## CHAPTER 1.

### NUMBER OF INHABITANTS.

**Introduction.**—This chapter gives the population of Illinois, by counties and minor civil divisions, as enumerated at the Thirteenth Census, taken as of April 15, 1910, with comparative statements of population where possible, and a statement and discussion for the state as a whole of the population living in urban and in rural territory. The statistics are given in detail in two general tables.

Table 1 (p. 574) shows the population of Illinois, distributed according to counties and minor civil divisions, at the last three censuses, namely, those of 1910, 1900, and 1890. The arrangement of counties and of the primary divisions in each county is alphabetical. The figures for all secondary divisions except Quincy city are printed in italics. The changes in boundaries, name, or form of organization that have taken place since 1900 are indicated in the footnotes to the table. For changes between 1890 and 1900 reference must be made to the census report of 1900.

It may be noticed that the county totals as given in Table 1 for 1900 and 1890 sometimes exceed the aggregate population of the minor civil divisions as shown in the table. This is due in the case of some counties to the numerous territorial changes that have been made in the minor civil divisions since 1890 and in the case of certain counties for which the population was returned by precincts or townships in 1910 to the fact that it was not so returned at one or both of the other censuses. In addition, there are several instances in which the county total includes the population of a city, town, or village which was returned as a primary division in 1890 or 1900 and as a secondary division in 1910.

Table 2 (p. 600) shows the cities and incorporated towns and villages in Illinois, alphabetically arranged, with their population in 1910, 1900, and 1890.

**HISTORICAL NOTE.**—This state takes its name from an Indian tribe which, at the time of the early French explorations, inhabited the area now comprising Illinois and adjacent parts of Wisconsin, Iowa, and Missouri. The word is the gallicized plural of the Indian *Illini*, meaning "man."

The region now constituting Illinois was first visited by white men in 1673, when Joliet and Marquette ascended the Illinois River and reached Lake Michigan by way of the Des Plaines and Chicago portage. Further explorations were made by La Salle and other Frenchmen a few years later. The first permanent settlement was made by the French at Kaskaskia about the year 1700, although mission stations and trading posts had been established some years earlier.

This region continued in the possession of the French, who made a number of other settlements, until the close of the French and Indian War, when, by the treaty of 1763, the "Illinois country," as it was then called, was ceded to Great Britain, together with the rest of the former French territory east of the Mississippi and south of the Great Lakes. Owing to the hostility of the Indians, however, the English did not take actual possession until October, 1765, when the British flag was raised at Fort Chartres, then the capital. In 1772 the seat of government was removed to Kaskaskia.

The population of Illinois, by counties, at each of the last five censuses, from 1870 to 1910, inclusive; the increase during the last two decades; the density of the total and the rural population at the census of 1910; and the distribution of the population at the last two censuses according to urban and rural districts are given in Table I of Chapter 2.

The tables and text of the present chapter contain few technical expressions whose meaning is not apparent. The census usage in regard to certain terms is, however, explained below:

**Density of population.**—The density of population of a state or county is obtained by dividing its total population by the number of square miles in its land area. In calculating the density of rural population, the same divisor is used as it is not practicable to ascertain and deduct the exact area covered by the urban districts, and even if this could be done with accuracy the deduction of this area from the total land area would ordinarily make no appreciable difference in the resulting quotient.

**Minor civil divisions.**—The counties are divided generally into smaller political units which bear different designations in the different parts of the country, such as towns, townships, election precincts, etc. Of these minor civil divisions those which rank next to the county as geographic areas are termed primary divisions. In many instances, however, these primary divisions contain political units of still smaller area, such as cities, incorporated villages, towns, or boroughs. These smaller political units are referred to as secondary divisions.

**Urban and rural population defined.**—The Census Bureau, for purposes of discussion, has defined urban population as that residing in cities and other incorporated places of 2,500 inhabitants or more, and rural population as that residing outside of such incorporated places.

The comparisons of the urban and rural population in 1910 with that at earlier enumerations may be made either with respect to the varying proportions of the two classes at successive enumerations or with respect to the increase between enumerations. In order to contrast the *proportion* of the total population living in urban or rural territory at the census of 1910 with the proportion urban or rural at the preceding census, it is necessary to classify the territory according to the conditions *as they existed* at each census. In this comparison a place having less than 2,500 inhabitants in 1900 and

In 1778, during the Revolution, the region northwest of the Ohio River was conquered by a force of Virginians under George Rogers Clark, and later in the same year it was made a county of Virginia. In 1783, at the close of the Revolution, the British claims to all territory east of the Mississippi, north of Florida, and extending as far north as the present northern boundary of the United States, were relinquished in favor of the latter nation. The states which claimed title to lands northwest of the Ohio and east of the Mississippi later ceded their rights to the United States, and in 1787 a territorial government was established for this region, then called the Northwest Territory.

In 1800 the territory of Indiana, including the area now constituting Illinois, was organized from a part of the Northwest Territory. In 1809 the territory of Illinois, including all the region lying between the Mississippi and the present western boundary of Indiana, prolonged northward to the Canadian line, was organized from a part of Indiana. In 1812 the right of suffrage was greatly extended and the form of territorial government was changed from the first to the second grade, thus giving the people of Illinois the power to elect a legislature and a delegate in Congress.

