

POPULATION : UTAH

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Utah gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of four general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for the two cities of more than 25,000 inhabitants; Table III for places of 2,500 to 10,000; and Table IV for wards of Salt Lake City.

A series of summary tables (numbered 1 to 14) reproduce from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had

attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Utah, 171,663, or 46 per cent, are native whites of native parentage; 131,527, or 35.2 per cent, are native whites of foreign or mixed parentage; and 63,393, or 17 per cent, are foreign-born whites. The corresponding percentages in 1900 were 37.6, 41.8, and 19.1, respectively, the comparison indicating a considerable increase since 1900 in the proportion of native whites of native parentage. All other classes combined, 6,768, constitute 1.8 per cent of the total population. In 20 of the 27 counties the percentage of foreign-born whites is less than 15, in 6 it is between 15 and 25, and in 1 it exceeds 25. The percentage of native whites of foreign or mixed parentage ranges considerably higher, being less than 15 in only 1 county and more than 25 in 21 counties. (See maps on page 7.)

Of the urban population, 42.5 per cent are native whites of native parentage; of the rural, 48.9 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 37 and 33.8 per cent, respectively. The percentage of foreign-born whites is 19.3 in the urban population and 15 in the rural. All other classes combined constitute 1.2 per cent of the urban population and 2.3 per cent of the rural.

Sex (Table 2).—In the total population of the state there are 196,863 males and 176,488 females, or 111.5 males to 100 females. In 1900 the ratio was 104.9 to 100. Among native whites it is 106.2 to 100; among foreign-born whites, 131. In the urban population there are 106.2 males to 100 females, and in the rural, 116.4.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—79 per cent were born in Utah and 21 per cent outside the state; of the native white population, 20.7 per cent were born outside the state; of the native negro, 85.4 per cent; and of the native Indian, 27 per cent. Persons born outside the state constitute a much larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Table 5).—Of the foreign-born white population of Utah, persons born in England represent 28.5 per cent; Denmark, 13.1; Sweden, 11.4;

Greece, 6.4; Germany, 6.3; Italy, 4.9; Scotland, 4.5; Norway, 3.6; all other countries, 21.2. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, England contributed 34.9 per cent; Denmark, 13.7; Sweden, 8.8; Scotland, 5.4; Germany, 5.1; Wales, 3.3; Ireland, 3.1; Norway, 2.8; Canada, 2.6; Switzerland, 2.2; Italy, 2.2 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 104,115, representing 27.9 per cent of the population. Of such males, 31.7 per cent are native whites of native parentage, 33.4 per cent native whites of foreign or mixed parentage, 31.4 per cent foreign-born whites, and 3.5 per cent in other classes. Of the 32,652 foreign-born white males of voting age, 15,351, or 47 per cent, are naturalized. Males of militia age—18 to 44—number 84,449.

Age (Tables 7, 8, and 12).—Of the total population, 14.1 per cent are under 5 years of age, 23 per cent from 5 to 14 years, inclusive, 19.9 per cent from 15 to 24, 27.5 per cent from 25 to 44, and 15.1 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 4.5 per cent of this class being under 15 years of age, while 83 per cent are 25 years of age and over. Of the native whites of foreign or mixed parentage, only 42.2 per cent are 25 and over, and of the native whites of native parentage, only 27.2 per cent. The corresponding percentage for Indians is 46.6.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 30.2 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 25.2 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 121,016, of whom 85,006, or 70.2 per cent, attended school. In addition to these, 771 children under 6 and 2,279 persons 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 70.2; for girls, 70.3. For children from 6 to 14 years, inclusive, the percentage attending school was 85.6. The percentage for children of this age among native whites of foreign or mixed parentage was 87.9; among native whites of native parentage, 85.4; and among foreign-born whites, 83.5. (See Table I.) In the urban population the percentage of children of that age attending school was 87.2, and in the rural, 84.6; the percentages for persons from 15 to 20 years, inclusive, were 41.2 and 46.6, respectively.

Illiteracy (Table 10).—There are 6,821 illiterates in the state, representing 2.5 per cent of the total population 10 years of age and over, as compared with 3.1 per cent in 1900. The percentage of illiteracy is 83 among Indians, 5.9 among foreign-born whites, 4.8 among negroes, and 0.4 among native whites.

For all classes combined the percentage of illiteracy is 1.6 in the urban population and 3.3 in the rural. For each class separately, also, the percentage is somewhat higher in the rural than in the urban.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is very slight, only 1. (See Table I.)

Marital condition (Tables 11 and 13).—In the population 15 years of age and over, 41 per cent of the males are single and 27.9 per cent of the females. The percentage married is 54.2 for males and 61.3 for females; and the percentage widowed 2.9 and 9.2, respectively. The percentages of those reported as divorced, 0.6 and 0.8, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due partly to the excess of males in the total population and partly to the fact that women marry younger. Thus 8.4 per cent of the females from 15 to 19 years of age are married, as compared with 0.7 per cent of the males, and 52.4 per cent of the females from 20 to 24 years are married, as compared with 22 per cent of the males. In the age group 25 to 34 years the percentages are 82.5 and 61.7, respectively. In the next age group the difference is not so great, while in the age group 45 years and over the percentage married is higher among the males. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 62 for males and 67.6 for females; native whites of foreign or mixed parentage, 55.1 and 62.2, respectively; native whites of native parentage, 48.2 and 55.7; Indians, 63.4 and 74.5; negroes, 44.4 and 60.5.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married for males is slightly higher in the urban population than in the rural, while that for females is higher in the rural.

Dwellings and families.—The total number of dwellings in Utah is 72,649, and the total number of families 77,339, there being 106.5 families to each 100 dwellings. (See Table I.) The average number of persons per dwelling is 5.1, and the average number per family, 4.8.

NOTES REGARDING CHANGES IN BOUNDARIES, ETC.

COUNTIES.

BOXELDER.—Part of Salt Lake annexed in 1880.
 CARBON.—Organized from part of Emery in 1894.
 DAVIS.—Part of Salt Lake annexed in 1880.
 EMERY.—Organized from parts of Sanpete, Sevier, and Wasatch in 1880; parts taken to form Grand in 1890 and Carbon in 1894.
 GARFIELD.—Organized from parts of Iron and Kane in 1882; part of Kane annexed between 1890 and 1900.
 GRAND.—Organized from part of Emery in 1890.
 IRON.—Parts taken to form part of San Juan in 1880 and part of Garfield in 1882.
 KANE.—Parts taken to form part of San Juan in 1880 and part of Garfield in 1882; parts annexed to Washington in 1882 and Garfield between 1890 and 1900.
 PIUTE.—Parts taken to form Wayne in 1892 and part of San Juan in 1880; part annexed to Sevier in 1900.
 SALT LAKE.—Parts annexed to Boxelder, Davis, Tooele, and Weber in 1880.
 SAN JUAN.—Organized from parts of Iron, Kane, and Piute in 1880.
 SANPETE.—Parts taken to form parts of Emery and Uinta in 1880; parts annexed to Wasatch in 1880 and to Utah County between 1890 and 1900.

