E. DANA DURAND, DIRECTOR

# POPULATION: NEW JERSEY

### COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for New Jersey gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of more than 25,000 inhabitants; Table III for places of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of cities of more than 50,000.

A series of summary tables (numbered 1 to 16) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of New Jersey, 1,009,909, or 39.8 per cent, are native whites of native parentage; 777,797, or 30.7 per cent, are native whites of foreign or mixed parentage; 658,188, or 25.9 per cent, are foreign-born whites; and 89,760, or 3.5 per cent, are negroes. The corresponding percentages in 1900 were 43.8, 29.5, 22.8, and 3.7, respectively, the proportion of foreign-born whites having increased during the decade. By counties the proportion of foreign-born whites ranges from 6.1 per cent in Salem County to 39.3 per cent in Passaic, and the proportion of native whites of foreign or mixed parentage from 8.1 per cent in Salem to 41.4 per cent in Hudson County. (See maps on page 25.)

Of the urban population, 33.6 per cent are native whites of native parentage; of the rural, 58.7 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 34.1 and 20.1 per cent, respectively. The percentage of foreign-born whites is 28.8 in the urban population and 17.3 in the rural; the percentage of negroes is 3.4 in the urban and 3.9 in the rural.

Sex (Tables 2 and 13).—In the total population of the state there are 1,286,463 males and 1,250,704 females, or 102.9 males to 100 females. In 1900 the sexes were nearly equal. Among native whites the ratio of males to females is 98 to 100 and among foreignborn whites 118.2 to 100. In the urban population there are 101 males to 100 females, and in the rural, 108.8.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—71.6 per cent were born in New Jersey and 28.4 per cent outside the state; of the native white population, 26.9 per cent were born outside the state, and of the native negro, 58.1 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 12).—Of the foreign-born white population of New Jersey, persons born in Germany represent 18.7 per cent; Italy, 17.5;

Russia, 14.2; Ireland, 12.6; Austria, 8.6; England, 7.6; Hungary, 7.2; Scotland, 2.7; Holland, 1.9; Sweden, 1.6; all other countries, 7.1 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 23.2 per cent; Ireland, 18.1; Italy, 13.4; Russia, 10.2; England, 8.5; Austria, 6.1; Hungary, 4.8; Scotland, 2.7; Holland, 1.9; Canada, 1.4; Sweden, 1.3 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 774,702, representing 30.5 per cent of the population. Of such males, 36.3 per cent are native whites of native parentage, 19.9 per cent native whites of foreign or mixed parentage, 40 per cent foreign-born whites, and 3.7 per cent negroes. Of the 309,648 foreign-born white males of voting age, 128,438, or 41.5 per cent, are naturalized. Males of militia age—18 to 44—number 597,513.

Age (Tables 7, 8, and 14).—Of the total population, 10.5 per cent are under 5 years of age, 18.5 per cent from 5 to 14 years, inclusive, 19.2 per cent from 15 to 24, 32.1 per cent from 25 to 44, and 19.4 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 6.3 per cent of this class being under 15 years of age, while more than three-fourths (75.6 per cent) are 25 years of age and over. Of the native whites of foreign or mixed parentage, 34.2 per cent are 25 and over, and of the native whites of native parentage, 49 per cent.

The urban population shows a somewhat larger proportion of persons in the prime of life than the rural, and a smaller proportion in the advanced ages. Migration to the city explains this at least in part. Of the urban population, 32.9 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 30 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 708,525, of whom 440,903, or 62.2 per cent, attended school. In addition to these, 21,433 children under 6 and 6,936 persons 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 62.9; for girls, 61.6. For children from 6 to 14 years, inclusive, the percentage attending school was 88.6. The percentage for children of this age among native whites of native parentage was 89.6; among native whites of foreign or mixed parentage, 88.7; among negroes, 85.7; and among foreign-born whites, 83.8. (See Table I.) There is little difference between urban and rural communities as regards the percentage attending school for children of that age; for persons from 15 to 20 the percentage is 22.4 in the urban population and 27.9 in the rural.