In 1818, under authority of an enabling act passed by Congress in the same year, Illinois, with boundaries as at present, adopted a state constitution and was admitted to the Union.

over 2,500 in 1910 is classed with the rural population for 1900 and with the urban for 1910. On the other hand, in order to present fairly the contrast between urban and rural communities, as regards their *rate of growth*, it is necessary to consider the changes in population for the *same* territory which have occurred from one decennial census to another. For this purpose the territory which in 1910 was urban or rural, as the case may be, is taken as the basis, and the population in 1900 for the same territory (so far as sepa-

rately reported at that census) is presented, even though part of the territory may, on the basis of its population at the earlier census, have then been in a different class. This avoids the disturbing effect on comparisons which would arise from the passage, for example, of communities formerly classed as rural into the urban group. These two distinct forms of comparison are made in Table I of Chapter 2 for the state as a whole and for each county separately for the last two censuses.

**TOTAL POPULATION, INCREASE, AND DISTRIBUTION.**

Population of the state.—The population of Illinois is 5,638,591. Compared with a population of 4,821,550 in 1900, this represents an increase during the last decade of 817,041, or 16.9 per cent, the smallest relative increase shown at any census. During the same period the total population of the United

States increased 21 per cent. The following table shows the population of Illinois at each census from 1810 to 1910, inclusive, together with the increase and per cent of increase during each decade, in comparison with the per cent of increase for the United States as a whole.

CENSUS YEAR.	Population.	INCREASE OVER PRECEDING CENSUS.		Per cent of increase for the United States.
		Number.	Per cent.	
1910.....	5,638,591	817,041	16.9	21.0
1900.....	4,821,550	995,198	26.0	20.7
1890.....	3,826,352	748,481	24.3	25.5
1880.....	3,077,871	537,980	21.2	30.1
1870.....	2,539,891	827,940	48.4	22.6
1860.....	1,711,951	860,481	101.1	35.6
1850.....	851,470	375,287	78.8	35.9
1840.....	476,183	318,738	202.4	32.7
1830.....	157,445	102,234	185.2	33.5
1820.....	55,211	42,929	349.5	33.1
1810.....	12,282			

Illinois was organized as a territory in 1809 and appears in the census reports for the first time in 1810. During the 50 years from 1810 to 1860 its population increased very rapidly, the lowest rate of increase for any decade being 78.8 per cent between 1840 and 1850. The percentages of increase for the other four decades ranged from 101.1 to 349.5. During the 50 years from 1860 to 1910 the population of the state increased much more slowly, the rates of increase ranging from 16.9 per cent for the last decade to 48.4 per cent for the decade 1860-1870. In 1910 the population of the state was a little more than three times as great as in 1860.

A comparison of the rates of increase for the state with those for the United States, as given in the preceding table, shows that prior to 1870 the population of the state increased at a very much higher rate than the population of the United States. From 1870 to 1910, however, except for the decade 1890-1900, the population of the state increased at a slower rate than that of the United States. During this 40-year period the population of the state increased 122 per cent, while the population of the United States increased 138.5 per cent.

Principal cities.—Illinois has 242 cities. Chicago, the largest, has a population of 2,185,283. Peoria, the second city, has a population of 66,950. East St. Louis

and Springfield have 58,547 and 51,678 inhabitants, respectively. Of the remaining cities, 8 have from 25,000 to 50,000, 18 from 10,000 to 25,000, 36 from 5,000 to 10,000, 61 from 2,500 to 5,000, and 115 less than 2,500 inhabitants. The aggregate population of the 242 cities is 3,562,714, or 63.2 per cent of the total population of the state.

Table 2 shows the population in 1910 of all the cities of the state with comparative figures, where possible, for 1900 and 1890. The table on page 569 shows the population of the 12 cities having in 1910 over 25,000 inhabitants, as reported at each census since their incorporation either as cities, towns, or villages, so far as figures are available, together with the increase during each decade.

Of the cities included in this table, East St. Louis shows the highest percentage of increase during the last decade, namely, 97.4 per cent, and Quincy the lowest, nine-tenths of 1 per cent.

The population of Chicago increased 486,708, or 28.7 per cent, during the last decade, the lowest relative increase which it has shown at any census. During the preceding decade the increase was 598,725, or 54.4 per cent. From 1840 to 1890, inclusive, the percentage of increase in the population of the city did not fall below 100 per cent except for one decade, 1870-1880, when it was 68.3 per cent.

1910.....	25,976	3,543	15.8	1850.....	4,533	1,954	75.8
1900.....	22,433	4,610	25.9	1840.....	2,579		

There are 4 cities which showed during the last decade rates of increase of 50 per cent or more—Danville, Decatur, East St. Louis, and Springfield. Six cities—Aurora, Danville, Decatur, East St. Louis, Rockford, and Springfield—showed higher rates of increase in population for the last decade than for the preceding decade, 1890–1900.

**Counties.**—Illinois has 102 counties. The population of these counties ranges from 7,015 in Hardin County to 2,405,233 in Cook County.

There have been no changes in the territorial boundaries of the counties since 1900.