SEVIER.—Part taken to form part of Emery in 1880; part of Piute annexed in 1900.

TOOELE.—Part of Salt Lake annexed in 1880.

UINTA.—Organized from parts of Sanpete and Wasatch in 1880.

UTAH.—Part of Sanpete annexed between 1890 and 1900.

WASATCH.—Parts taken to form parts of Emery and Uinta in 1880; part of Sanpete annexed in 1880.

WASHINGTON.—Rio Virgin annexed in 1872 and part of Kane annexed in 1882.

WAYNE.—Organized from part of Piute in 1892.

WEBER.—Part of Salt Lake annexed in 1880.

NOTE.—In computing this increase the population of Indian reservations in 1900 has been deducted from the total population of the county in order to make that total comparable with the total for 1890, which does not include the population of Indian reservations. The population thus deducted in the several counties was as follows: San Juan, 160; Uinta, 1,467; Wasatch, 170.

INCORPORATED PLACES.

BINGHAM.—Incorporated in 1904.

MURRAY.—Incorporated in 1902.

SALT LAKE CITY.—Parts of election precincts 1 and 2 annexed since 1900.

POPULATION : VERMONT

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Vermont gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of three general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of over 10,000; and Table III for places of 2,500 to 10,000.

A series of summary tables (numbered 1 to 11) reproduces from the general tables the more important state totals and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences commonly exist between urban and rural communities with respect to the composition and characteristics of the population, it is desirable that the two classes be distinguished in presenting census data. The Bureau of the Census has undertaken to do this by classifying as urban the population of all incorporated places of 2,500 inhabitants or more. In New England, however, where many villages of considerable size are not separately incorporated, it was deemed best to classify also towns of 2,500 inhabitants or more as urban, although this

classification is not very satisfactory because such towns generally include more or less population that is essentially rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time from September 1, 1909, to the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Vermont, 229,382, or 64.4 per cent, are native whites of native parentage; 75,055, or 21.1 per cent, are native whites of foreign or mixed parentage; 49,861, or 14 per cent, are foreign-born whites; and 1,621, or 0.5 per cent, are negroes. The corresponding percentages in 1900 were 65.6, 21.1, 13, and 0.2, respectively, the comparison indicating very slight changes in the color, nativity, and parentage composition of the population. By counties, the proportion of whites of foreign birth ranges from 5.9 per cent in Addison to 21.6 in Essex; and the proportion of native whites of foreign or mixed parentage, from 11.5 per cent in Orange to 28.3 in Chittenden and Essex. (See maps on a following page.) In five counties more than three-fourths of the population are native whites of native parentage, and in two, Lamoille and Orange, more than four-fifths.

Of the urban population, 54.3 per cent are native whites of native parentage; of the rural, 73.6 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 25.7 and 16.9 per cent, respectively. The percentage of foreign-born whites is 19.2 in the urban population and 9.4 in the rural; the percentage of negroes is 0.8 in the urban and 0.1 in the rural.

Sex (Table 2).—In the total population of the state there are 182,568 males and 173,388 females, or 105.3 males to 100 females. In 1900 the ratio was 103.9 to 100. Among native whites the ratio is 101.6 to 100; among foreign-born whites 127.3. The urban population is about equally divided between the sexes, while in the rural there are 110.3 males to 100 females.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—81.8 per cent were born in Vermont and 18.2 per cent outside the state; of the native white population, 17.9 per cent were born outside the state, and of the native negro, 72.4 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Table 5).—Of the foreign-born white population of Vermont, persons born in Canada represent 52.3 per cent (those of French parentage, 29.4, and all other, 22.9); Ireland, 9.9; Italy, 9.2; Scotland, 5.2; England, 4.9; Russia, 4.9; Sweden, 2.7; Austria, 2.2; Wales, 2.1; Germany, 1.6; Hungary, 1.1; all other countries, 3.8 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Canada contributed 54.4 per cent (French stock, 32.4, and all other, 22); Ireland, 15.7; Italy, 5.3; England, 5.1; Scotland, 4.3; Russia, 2.9; Sweden, 1.9; Wales, 1.8; Germany, 1.7; Austria, 1.2; Hungary, 0.5 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 113,506, representing 31.9 per cent of the population. Of such males, 61.1 per cent are native whites of native parentage, 17.1 per cent native whites of foreign or mixed parentage, 20.9 per cent foreign-born whites, and 0.9 per cent negroes. Of the 23,759 foreign-born white males of voting age, 10,811, or 45.5 per cent, are naturalized. Males of militia age—18 to 44—number 73,685.

Age (Tables 7 and 8).—Of the total population, 9.6 per cent are under 5 years of age, 18 per cent from 5 to 14 years, inclusive, 16.9 per cent from 15 to 24, 28.4 per cent from 25 to 44, and 27 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 7.8 per cent of this class being under 15 years of age, while more than three-fourths (76.9 per cent) are 25 years of age and over. Of the native whites of foreign or mixed parentage, less than half (46.8 per cent) are 25 and over and of the native whites of native parentage only a little more than half (53.7 per cent).

As compared with the rural, the urban population shows a larger proportion of persons in the prime of life, 30.6 per cent of the urban population being from 25 to 44 years of age, and 26.6 per cent of the rural.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 94,701, of whom 66,845, or 70.6 per cent, attended school. In addition to these, 2,768 persons under 6 and 918 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 69.2; for girls, 72. For children from 6 to 14 years, inclusive, the percentage attending school was 92.9. The percentage for children of this age among native whites of native parentage was 93.1; among native whites of foreign or mixed parentage, 93.3; among foreign-born whites, 89.3; among negroes, 87.6. (See Table I.) There is little difference between urban and rural communities as regards the percentage of school attendance, the percentage being slightly higher in the urban for those from 6 to 14 years of age and in the rural for those from 15 to 20 years.

Illiteracy (Table 10).—There are 10,806 illiterates in the state, representing 3.7 per cent of the total population 10 years of age and over, as compared with

5.8 per cent in 1900. The percentage of illiteracy is 13.1 among foreign-born whites, 1.9 among native whites, and 4.8 among negroes.

For all classes combined, the percentage of illiterates is slightly higher in urban than in rural population, 3.9 as compared with 3.6, but for each class separately the percentage is higher in the rural.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is very slight (1.0). (See Table I.)

