annexed in 1908.

PER CENT OF NEGROES IN TOTAL POPULATION OF GEORGIA: 1910,

POPULATION : IDAHO

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Idaho gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of three general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for Boise, the only city of more than 10,000 inhabitants; and Table III for cities of 2,500 to 10,000 inhabitants.

A series of summary tables (numbered 1 to 12) reproduces from the general tables the more important state totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had at-

tended any kind of school at any time from September 1, 1909, to the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Idaho, 203,599, or 62.5 per cent, are native whites of native parentage; 75,195, or 23.1 per cent, are native whites of foreign or mixed parentage; and 40,427, or 12.4 per cent, are foreign-born whites. The corresponding percentages in 1900 were 55.5, 26.4, and 13.5, respectively, the comparison indicating a considerable increase in the proportion of native whites of native parentage. In 1910 Indians constituted 1.1 per cent of the population; Japanese, 0.4; Chinese, 0.3; and negroes, 0.2 per cent. In the counties the proportion of whites of foreign birth varies from 5.8 per cent in Washington to 30.2 per cent in Shoshone, and the proportion of native whites of foreign or mixed parentage from 13.2 per cent in Washington to 41.8 per cent in Bear Lake. (See maps on a following page.)

The composition of the urban population of the state as regards race, nativity, and parentage does not differ materially from that of the rural population, the percentage of foreign-born whites being, however, slightly higher in the urban population (13.6) than in the rural (12.1), while the Indian population is almost exclusively rural.

Sex (Table 2).—In the total population of the state there are 185,546 males and 140,048 females, or 132.5 males to 100 females. In 1900 the ratio was 136.5 to 100. Among native whites the ratio is 121.9 to 100 and among foreign-born whites 227.5 to 100. In the urban population there are 129.5 males to 100 females, and in the rural, 133.3.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—31.9 per cent were born in Idaho and 68.1 per cent outside the state; of the native white population, 68.8 per cent were born outside the state; of the native Indian, 13.8 per cent; and of the native negro, 88.9 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Table 5).—Of the foreign-born white population of Idaho, persons born in Canada represent 13.3 per cent; Germany, 12.5; Sweden, 12.3; England, 12.3; Norway, 6.3; Denmark, 5.6; Italy, 5.1; Greece, 4.6; Ireland, 4.4; Austria, 3.9;

all other countries, of which 10 are specified in Table 5, 19.7 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, England contributed 18.2 per cent; Germany, 14.9; Canada, 11.6; Sweden, 9.5; Denmark, 6.5; Ireland, 6.3; Norway, 5.3; Scotland, 3.9; Switzerland, 2.9; Wales, 2.7; Italy, 2.3; Austria, 2 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 110,863, representing 34 per cent of the population. Of such males, 53.2 per cent are native whites of native parentage, 20.4 per cent native whites of foreign or mixed parentage, 23.3 per cent foreign-born whites, 1.8 per cent Chinese and Japanese, 0.9 per cent Indians, and 0.3 per cent negroes. Of the 25,844 foreign-born white males of voting age, 12,817, or 49.6 per cent, are naturalized. Males of militia age—18 to 44—number 86,384.

Age (Tables 7 and 8).—Of the total population, 12.4 per cent are under 5 years of age, 20.9 per cent from 5 to 14 years, inclusive, 19.1 per cent from 15 to 24, 31 per cent from 25 to 44, and 16.2 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 3.4 per cent of this class being under 15 years of age, while more than four-fifths (83.1 per cent) are 25 years of age and over. Of the native whites of foreign or mixed parentage, 44 per cent are 25 and over, and of the native whites of native parentage, 40.7 per cent.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Of the urban population, 36.6 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 29.5 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 96,819, of whom 66,779, or 69 per cent, attended school. In addition to these, 632 persons under 6 and 1,192 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 68; for girls, 70.1. For children from 6 to 14 years, inclusive, the percentage attending school was 82.1. The percentage for children of this age among native whites of foreign or mixed parentage was 84.1; among native whites of native parentage, 82; and among foreign-born whites, 76.2. (See Table I.) There is little difference between urban and rural communities as regards the percentage of school attendance.

Illiteracy (Table 10).—There are 5,453 illiterates in the state, representing 2.2 per cent of the total population 10 years of age and over, as compared with 4.6 per cent in 1900. The percentage of illiteracy is 6.9 among foreign-born whites, 0.3 among native whites, 59.4 among Indians, and 6.4 among negroes.