Fifty-two counties have increased in population during the last decade, the rates of increase ranging from less than one-tenth of 1 per cent in Fayette County to 62.2 per cent in Williamson County, and the absolute increases from 10 in Fayette County to 566,498 in Cook County. Nineteen counties show a larger rate of increase than is shown for the state as a whole, which, as before stated, was 16.9 per cent. Fifty counties have decreased in population during the last decade, the rates of decrease ranging from three-tenths of 1 per cent in Dewitt County to 17.4 per cent in Pope County, and the absolute

decreases from 66 in Dewitt County to 2,973 in Pike County. During the preceding decade, 1890–1900, only 6 counties in the state showed decreases in population. The aggregate increase of population from 1900 to 1910 in the 52 counties that show an increase is 872,985; the aggregate decrease of population in the 50 counties that show a decrease is 55,944. The difference, 817,041, is, of course, the total increase of population in the state.

The maps on page 572 show the increase or decrease in the total and the rural population, respectively, of each county of Illinois during the last decade. In the counties shown in white the population decreased; for the other counties the different rates of increase are indicated by differences in shading.

**Density of population.**—The total land area of the state is 56,043 square miles. The average number of persons to the square mile in 1910 was 100.6; in 1900 and 1890 it was 86.1 and 68.3, respectively. The average number per square mile for the United States as a whole in 1910 was 30.9. In density of population Illinois ranks tenth among the states in 1910.

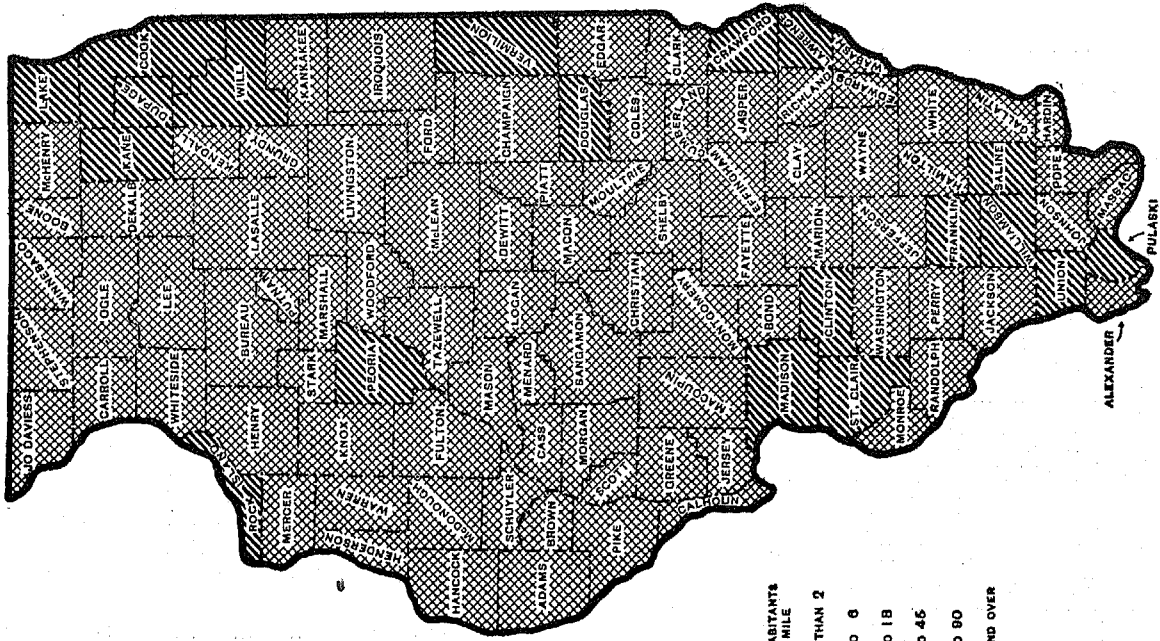

DENSITY OF POPULATION OF ILLINOIS, BY COUNTIES: 1910.

TOTAL POPULATION.

RURAL POPULATION.

Rural population is defined as that residing outside of incorporated places having 2,500 inhabitants or more.

TABLE 1.—POPULATION OF MINOR CIVIL DIVISIONS: 1910, 1900, AND 1890.

[The word "precinct," where used, means election precinct. For changes in boundaries, etc., between 1900 and 1910, see footnotes; for those between 1890 and 1900, see Reports of the Twelfth Census: 1900, Vol. I, Table 5.]

<sup>1</sup> County total includes population (308) of Good Hope village, returned independently in 1890.

<sup>2</sup> Macomb city, coextensive with Macomb City township, incorrectly reported as in Chalmers, Emmet, Macomb, and Scotland townships in 1900 and 1890.

<sup>3</sup> Owing to physical disability, the enumerator for Bardolph village failed to fully canvass all the territory assigned to him and, according to a local census, between 50 and 60 persons were thereby omitted from the enumeration, but the omission was discovered at too late a date to permit of a change in the population of Bardolph.

<sup>4</sup> Exclusive of population of Good Hope village.

<sup>5</sup> Incorporated in 1902.

<sup>6</sup> Returned in 1900 as in Coral township only.

<sup>7</sup> Name changed from Nunda in 1903.

<sup>8</sup> Parts of Bloomington township annexed to Bloomington city in 1900, 1902, 1904, and 1905.

<sup>9</sup> Incorporated in 1901.

TABLE 1.—POPULATION OF MINOR CIVIL DIVISIONS: 1910, 1900, AND 1890—Continued.