Marital condition (Table 11).—In the population 15 years of age and over, 34.3 per cent of the males are single and 26.4 per cent of the females. The percentage married is 58.5 for males and 60.6 for females; and the percentage widowed 6.2 and 12.2, respectively. The percentages of those reported as divorced, 0.9 and 0.8, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that they marry younger. Thus, 9.9 per cent of the females from 15 to 19 years of age are married, as compared with 0.8 per cent of the males; and 49 per cent of the females from 20 to 24 years are married, as compared with 22.1 per cent of the males. In the next age group, 25 to 34 years, the difference is not so great, the percentages being 75.3 for females and 62.7 for males, while in the age group 35 to 44 the difference practically disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 63.6 for males and 68.6 for females; native whites of native parentage, 58.8 and 59.6, respectively; native whites of foreign or mixed parentage, 53.5 and 57.3, respectively; negroes, 23.5 for males and 62.2 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married for males is slightly higher, and for females decidedly higher, in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Vermont is 77,466, and the total number of families 85,178, indicating that in comparatively few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.6, and the average number per family 4.2.

PROPORTION OF FOREIGN-BORN WHITE AND NATIVE WHITE OF FOREIGN OR MIXED PARENTAGE.

PER CENT OF FOREIGN-BORN WHITE IN TOTAL POPULATION: 1910.

PER CENT OF NATIVE WHITE OF FOREIGN OR MIXED PARENTAGE IN TOTAL POPULATION: 1910.

POPULATION : VIRGINIA

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Virginia gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and for counties and independent cities; Table II for cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of Norfolk and Richmond, the two cities of more than 50,000 inhabitants.

While the cities of Virginia are politically independent of the counties in which they are located, it seems desirable for the purpose of considering the growth of population to give totals for the city and county in combination as well as separately.

A series of summary tables (numbered 1 to 15) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composi-

tion and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Virginia, 1,389,809, or 67.4 per cent, are whites, and 671,096, or 32.6 per cent, negroes. The corresponding percentages in 1900 were 64.3 and 35.6, respectively, the proportion of whites having increased somewhat during the decade. In 37 of the 100 counties negroes constitute less than one-fourth of the population; in 32 counties the percentage negro is between 25 and 50, and in 31 it exceeds 50. (See map on page 39.)

Native whites of native parentage constitute 64.3 per cent of the total population of the state, and 95.4 per cent of the white population. Native whites of foreign or mixed parentage constitute only 1.8 per cent of the total population, and foreign-born whites only 1.3 per cent.

Of the urban population, 59.4 per cent are native whites of native parentage; of the rural, 65.7 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 4.5 and 1 per cent, respectively. The percentage of foreign-born whites is 2.9 in the urban population and 0.8 in the rural; the percentage of negroes is 33.2 in the urban and 32.4 in the rural.

Sex (Table 2).—In the total population of the state there are 1,035,348 males and 1,026,264 females, or 100.9 males to 100 females. In 1900 the ratio was 99.7 to 100. Among the whites there are 102.8 males to 100 females; among the negroes, 97.1. Among native whites the ratio is 101.8 to 100, as compared with 169 to 100 for the foreign-born whites. In the urban population there are 94 males to 100 females, and in the rural, 103.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United

States—90.6 per cent were born in Virginia and 9.4 per cent outside the state; of the native white population, 10.6 per cent were born outside the state, and of the native negro, 7.1 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 12).—Of the foreign-born white population of Virginia, persons born in Russia represent 16.4 per cent; Germany, 15.9; England, 13.8; Ireland, 9.2; Italy, 9.2; Hungary, 6.7; Canada, 5; Austria, 4.8; Scotland, 4.7; all other countries, 14.3 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 21.3 per cent; Ireland, 14.7; England, 14.6; Russia, 11.8; Italy, 6.3; Scotland, 4.9; Canada, 4.6; Hungary, 3.8; Austria, 3.6 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 523,532, representing 25.4 per cent of the population. Of such males, 69.5 per cent are whites and 30.5 per cent are negroes. Native whites represent 66.6 per cent of the total number and foreign-born whites 2.8 per cent. Of the 14,882 foreign-born white males of voting age, 6,411, or 43.1 per cent, are naturalized. Males of militia age—18 to 44—number 398,728.

Age (Tables 7, 8, and 13).—Of the total population, 13 per cent are under 5 years of age, 23.9 per cent from 5 to 14 years, inclusive, 20 per cent from 15 to 24, 25.5 per cent from 25 to 44, and 17.3 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 6.6 per cent of this class being under 15 years of age, while 78.8 per cent are 25 years of age and over. Of the native whites of native parentage, 43.3 per cent are 25 and over; of the negroes, 40.3 per cent.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 32.4 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 23.4 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 697,649, of whom 392,499, or 56.3 per cent, attended school. In addition to these, 3,901 children under 6 and 5,296 persons 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 55.4; for girls, 57.1. For children from 6 to 14 years, inclusive, the percentage attending school was 68.3. The percentage for children of this age among native whites of native parentage was 73.2; among native whites of foreign or mixed parentage, 80; among foreign-born whites, 71.3; and among negroes, 58.7. (See Table I.) In urban communities the percentage of children of that age attending school was 74.4, and in rural, 66.9.

Illiteracy (Table 10).—There are 232,911 illiterates in the state, representing 15.2 per cent of the total population 10 years of age and over, as compared with

22.9 per cent in 1900. The percentage of illiteracy is 30 among negroes, 9.2 among foreign-born whites, and 8 among native whites. For native whites of native parentage, the percentage is 8.2, and for native whites of foreign or mixed parentage, 1.2.

For all classes combined, illiterates are relatively fewer in urban than in rural communities, the percentages being 9.2 and 17.2, respectively. For each class separately, also, the rural percentage exceeds the urban.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 9.5. (See Table I.)

Marital condition (Tables 11 and 14).—In the population 15 years of age and over, 38.5 per cent of the males are single and 31.6 per cent of the females. The percentage married is 56.1 for males and 56.5 for females, and the percentage widowed 4.9 and 11.3, respectively. The percentages of those reported as divorced, 0.3 and 0.4, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that women marry younger. Thus 11.5 per cent of the females from 15 to 19 years of age are married, as compared with 1.1 per cent of the males, and 50.5 per cent of the females from 20 to 24 years are married, as compared with 26.4 per cent of the males. In the next age group, 25 to 34 years, the difference in the percentages is less marked, and among those in the next two age groups, the percentage married is higher among the males. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 59.5 for males, 69.9 for females; native whites of native parentage, 57.1 and 58, respectively; native whites of foreign or mixed parentage, 47.6 and 49.5; negroes, 54.3 and 53.3.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, for males and for females, is higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Virginia is 400,445, and the total number of families 419,452, there being 104.7 families to each 100 dwellings. (See Table I.) The average number of persons per dwelling is 5.1, and the average number per family, 4.9.

POPULATION : WASHINGTON

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Washington gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of cities of more than 50,000.