Illiteracy (Table 10).—There are 113,502 illiterates | to each 100 dwellings. in the state, representing 5.6 per cent of the total | number of persons per d population 10 years of age and over, as compared with | number per family, 4.5.

5.9 per cent in 1900. The percentage of illiteracy is 14.7 among foreign-born whites, 9.9 among negroes, and 0.9 among native whites.

For all classes combined, the percentage of illiterates is 5.8 in urban communities and 5 in rural. For each class separately, however, the percentage of illiteracy in the rural population exceeds that in the urban.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 2.4. (See Table I.)

Marital condition (Tables 11 and 15).—In the population 15 years of age and over, 37.9 per cent of the males are single and 31.6 per cent of the females. The percentage married is 57.3 for both males and females, and the percentage widowed 4.4 and 10.7, respectively. The percentages of those reported as divorced, 0.2 for both sexes, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that women marry younger. Thus 6.8 per cent of the females from 15 to 19 years of age are married, as compared with 0.7 per cent of the males, and 44.3 per cent of the females from 20 to 24 years of age are married, as compared with 21.5 per cent of the males. In the next age group, 25 to 34 years, the difference is not so great, the percentages being 73.2 for females and 63.7 for males, while in the next two age groups the percentage married is higher among the males. there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 65.4 for males and 67.1 for females; native whites of native parentage, 56.9 and 55.3, respectively; native whites of foreign or mixed parentage, 44.9 and 48.2; negroes, 56.8 and 55.2.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, for males and for females, is higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in New Jersey is 407,295, and the total number of families 558,202, there being 137.1 families to each 100 dwellings. (See Table I.) The average number of persons per dwelling is 6.2, and the average number per family, 4.5.

PER CENT OF NATIVE WHITE OF FOREIGN OR MIXED PARENTAGE IN TOTAL POPULATION.

## THIRTEENTH CENSUS OF THE UNITED STATES: 1910

DEPARTMENT OF COMMERCE AND LABOR

# BULLETIN

BUREAU OF THE CENSUS E. DANA DURAND, DIRECTOR

# POPULATION: NEW MEXICO

### COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM, C. HUNT, Chief Statistician for Population

The first population bulletin for New Mexico gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of three general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for Albuquerque, the only city of more than 10,000 inhabitants; and Table III for places of 2,500 to 10,000 inhabitants.

A series of summary tables (numbered 1 to 12) reproduces from the general tables the more important state totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of New Mexico, 255,609, or 78.1 per cent, are native whites of native parentage; 26,331, or 8 per cent, are native whites of foreign or mixed parentage; 22,654, or 6.9 per cent, are foreign-born whites; and 20,573, or 6.3 per cent, are Indians. The corresponding percentages in 1900 were 76.3, 9.2, 6.8, and 6.7, respectively, the comparison indicating only slight changes in the composition of the population during the decade. Negroes constitute 0.5 per cent of the population. In 14 of the 26 counties the percentage of foreign-born whites is less than 5; the maximum percentage, 25.2, is that for Grant County. The percentage of native whites of foreign or mixed parentage is less than 5 in 10 counties, and exceeds 25 in 2, Grant (27.6) and Dona Ana (27.5). (See also maps on page 7.)

Of the urban population, 74 per cent are native whites of native parentage; of the rural, 78.8 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 15.1 and 6.9 per cent, respectively. The percentage of foreign-born whites is 8.8 in the urban population and 6.6 in the rural; the percentage of Indians is 0.1 in the urban and 7.3 in the rural.