[The word "precinct," where used, means election precinct. For changes in boundaries, etc., between 1900 and 1910, see footnotes; for those between 1890 and 1900, see Reports of the Twelfth Census: 1900, Vol. I, Table 5.]

				Ward 4.....	817		
				Washington precinct.....	850	911	862

<sup>1</sup> Through a misunderstanding of the boundaries of his district, an enumerator in Granite city failed to canvass a part of the territory assigned to him and, according to a local census, about 600 persons were thereby omitted from the enumeration, but the omission was discovered at too late a date to permit a change in the population of Granite city.

<sup>2</sup> Returned in 1900 as in Venice township only.

<sup>3</sup> Incorporated in 1905.

<sup>4</sup> Incorporated in 1907.

<sup>5</sup> Returned in 1900 as in Burgess township, Bond County, only.

<sup>6</sup> Incorporated in 1909.

<sup>7</sup> Incorporated in 1908.

<sup>8</sup> Incorporated in 1903.

<sup>9</sup> Name changed from Brooklyn in 1903. Incorporated as a city in 1903.

<sup>10</sup> Incorporated in 1901.

## CHAPTER 2.

### COMPOSITION AND CHARACTERISTICS OF THE POPULATION.

**Introduction.**—The first chapter having given the number of inhabitants of Illinois by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural, the present chapter deals with the composition and characteristics of the population. The two chapters cover all the principal topics of the population census except occupations and ownership of homes.

**Description of the tables.**—The greater part of this chapter consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of more than 25,000 inhabitants; Table III for places of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of cities of more than 50,000.

A series of summary tables (numbered 1 to 16) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

**Color and nativity (Table 1).**—Of the total population of Illinois, 2,600,555, or 46.1 per cent, are native whites of native parentage; 1,723,847, or 30.6 per cent, are native whites of foreign or mixed parentage; 1,202,560, or 21.3 per cent, are foreign-born whites; and 109,049, or 1.9 per cent, are negroes. The corresponding percentages in 1900 were 47.1, 31.1, 20, and 1.8, respectively, only slight changes in the composition of the population having taken place during the decade. In most of the 102 counties, the proportion of foreign-born whites is small, being less than 5 per cent in 40 counties, and exceeding 25 per cent in only 6. More than two-thirds of the foreign-born whites are in Cook County, in which both this class and the native whites of foreign or mixed parentage constitute a larger proportion of the total population than in any other county (35 and 41.5 per cent, respectively). (See maps on page 615.)

Of the urban population, 32.3 per cent are native whites of native parentage; of the rural, 68.4 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 36.5 and 21.1 per cent, respectively. The percentage of foreign-born whites is 28.7 in the urban population and 9.5 in the rural; the percentage of negroes is 2.5 in the urban and 1.1 in the rural.

**Sex (Tables 2 and 12).**—In the total population of the state there are 2,911,674 males and 2,726,917 females, or 106.8 males to 100 females. In 1900 the ratio was 105.3 to 100. Among native whites the ratio is 101.5 to 100, and among foreign-born whites 127.3 to 100. In the urban population there are 104.9 males to 100 females, and in the rural, 109.9.

**State of birth (Tables 3 and 4).**—Of the total native population—that is, population born in the United States—76.8 per cent were born in Illinois and 23.2 per cent outside the state; of the native white population, 22.1 per cent were born outside the state, and of the native negro, 66.8 per cent. Persons born outside the state constitute a much larger proportion of the native population in urban than in rural communities.

**Foreign nationalities** (Tables 5 and 15).—Of the foreign-born white population of Illinois, persons born in Germany represent 26.5 per cent; Austria, 13.6; Russia, 12.4; Sweden, 9.6; Ireland, 7.8; Italy, 6; England, 5; Canada, 3.7; Hungary, 3.3; Norway, 2.7; all other countries, 9.2 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 34.7 per cent; Ireland, 11.3; Austria, 9.6; Sweden, 7.9; Russia, 7.8; England, 5.8; Italy, 4; Canada, 3.7; Norway, 2.3; Scotland, 1.8; Hungary, 1.8; Denmark, 1.1; Holland, 1.1.

**Voting and militia ages** (Table 6).—The total number of males 21 years of age and over is 1,743,182, representing 30.9 per cent of the population. Of such males, 39.5 per cent are native whites of native parentage, 23.4 per cent native whites of foreign or mixed parentage, 34.7 per cent foreign-born whites, and 2.3 per cent negroes. Of the 604,524 foreign-born white males of voting age, 317,339, or 52.5 per cent, are naturalized. Males of militia age—18 to 44—number 1,330,556.

**Age** (Tables 7, 8, and 13).—Of the total population, 10.6 per cent are under 5 years of age, 18.9 per cent from 5 to 14 years, inclusive, 19.9 per cent from 15 to 24, 31 per cent from 25 to 44, and 19.3 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 5 per cent of this class being under 15 years of age, while four-fifths (80 per cent) are 25 years of age and over. Of the native whites of foreign or mixed parentage, only 39.5 per cent are 25 and over, and of the native whites of native parentage, only 43.3 per cent.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 33.5 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 27 per cent.

