

POPULATION : INDIANA

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Indiana gave the number of inhabitants by counties and minor civil divisions, the decennial increase and density of population, and the proportion urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of the bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of 25,000 inhabitants or more; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of cities of 50,000 or more.

A series of summary tables reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since it is well known that nearly all negroes and Indians are native born of native parentage, and that nearly all Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents native of the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being treated as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had at-

tended any kind of school at any time from September 1, 1909, to the date of enumeration, April 15, 1910.

The Census Bureau treats as illiterate any person unable to write, regardless of his ability to read; the returns relate only to persons 10 years of age or over.

Color and nativity (Table 1).—Of the total population of Indiana, 2,130,088, or 78.9 per cent, are native whites of native parentage; 350,551, or 13 per cent, are native whites of foreign or mixed parentage; 159,322, or 5.9 per cent, are foreign-born whites; and 60,320, or 2.2 per cent, are negroes. The corresponding percentages in 1900 were 77.6, 14.5, 5.6, and 2.3, respectively, the comparison indicating a slight increase in the relative importance of the native whites of native parentage. In most of the counties, the proportion of whites of foreign birth or of foreign or mixed parentage is small. There is, however, one county (Lake) in which the foreign-born whites constitute more than one-fourth of the total population, and six counties in which the native whites of foreign or mixed parentage exceed that proportion. (See maps, p. 37.)

Of the urban population, 67.8 per cent are native whites of native parentage; of the rural population, 87 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 18.2 and 9.1 per cent, respectively. The percentage of foreign-born whites is 9.7 in the urban population and 3.1 in the rural; the percentage of negroes is 4.2 in the urban and 0.8 in the rural.

Sex (Table 2).—In the total population of the state there are 1,383,295 males and 1,317,581 females, or 105 males to each 100 females. In 1900 the ratio was 104.4 to 100. Among native whites the ratio is 102.3; among foreign-born whites 156.4. In the total urban population there are 102.5 males to 100 females, as compared with 106.8 in the rural population.

State of birth (Tables 3 and 4).—Of the total native population, that is, population born in the United States, 79.9 per cent were born in Indiana and 20.1 per cent in other states; of the native white population, 19.1 per cent were born in other states, and of the native negro, 58.1 per cent. Persons born outside the state constitute a much larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 12).—Of the foreign-born white population of Indiana, persons born in Germany represent 39 per cent; Hungary, 9; Austria, 7.4; Ireland, 7.1; England, 6.1; Russia, 6; Italy, 4.3; Canada, 3.6; Sweden, 3.2; Scotland, 2.1; all other countries, 11.8. Of the total white stock of foreign

origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 51.8 per cent; Ireland, 10.4; England, 6.8; Hungary, 3.7; Austria, 3.5; Canada, 3.3; Russia, 2.9; Sweden, 2.3; Scotland, 2.1; Switzerland, 2; France, 1.8; Italy, 1.8.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 822,434, representing 30.5 per cent of the population. Of such males, 72.5 per cent are native whites of native parentage, 14.2 per cent native whites of foreign or mixed parentage, 10.8 per cent foreign-born whites, and 2.5 per cent negroes. Of the 88,927 foreign-born white males of voting age, 42,533, or 47.8 per cent, are naturalized.

Age (Tables 7, 8, and 13).—Of the total population, 10.2 per cent are under 5 years of age, 19.3 per cent are from 5 to 14 years, inclusive, 18.9 per cent are from 15 to 24, 28.9 per cent are from 25 to 44, and 22.5 per cent are 45 years of age and over. The foreign-born white population comprises comparatively few children, only 4 per cent of this class being under 15 years of age, while more than four-fifths (84 per cent) are 25 years of age and over. Of the native whites of foreign or mixed parentage, less than three-fifths (59.7 per cent) are 25 and over and of the native whites of native parentage less than one-half (47.6 per cent).

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 33 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 26 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 777,889, of whom 513,623, or 66 per cent, attended school. In addition to these, 5,390 persons under 6 and 10,729 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage of school attendance was 65.9, as compared with 66.2 for girls. For children from 6 to 14 years, inclusive, the percentage attending school was 88.2. The percentage for children of this age was highest among native whites of native parentage, 88.4, followed by negroes, 87.7; native whites of foreign or mixed parentage, 87.6; and foreign-born whites, 80.6. (See Table I, p. 9.) There is little difference between urban and rural communities as regards the percentage of school attendance for the ages from 6 to 14, but of persons from 15 to 20 years, inclusive, 26.6 per cent were reported as attending school in urban communities as against 37.1 per cent in rural.

Illiteracy (Table 10).—There are 66,213 illiterates in the state, representing 3.1 per cent of the total population 10 years of age and over, as compared with 4.6 per cent in 1900. The percentage of illiteracy is 11.7 among foreign-born whites, 2.1 among native whites, and 13.7 among negroes.

For all classes combined, the percentage of illiterates is about the same in urban communities as in rural communities, 3 and 3.1, respectively, but the percentages for native whites and for negroes are higher in rural communities than in urban communities, while the percentage for foreign-born whites is slightly lower.

For persons from 10 to 20 years, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is very slight, only 0.6. (See Table I, p. 9.)