For all classes combined, the percentage of illiterates is 1.7 in urban communities and 2.3 in rural. For each class separately, except the foreign-born whites, the

percentage is somewhat higher in rural communities than in urban.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is very low, being only 0.8. (See Table I.)

Marital condition (Table 11).—In the population 15 years of age and over, 45.9 per cent of the males are single and 24.7 per cent of the females. The percentage married is 49.2 for males and 67.8 for females; and the percentage widowed 3.4 and 6.4, respectively. The percentages of those reported as divorced, 0.7 both for males and for females, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is accounted for partly by the excess of males in the total population, and partly by the fact that women marry younger. Thus 11.6 per cent of the females from 15 to 19 years of age are married, as compared with 0.7 per cent of the males; and 60.8 per cent of the females from 20 to 24 years are married, as compared with 17.2 per cent of the males. For those from 25 to 34 years, the percentages are 85.7 for females as against 52 for males, and for those from 35 to 44, 90.2 and 70.9, respectively, while in the age group 45 and over the difference practically disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 49 for males and 77.5 for females; native whites of native parentage, 49.9 and 66.7, respectively; native whites of foreign or mixed parentage, 48.3 and 65.4, respectively; Indians, 64.3 and 68.6, respectively; negroes, 40.6 for males and 54.1 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, both for males and females, is somewhat higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Idaho is 71,830, and the total number of families 73,669, indicating that in very few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.5, and the average number per family 4.4.

 LINCOLN.—Organized from part of Logan in 1895.
 NEZ PERCE.—Part taken to form Latah in 1888; part of Shoshone annexed in 1905.

ONEIDA.—Parts taken to form Bear Lake in 1875 and Bingham in 1885.

OWYHEE.—Part taken to form Cassia in 1873.

SHOSHONE.—Part annexed to Nez Perce in 1905.

TWIN FALLS.—Organized from part of Cassia in 1907. (See also Note 2.)

WASHINGTON.—Organized from parts of Ada and Idaho in 1879.

NOTE 1.—*Bonner and Kootenai Counties combined.*—Total population: 1910, 36,335; 1900, 10,216; increase, 1900-1910, 26,119; per cent of increase, 255.7. Urban population—1910, 10,284; same places in 1900, 508; per cent of increase, 1,924.4. Rural population—1910, 26,051; same territory in 1900, 9,708; per cent of increase, 168.3. Rural population—1900, 10,216. Per cent in places of 2,500 or more in 1910, 28.3.

NOTE 2.—*Cassia and Twin Falls Counties combined.*—Total population: 1910, 20,740; 1900, 3,951; increase, 1900-1910, 16,789; per cent of increase, 424.9. Urban population—1910, 5,258. Rural population—1910, 15,482; same territory in 1900, 3,951; per cent of increase, 291.9. Rural population—1900, 3,951. Per cent in places of 2,500 or more in 1910, 25.4.

NOTE 3.—In computing this increase the population of Indian reservations in 1900 has been deducted from the total population of the county in order to make that total comparable with the total for 1890, which does not include the population of Indian reservations. The population thus deducted in the several counties was as follows: Bannock, 448; Bingham, 939; Kootenai, 752; and Lemhi, 486.

CITIES.

SANDPOINT.—Incorporated as a city in 1907.

TWIN FALLS.—Incorporated in 1908.

POPULATION : ILLINOIS

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Illinois gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of more than 25,000 inhabitants; Table III for places of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of cities of more than 50,000.

A series of summary tables (numbered 1 to 16) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Illinois, 2,600,555, or 46.1 per cent, are native whites of native parentage; 1,723,847, or 30.6 per cent, are native whites of foreign or mixed parentage; 1,202,560, or 21.3 per cent, are foreign-born whites; and 109,049, or 1.9 per cent, are negroes. The corresponding percentages in 1900 were 47.1, 31.1, 20, and 1.8, respectively, only slight changes in the composition of the population having taken place during the decade. In most of the 102 counties, the proportion of foreign-born whites is small, being less than 5 per cent in 40 counties, and exceeding 25 per cent in only 6. More than two-thirds of the foreign-born whites are in Cook County, in which both this class and the native whites of foreign or mixed parentage constitute a larger proportion of the total population than in any other county (35 and 41.5 per cent, respectively). (See maps on page 9.)

Of the urban population, 32.3 per cent are native whites of native parentage; of the rural, 68.4 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 36.5 and 21.1 per cent, respectively. The percentage of foreign-born whites is 28.7 in the urban population and 9.5 in the rural; the percentage of negroes is 2.5 in the urban and 1.1 in the rural.