Sex (Table 2).—In the total population of the state there are 175,245 males and 152,056 females, or 115.3 males to 100 females. In 1900 the ratio was 114.4 to 100. Among native whites the ratio is 111.5 to 100 and among foreign-born whites 189.6 to 100. In the urban population there are 101.5 males to 100 females, and in the rural, 117.7.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—60.7 per cent were born in New Mexico and 39.3 per cent outside the state; of the native white population, 41.7 per cent were born outside the state; of the native Indian, 2.5 per cent; and of the native negro, 74.3 per cent. Persons born outside the state constitute a much larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Table 5).—Of the foreignborn white population of New Mexico, persons born in Mexico represent 52.6 per cent; Italy, 8.6; Germany, 7.7; Austria, 5.4; England, 4.9; Canada, 4.5; Ireland, 2.8; Scotland, 2.2; Sweden, 1.6; France, 1.4; all other countries, 8.1 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Mexico contributed 44.8 per cent; Germany, 12.5; England, 6.9; Italy, 5.8; Ireland, 5.6; Canada, 5.3; Austria, 3.5; Scotland, 2.9; France, 1.7; Sweden, 1.5; Switzerland, 0.9 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 94,637, representing 28.9 per cent of the population. Of such males, 73.2 per cent are native whites of native parentage, 7.3 per cent native whites of foreign or mixed parentage, 13.2 per cent foreign-born whites, 5.1 per cent Indians, 0.7 per cent negroes, and 0.5 per cent Chinese and Japanese. Of the 12,502 foreign-born white males of voting age, 4,267, or 34.1 per cent, are naturalized. Males of militia age—18 to 44—number 73,097.

Age (Tables 7 and 8).—Of the total population, 13.8 per cent are under 5 years of age, 23 per cent from 5 to 14 years, inclusive, 19.4 per cent from 15 to 24, 27.6 per cent from 25 to 44, and 16.1 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 10 per cent of this class being under 15 years of age, while 72.7 per cent are 25 years of age and over. Of the native whites of foreign or mixed parentage, less than two-fifths (39.9 per cent) are 25 and over, and of the native whites of native parentage slightly more than two-fifths (41.5 per cent).

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Of the urban population, 32.3 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 26.7 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 105,403, of whom 64,342, or 61 per cent, attended school. In addition to these, 1,563 children under 6 and 812 persons 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 62.1; for girls, 59.9. For children from 6 to 14 years, inclusive, the percentage attending school was 72.9. The percentage for children of this age among native whites of native parentage was 76.9; among native whites of foreign or mixed parentage, 75.1; among foreign-born whites, 56.6; among Indians, 29.3; and among negroes, 73.8. (See Table I.) In urban communities the percentage of children of that age attending school was 83.2, and in rural, 71.4.

Illiteracy (Table 10).—There are 48,697 illiterates in the state, representing 20.2 per cent of the total population 10 years of age and over, as compared with 33.2 per cent in 1900. The percentage of illiteracy is 14.9 among native whites, 31 among foreign-born whites, 81.7 among Indians, and 14.2 among negroes.

For all classes combined, the percentage of illiterates is 7.8 in urban communities and 22.4 in rural. For each class separately, also, the percentage is considerably higher in rural communities than in urban.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 13. (See Table I.)

Marital condition (Table 11).—In the population 15 years of age and over, 38.2 per cent of the males are single and 23.3 per cent of the females. The percentage married is 55.7 for males and 66.2 for females, and the percentage widowed 5.2 and 9.6, respectively. The percentages of those reported as divorced, 0.7 and 0.9, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due partly to the excess of males in the total population, and partly to the fact that women marry younger. Thus 19.7 per cent of the females from 15 to 19 years of age are married, as compared with 1.1 per cent of the males, and 66.8 per cent of the females from 20 to 24 years of age are married, as compared with 26.1 per cent of the males. the next age group, 25 to 34 years, the percentages are 84.3 and 64, respectively; in the age group 35 to 44 the difference is less marked, while in the succeeding age group the percentage married is higher among the males. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 54.1 for males and 72.6 for females; native whites of native parentage, 56.6 and 66.2, respectively; native whites of foreign or mixed parentage, 47.8 and 59.9; Indians, 60.5 and 66.1; negroes, 49.7 and 58.7.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married is slightly lower for males, but decidedly higher for females, in rural than in urban communities.

Dwellings and families.—The total number of dwellings in New Mexico is 75,888, and the total number of families 78,883, indicating that in comparatively few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.3, and the average number per family, 4.1.

#### NOTES REGARDING CHANGES IN BOUNDARIES, ETC.

#### COUNTIES.

BERNALILIO.—Santa Ana annexed in 1876 and part of Santa Fe annexed between 1890 and 1800; parts taken to form part of McKinley in 1901, Sandoval and part of Leonard Wood (see Guadalupe) in 1903, and part of Torrance in 1905. (See also Note 1.)