A series of summary tables (numbered 1 to 15) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Washington, 585,386, or 51.3 per cent, are native whites of native parentage; 282,528, or 24.7 per cent, are native whites of foreign or mixed parentage; and 241,197, or 21.1 per cent, are foreign-born whites. The corresponding percentages in 1900 were 51.2, 24.9, and 19.7, respectively. The Japanese and Chinese constitute 1.3 per cent of the population; Indians, 1 per cent; negroes, 0.5 per cent. In 26 of the 38 counties the proportion of foreign-born whites ranges from 10 to 25 per cent, and in 8 counties the proportion exceeds one-fourth. In 14 counties the proportion of native whites of foreign or mixed parentage exceeds one-fourth, and except in 6 counties the percentage for this class exceeds that for the foreign-born whites. (See maps on page 23.)

Of the urban population, 48.7 per cent are native whites of native parentage; of the rural, 54.2 per cent. The corresponding percentages for native whites of foreign or mixed parentage are 25.7 and 23.6, respectively. The percentage of foreign-born whites is 23.1 in the urban population and 18.9 in the rural; of Chinese and Japanese, 1.7 and 1, respectively; of negroes, 0.8 and 0.3. The Indian population is almost exclusively rural.

Sex (Table 2).—In the total population of the state there are 658,663 males and 483,327 females, or 136.3 males to 100 females. In 1900 the ratio was 142.2 to 100. Among native whites the ratio is 120.8 to 100 and among foreign-born whites 199.7 to 100. In the urban population there are 132.4 males to 100 females, and in the rural, 140.9.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—29.7 per cent were born in Washington and 70.3 per cent outside the state; of the native white population, 71.1 per cent were born outside the state; of the native negro, 90.8 per cent; and of the native Indian, 5.4 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 12).—Of the foreign-born white population of Washington, persons born in Canada represent 16.2 per cent; Sweden, 13.3; Germany, 12.2; Norway, 11.8; England, 8; Italy, 5.4; Austria, 5.3; Russia, 4.5; Ireland, 4.2; Finland, 3.6; all other countries, 15.1. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 16.7 per cent; Canada, 16; Sweden, 10.7; Norway, 10.1; England, 8.9; Ireland, 6.8; Austria, 3.6; Russia, 3.4; Italy, 3.2; Scotland, 3.1; Denmark, 2.9.

Voting and militia ages (Table 6).—The number of males 21 years of age and over is 441,294, representing 38.6 per cent of the population. Of such males, 45.3 per cent are native whites of native parentage, 17.1 per cent native whites of foreign or mixed parentage, 33.4 per cent foreign-born whites, 2.8 per cent Chinese and Japanese, 0.7 per cent negroes, and 0.6 per cent Indians. Of the 147,224 foreign-born white males of voting age, 68,895, or 46.8 per cent, are naturalized. Males of militia age—18 to 44—number 340,872.

Age (Tables 7, 8, and 13).—Of the total population, 9.5 per cent are under 5 years of age, 16.8 per cent from 5 to 14 years, inclusive, 19.4 per cent from 15 to 24, 35.1 per cent from 25 to 44, and 18.5 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 4.6 per cent of this class being under 15, while 81 per cent, or more than four-fifths, are 25 and over. Of the native whites of foreign or mixed parentage, 39.2 per cent are 25 and over, and of the native whites of native parentage, 48.9 per cent.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 38.6 per cent are from 25 to 44 years of age, inclusive, and of the rural, 31 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 293,478, of whom 195,259, or 66.5 per cent, attended school. In addition to these, 1,865 children under 6 and 4,571 persons 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 64.7; for girls, 68.5. For children 6 to 14, the percentage attending school was 85.7. The percentage for children of this age among native whites of native parentage was 85.9; among native whites of foreign or mixed parentage, 86.9; among foreign-born whites, 83.9; and among negroes, 81.3. (See Table I.) There is little difference between urban and rural communities as regards the percentage attending school.

Illiteracy (Table 10).—There are 18,416 illiterates in the state, representing 2 per cent of the total population 10 years of age and over, as compared with 3.1 per cent in 1900. The percentage of illiteracy is 0.3 among native whites, 4.8 among foreign-born

whites, 4.3 among negroes, 45.8 among Indians, 19 among Chinese, and 6.8 among Japanese.

For all classes combined, the percentage of illiterates is 1.3 in the urban population and 2.8 in the rural. For each class separately, also, the rural percentage exceeds the urban.

For persons 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is very low, being only 0.8. (See Table I.)

Marital condition (Tables 11 and 14).—In the population 15 years of age and over, 48.6 per cent of the males are single and 26.5 per cent of the females. The percentage married is 45.7 for males and 64.1 for females; and the percentage widowed 3.6 and 7.9, respectively. The percentages of those reported as divorced, 0.9 and 1.2, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due partly to the excess of males in the total population and partly to the fact that women marry younger. Thus 10.5 per cent of the females 15 to 19 are married, as compared with 0.5 per cent of the males, and 52.1 per cent of the females 20 to 24 are married, as compared with 13.7 per cent of the males. In the age group, 25 to 34, the percentage married is 78.4 for females and 44.1 for males and for those from 35 to 44 it is 85.5 and 65.2, respectively, while in the age group 45 and over, the difference practically disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages married among those 15 years of age and over are as follows: Native whites of native parentage, 48.3 for males and 64 for females; foreign-born whites, 46.8 and 72.9, respectively; native whites of foreign or mixed parentage, 39.9 and 55.8; negroes, 38.8 and 59.4; Indians, 57.2 and 65.2; Chinese, 42.5 and 50.7; Japanese, 25.5 and 80.5.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, for males and for females, is higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Washington is 238,822, and the total number of families 254,692, there being 106.6 families to each 100 dwellings. (See Table I.) The average number of persons per dwelling is 4.8, and the average number per family, 4.5.

NOTES REGARDING CHANGES IN BOUNDARIES, ETC.

COUNTIES.