Marital condition (Tables 11 and 14).—In the population 15 years of age and over 34 per cent of the males are single and 26.2 per cent of the females. The percentage married is 59.8 for males and 62.3 for females; and the percentage widowed 5.1 and 10.4, respectively. The percentages divorced, 0.8 and 0.9, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that they marry younger. Thus 11.4 per cent of the females from 15 to 19 years of age are married, as compared with 1.2 per cent of the males, and 52.2 per cent of the females from 20 to 24 years are married, as compared with 27.2 per cent of the males. In the next age group, 25 to 34 years, the difference is not so great, 77.8 for females as against 67.7 for males, while in the age group 35 to 44 the difference practically disappears. That there is a larger proportion of widows than of widowers probably indicates that men are more apt to remarry than women and furthermore that, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of persons over 15 years of age who are married are as follows: Foreign-born whites, 63.9 for males and 66.9 for females; native whites of native parentage, 59.6 and 62.7, respectively; native whites of foreign or mixed parentage, 59 and 59.1, respectively; negroes, 51.7 for males and 55.9 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that the comparison should be made by age periods since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, both for males and females, is higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Indiana is 631,554, and the total number of families 654,891, indicating that in very few cases does more than one family occupy a dwelling. (See Table I, p. 9.) The average number of persons per dwelling is 4.3, and the average number per family 4.1.

NOTES REGARDING CHANGES IN BOUNDARIES, ETC. OF INCORPORATED PLACES.