Sex (Tables 2 and 12).—In the total population of the state there are 2,911,674 males and 2,726,917 females, or 106.8 males to 100 females. In 1900 the ratio was 105.3 to 100. Among native whites the ratio is 101.5 to 100, and among foreign-born whites 127.3 to 100. In the urban population there are 104.9 males to 100 females, and in the rural, 109.9.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—76.8 per cent were born in Illinois and 23.2 per cent outside the state; of the native white population, 22.1 per cent were born outside the state, and of the native negro, 66.8 per cent. Persons born outside the state constitute a much larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 15).—Of the foreign-born white population of Illinois, persons born in Germany represent 26.5 per cent; Austria, 13.6; Russia, 12.4; Sweden, 9.6; Ireland, 7.8; Italy, 6; England, 5; Canada, 3.7; Hungary, 3.3; Norway, 2.7; all other countries, 9.2 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 34.7 per cent; Ireland, 11.3; Austria, 9.6; Sweden, 7.9; Russia, 7.8; England, 5.8; Italy, 4; Canada, 3.7; Norway, 2.3; Scotland, 1.8; Hungary, 1.8; Denmark, 1.1; Holland, 1.1.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 1,743,182, representing 30.9 per cent of the population. Of such males, 39.5 per cent are native whites of native parentage, 23.4 per cent native whites of foreign or mixed parentage, 34.7 per cent foreign-born whites, and 2.3 per cent negroes. Of the 604,524 foreign-born white males of voting age, 317,339, or 52.5 per cent, are naturalized. Males of militia age—18 to 44—number 1,330,556.

Age (Tables 7, 8, and 13).—Of the total population, 10.6 per cent are under 5 years of age, 18.9 per cent from 5 to 14 years, inclusive, 19.9 per cent from 15 to 24, 31 per cent from 25 to 44, and 19.3 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 5 per cent of this class being under 15 years of age, while four-fifths (80 per cent) are 25 years of age and over. Of the native whites of foreign or mixed parentage, only 39.5 per cent are 25 and over, and of the native whites of native parentage only 43.3 per cent.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 33.5 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 27 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 1,615,914, of whom 1,025,053, or 63.4 per cent, attended school. In addition to these, 19,085 children under 6 and 20,208 persons 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 63.8; for girls, 63.1. For children from 6 to 14 years, inclusive, the percentage attending school was 87.8. The percentage for children of this age among native whites of native parentage was 88.2; among native whites of foreign or mixed parentage, 88; among foreign-born whites, 83.8; and among negroes, 83. (See Table I.) There is little difference between urban and rural communities as regards the percentage attending school for the ages from 6 to 14, but of persons from 15 to 20 years of age, 35.8 per cent in rural communities attended school and 23.5 per cent in urban.

Illiteracy (Table 10).—There are 168,294 illiterates in the state, representing 3.7 per cent of the total population 10 years of age and over, as compared with 4.2

per cent in 1900. The percentage of illiteracy is 1.3 among native whites, 10.1 among foreign-born whites, and 10.5 among negroes.

For all classes combined, the percentage of illiterates is 4.1 in urban communities and 3.2 in rural. For each class separately, however, except the foreign-born whites, the percentage is higher in the rural population than in the urban.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 1.1. (See Table I.)

Marital condition (Tables 11 and 14).—In the population 15 years of age and over, 39.3 per cent of the males are single and 30.4 per cent of the females. The percentage married is 55.2 for males and 58.6 for females, and the percentage widowed 4.2 and 10.1, respectively. The percentages of those reported as divorced, 0.5 and 0.7, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due partly to the excess of males in the total population and partly to the fact that women marry younger. Thus 8 per cent of the females from 15 to 19 years of age are married, as compared with 0.6 per cent of the males, and 46.2 per cent of the females from 20 to 24 years of age are married, as compared with 20.3 per cent of the males. In the next age group, 25 to 34 years, the percentages are 74.4 and 61.1, while in the age group 35 to 44 the difference practically disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 63.9 for males and 67.7 for females; native whites of native parentage, 54.6 and 58.2, respectively; native whites of foreign or mixed parentage, 46.1 and 51; negroes, 51.7 and 57.7.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, for males and for females, is higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Illinois is 1,006,848, and the total number of families 1,264,717, there being 125.6 families to each 100 dwellings. (See Table I.) The average number of persons per dwelling is 5.6, and the average number per family, 4.5.