ADAMS.—Organized from part of Whitman in 1883.
 ASOTIN.—Organized from part of Garfield in 1883.
 BENTON.—Organized from parts of Klickitat and Yakima in 1905.
 CHELAN.—Organized from parts of Kittitas and Okanogan in 1899.
 COLUMBIA.—Organized from part of Walla Walla in 1875; part taken to form Garfield in 1881.
 DOUGLAS.—Organized from part of Lincoln in 1883; part taken to form Grant in 1909.
 FERRY.—Organized from part of Stevens in 1899.
 FRANKLIN.—Organized from part of Whitman in 1883.
 GARFIELD.—Organized from part of Columbia in 1881; part taken to form Asotin in 1883.
 GRANT.—Organized from part of Douglas in 1909.
 KITTITAS.—Organized from part of Yakima in 1883; part taken to form part of Chelan in 1899.
 KLICKITAT.—Part taken to form part of Benton in 1905.
 LINCOLN.—Organized from part of Spokane in 1883; part taken to form Douglas in 1883.
 OKANOGAN.—Organized from part of Stevens in 1883; part taken to form part of Chelan in 1899.
 SKAGIT.—Organized from part of Whatcom in 1883.
 SPOKANE.—Organized from part of Stevens in 1879; part taken to form Lincoln in 1883.
 STEVENS.—Parts taken to form Spokane in 1879, Okanogan in 1883, and Ferry in 1899.
 WALLA WALLA.—Parts taken to form Whitman in 1871 and Columbia in 1875.
 WHATCOM.—Part taken to form Skagit in 1883.
 WHITMAN.—Organized from part of Walla Walla in 1871; parts taken to form Adams and Franklin in 1883.
 YAKIMA.—Parts taken to form Kittitas in 1883 and part of Benton in 1905.
 NOTE 1.—Benton, Klickitat, and Yakima Counties combined.—Total population: 1910, 69,826; 1900, 19,869; increase, 1900-1910, 49,957; per cent of increase, 251.1.

Urban population—1910, 14,082; same places in 1900, 3,154; per cent of increase, 346.5. Rural population—1910, 45,744; same territory in 1900, 16,715; per cent of increase, 173.7. Urban population—1900, 3,154; rural population—1900, 16,715. Per cent in places of 2,500 or more in 1910, 23.5. Per cent in places of 2,500 or more in 1900, 15.9.

NOTE 2.—Douglas and Grant Counties combined.—Total population: 1910, 17,925; 1900, 4,926; increase, 1900-1910, 12,999; per cent of increase, 263.9. Rural population—1910, 17,925; same territory in 1900, 4,926; per cent of increase, 263.9. Rural population—1900, 4,926.

NOTE 3.—In computing this increase the population of Indian reservations in 1900 has been deducted from the total population of the county, in order to make that total comparable with the total for 1890, which does not include the population of Indian reservations. The population thus deducted in the several counties was as follows: Chehalis, 193; Clallam, 417; Ferry, 753; Jefferson, 35; King, 146; Kitsap, 139; Okanogan, 724; Skagit, 275; Snohomish, 468; Stevens, 589; Whatcom, 359; and Yakima, 2,219.

INCORPORATED PLACES.

BELLINGHAM.—Fairhaven and New Whatcom cities consolidated under the name of Bellingham city in 1903.
 BREMERTON.—Incorporated in 1901.
 CLE ELUM.—Incorporated in 1904.
 HILLYARD.—Incorporated in 1907.
 OLYMPIA.—Part taken to form Peninsula precinct in 1908.
 RENTON.—Incorporated in 1904.
 SEATTLE.—Part of Fulton precinct annexed in 1905, Ballard city, Columbia town, West Seattle precinct, and parts of Dunlap and Duwamish precincts annexed in 1907, and Georgetown city annexed in 1910.
 SPOKANE.—Parts of Five Mile, Marshall, Mead, Moran, and Opportunity precincts annexed in 1907.
 TACOMA.—Part of Reservation precinct annexed in 1907, parts of Hunts Prairie precinct annexed in 1907 and 1909, and parts of Fern Hill, Larchmont, and Midland precincts annexed in 1909.
 WALLA WALLA.—Parts of Small, Ritz, and Baker precincts annexed in 1906, 1907, and 1908, respectively.

PROPORTION OF FOREIGN-BORN WHITE AND NATIVE WHITE OF FOREIGN OR MIXED PARENTAGE OF WASHINGTON, BY COUNTIES: 1910.

PER CENT OF FOREIGN-BORN WHITE IN TOTAL POPULATION.

PER CENT OF NATIVE WHITE OF FOREIGN OR MIXED PARENTAGE IN TOTAL POPULATION.

POPULATION: WEST VIRGINIA

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for West Virginia gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of four general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for the two cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; and Table IV for places of 2,500 to 10,000.

A series of summary tables (numbered 1 to 13) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had

attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of West Virginia, 1,156,817, or 94.7 per cent, are whites, and 64,173, or 5.3 per cent, negroes. The corresponding percentages in 1900 were 95.5 and 4.5. In 42 of the 55 counties less than 5 per cent of the population are negroes; in only 4 counties does the proportion of negroes exceed 12.5 per cent, the maximum percentage, 30.6, being that for McDowell County. (See also map on page 7.)

Native whites of native parentage constitute 85.3 per cent of the total population of the state, and 90.1 per cent of the white population. Native whites of foreign or mixed parentage and foreign-born whites each constitute only 4.7 per cent of the total population.

Of the urban population, 74.8 per cent are native whites of native parentage; of the rural, 87.8 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 11.6 and 3.1 per cent, respectively. The percentage of foreign-born whites is 6.9 in the urban population and 4.2 in the rural; the percentage of negroes is 6.7 in the urban and 4.9 in the rural.

Sex (Table 2).—In the total population of the state there are 644,044 males and 577,075 females, or 111.6 males to 100 females. In 1900 the ratio was 108.6 to 100. Among the whites there are 110.5 males to 100 females; among the negroes, 132.8. Among native whites the ratio is 106.1 to 100, as compared with 261.8 to 100 for the foreign-born whites. In the urban population there are 104.2 males to 100 females, and in the rural, 113.4.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—80 per cent were born in West Virginia and 20 per cent outside the state; of the native white population, 17.8 per cent were born outside the state, and of the native negro, 57.6 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Table 5).—Of the foreign-born white population of West Virginia, persons born in Italy represent 30.3 per cent; Austria,

14.6; Germany, 11.1; Hungary, 10.4; Russia, 9; England, 6.1; Ireland, 4; Scotland, 1.9; all other countries, 12.5. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 21.7 per cent; Italy, 18.5; Ireland, 11.5; Austria, 9.5; England, 9; Hungary, 6.6; Russia, 6.4; Scotland, 2.9.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 338,349, representing 27.7 per cent of the population. Of such males, 93.2 per cent are whites and 6.7 per cent negroes. Native whites represent 83 per cent of the total number and foreign-born whites 10.3 per cent. Of the 34,687 foreign-born white males of voting age, 7,263, or 20.9 per cent, are naturalized. Males of militia age—18 to 44—number 275,048.