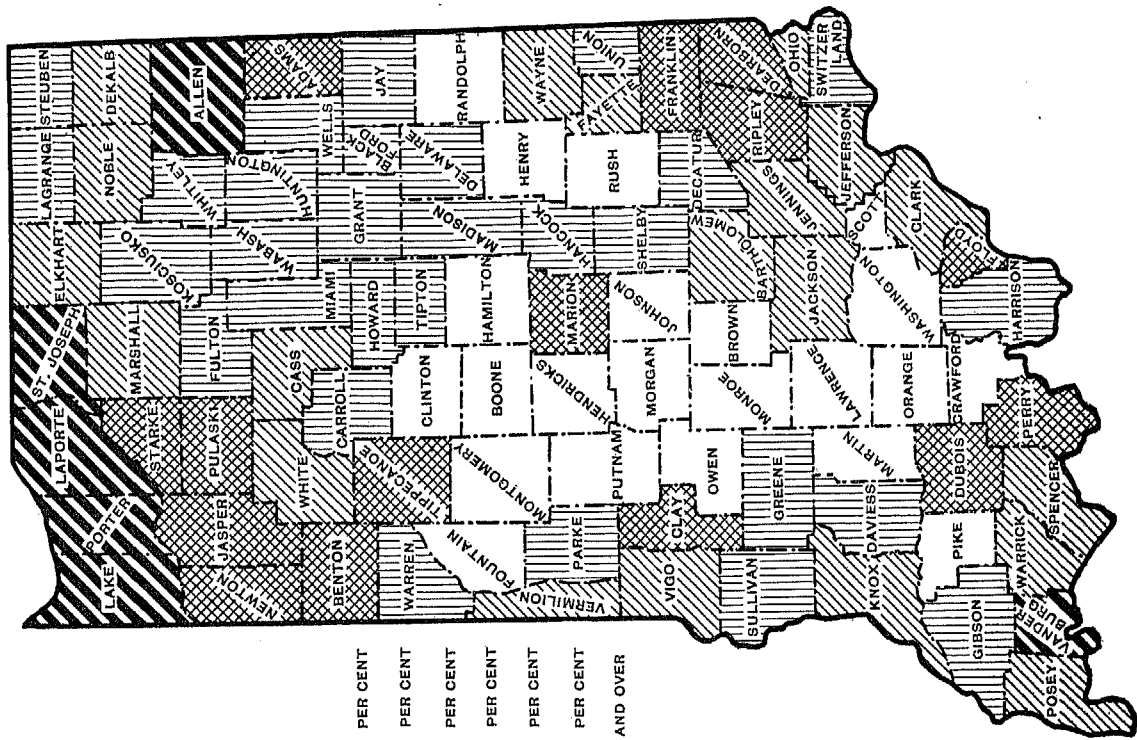

- ANGOLA.—Part of Pleasant township annexed in 1906.
 AURORA.—Part of Center township (Cochran town) annexed in 1907.
 BICKNELL.—Incorporated in 1907.
 CLINTON.—Part of Clinton township annexed in 1910.
 CONNERSVILLE.—Parts of Connorsville and Harrison townships (Maplewood town) annexed between 1890 and 1900.
 ELKHART.—Part of Concord township annexed in 1900.
 ELWOOD.—Part annexed to Pipe Creek township in 1906.
 EVANSVILLE.—Part of Pigeon township annexed in 1907; parts of Center, German, and Knight townships and parts of Perry and Pigeon townships (including Howell town) annexed in 1910.
 FORT WAYNE.—Parts of Adams and Wayne townships annexed between 1890 and 1900; parts of Adams, Washington, and Wayne townships annexed since 1900.
 GARY.—Incorporated in 1906; part of Calumet township (Polleston town) annexed in 1910.
 HAMMOND.—Parts of North township annexed in 1906 and 1907; part annexed to North township in 1906.
 HUNTINGTON.—Parts of Huntington township annexed since 1900; parts annexed to Huntington township since 1900.
 INDIANAPOLIS.—Part of Center township (Brightwood, North Indianapolis, West Indianapolis town, and part of Haughville town), and part of Wayne township (Mount Jackson town and part of Haughville town) annexed between 1890 and 1900; parts of Center and Warren townships (including Irvington town), and parts of Washington and Wayne townships annexed since 1900.
 JASONVILLE.—Incorporated in 1902.
 KOKOMO.—Parts of Center township annexed in 1904, 1907, and 1909.
 LAFAYETTE.—Part of Fairfield township annexed in 1909.
 LOGANSPORT.—Part of Eel township annexed in 1908.
 MADISON.—Part of Madison township (West Madison town) annexed in 1907.
 MARION.—Parts of Center and Franklin townships annexed since 1900.
 MICHIGAN CITY.—Part of Michigan township annexed in 1907.
 MUNCIE.—Parts of Center township annexed in 1901, 1903, and 1908.
 PERU.—Parts of Peru township annexed since 1900.
 RICHMOND.—Parts of Wayne township annexed in 1904 and 1909.
 SOUTH BEND.—Part of Portage township (Myler town) annexed between 1890 and 1900; parts of German and Portage townships annexed since 1900; part annexed to Portage township in 1908.
 TERRE HAUTE.—Parts of Harrison township annexed in 1901 and 1905.
 VINCENNES.—Parts of Vincennes township annexed in 1903, 1905, and 1907.
 WASHINGTON.—Part of Washington township annexed in 1908.

POPULATION : IOWA

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Iowa gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of Des Moines, the only city of more than 50,000.

A series of summary tables (numbered 1 to 14) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Iowa, 1,303,526, or 58.6 per cent, are native whites of native parentage; 632,181, or 28.4 per cent, are native whites of foreign or mixed parentage; 273,484, or 12.3 per cent, are foreign-born whites; and 14,973, or 0.7 per cent, are negroes. The corresponding percentages in 1900 were 56.5, 29.2, 13.7, and 0.6, respectively, the comparison indicating a slight increase in the proportion of native whites of native parentage. In 26 of the 99 counties the foreign-born whites constitute more than 15 per cent of the population; the highest percentage for this class (26.9) is in Sioux County. In 64 counties more than one-fourth of the population are native whites of foreign or mixed parentage, the proportion being highest (49.9 per cent) in Winnebago County. (See maps on page 32.)

Native whites of native parentage constitute nearly three-fifths both of the urban and of the rural population (58.2 per cent and 58.8 per cent, respectively); the corresponding proportions for native whites of foreign or mixed parentage are 27.1 per cent and 29.1 per cent. The percentage of foreign-born whites is 13.3 in the urban population and 11.9 in the rural; the percentage of negroes is 1.4 in the urban and 0.3 in the rural.

Sex (Table 2).—In the total population of the state there are 1,148,171 males and 1,076,600 females, or 106.6 males to 100 females. In 1900 the ratio was 107.6 to 100. Among native whites the ratio is 103 to 100, as compared with 135.7 to 100 for the foreign-born whites. In the urban population there are 100.4 males to 100 females, and in the rural, 109.5.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—72.6 per cent were born in Iowa and 27.4 per cent outside the state; of the native white population, 27.1 per cent were born outside the state, and of the native negro, 64.8 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Table 5).—Of the foreign-born white population of Iowa, persons born in Germany represent 36.1 per cent; Sweden, 9.8; Norway, 8; Denmark, 6.6; Ireland, 6.5; England, 6.1; Austria, 5.8; Canada, 4.2; Holland, 4.1; Russia, 2.3; Italy, 2.1; all other countries, 8.1. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 39.8 per cent; Ireland, 10.2; Norway, 7.4; Sweden, 7.3; England, 7; Denmark, 4.6; Canada, 4.5; Austria, 4.4; Holland, 3.2; Scotland, 2.1; Switzerland, 1.2; Russia, 1.1.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 663,672, representing 29.8 per cent of the population. Of such males, 50.3 per cent are native whites of native parentage, 26.7 per cent native whites of foreign or mixed parentage, 22.1 per cent foreign-born whites, and 0.8 per cent negroes. Of the 146,880 foreign-born white males of voting age, 90,573, or 61.7 per cent, are naturalized. Males of militia age—18 to 44—number 475,829.

Age (Tables 7, 8, and 12).—Of the total population, 10.6 per cent are under 5 years of age, 20.3 per cent from 5 to 14 years, inclusive, 19.6 per cent from 15 to 24, 27.8 per cent from 25 to 44, and 21.4 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 2.8 per cent of this class being under 15 years of age, while 88.1 per cent are 25 years of age and over. Of the native whites of foreign or mixed parentage, 46.8 per cent are 25 and over and of the native whites of native parentage, 42.4 per cent.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 31.4 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 26.3 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 675,222, of whom 469,778, or 69.6 per cent, attended school. In addition to these, 19,300 persons under 6 and 10,194 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 69.1; for girls, 70. For children from 6 to 14 years, inclusive, the percentage attending school was 90.7. The percentage for children of this age among native whites of native parentage and among native whites of foreign or mixed parentage was 90.8; among foreign-born whites, 82; among negroes, 89.3. (See Table I.) There is little difference between urban and rural communities as regards the percentage attending school for the ages from 6 to 14, but of persons from 15 to 20 years, inclusive, 39.6 per cent were reported as attending school in the rural population and 34.1 per cent in the urban.