**School attendance** (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 1,615,914, of whom 1,025,053, or 63.4 per cent, attended school. In addition to these, 19,085 children under 6 and 20,208 persons 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 63.8; for girls, 63.1. For children from 6 to 14 years, inclusive, the percentage attending school was 87.8. The percentage for children of this age among native whites of native parentage was 88.2; among native whites of foreign or mixed parentage, 88; among foreign-born whites, 83.8; and among negroes, 83. (See Table I.) There is little difference between urban and rural communities as regards the percentage attending school for the ages from 6 to 14, but of persons from 15 to 20 years of age, 35.8 per cent in rural communities attended school and 23.5 per cent in urban.

**Illiteracy** (Table 10).—There are 168,294 illiterates in the state, representing 3.7 per cent of the total population 10 years of age and over, as compared with 4.2

per cent in 1900. The percentage of illiteracy is 1.3 among native whites, 10.1 among foreign-born whites, and 10.5 among negroes.

For all classes combined, the percentage of illiterates is 4.1 in urban communities and 3.2 in rural. For each class separately, however, except the foreign-born whites, the percentage is higher in the rural population than in the urban.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 1.1. (See Table I.)

**Marital condition** (Tables 11 and 14).—In the population 15 years of age and over, 39.3 per cent of the males are single and 30.4 per cent of the females. The percentage married is 55.2 for males and 58.6 for females, and the percentage widowed 4.2 and 10.1, respectively. The percentages of those reported as divorced, 0.5 and 0.7, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due partly to the excess of males in the total population and partly to the fact that women marry younger. Thus 8 per cent of the females from 15 to 19 years of age are married, as compared with 0.6 per cent of the males, and 46.2 per cent of the females from 20 to 24 years of age are married, as compared with 20.3 per cent of the males. In the next age group, 25 to 34 years, the percentages are 74.4 and 61.1, while in the age group 35 to 44 the difference practically disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 63.9 for males and 67.7 for females; native whites of native parentage, 54.6 and 58.2, respectively; native whites of foreign or mixed parentage, 46.1 and 51; negroes, 51.7 and 57.7.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, for males and for females, is higher in rural than in urban communities.

**Dwellings and families**.—The total number of dwellings in Illinois is 1,006,848, and the total number of families 1,264,717, there being 125.6 families to each 100 dwellings. (See Table I.) The average number of persons per dwelling is 5.6, and the average number per family, 4.5.

NOTES REGARDING CHANGES IN BOUNDARIES, ETC., OF INCORPORATED PLACES.

ALTON.—Part of Alton township (North Alton village) annexed in 1907.  
 BELLEVILLE.—Parts of Centerville, St. Clair, and Stookey townships annexed in 1906.  
 BERWYN.—Incorporated in 1902.  
 BLOOMINGTON.—Parts of Bloomington township annexed since 1900.  
 CHAMPAIGN.—Part of Urbana township annexed in 1907.  
 DANVILLE.—Parts of Danville township (including Germantown and South Danville villages) annexed in 1906, 1907, and 1909, and part of Nowell township annexed in 1907.  
 DECATUR.—Parts of Decatur township annexed since 1900.  
 EAST MOLINE.—Incorporated in 1907.  
 EAST ST. LOUIS.—Parts of Centerville township (including Winstanley Park and Edgemont villages) annexed in 1902, 1908, and 1909.  
 ELGIN.—Part of Elgin township, Kane County, annexed in 1903.  
 FOREST PARK.—Name changed from Harlem in 1907.

FREEMONT.—Parts of Harlow (including West Freemont village) and Silver Creek townships annexed in 1907 and that part of Freemont township outside of Freemont city and part of Lancaster township annexed in 1908.  
 LINCOLN.—Part of East Lincoln township annexed in 1901.  
 MATTOON.—Parts of Mattoon township annexed in 1904, 1905, and 1907.  
 MOLINE.—Parts of South Moline township annexed in 1905, 1908, and 1910.  
 OAK PARK.—Incorporated in 1902.  
 PEORIA.—South Peoria and West Peoria villages annexed between 1890 and 1900; parts of Peoria township (including part of North Peoria village) annexed in 1900, 1902, and 1909, and parts of Richwoods township (including part of North Peoria village) annexed in 1900 and 1909.  
 PORTLAND.—Incorporated in 1903.  
 ROCKFORD.—Parts of Rockford township annexed in 1903 and 1905.  
 SPRINGFIELD.—Parts of Woodside township annexed in 1904, 1908, and 1909, and parts of Springfield township (including Ridgely and East Springfield villages) annexed in 1907 and 1909.  
 ZION.—Incorporated in 1902.

## CHAPTER 3.

# STATISTICS OF AGRICULTURE FOR THE STATE AND ITS COUNTIES.

**Introduction.**—This chapter presents a complete statement of the statistics of agriculture for Illinois collected at the census of 1910. Statistics of farms and farm property relate to April 15, 1910; those of farm products, expenses, and receipts are for the calendar year 1909.

**Definitions.**—To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

**Farm.**—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term referring to the work of growing crops, producing other agricultural products, and raising animals, fowls, and bees. A "farm" as thus defined may consist of a single tract of land, or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. Further, when a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least \$250 worth of farm products in the year 1909.

**Farmer.**—A "farmer" or "farm operator," according to the census definition, is a person who directs the operations of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, tenants, and managers.

*Farm owners* include (1) farmers operating their own land only, and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "owners" being then restricted to those owning all their land.