Age (Tables 7, 8, and 12).—Of the total population, 13.8 per cent are under 5 years of age, 22.8 per cent from 5 to 14 years, inclusive, 20.2 per cent from 15 to 24, 27.4 per cent from 25 to 44, and 15.5 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 6.9 per cent of this class being under 15 years of age, while 69.9 per cent are 25 years of age and over. Of the native whites of native parentage 40.9 per cent are 25 and over, and of the negroes 46.5 per cent. The negro population comprises a somewhat smaller proportion of children under 5 than the native white of native parentage. The proportion under 5 is greatest among native whites of foreign or mixed parentage.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 33.2 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 26.1 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 396,818, of whom 259,971, or 65.5 per cent, attended school. In addition to these, 3,544 children under 6 and 3,896 persons 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 64.9; for girls, 66.2. For children from 6 to 14 years, inclusive, the percentage attending school was 82.5. The percentage for children of this age among native whites of native parentage was 83; among native whites of foreign or mixed parentage, 82.9; among foreign-born whites, 66.1; and among negroes, 76.2. (See Table I.) The percentage attending school for children of that age was 85.1 in the urban population, and 82.1 in the rural.

Illiteracy (Table 10).—There are 74,866 illiterates in the state, representing 8.3 per cent of the total population 10 years of age and over, as compared with 11.4 per cent in 1900. The percentage of illiteracy is 6.4 among native whites, 23.9 among foreign-born whites, and 20.3 among negroes. Among native whites of native parentage it is 6.7 and among native whites of foreign or mixed parentage, 2.

Illiterates are relatively fewer in urban than in rural communities, the percentage being 4 in the urban population and 9.4 in the rural. For each class of the population separately, also, the rural percentage is higher than the urban—decidedly higher for the foreign-born whites and for the negroes.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 4.1. (See Table I.)

Marital condition (Tables 11 and 13).—In the population 15 years of age and over, 38.9 per cent of the males are single and 28 per cent of the females. The percentage married is 56.7 for males and 63.3 for females, and the percentage widowed 3.7 and 7.9, respectively. The percentages of those reported as divorced, 0.3 and 0.5, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due partly to the excess of males in the total population, but mainly to the fact that women marry younger. Thus 15.5 per cent of the females from 15 to 19 years of age are married, as compared with 1.3 per cent of the males; and 57.9 per cent of the females from 20 to 24 years are married, as compared with 25.8 per cent of the males. In the next age group, 25 to 34 years, the difference is less marked, the percentages being 80.4 and 66.7, respectively, and it is inconsiderable in the age group 35 to 44. Among those 45 and over the percentage married is higher among the males. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages married among those 15 years of age and over are as follows: Native whites of native parentage, 58 for males, 63.1 for females; native whites of foreign or mixed parentage, 56.6 both for males and for females; foreign-born whites, 53.6 and 76.6; negroes, 45.7 and 62.2.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, both for males and for females, is higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in West Virginia is 239,128, and the total number of families 248,480, indicating that in comparatively few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 5.1, and the average number per family, 4.9.

COUNTIES.

FAYETTE.—Part taken to form part of Summers in 1871.
GREENBRIER.—Part taken to form part of Summers in 1871.
HAMPSHIRE.—Part of Mineral annexed in 1872.
LOGAN.—Part taken to form Mingo in 1895.
MERCER.—Part taken to form part of Summers in 1871.
MINERAL.—Part annexed to Hampshire in 1872.
MINGO.—Organized from part of Logan in 1895.
MONROE.—Part taken to form part of Summers in 1871.
RALEIGH.—Part of Wyoming annexed in 1872.
SUMMERS.—Organized from parts of Fayette, Greenbrier, Mercer, and Monroe in 1871.
WYOMING.—Part annexed to Raleigh in 1872.

INCORPORATED PLACES.

CHARLESTON.—Part of Charleston district annexed in 1907.
CHESTER.—Incorporated in 1907.
ELKINS.—Part of Leadsville district (South Elkins town) annexed in 1901.
GRAFTON.—Part of Fetterman district (Fetterman town) annexed in 1903.
HINTON.—Part (old wards 4 and 5) taken to form Avis town in 1901.
HUNTINGTON.—Part of Guyandotte district (Central City town) annexed in 1909.
MARTINSBURG.—Parts of Arden and Opequon districts annexed in 1909.
MORGANTOWN.—Part of Morgan district (Greenmont, Seneca, and South Morgantown towns) annexed in 1901.
PARKERSBURG.—Part of Parkersburg district annexed in 1903.
PRINCETON.—Incorporated in 1909.
RICHWOOD.—Incorporated in 1901.
WELLSBURG.—Part of Cross Creek district annexed in 1903.
WILLIAMSON.—Incorporated in 1905.

POPULATION : WISCONSIN

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Wisconsin gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of Milwaukee.

A series of summary tables (numbered 1 to 16) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had

attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Wisconsin, 763,225, or 32.7 per cent, are native whites of native parentage; 1,044,761, or 44.7 per cent, are native whites of foreign or mixed parentage; and 512,569, or 22 per cent, are foreign-born whites. The corresponding percentages in 1900 were 28.3, 46.2, and 24.9, respectively, the proportion of native whites of native parentage having increased somewhat during the decade. In only 2 of the 71 counties is the percentage of foreign-born whites less than 10, in 7 it is between 10 and 15, in 48 between 15 and 25, in 12 between 25 and 35, and in 2 it exceeds 35. The percentage of native whites of foreign or mixed parentage ranges generally higher, exceeding 35 in 63 counties. (See maps on page 9.)

Of the urban population, 28.5 per cent are native whites of native parentage; of the rural, 35.9 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 45.7 and 44.1 per cent, respectively. The percentage of foreign-born whites is 25.5 in the urban population and 19.3 in the rural. The Indians appear almost exclusively in the rural population, of which they constitute 0.7 per cent.

Sex (Tables 2 and 14).—In the total population of the state there are 1,208,578 males and 1,125,282 females, or 107.4 males to 100 females. In 1900 the ratio was 106.6 to 100. Among the native whites the ratio is 101.6; among the foreign-born whites, 130.8. In the urban population there are 101.7 males to 100 females, and in the rural, 111.9.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—85.6 per cent were born in Wisconsin and 14.4 per cent outside the state, the proportions being the same for the native white population. Of the native negroes, 58.7 per cent were born outside the state; of the native Indians, 6.1 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 12).—Of the foreign-born white population of Wisconsin, persons born in Germany represent 45.5 per cent; Norway, 11.1; Austria, 7.5; Russia, 5.8; Sweden, 5; Canada, 4.9; Denmark, 3.2; Ireland, 2.7; England, 2.7; all

other countries, 11.6. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 51 per cent; Norway, 10.1; Austria, 5.2; Canada, 5; Ireland, 4.8; Sweden, 3.6; England, 3.4; Russia, 2.9; Denmark, 2.5.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 683,743, representing 29.3 per cent of the population. Of such males, 21.7 per cent are native whites of native parentage, 38.3 per cent native whites of foreign or mixed parentage, 39.4 per cent foreign-born whites, and 0.6 per cent are in other classes. Of the 269,237 foreign-born white males of voting age, 142,848, or 53.1 per cent, are naturalized. Males of militia age—18 to 44—number 497,922.