Illiteracy (Table 10).—There are 29,889 illiterates in the state, representing 1.7 per cent of the total population 10 years of age and over, as compared with 2.3

per cent in 1900. The percentage of illiteracy is 0.8 among native whites, 6.3 among foreign-born whites, and 10.3 among negroes.

For all classes combined, and for each class separately, the proportion of illiterates is about the same in urban population as in rural, the percentages being 1.8 and 1.6, respectively.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is very slight, only 0.4. (See Table I.)

Marital condition (Tables 11 and 13).—In the population 15 years of age and over, 38.6 per cent of the males are single and 29.8 per cent of the females. The percentage married is 55.9 for males and 60 for females, and the percentage widowed 4.4 and 9.1, respectively. The percentages of those reported as divorced, 0.6 and 0.7, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due in part to the excess of males in the total population and in part to the fact that women marry younger. Thus 7.8 per cent of the females from 15 to 19 years of age are married, as compared with 0.6 per cent of the males, and 45.2 per cent of the females from 20 to 24 years are married, as compared with 20 per cent of the males. In the next age group, 25 to 34 years, the percentage is 75.5 for females and 61.6 for males, while in the age group 45 years and over the percentage married is higher among males. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 66.2 for males and 70.5 for females; native whites of native parentage, 55.5 and 59.2, respectively; native whites of foreign or mixed parentage, 49.6 and 56.3; negroes, 51.8 and 60.9.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married for males is practically the same in rural as in urban communities; for females the percentage is higher in the rural.

Dwellings and families.—The total number of dwellings in Iowa is 498,943, and the total number of families 512,515, indicating that in comparatively few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.5, and the average number per family, 4.3.

POPULATION : KANSAS

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Kansas gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for the three cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for cities of 2,500 to 10,000; and Table V for wards of Kansas City and Wichita, the only cities of more than 50,000.

A series of summary tables (numbered 1 to 14) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Kansas, 1,207,057, or 71.4 per cent, are native whites of native parentage; 292,105, or 17.2 per cent, are native whites of foreign or mixed parentage; 135,190, or 8 per cent, are foreign-born whites; and 54,030, or 3.2 per cent, are negroes. The corresponding percentages in 1900 were 68.9, 18.8, 8.6, and 3.5, respectively, the proportion of native whites of native parentage having increased somewhat during the decade. In most of the 105 counties the proportion of foreign-born whites is small, the maximum percentage for this class being that for Ellis County (19.8), which shows also the highest percentage of native whites of foreign or mixed parentage (46.1). (See maps on page 7.)

Of the urban population, 70.3 per cent are native whites of native parentage; of the rural population, 71.8 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 14.5 and 18.4 per cent, respectively. The percentage of foreign-born whites is 7.7 in the urban population and 8.1 in the rural; the percentage of negroes is 7.3 in the urban and 1.5 in the rural.

Sex (Table 2).—In the total population of the state there are 885,912 males and 805,037 females, or 110 males to 100 females. In 1900 the ratio was 109.5 to 100. Among native whites the ratio is 107.1 to 100, and among foreign-born whites 149.9 to 100. In the urban population there are 102.1 males to 100 females, and in the rural 113.5.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—52.9 per cent were born in Kansas and 47.1 per cent outside the state; of the native white population, 46.7 per cent were born outside the state; and of the native negro, 57.5 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Table 5).—Of the foreign-born white population of Kansas, persons born in Germany represent 25.5 per cent; Russia, 11.3; Sweden, 9.8; Austria, 8.9; England, 8.3; Mexico, 6.2;

Ireland, 6; Canada, 5.3; Scotland, 2.7; Italy, 2.6; all other countries, 13.3 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 31 per cent; England, 9.9; Ireland, 9.1; Russia, 9; Sweden, 8.3; Canada, 6.1; Austria, 5.8; Scotland, 3; Switzerland, 2.2; Mexico, 2 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 508,529, representing 30.1 per cent of the population. Of such males, 65.6 per cent are native whites of native parentage, 16.2 per cent native whites of foreign or mixed parentage, 14.6 per cent foreign-born whites, and 3.5 per cent negroes. Of the 74,248 foreign-born white males of voting age, 39,145, or 52.7 per cent, are naturalized. Males of militia age—18 to 44—number 370,227.

Age (Tables 7, 8, and 12).—Of the total population, 11.3 per cent are under 5 years of age, 20.5 per cent from 5 to 14 years, inclusive, 20 per cent from 15 to 24, 27.7 per cent from 25 to 44, and 20.3 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 4.4 per cent of this class being under 15 years of age, while 84.8 per cent are 25 years of age and over. Of the native whites of foreign or mixed parentage, only 44.8 per cent are 25 and over and of the native whites of native parentage practically the same proportion (44.5 per cent).

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 31.2 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 26.2 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 515,156, of whom 363,695, or 70.6 per cent, attended school. In addition to these, 6,527 persons under 6 and 7,877 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 69.9; for girls, 71.4. For children from 6 to 14 years, inclusive, the percentage attending school was 88.2. The percentage for children of this age among native whites of native parentage was 88.3; among native whites of foreign or mixed parentage, 89.1; among foreign-born whites, 76.7; and among negroes, 84.6. (See Table I.) There is little difference between urban and rural communities as regards the percentage attending school for the ages from 6 to 14, but of persons from 15 to 20 years of age, inclusive, the percentage attending school was 37.5 in the urban population and 46.8 in the rural.