CHAVES.—Organized from part of Lincoln in 1891; part taken to form part of Roosevelt in 1903. (See also Note 2.)

COLFAX.-Part taken to form part of Union in 1893.

CURRY.-Organized from parts of Quay and Roosevelt in 1909. (See also Note 2.) DONA ANA.—Part annexed to Lincoln between 1870 and 1880; part of Lincoln annexed between 1880 and 1890; parts taken to form part of Sierra in 1884, part of Otero in 1899, and part of Luna in 1901. (See also Note 3.)

EDDY .- Organized from part of Lincoln in 1891.

GRANT.—Parts taken to form part of Sierra in 1884 and part of Luna in 1901. (See also Note 3.)

GUADALUPE.—Old Guadalupe organized from parts of Lincoln and San Miguel In 1891; parts taken to form parts of Quay and Roosevelt in 1903; the remainder with parts of Bernalillo and Valencia, taken to form Leonard Wood in 1903. Name clanged from Leonard Wood to Guadalupe in 1905. (See also Note 2.)

Lincoln.—Part of Dona Ana annexed between 1870 and 1880; part annexed to Dona Ana between 1880 and 1880; parts taken to form Chaves, Eddy, and part of old Quadalupe in 1891, part of Otero in 1899, and part of Torrance in 1905. (See also Note 1.)

LUNA .- Organized from parts of Dona Ana and Grant in 1901. (See also Note 3.) McKinley.—Organized from parts of Bernalillo, Rio Arriba, San Juan, and Valenda in 1901. (See also Note 1.)

MORA .- Part taken to form part of Union in 1893.

OTERO.-Organized from parts of Dona Ana, Lincoln, and Socorro in 1899. QUAY.—Organized from parts of old Guadalupe and Union in 1903; part taken to form part of Gurry in 1909. (See also Note 2.)

RIO ARRIBA.—Parts taken to form San Juan in 1887 and part of McKinley in 1901; part of Santa Fe annexed in 1902. (See also Note 1.)

ROOSEVELT.—Organized from parts of Chaves and old Guadalupe in 1903; part taken to form part of Curry in 1909. (See also Note 2.)

San Juan.—Organized from part of Rio Arriba in 1887; part taken to form part of McKinley in 1901. (See also Note 1.) SAN MIGUEL.—Parts taken to form part of old Guadalupe in 1891, part of Union in 1893, and part of Torrance in 1905. (See also Note 1.)

SANDOVAL.-Organized from part of Bernalillo in 1903. (See also Note 1.)

SANTA FE.—Part annexed to Bernalillo between 1890 and 1900 and part annexed to Rio Arriba in 1902; part taken to form part of Torrance in 1905. (See also

SIERRA.—Organized from parts of Dona Ana, Grant, and Socorro in 1884.

SOCORRO.—Parts taken to form part of Sierra in 1884, part of Otero in 1899, and part of Torrance in 1905. (See also Note 1.)

TORRANCE.—Organized from parts of Bernalillo, Lincoln, San Miguel, Santa Fe, Socorro, and Valencia in 1905. (See also Note 1.)

Socorro, and Valencia in 1905. (See also Note 1.)

UNION.—Organized from parts of Collax, Mora, and San Miguel in 1893; part taken to form part of Quay in 1903. (See also Note 2.)

VALENCIA.—Parts taken to form part of McKlinley in 1901, part of Leonard Wood (now Guadalupe) in 1903, and part of Torrance in 1905. (See also Note 1.)

NOTE 1.—Bernuillo, Lincoln, McKinley, Rio Arriba, San Juan, San Miquel, Sandoval, Santa Fe, Socorro, Torrance, and Valencia Counties combined.—Total population: 1910, 154, 998; 1900, 114, 989; increase, 1900–1910, 39, 090; per cent of increase, 26.8. Rural population: 1910, 130, 972; same places in 1900, 18, 160; per cent of increase, 26.8. Rural population: 1910, 130, 972; same territory in 1900, 98, 29; per cent of increase, 35.3. Urban population: 1900, 21, 106; rural population, 1900, 98, 883. Per cent in places of 2,500 or more in 1910, 15. Per cent in places of 2,500 or more in 1900, 18.4.