Age (Tables 7, 8, and 13).—Of the total population, 11 per cent are under 5 years of age, 21.1 per cent from 5 to 14 years, inclusive, 19.9 per cent from 15 to 24, 27.3 per cent from 25 to 44, and 20.5 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 3.6 per cent of this class being under 15 years of age, while 87.1 per cent are 25 years of age and over. Of the native whites of native parentage, 30.4 per cent are 25 years of age and over; of native whites of foreign or mixed parentage, 41.3 per cent; of Indians, 42 per cent; and of negroes, 61.3 per cent.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 30.3 per cent are from 25 to 44 years of age, inclusive, and of the rural, 25 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 732,544, of whom 484,629, or 66.2 per cent, attended school. In addition to these, 22,287 children under 6 and 7,985 persons 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 66; for girls, 66.3. For children from 6 to 14 years, inclusive, the percentage attending school was 89.9. The percentage for children of this age among native whites of native parentage was 90.8; among native whites of foreign or mixed parentage, 89.7; among foreign-born whites, 84.1; and among negroes, 88.9. (See Table I.) There is little difference between urban and rural communities as regards the percentage of school attendance for the ages from 6 to 14, but for persons from 15 to 20, the percentages were 27.3 in the urban population and 31.3 in the rural.

Illiteracy (Table 10).—There are 57,769 illiterates in the state, representing 3.2 per cent of the total population 10 years of age and over, as compared with 4.7 per cent in 1900. The percentage of illiteracy is 33.7 among Indians, 8.7 among foreign-born whites, 4.5 among negroes, and 0.9 among native whites.

For all classes combined, the percentage of illiteracy is slightly higher in rural than in urban communities, 3.3 as compared with 3. The rural percentage exceeds the urban for each class separately, except the foreign-born whites, most of whom arrive in this country when past the school age. Among them the percentage is the same in the urban as in the rural population.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is only 0.7. (See Table I.)

Marital condition (Tables 11 and 15).—In the population 15 years of age and over, 41.4 per cent of the males are single and 32.6 per cent of the females. The percentage married is 53.6 for males and 57.7 for females, and the percentage widowed 4.2 and 9, respectively. The percentages of those reported as divorced, 0.5 and 0.6, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is smaller for women than for men is due largely to the fact that women marry younger. Thus 4.6 per cent of the females from 15 to 19 years of age are married, as compared with 0.3 per cent of the males, and 39.1 per cent of the females from 20 to 24 years are married, as compared with 14.4 per cent of the males. In the next two age groups, 25 to 34 and 35 to 44 years, the difference is less marked, while among those 45 and over, the percentage married is higher among the males. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 68.2 for males and 71.8 for females; native whites of foreign or mixed parentage, 46.8 and 54, respectively; native whites of native parentage, 45.1 and 48.8; Indians, 55.2 and 63.1; negroes, 45.6 and 50.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married for males is higher in the urban population; for females, it is higher in the rural.

Dwellings and families.—The total number of dwellings in Wisconsin is 462,355, and the total number of families 499,629, there being 108.1 families to each 100 dwellings. (See Table I.) The average number of persons per dwelling is 5, and the average number per family, 4.7.

NOTES REGARDING CHANGES IN BOUNDARIES, ETC.

COUNTIES.

ASHLAND.—Parts taken to form part of Sawyer in 1883 and part of Iron in 1893.
BURNETT.—Part taken to form Washburn in 1883.
CHIPPewa.—Parts taken to form part of Taylor in 1875, part of Price in 1879, and part of Sawyer in 1883; part taken to form Gates County (now Rusk) in 1901.
CLARK.—Part taken to form part of Taylor in 1875.
FLORENCE.—Organized from parts of Marinette and Oconto in 1882.
FOREST.—Organized from parts of Langlade and Oconto in 1885; part annexed to Oneida between 1890 and 1900 and part annexed to Vilas in 1905.
IRON.—Organized from parts of Ashland and Oneida in 1893.
LANGLADE.—Organized as New from part of Oconto in 1879; name changed in 1880; part taken to form part of Forest in 1885; part of Lincoln annexed between 1880 and 1890.
LINCOLN.—Organized from part of Marathon in 1874; parts taken to form part of Taylor in 1875 and part of Price in 1879; part taken to form Oneida in 1885; part annexed to Langlade between 1880 and 1890.
MARATHON.—Parts taken to form Lincoln in 1874 and part of Taylor in 1875.
MARINETTE.—Organized from part of Oconto in 1879; part taken to form part of Florence in 1882.
OCONTO.—Part of Shawano annexed in 1879; parts taken to form Marinette and New (now Langlade) in 1879, part of Florence in 1882, and part of Forest in 1885.
ONEIDA.—Organized from part of Lincoln in 1885; parts taken to form Vilas and part of Iron in 1893; part of Forest annexed between 1890 and 1900 and part of Vilas annexed in 1901.
PRICE.—Organized from parts of Chippewa and Lincoln in 1879.
RUSK.—Organized as Gates from part of Chippewa in 1901; name changed in 1905.
SAWYER.—Organized from parts of Ashland and Chippewa in 1883.
SHAWANO.—Part annexed to Oconto in 1879.

TAYLOR.—Organized from parts of Chippewa, Clark, Lincoln, and Marathon in 1875.

VILAS.—Organized from part of Oneida in 1893; part annexed to Oneida in 1901; part of Forest annexed in 1905.

WASHBURN.—Organized from part of Burnett in 1883.

NOTE 1.—*Chippewa and Rusk Counties combined.*—Total population: 1910, 43,263; 1900, 33,037; increase, 1900-1910, 10,226; per cent of increase, 31. Urban population—1910, 11,568; same places in 1900, 10,481; per cent of increase, 10.4. Rural population—1910, 31,695; same territory in 1900, 22,556; per cent of increase, 40.5. Urban population—1900, 8,094; rural population—1900, 24,943. Per cent in places of 2,500 or more in 1910, 28.7. Per cent in places of 2,500 or more in 1900, 24.5.

NOTE 2.—In computing this increase the population of Indian reservations in 1900 has been deducted from the total population of the county in order to make that total comparable with the total for 1890 which does not include the population of Indian reservations. The population thus deducted in the several counties was as follows: Ashland, 627; Bayfield, 398; Brown, 695; Oconto, 232; Outagamie, 1,009; Sawyer, 373; Shawano, 1,631; and Vilas, 661.

CITIES.

KENOSHA.—Parts of Pleasant Prairie town annexed in 1902, 1906, and 1908, and parts of Somers town annexed in 1901, 1902, 1906, and 1908.

MADISON.—Part of Madison town annexed in 1903.

MARSHFIELD.—Part taken to form Cameron town in 1903.