Illiteracy (Table 10).—There are 28,968 illiterates in the state, representing 2.2 per cent of the total population 10 years of age and over, as compared with 2.9 per cent in 1900. The percentage of illiteracy is 0.8 among native whites, 10.5 among foreign-born whites, and 12 among negroes.

For all classes combined, the percentage of illiterates is slightly higher in the urban population than in the rural, the percentages being 2.4 and 2.1, respectively, but for each class separately, with the exception of the foreign-born whites, the percentage is higher in the rural population.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is very low (0.6). (See Table I.)

Marital condition (Tables 11 and 13).—In the population 15 years of age and over, 37.4 per cent of the males are single and 26.6 per cent of the females. The percentage married is 56.8 for males and 63.7 for females, and the percentage widowed, 4.5 and 8.7, respectively. The percentages of those reported as divorced, 0.6 and 0.7, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due in part to the excess of males in the total population and in part to the fact that women marry younger. Thus 11 per cent of the females from 15 to 19 years of age are married, as compared with 0.8 per cent of the males, and 52.8 per cent of the females from 20 to 24 years are married, as compared with 22.7 per cent of the males. In the next age group, 25 to 34 years, the percentages are 80.3 and 64.8, respectively, while in the age group 35 to 44 they are 86.4 and 80.9. In the age group 45 and over, however, the percentage is higher among males (79.6 as compared with 70.4). That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 65.8 for males and 73.4 for females; native whites of native parentage, 57 and 64.1, respectively; native whites of foreign or mixed parentage, 50.2 and 58.2, respectively; negroes, 53.5 for males and 58.1 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married for males is higher in the urban population, for females, in the rural.

Dwellings and families.—The total number of dwellings in Kansas is 385,682, and the total number of families 395,771, indicating that in comparatively few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.4, and the average number per family, 4.3.

¹ State total includes population (2,794) of Howard County, taken to form Chautauqua and Elk Counties in 1875.

² See note on page 32.

³ Includes 66 whites specially enumerated in 1890, not distributed by counties, also population (876 whites and negroes) of Garfield County, annexed to Finney County in 1893.

⁴ Native whites having both parents born in countries other than specified, and also those having both parents of foreign birth but born in different countries.

NOTES REGARDING CHANGES IN BOUNDARIES, ETC.

COUNTIES.

BARBER.—Parts of Harper and Pratt annexed in 1873.
CHAUTAQUA.—Organized from part of Howard in 1875.
CHEYENNE.—Organized from unorganized territory in 1873.
CLARK.—Part of Ford annexed in 1873.
COMANCHE.—Organized from part of old Kiowa in 1875; part taken to form part of new Kiowa in 1886.
DECATUR.—Organized from unorganized territory in 1873.
EDWARDS.—Organized from parts of old Kiowa and unorganized territory in 1874; part of old Kiowa annexed in 1875; part taken to form part of new Kiowa in 1886.
ELK.—Organized from part of Howard in 1875.
FINNEY.—Organized from Arapahoe and Sequoyah and parts of Buffalo, Foote, Grant, and Kearny in 1884; parts taken to form Haskell and parts of Garfield, Grant, Gray, and Kearny in 1887; Garfield annexed in 1893.
FORD.—Organized from part of Hodgeman in 1873; part annexed to Clark in 1873; part of Foote annexed in 1884; part taken to form part of Gray in 1887.
GEARY.—Parts of Riley annexed in 1873 and 1875; name changed from Davis in 1889.
GRANT.—Organized from unorganized territory in 1873; part taken to form part of Finney and part annexed to Hamilton in 1884; reorganized from parts of the same counties in 1887.
GRAY.—Organized from parts of Finney, Ford, and Hodgeman in 1887.
GREELEY.—Organized from unorganized territory in 1873.
HAMILTON.—Organized from unorganized territory in 1873; Stanton and parts of Grant and Kearny annexed in 1884; parts taken to form Stanton and parts of Grant and Kearny in 1887.
HARPER.—Part taken to form part of Kingman in 1872; part annexed to Barber in 1873.
HARVEY.—Organized from parts of McPherson and Sedgwick in 1872; part of Marion annexed in 1873.
HASKELL.—Organized from part of Finney in 1887.
HODGEMAN.—Part of unorganized territory annexed in 1873; part taken to form Ford in 1873; parts of Buffalo and Foote annexed in 1884; parts taken to form parts of Garfield and Gray in 1887.
KEARNY.—Organized from unorganized territory in 1873; part taken to form part of Finney and part annexed to Hamilton in 1884; reorganized from parts of the same counties in 1887.
KINGMAN.—Organized from parts of Harper and Reno in 1872.
KIOWA.—Organized from parts of Comanche and Edwards in 1886.
LANE.—Organized from unorganized territory in 1873.
LOGAN.—Organized as St. John from part of Wallace in 1881.
McPHERSON.—Part taken to form part of Harvey and part annexed to Reno in 1872.
MARION.—Part annexed to Harvey in 1873.
MEADE.—Organized from unorganized territory in 1873.