Nore 2.—Chaves, Curry, Guadalupe, Quay, Roosevelt, and Union Counties combined.—Total population: 1910, 77,600; 1900, 14,730; increase, 1900-1910, 62,870; per cent of increase, 428.8. Urban population: 1910, 11,953; same places in 1900, 2,049 per cent of increase, 483.4. Rural population: 1910, 65,647; same territory in 1900, 12,681; per cent of increase, 417.7. Rural population: 1900, 14,730. Per cent in places of 2,800 or page in 190, 154. of 2,500 or more in 1910, 15.4.

of 2,500 or more in 1910, 15.4.

NOTE 3.—Dona Ana, Grant, and Luna Counties combined.—Total population: 1910, 31,619, 1900, 23,070; increase, 1900–1910, 8,549; per cent of increase, 37.1. Urban population: 1910, 7,053; same places in 1900, 2,735; per cent of increase, 157.9. Rural population: 1910, 24,566; same territory in 1900, 29,335; per cent of increase, 20.8. Urban population: 1900, 2,735; rural population, 1900, 20,335. Per cent in places of 2,500 or more in 1910, 22.3. Per cent in places of 2,500 or more in 1910, 22.3. Per cent in places of 2,500 or more in 1910, 23.3. Per cent in places of 1,500 or more in 1900, 11.9.

NOTE 4.—In computing this increase the population of Indian reservations in 1900 has been deducted from the total population of the county in order to make that total comparable with the total for 1890, which does not include the population of Indian reservations. The population thus deducted in the several counties was as follows: Bernalillo, 733; Otero, 554; Rio Arriba, 829; and San Juan, 1,747.

#### INCORPORATED PLACES.

CLOVIS.—Incorporated in 1909. LAS CRUCES.—Incorporated in 1907. Tucumcari.—Incorporated in 1908.

DEPARTMENT OF COMMERCE AND LABOR

# BULLETIN

BUREAU OF THE CENSUS E. DANA DURAND, DIRECTOR

# POPULATION: NEW YORK

#### COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for New York gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of more than 25,000 inhabitants; Table III for places of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of cities of more than 50,000 inhabitants.

A series of summary tables (numbered 1 to 17) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had

attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of New York, 3,230,325, or 35.4 per cent, are native whites of native parentage; 3,007,248, or 33 per cent, are native whites of foreign or mixed parentage; 2,729,272, or 29.9 per cent, are foreign-born whites; and 134,191, or 1.5 per cent, are negroes. The corresponding percentages in 1900 were 39.2, 33.2, 26, and 1.4, respectively, the proportion of foreign-born whites having increased during the decade. In 35 of the 61 counties the percentage of foreign-born whites is less than 15; in 18 it is between 15 and 25; in 6 it is between 25 and 35; and in 2, New York and Kings, it is 35 or over. Of the 2,762,522 inhabitants of New York County, 45.4 per cent are foreign-born whites and only 15.8 per cent are native whites of native parentage. In 23 counties the percentage of native whites of foreign or mixed parentage exceeds 25, being 42.6 in Queens, 41.5 in Erie, and 40.6 in Kings. (See maps on page 15.)

Of the urban population, 27.2 per cent are native whites of native parentage; of the rural, 66.1 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 36.5 and 19.9 per cent, respectively. The percentage of foreign-born whites is 34.5 in the urban population and 12.8 in the rural.

Sex (Tables 2 and 12).—In the total population of the state there are 4,584,597 males and 4,529,017 females, or 101.2 males to 100 females. In 1900 the ratio was 98.9 to 100. Among native whites the ratio is 97.5 to 100, and among foreign-born whites 110.5 to 100. In the urban population there are 99.5 males to 100 females, and in the rural, 108.1.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—88.7 per cent were born in New York and 11.3 per cent outside the state; of the native white population, 10.4 per cent were born outside the state; and of the native negro, 59 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 13).—Of the foreign-born white population of New York, persons born in Russia represent 20.5 per cent; Italy, 17.3; Germany, 16; Ireland, 13.5; Austria, 9; England, 5.4;