MILWAUKEE.—Part of Milwaukee town annexed between 1890 and 1900. Parts of Greenfield town annexed in 1903 and 1910, part of Lake town annexed in 1908, part of Milwaukee town annexed in 1910, and parts of Wauwatosa town annexed in 1900, 1902, 1906, 1909, and 1910.

OSHKOSH.—Part of Oshkosh town annexed in 1906.

WASHBURN.—Incorporated from part of Washburn town in 1904.

WEST ALLIS.—Incorporated from parts of Greenfield and Wauwatosa towns in 1906.

POPULATION : WYOMING

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Wyoming gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of three general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for Cheyenne, the only city of more than 10,000 inhabitants; and Table III for places of 2,500 to 10,000.

A series of summary tables (numbered 1 to 12) reproduces from the general tables the more important state totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had

attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Wyoming, 80,696, or 55.3 per cent, are native whites of native parentage; 32,504, or 22.2 per cent, are native whites of foreign or mixed parentage; 27,118, or 18.6 per cent, are foreign-born whites; and 2,235, or 1.5 per cent, are negroes. The corresponding percentages in 1900 were 51.9, 26.5, 17.9, and 1, respectively, the proportion of native whites of native parentage having increased during the decade. The 1,842 Chinese and Japanese constitute 1.3 per cent of the population and the 1,486 Indians 1 per cent. In 13 of the 15 counties the proportion of foreign-born whites ranges from 10 to 25 per cent; the maximum percentage, 44.2, is that for Sweetwater County. The proportion of native whites of foreign or mixed parentage ranges from 15 to 25 per cent in 12 counties, and exceeds 25 in 3 counties. (See maps on page 7.)

Of the urban population, 51.7 per cent are native whites of native parentage; of the rural, 56.8 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 25.1 and 21.1 per cent, respectively. The percentage of foreign-born whites is 19.1 in the urban population and 18.4 in the rural; the percentage of negroes is 2.4 in the urban and 1.2 in the rural; while the Indian population is almost exclusively rural.

Sex (Table 2).—In the total population of the state there are 91,670 males and 54,295 females, or 168.8 males to 100 females. In 1900 the ratio was 169.4 to 100. Among native whites the ratio is 147.1 to 100 and among foreign-born whites, 287.2 to 100. In the urban population there are 151.4 males to 100 females and in the rural, 176.9.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—27.2 per cent were born in Wyoming and 72.8 per cent outside the state; of the native white population, 73.3 per cent were born outside the state; of the native Indian, 5.4 per cent; and of the native negro, 93 per cent. Persons born outside the state constitute approximately the same proportion of the native population in urban as in rural communities.

Foreign nationalities (Table 5).—Of the foreign-born white population of Wyoming, persons born in Austria represent 14.6 per cent; England, 11; Germany, 9.7; Sweden, 9.2; Italy, 7.2; Greece, 7.1; Scotland, 6.7; Canada, 5.2; Finland, 5.1; Ireland, 5; all other countries, 19.1. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, England contributed 14.9 per cent; Germany, 13.6; Austria, 9.2; Ireland, 8.8; Sweden, 7.6; Scotland, 7.1; Canada, 6.5; Italy, 4.2; Denmark, 3.9; Finland, 3.6; Greece, 3.2.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 63,201, representing 43.3 per cent of the population. Of such males, 48.6 per cent are native whites of native parentage, 17 per cent native whites of foreign or mixed parentage, 28.9 per cent foreign-born whites, 2.1 per cent negroes, 0.7 per cent Indians, and 2.8 per cent Chinese, Japanese, and all other. Of the 18,263 foreign-born white males of voting age, 6,837, or 37.4 per cent, are naturalized. Males of militia age—18 to 44—number 54,654.

Age (Tables 7 and 8).—Of the total population, 10.5 per cent are under 5 years of age, 16.3 per cent from 5 to 14 years, inclusive, 21.2 per cent from 15 to 24, 37.8 per cent from 25 to 44, and 14 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 4.4 per cent of this class being under 15 years of age, while 76.9 per cent are 25 years of age and over. Of the native whites of foreign or mixed parentage 41.7 per cent are 25 and over, and of the native whites of native parentage, 46.6 per cent.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to urban communities explains this at least in part. Of the urban population 40.2 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 36.8 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 35,776, of whom 23,020, or 64.3 per cent, attended school. In addition to these, 297 children under 6 and 428 persons 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 60.2; for girls, 69.1. For children from 6 to 14 years, inclusive, the percentage attending school was 84.5. The percentage for children of this age among native whites of native parentage was 84.9; among native whites of foreign or mixed parentage, 85.9; among foreign-born whites, 76.4; and among negroes, 84.7. (See Table I.) There is little difference between urban and rural communities as regards the percentage of school attendance.

Illiteracy (Table 10).—There are 3,874 illiterates in the state, representing 3.3 per cent of the total population 10 years of age and over, as compared with 4 per cent in 1900. The percentage of illiteracy is 0.3 among native whites, 9.7 among foreign-born whites, 51.2 among Indians, and 5 among negroes.

For all classes combined the percentage of illiterates is 2.8 in urban communities and 3.5 in rural. For each class separately, except the small group of negroes, the percentage is somewhat higher in rural communities than in urban.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 1.4. (See Table I.)

Marital condition (Table 11).—In the population 15 years of age and over, 56.3 per cent of the males are single and 23.5 per cent of the females. The percentage married is 39.7 for males and 69.1 for females, and the percentage widowed 2.8 and 6.2, respectively. The percentages of those reported as divorced, 0.7 and 1, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due partly to the excess of males in the total population, and partly to the fact that women marry younger. Thus 14.6 per cent of the females from 15 to 19 years of age are married, as compared with 0.6 per cent of the males, and 61.9 per cent of the females from 20 to 24 years are married, as compared with 12 per cent of the males. In the next age group, 25 to 34 years, the effect of the excess of males in the population is clearly apparent, 84.7 per cent of the females being married, as compared with 39.3 of the males. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 41 for males and 79.2 for females; native whites of native parentage, 40.5 and 68.7, respectively; native whites of foreign or mixed parentage, 38.8 and 63.1; Indians, 60.3 and 66.6; negroes, 25.9 and 54.6.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married is slightly lower for males, but decidedly higher for females, in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Wyoming is 30,969, and the total number of families 32,092, indicating that in comparatively few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.7, and the average number per family, 4.5.

¹ In computing this increase the population of Wind River Indian Reservation in 1900 (1,961) has been deducted from the total population of the county in order to make that total comparable with the total for 1890, which does not include the population of that reservation.

² Comparable figures not available; for combined figures, see note on page 13.

³ State total includes population (49) specially enumerated in 1890, not distributed by counties.

⁴ Native whites having both parents born in countries other than specified, and also those having both parents of foreign birth but born in different countries.