MORTON.—Organized from unorganized territory in 1873; name changed from Kansas in 1886.
NORTON.—Name changed to Billings in 1873; name changed back to Norton in 1874.
PAWNEE.—Parts of Rush and Stafford annexed in 1873; part given to unorganized territory in 1873; part of unorganized territory annexed in 1874.
PRATT.—Part annexed to Barber in 1873.
RAWLINS.—Organized from unorganized territory in 1873.
RENO.—Parts of McPherson, Rice, and Sedgwick annexed in 1872; part taken to form part of Kingman in 1872.
RICE.—Part annexed to Reno in 1872.
RILEY.—Part of Wabaunsee annexed in 1871; parts annexed to Geary in 1873 and 1875.
RUSH.—Part annexed to Pawnee in 1873.
SCOTT.—Organized from unorganized territory in 1873.
SEDGWICK.—Part taken to form part of Harvey in 1872; part annexed to Reno in 1872.
SEWARD.—Organized from unorganized territory in 1873.
SHERIDAN.—Organized from unorganized territory in 1873.
SHERMAN.—Organized from unorganized territory in 1873.
STAFFORD.—Part annexed to Pawnee in 1873.
STANTON.—Organized from unorganized territory in 1873; annexed to Hamilton in 1884; reorganized from part of the same county in 1887.
STEVENS.—Organized from unorganized territory in 1873.
THOMAS.—Organized from unorganized territory in 1873.
WABAUNSEE.—Part annexed to Riley in 1871.
WALLACE.—Part taken to form Logan in 1881.
WICHITA.—Organized from unorganized territory in 1873.

NOTE.—In computing this increase the population of Indian reservations in 1900 has been deducted from the total population of the county, in order to make that total comparable with the total for 1890, which does not include the population of Indian reservations. The population thus deducted in the several counties was as follows: Brown, 968; Doniphan, 47; and Jackson, 1,011.

CITIES.

ATCHISON.—Part of Walnut township annexed in 1905.
EMPORIA.—Part of Emporia township annexed in 1903.
GALENA.—Empire City annexed in 1907.
KANSAS CITY.—Part of Quindaro township annexed in 1905 and Argentine City annexed in 1910.
LAWRENCE.—Parts of Wakarusa township annexed since 1900.
PITTSBURG.—Parts of Baker township annexed in 1906 and 1907.
TOPEKA.—Parts of Topeka township annexed between 1890 and 1900 and since 1900.
WICHITA.—Parts of Wichita township annexed in 1904, 1905, and 1907.

POPULATION : KENTUCKY

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Kentucky gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportion urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of 25,000 inhabitants or more; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of the two cities of more than 50,000.

A series of summary tables (numbered 1 to 15) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time from September 1, 1909, to the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Kentucky, 2,027,951, or 88.6 per cent, are whites, and 261,656, or 11.4 per cent, negroes. The corresponding percentages in 1900 were: Whites, 86.7; negroes, 13.3. In 72 of the 119 counties the population is less than 10 per cent negro; in 41 counties from 10 to 25; and in 6 counties over 25 per cent negro. (See map on a following page.)

Native whites of native parentage constitute 81.4 per cent of the total population of the state, and 91.9 per cent of the white population. Native whites of foreign or mixed parentage constitute only 5.4 per cent of the total population, and foreign-born whites 1.7 per cent.

Of the urban population, 58.2 per cent are native whites of native parentage; of the rural population, 88.8 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 17.2 and 1.7 per cent, respectively. The percentage of foreign-born whites is 5.4 in the urban population and 0.6 in the rural; the percentage of negroes is 19.2 in the urban and 8.9 in the rural.

Sex (Table 2).—In the total population of the state there are 1,161,709 males and 1,128,196 females, or 103 males to 100 females. In 1900 the ratio was practically the same, 103.1 to 100. Among the whites there are 103.2 males to 100 females, and among the negroes 101. For all native whites combined the ratio is 103 to 100, as compared with 117.2 to 100 for the foreign-born whites. In the urban population there are 94.1 males to 100 females, and in the rural, 106.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—90.3 per cent were born in Kentucky and 9.7 per cent outside the state; of the native white population, 9.6 per cent were born outside the state; and of the native negro, 10.8 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 12).—Of the foreign-born white population, persons born in Germany represent 48.3 per cent; Ireland, 14.8; Russia, 8; England, 6.5; Switzerland, 4.1; Italy, 3.3; Austria, 2.6; Canada, 2.5; all other countries, 9.8 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 56.1 per cent; Ireland, 18; England, 6; Russia, 3.4; Switzerland, 2.8; Canada, 1.7; France, 1.7; Italy, 1.5; Scotland, 1.5 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 603,454, representing 26.4 per cent of the population. Of such males, 37.4 per cent are whites and 12.5 per cent negroes. Native whites represent 84.1 per cent of the total number and foreign-born whites 3.4 per cent. Of the 20,440 foreign-born white males of voting age, 13,225, or 64.7 per cent, are naturalized. Males of militia age—18 to 44—number 457,493.

Age (Tables 7, 8, and 13).—Of the total population, 12.9 per cent are under 5 years of age, 22.9 per cent from 5 to 14 years, inclusive, 20 per cent from 15 to 24, 26.3 per cent from 25 to 44, and 17.7 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 2.2 per cent of this class being under 15 years of age, while more than nine-tenths (90.6 per cent) are 25 years of age and over. The negro population comprises a considerably smaller proportion of children under 15 than the native white population of native parentage.