Canada, 4.5; Hungary, 3.5; Sweden, 2; all other countries, 8.4. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 21.5 per cent; Ireland, 19; Russia, 14.8; Italy, 12.9; Austria, 6.7; England, 6; Canada, 4.7; Hungary, 2.5; Scotland, 1.6; Sweden, 1.6 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 2,836,773, representing 31.1 per cent of the population. Of such males, 32.1 per cent are native whites of native parentage, 23 per cent native whites of foreign or mixed parentage, 43 per cent foreign-born whites, and 1.6 per cent negroes. Of the 1,221,013 foreign-born white males of voting age, 502,083, or 41.1 per cent, are naturalized. Males of militia age—18 to 44—number 2,156,361.

Age (Tables 7, 8, 14, and 15).—Of the total population, 9.9 per cent are under 5 years of age, 17.4 per cent from 5 to 14 years, inclusive, 19.5 per cent from 15 to 24, 32.5 per cent from 25 to 44, and 20.6 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 7 per cent of this class being under 15 years of age, while 73.6 per cent are 25 years of age and over. Of the native whites of foreign or mixed parentage, 38.3 per cent are 25 and over, and of the native whites of native parentage, 49 per cent.

The urban population shows a larger proportion of persons in the prime of life than the rural and a smaller proportion past middle age. Migration to the city and the influx of foreign immigrants explains this at least in part. Of the urban population, 33.6 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 28.3 per cent, while for those 45 years and over the percentages are 18.3 and 28.7, respectively. The large number of children in families of foreign origin may account for the fact that the proportion of children under 5 is greater in the urban population than in the rural.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 2,454,428, of whom 1,563,374, or 63.7 per cent, attended school. In addition to these, 55,773 children under 6 and 31,716 persons 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 64.4; for girls, 63. For children from 6 to 14 years, inclusive, the percentage attending school was 90. The percentage for children of this age among native whites of foreign or mixed parentage was 90.6; among native whites of native parentage, 89.9; among foreign-born whites, 88.3; and among negroes, 87.1. (See Table I.) There is little difference between urban and rural communities as regards the percentage of school attendance for the ages from 6 to 14, but of persons from 15 to 20 years, inclusive, 25 per cent in urban communities, as against 37.2 per cent in rural, were reported as attending school.

Illiteracy (Table 10).—There are 406,020 illiterates in the state, representing 5.5 per cent of the total

population 10 years of age and over, the percentage being the same as in 1900. The percentage of illiteracy is 13.7 among foreign-born whites, 5 among negroes, and 0.8 among native whites.

For all classes combined, the percentage of illiterates is 5.9 in urban communities and 3.9 in rural, but for each class separately the rural percentage exceeds the urban.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 2.1. (See Table I.)

Marital condition (Tables 11 and 16).—In the population 15 years of age and over, 39.8 per cent of the males are single and 33.7 per cent of the females. The percentage married is 55.2 for males and 54.5 for females, and the percentage widowed 4.4 and 11.3, respectively. The percentages of those reported as divorced, 0.2 and 0.3, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is smaller for women than for men is due largely to the fact that women marry younger. Thus 5.7 per cent of the females from 15 to 19 years of age are married, as compared with 0.5 per cent of the males, and 39.6 per cent of the females from 20 to 24 years are married, as compared with 18.7 per cent of the males. In the next age group, 25 to 34 years, the difference is not so great, while in the succeeding age groups the percentage married is higher among the males.

That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 62.9 for males and 61.5 for females; native whites of native parentage, 54 and 53.3, respectively; native whites of foreign or mixed parentage, 44.9 and 46.9; negroes, 53.3 and 50.6.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, both for males and for females, is higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in New York is 1,178,686, and the total number of families 2,046,845, there being 173.7 families to each 100 dwellings. (See Table I.) The average number of persons per dwelling is 7.7, and the average number per family, 4.5.

## POPULATION—NEW YORK.

#### NOTES REGARDING CHANGES IN BOUNDARIES, ETC.

#### COUNTIES.

NASSAU.-Organized from part of Queens in 1899.

NEW YORK.—Parts of Westchester annexed in 1873 and 1895.