*Farm tenants* are farmers who, as tenants, renters, or croppers operate hired land only. They were reported in 1910 in three classes: (1) *Share tenants*—those who pay a certain share of the products, as one-half, one-third, or one-quarter; (2) *share-cash tenants*—those who pay a share of the products for part of the land rented by them and cash for part; and (3) *cash tenants*—those who pay a cash rental or a stated amount of labor or products, such as \$7, 10 bushels of wheat, or 100 pounds of seed cotton per acre.

*Managers* are farmers who are conducting farm operations for the owner for wages or a salary.

**Farm land.**—Farm land is divided into (1) improved land, (2) woodland, and (3) all other unimproved land. The same classification was followed in 1880. At former censuses, except that of 1880, farm land was divided into improved land and unimproved

land, woodland being included with unimproved land. *Improved land* includes all land regularly tilled or mowed, land pastured and cropped in rotation, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings. *Woodland* includes all land covered with natural or planted forest trees, which produce, or later may produce, firewood or other forest products. *All other unimproved land* includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest. The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics therefore must be considered at best only a close approximation.

**Total value of farm products.**—No attempt has been made at this census to compute or even to estimate approximately the total value of farm products. Among the numerous difficulties which stand in the way of obtaining a total which would be at once comprehensive, free from duplication, and confined exclusively to the products of a definite period of time are the following:

(1) The duplication resulting from the feeding of farm crops to farm live stock, when the value both of the products derived from such live stock and of the crops are included in the same total. In 1900 an attempt was made to eliminate this duplication by means of an inquiry as to the total value of the products of each farm fed to the live stock on that farm, but, aside from the fact that this would not eliminate the duplication where the products of one farm are fed to the live stock of another farm, it is believed that the farmers were unable to make even approximately accurate answers to the inquiry, and it was accordingly not included in the schedule for 1910.

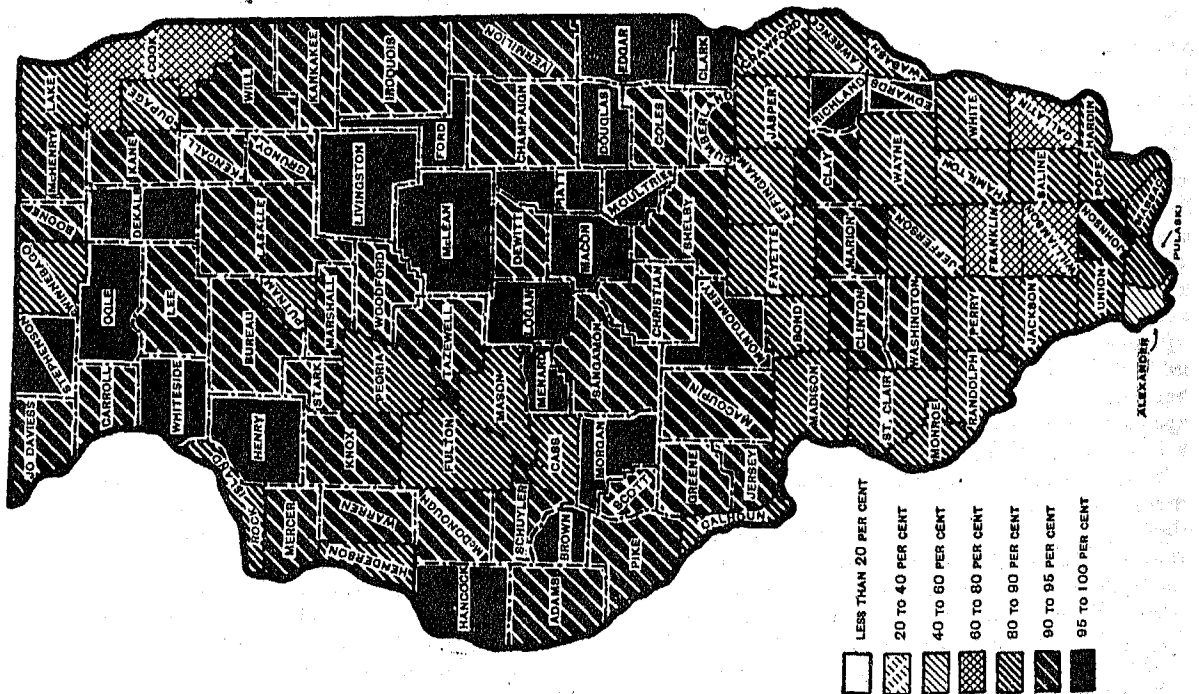

(2) The fact that farmers may buy domestic animals during the census year which are subsequently sold or slaughtered during the same year and that it is impossible to eliminate the duplication accurately; and the further fact that the value of domestic animals sold or slaughtered, or of forest products cut, during a given year (as well as some other minor items) does not usually represent a value created wholly during that year, and that it is quite impossible to ascertain the value created during the year.

(3) The fact that the returns for some products are incomplete. The returns for all products are to a considerable extent estimates made by the farmers. Special difficulty was encountered in cases where the person in possession of the farm in April, 1910, when the census was taken, was not in possession of it during the crop year 1909. In such cases the farmer was not always able to report completely and accurately the products of the land for the preceding year. It is probable that the returns for the principal crops are in general fairly accurate, but that those for minor crops and for dairy and poultry products are frequently understatements, particularly because the home consumption was disregarded or underestimated. In the belief that no accurate result could be obtained from such an inquiry, the Bureau of the Census did not even attempt to ascertain the total quantity and value of certain by-products, such as straw and cornstalks, which are of considerable importance, the schedule calling only for the value of such by-products sold.