The urban population shows a smaller proportion of children than the rural, and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 32.8 per cent are from 25 to 44 years of age, inclusive, and of the rural population 24.3 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 755,709, of whom 461,195, or 61 per cent, attended school. In addition to these, 5,188 persons under 6 and 7,098 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 61.1; for girls, 61. For children from 6 to 14 years, inclusive, the percentage attending school was 76. The percentage for children of this age among native whites of foreign or mixed parentage was 87.1; among foreign-born whites, 83.8; among native whites of native parentage, 76.3; and among negroes, 70.3. (See Table I.) In urban communities the percentage of children of that age attending school was 85.1, in rural communities, 74.

Illiteracy (Table 10).—There are 208,084 illiterates in the state, representing 12.1 per cent of the total population 10 years of age and over, as compared with 16.5 per cent in 1900. The percentage of illiteracy is 27.6 among negroes, 10 among native whites, and 8.3 among foreign-born whites. It is 10.7 for native

whites of native parentage, and only 1.5 for native whites of foreign or mixed parentage.

Illiterates are relatively fewer in urban than in rural communities, the percentages being 6.7 and 14, respectively. This difference between urban and rural communities appears in each class of the population, although among foreign-born whites, most of whom arrive in this country when past the school age, it is slight.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 6.7. (See Table I.)

Marital condition (Tables 11 and 14).—In the population 15 years of age and over, 35.6 per cent of the males are single and 27.8 per cent of the females. The percentage married is 58.4 for males and 60.3 for females; and the percentage widowed 5.1 and 10.9, respectively. The percentages of those reported as divorced, 0.5 and 0.8, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that they marry younger. Thus, 17.3 per cent of the females from 15 to 19 years of age are married, as compared with 2.3 per cent of the males; and 56.3 per cent of the females from 20 to 24 years are married, as compared with 32.7 per cent of the males. In the next age group, 25 to 34 years, the difference is much less marked. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but since husbands are generally older than their wives, the marriage relationship is in fact more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 67.8 for males, 53.6 for females; native whites of native parentage, 59.2 and 62.3, respectively; native whites of foreign or mixed parentage, 55.8 and 52.2, respectively; negroes, 52.6 for males and 53.9 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, for each sex, is higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Kentucky is 469,669, and the total number of families 494,788, indicating that in comparatively few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.9, and the average number per family 4.6.

NOTES REGARDING CHANGES IN BOUNDARIES, ETC.

COUNTIES.

ANDERSON.—Part of Washington annexed between 1880 and 1890.
 BALLARD.—Part taken to form Carlisle in 1886.
 BATH.—Part of Menifee annexed in 1878.
 BELL.—Name changed from Josh Bell between 1870 and 1880. Part of Knox annexed in 1872.
 BREATHITT.—Part taken to form part of Knott in 1884.
 CARLISLE.—Organized from part of Ballard in 1886.
 CLAY.—Part taken to form part of Leslie in 1878.
 CUMBERLAND.—Part annexed to Russell in 1876.
 ESTILL.—Part annexed to Powell between 1890 and 1900.
 FLOYD.—Parts taken to form part of Martin in 1870 and part of Knott in 1884.
 GRANT.—Part of Owen annexed between 1870 and 1880.
 HARLAN.—Part taken to form part of Leslie in 1878.
 JOHNSON.—Part taken to form part of Martin in 1870.
 KNOTT.—Organized from parts of Breathitt, Floyd, Letcher, Magoffin, and Perry in 1884.
 KNOX.—Part annexed to Bell in 1872.
 LAUREL.—Part of Whitley annexed in 1876.
 LAWRENCE.—Part taken to form part of Martin in 1870.
 LESLIE.—Organized from parts of Clay, Harlan, and Perry in 1878.
 LETCHER.—Part taken to form part of Knott in 1884.
 MAGOFFIN.—Part taken to form part of Knott in 1884.

MARTIN.—Organized from parts of Floyd, Johnson, Lawrence, and Pike in 1870.
 MENIFEE.—Parts annexed to Bath and Morgan in 1878; parts of Powell and Wolfe annexed in 1880.
 MORGAN.—Part annexed to Wolfe in 1878; part of Menifee annexed in 1878.
 OWEN.—Part annexed to Grant between 1870 and 1880.
 PERRY.—Parts taken to form part of Leslie in 1878 and part of Knott in 1884.
 PIKE.—Part taken to form part of Martin in 1870.
 POWELL.—Part annexed to Menifee in 1880; part of Estill annexed between 1890 and 1900.
 RUSSELL.—Part of Cumberland annexed in 1876.
 WASHINGTON.—Part annexed to Anderson between 1880 and 1890.
 WHITLEY.—Part annexed to Laurel in 1876.
 WOLFE.—Part of Morgan annexed in 1878; part annexed to Menifee in 1880.

CITIES.

BOWLING GREEN.—Parts annexed to magisterial districts 4 and 5 in 1901.
 COVINGTON.—Part of magisterial district 3 annexed in 1903 and parts of district 4 (comprising Central Covington and Latonia towns) annexed in 1906 and 1909, respectively.
 HENDERSON.—Parts of magisterial districts 4 and 5 annexed in 1905.
 LOUISVILLE.—Parts of magisterial district 1 (including Crescent Hill town) annexed in 1900 and 1901; parts of district 3 annexed in 1903, 1909, and 1910; parts of district 4 annexed in 1900, 1902, and 1908; and part annexed to district 1 in 1909. East Louisville, South Louisville, and Parkland towns and part of Crescent Hill town annexed between 1890 and 1900.