QUEENS .- Part taken to form Nassau in 1899.

WESTCHESTER.—Parts annexed to New York in 1873 and 1895.

Nors.—In computing this increase the population of Indian reservations in 1900 has been deducted from the total population of the county in order to make that total comparable with the total for 1890, which does not include the population Indian reservations. The population thus deducted in the several counties was as follows: Cattaraugus, 1,982; Chautauqua, 31; Erie, 1,305; Franklin, 1,253; Genesce, 346; Niagara, 337; and Onondaga, 530.

#### INCORPORATED PLACES.

AMSTERDAM.—Part of Amsterdam town (Rockton village) annexed in 1901.

BATAVIA.-Part of Batavia town annexed in 1903.

BINGHAMTON.—Part of Binghamton town annexed in 1908.

CORNWALL.-Part of Cornwall town annexed in 1909.

HORNELL.-Name changed from Hornellsville in 1900.

HUDSON FALLS.-Name changed from Sandy Hill in 1910.

LACKAWANNA.-Incorporated from part of West Seneca town in 1909.

LITTLE FALLS.-Part of Little Falls town annexed in 1902.

NEW YORK.—Kings and Richmond Counties and parts of Queens and West-chester Counties annexed between 1890 and 1900.

NIAGARA FALLS.—Incorporated from part of Niagara town between 1890 and 1900.

OGDENSBURG.-Part of Lisbon town annexed in 1901.

OLEAN.-Part of Olean town (including North Olean village) annexed in 1909. ONEIDA.—Oneida village made coextensive with Oneida town and incorporated as a city in 1901.

PLATTSBURG.—Part of Plattsburg town annexed in 1902 and part annexed to Plattsburg town in 1903.

RENSSELAER.—Parts of East Greenbush town and North Greenbush town (including Bath-on-Hudson village) annexed in 1902,

ROCHESTER.—Parts of Brighton town (including Brighton village) annexed between 1890 and 1900 and in 1901, 1905, and 1908, and parts of Gates and Irondequoit towns annexed in 1907.

RYE.—Incorporated in 1904.

SARANAC LAKE.—Parts of Harrietstown, North Elba, and St. Armand towns annexed in 1910.

SCHENECTADY .-- Parts of Niskayuna and Rotterdam towns annexed in 1902.

Scotia.—Incorporated in 1904.

SYRACUSE.—Part of Onondaga town annexed between 1890 and 1900 and parts of Onondaga and Salina towns annexed in 1908 and 1909.

Thoy.-Lansingburg village and parts of Brunswick and North Greenbush towns annexed in 1901.

TUCKAHOE .- Incorporated in 1902.

TUPPER LAKE.—Incorporated in 1902.

UTICA.—Parts of New Hartford town annexed in 1904 and 1910.

DEPARTMENT OF COMMERCE AND LABOR

## BULLETIN

BUREAU OF THE CENSUS
E. DANA DURAND, DIRECTOR

## POPULATION: NORTH CAROLINA

### COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for North Carolina gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of four general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for Charlotte and Wilmington, the two cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; and Table IV for places of 2,500 to 10,000.

A series of summary tables (numbered 1 to 14) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of North Carolina, 1,500,511, or 68 per cent, are whites, and 697,843, or 31.6 per cent, negroes. The corresponding percentages in 1900 were 66.7 and 33, respectively. In 14 of the 98 counties the population is more than one-half negro, the highest percentages being those for Warren (65.2) and Halifax (64.6). In 41 counties, including 1 which reports no negroes, the percentage negro is less than 25, and in 43 it ranges from 25 to 50. (See map on page 7.)

Native whites of native parentage constitute 67.3 per cent of the total population of the state, and 99 per cent of the white population. Native whites of foreign or mixed parentage constitute only 0.4 per cent of the total population, and foreign-born whites 0.3 per cent.

Of the urban population, 61.2 per cent are native whites of native parentage; of the rural, 68.4 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 1.4 and 0.2 per cent, respectively. The percentage of foreign-born whites is 1 in the urban population and 0.2 in the rural; the percentage of negroes is 36.4 in the urban and 30.8 in the rural.