PER CENT OF LAND AREA IN FARMS, AND AVERAGE VALUE OF FARM LAND PER ACRE, IN ILLINOIS, BY COUNTIES: 1910.

PER CENT OF LAND AREA IN FARMS.

[Per cent for the state, 90.7.]

AVERAGE VALUE OF FARM LAND PER ACRE.

[Average for the state, \$95.02.]

## FARMS AND FARM PROPERTY.

Illinois ranks twenty-second in area and third in population among the states and territories of continental United States. It has passed out of the class of states that are adding materially to their total farm areas, having, in fact, a little less land in farms than it had in 1900, and only a little more than in 1880. The state of Illinois occupies the north central portion of the low plateau region which constitutes the upper portion of the Mississippi Basin. The surface of the state varies considerably in its different portions. The lowest altitudes are found in the alluvial bottoms at the junction of the Ohio and Mississippi Rivers in the vicinity of Cairo, where the elevation is approximately 300 feet above sea level. The plateau rises thence gradually northward, altitudes of 700 and 800 feet being attained in the central portion of the state, while the highest altitudes, slightly in excess of 1,000 feet, are found in the extreme northern and northwestern portions along the Wisconsin line.

All of Illinois except the northwestern portion of the state and the extreme southern counties near the confluence of the Ohio and Mississippi Rivers has been glaciated one or more times. Repeated glaciations have covered the central and northern portions of the state with a covering of glacial till, varying in thickness from 10 or 15 feet to depths of more than 200 feet. The glaciated plateau region occupying a considerable tract in the east central portion of the state and again in the northern portion, consists of an undulating to ridged upland intersected by deeply cut stream channels which are not infrequently bordered by alluvial bottoms. In the west and west central portion of the state this glaciated upland is covered by a deep layer of brown or yellow silty loam known as the loess. This material borders the course of the Mississippi River from the extreme northwestern portion of the state to the junction of the Ohio. The great southeastern portion of Illinois is chiefly occupied by a shallow covering of loess-like material which overlies the deposits of one of the older periods of glaciation. This shallow loess is gray or ash colored, compact and dense, differing in this respect from the brown or yellow, well-drained, and friable loess of the deeper areas.

The soils of the glaciated plateau consist of brown to almost black loams and silty loams which occupy the ridges, the gentle slopes, and all except the most depressed areas. All these soils are suited to the production of the principal staple crops of the climate. The soils of the deep loess in the west central portion of the state are prevailingly brown silty loams, deep, well-drained, and of undulating surface configuration, well suited not only to the production of the staple crops, but also in many instances to the raising of orchard fruits.

A very large proportion of the total land area of the state is topographically suited to the best forms of agricultural occupation, while the great variety of soil, the wide range of climatic conditions, and the favorable location of the state with respect to transportation and to markets have made possible a diversified and profitable agriculture.

The two maps on the opposite page show, for the different counties, the proportion of the total land area which is in farms and the average value of farm land per acre. Of the state's entire land area over nine-tenths is in farms, and as shown by the first map only one county has less than three-fifths and only four other counties have less than four-fifths of their land in farms.

The counties in the central and northern parts of the state have in the greater number of cases from 90 to 95 per cent of their land in farms and a comparatively large number have over 95 per cent. The southern counties show in frequent instances from 80 to 90 per cent of their total area in farms.

The average value of farm land per acre for the whole state is \$95.02. The second map shows that in 20 counties, mainly grouped in the east central part, the average value per acre is \$125 or over. Bordering this group and mainly included in a belt just north of it are the counties in which the average value per acre ranges from \$100 to \$125. Most of the southern third of the state consists of counties which show an average value per acre of from \$25 to \$50, while the northern and western portions are fairly evenly divided between the counties in which the average value ranges either from \$50 to \$75 per acre or from \$75 to \$100 per acre.

Progress during the decade 1900 to 1910.—Between 1900 and 1910 there was an increase of 817,041, or 16.9 per cent, in the population of the state, while there was a decrease of 12,279, or 4.6 per cent, in the number of farms, and of 271,791 acres, or 0.8 per cent, in the area of farm land. As a result of the greater relative decrease in the number of farms, as compared with the total area of farm land, the average size of farms increased about 5 acres.

Farm property, which includes land, buildings, implements and machinery, and live stock (domestic animals, poultry, and bees), has shown an increase in value during the decade which approaches \$2,000,000,000. This great increase was chiefly made up of increases of over \$1,576,000,000 in the value of land and of \$180,914,000 in the value of buildings. There was also an increase of \$143,793,000 in the value of farm equipment, including implements and machinery and live stock, of which more than four-fifths represents the gain in the value of live stock. In considering the increase of

values in agriculture the general increase in the prices of all commodities in the last 10 years should be borne in mind.

The average value of a farm with its equipment in 1900 was about \$7,600, while 10 years later it was \$15,505. The average value of land rose from \$46.17 per acre in 1900 to \$95.02 in 1910, this advance being

accompanied by increases in the average value per farm of implements and machinery and of live stock.