POPULATION : LOUISIANA

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Louisiana gave the number of inhabitants by parishes and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and parishes; Table II for New Orleans and Shreveport, the two cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of New Orleans, the only city of more than 50,000.

A series of summary tables (numbered 1 to 15) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated

places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Louisiana, 941,086, or 56.8 per cent, are whites, and 713,874, or 43.1 per cent, negroes. The corresponding percentages in 1900 were 52.8 and 47.1, respectively. In 25 of the 60 parishes the population is more than one-half negro, and in 5 of them more than four-fifths negro, the highest percentage of negroes being that for Tensas Parish (91.5). (See map on a following page.)

Native whites of native parentage constitute 46.9 per cent of the total population of the state, and 82.5 per cent of the white population. Native whites of foreign or mixed parentage constitute only 6.8 per cent of the total population, and foreign-born whites only 3.1 per cent.

Of the urban population, 43.8 per cent are native whites of native parentage; of the rural, 48.2 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 17 and 2.4 per cent, respectively. The percentage of foreign-born whites is 6.7 in the urban population and 1.6 in the rural; the percentage of negroes is 32.4 in the urban and 47.7 in the rural.

Sex (Table 2).—In the total population of the state there are 835,275 males and 821,113 females, or 101.7 males to 100 females. In 1900 the ratio was 101.1 to 100. Among the whites there are 104.3 males to 100 females; among the negroes, 98.3. Among native whites the ratio is 102.8 to 100, as compared with 133.9 to 100 for the foreign-born whites. In the urban population there are 93 males to 100 females, and in the rural, 105.7.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—87.7 per cent were born in Louisiana and 12.3 per cent outside the state; of the native white population, 14.3 per cent were born outside the state, and of the native negro, 9.9 per cent. Persons born outside

the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 12).—Of the foreign-born white population of Louisiana, persons born in Italy represent 39.1 per cent; Germany, 17.2; France, 10.2; Ireland, 7.2; England, 4; Russia, 3.5; Austria, 3.1; Canada, 2.3; Mexico, 1.9; all other countries, 11.8. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Italy contributed 26.1 per cent; Germany, 25.1; France, 12.1; Ireland, 11.5; England, 4.7; Russia, 1.9; Canada, 1.9; Austria, 1.8; Spain, 1.5; Scotland, 1.1.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 414,919, representing 25 per cent of the population. Of such males, 57.8 per cent are whites and 42 per cent negroes. Native whites represent 51.5 per cent of the total number and foreign-born whites 6.4 per cent. Of the 26,519 foreign-born white males of voting age, 10,024, or 37.8 per cent, are naturalized. Males of militia age—18 to 44—number 338,343.

Age (Tables 7, 8, and 13).—Of the total population, 13.5 per cent are under 5 years of age, 24.9 per cent from 5 to 14 years, inclusive, 20.6 per cent from 15 to 24, 26.5 per cent from 25 to 44, and 14.2 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 5.9 per cent of this class being under 15 years of age, while more than four-fifths (81.1 per cent) are 25 years of age and over. The proportion of children under 15 in the negro population is somewhat smaller than in the native white population of native parentage.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 32.1 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 24.2 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 575,866, of whom 248,420, or 43.1 per cent, attended school. In addition to these, 4,968 persons under 6 and 3,639 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 42.6; for girls, 43.7. For children from 6 to 14 years, inclusive, the percentage attending school was 54.6. The percentage for children of this age among native whites of foreign or mixed parentage was 69.7; among native whites of native parentage, 68.4; among foreign-born whites, 50.7; and among negroes, 37.4. (See Table I.) In urban communities the percentage of children of that age attending school was 74.1, and in rural, 48.5.

Illiteracy (Table 10).—There are 352,179 illiterates in the state, representing 29 per cent of the total population 10 years of age and over, as compared with 38.5 per cent in 1900. The percentage of illiteracy is 48.4 among negroes, 24 among foreign-born whites, and 13.4

among native whites. It is 15 for native whites of native parentage and 3.6 for native whites of foreign or mixed parentage.

For all classes combined, illiterates are fewer in urban than in rural communities, 10.7 per cent as against 38. For each class of the population the percentage of illiterates in the rural population greatly exceeds that in the urban.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 24.9. (See Table I.)

Marital condition (Tables 11 and 14).—In the population 15 years of age and over, 37.9 per cent of the males are single and 28.3 per cent of the females. The percentage married is 56.1 for males and 57.6 for females, and the percentage widowed 5 and 13.2, respectively. The percentages of those reported as divorced, 0.3 and 0.6, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that women marry younger. Thus 16.2 per cent of the females from 15 to 19 years of age are married, as compared with 1.6 per cent of the males, and 58 per cent of the females from 20 to 24 years of age are married, as compared with 32.3 per cent of the males. In the next age group, 25 to 34 years, the difference is less marked, the percentages being 76.6 and 69.1, respectively, while in the succeeding age groups the percentage married is higher among the males. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 63.4 for males, 59.4 for females; native whites of native parentage, 53.8 and 58.6, respectively; native whites of foreign or mixed parentage, 54.8 and 51.8; negroes, 57.8 and 57.5.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, both for males and females, is higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Louisiana is 331,220, and the total number of families 344,144, indicating that in comparatively few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 5, and the average number per family, 4.8.

COMPOSITION AND CHARACTERISTICS.