Sex (Table 2).—In the total population of the state there are 1,098,476 males and 1,107,811 females, or 99.2 males to 100 females. In 1900 the ratio was 98.3 to 100. Among the whites there are 101.2 males to 100 females; among the negroes, 94.8. Among native whites the ratio is 101 to 100, as compared with 170.5 to 100 for the foreign-born whites. In the urban population there are 91.1 males to 100 females, and in the rural, 100.6.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—95 per cent were born in North Carolina and 5 per cent outside the state; of the native white population, 5.1 per cent were born outside the state, and of the native negro, 4.9 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Table 5).—Of the foreign-born white population of North Carolina, persons born in Germany represent 18.1 per cent; England, 15.8; Russia, 12; Canada, 9; Italy, 8.8; Turkey, 8.6; Scotland, 7.3; Ireland, 5.1; Greece, 2.9; all other countries, 12.4 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 22.6 per cent; England, 17.9; Ireland, 9.5; Russia, 9.1; Canada, 8.1; Scotland, 8.1; Italy, 5.2; Turkey, 4.4; France, 2 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 506,134, representing 22.9 per cent of the population. Of such males, 70.7 per cent are whites and 29 per cent negroes. Native whites represent 70 per cent of the total number and foreign-born whites 0.7 per cent. Of the 3,296 foreign-born white males of voting age, 1,439, or 43.7 per cent, are naturalized. Males of militia age—18 to 44—number 392,192.

Age (Tables 7, 8, and 12).—Of the total population, 15.1 per cent are under 5 years of age, 25.5 per cent from 5 to 14 years, inclusive, 20.5 per cent from 15 to 24, 23.1 per cent from 25 to 44, and 15.7 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 6.9 per cent of this class being under 15 years of age, while more than three-fourths (78.6 per cent) are 25 years of age and over. The proportion of children under 15 in the negro population is greater than in the native white population of native parentage.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 29 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 22.1 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 785,583, of whom 481,450, or 61.3 per cent, attended school. In addition to these, 5,691 children under 6 and 8,055 persons 21 and over attended school. Both for boys and for girls from 6 to 20 years, inclusive, the percentage attending school was 61.3. For children from 6 to 14 years, inclusive, the percentage attending school was 71.7. The percentage for children of this age among native whites of foreign or mixed parentage was 84; among native whites of native parentage, 75.7; among foreign-born whites, 64.8; and among negroes, 64. (See Table I.) In urban communities the percentage of children of that age attending school was 74, and in rural, 71.4.

Illiteracy (Table 10).—There are 291,497 illiterates in the state, representing 18.5 per cent of the total population 10 years of age and over, as compared with 28.7 per cent in 1900. The percentage of illiteracy is 31.9 among negroes, 12.3 among native whites, and 8.3 among foreign-born whites. It is 12.3 for native

whites of native parentage and 3 for native whites of foreign or mixed parentage.

For all classes combined, the percentage of illiteracy is higher in the rural population than in the urban, 19.6 as compared with 12.5. For each class separately, also, the percentage in the rural population exceeds that in the urban.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 10.7. (See Table I.)

Marital condition (Tables 11 and 13).—In the population 15 years of age and over, 36.3 per cent of the males are single and 31.2 per cent of the females. The percentage married is 59.1 for males and 58 for females, and the percentage widowed 4.1 and 10.3, respectively. The percentages of those reported as divorced, 0,2 and 0.3, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is smaller for women than for men is due largely to the fact that women marry younger. Thus 14.3 per cent of the females from 15 to 19 years of age are married, as compared with 1.9 per cent of the males, and 55.2 per cent of the females from 20 to 24 years of age are married, as compared with 34.2 per cent of the males. In the next age group, 25 to 34 years, the difference largely disappears, while in the succeeding age groups the percentage married is higher among the males. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 62.2 for males and 69.7 for females; native whites of native parentage, 59.5 both for males and for females; native whites of foreign or mixed parentage, 54.3 and 50, respectively; negroes, 58.2 and 54.9.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, both for males and for females, is higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in North Carolina is 430,570, and the total number of families 440,334, indicating that in comparatively few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 5.1, and the average number per family, 5.