The following table summarizes for the state the more significant facts relating to population and land area, the number, value, and acreage of farms, and the value of all other farm property in 1910 and 1900:

NUMBER, AREA, AND VALUE OF FARMS.	1910 (April 15)	1900 (June 1)	INCREASE. <sup>1</sup>	
			Amount.	Per cent.

<sup>1</sup> A minus sign (-) denotes decrease.

<sup>2</sup> Due to drainage of lakes and swamps.

**Population, number of farms, and farm acreage: 1850 to 1910.**—The table following presents, for the state as a whole for each census from 1850 to 1910, inclusive, a statement of the total population, the number of farms, and the acreage of farm land and of improved land in farms. It also gives the percentage of the land area in farms, the percentage of farm land improved, and the percentage of increase during each decade in the number of farms and in the land in farms.

CEN- SUS YEAR.	Popula- tion.	FARMS.		LAND IN FARMS.			Per cent of land area in farms.	Per cent of farm land im- prov- ed.
		Num- ber.	Per cent of in- crease. <sup>1</sup>	All land.		Improved land (acres).		
				Acres.	Per cent of in- crease. <sup>1</sup>			
1910...	5,638,591	251,872	-4.6	32,522,937	-0.8	28,048,323	90.7	86.2
1900...	4,821,550	264,151	0.8	32,794,728	7.5	27,699,210	91.5	84.5
1890...	3,826,352	240,681	-5.9	30,408,277	-3.7	25,669,030	85.0	84.2
1880...	3,077,871	255,741	26.1	31,073,045	22.4	26,115,154	88.3	82.5
1870...	2,539,801	202,803	41.5	25,882,861	23.8	19,329,052	72.2	74.7
1860...	1,711,951	143,310	88.1	20,911,989	73.7	13,006,374	58.3	62.6
1850...	851,470	76,208	.....	12,037,412	.....	5,039,545	33.6	41.9

<sup>1</sup> A minus sign (-) denotes decrease.

In the 60 years since 1850 the population of the state has increased by 4,787,121, or nearly six times.

There are 251,872 farms in Illinois, or more than three times as many as in 1850. The increase was very rapid from 1850 to 1880, averaging 5,984 per year. From 1880 to 1890 there was a considerable decrease in the number of farms, but between 1890 and 1900 the number increased 23,470, or 9.8 per cent, the total number in 1900 being the largest reported at any census. During the last decade, however, the

number decreased from 264,151 to 251,872, or 4.6 per cent. The decrease during the last decade was quite general throughout the state, as only 22 counties show even slight increases.

The land surface of Illinois is approximately 35,867,520 acres. Of this area 32,522,937 acres, or 90.7 per cent, are included in farms, while 28,048,323 acres, or 86.2 per cent of the total farm acreage, are reported as improved land, representing 78.2 per cent of the total land area of the state. The total acreage of farm land decreased 0.8 per cent during the last decade. Since the reported acreage of improved land increased from 1900 to 1910, while the total acreage in farms decreased, the percentage of farm land improved was higher in 1910 than in 1900.

The table preceding shows also the rapid increase from 1850 to 1880 in the total farm acreage and in the acreage of improved land. The proportion of the total land area of the state which was occupied by farms rose during this period from 33.6 to 88.3 per cent; since 1880 there has been little change in this proportion. The proportion which improved land formed of the total land in farms increased from 41.9 to 82.5 per cent between 1850 and 1880. Between 1880 and 1890 there was a decrease in the total farm acreage as well as in that of improved land. In each decade since 1890 improved land increased in acreage. The proportion of farm land improved reached 86.2 per cent in 1910.

**Values of farm property: 1850 to 1910.**—The agricultural changes in Illinois since 1850, as reflected in the values of the several classes of farm property, are shown in the table which follows.

CENSUS YEAR.	FARM PROPERTY.							
	Total.		Land and buildings.		Implements and machinery.		Domestic animals, poultry, and bees.	
	Value.	Per cent of increase.	Value.	Per cent of increase.	Value.	Per cent of increase.	Value.	Per cent of increase.
1910.....	\$3,905,321,075	94.8	\$3,522,792,570	99.5	\$73,724,074	63.9	\$308,804,431	59.4

<sup>1</sup> Computed gold values, being 80 per cent of the currency values reported.

The total wealth in the form of farm property is over \$3,900,000,000, of which 90.2 per cent is represented by land and buildings, 1.9 per cent by implements and machinery, and 7.9 per cent by live stock. The total value of farm property increased from 1900 to 1910 by over \$1,900,000,000, or 94.8 per cent. This was a greater absolute increase than that of the preceding half century, and a greater relative increase than during any other decade since 1860. The rate of increase of total value of farm property fell off at each census from 1860 to 1890. There have been very marked fluctuations in the decennial increases in value of domestic animals, the lowest increase being from 1890 to 1900.

Average acreage and values per farm; 1850 to 1910.—The changes which have taken place during the past 60 years in the average acreage of Illinois farms and in the average values of the various classes of farm property, as well as in the average value per acre of land and buildings, are shown in the following table:

CENSUS YEAR.	Average acres per farm.	AVERAGE VALUE PER FARM. <sup>1</sup>				Average value of land and buildings per acre.
		All farm property.	Land and buildings.	Implements and machinery.	Domestic animals, poultry, and bees.	
1910.....	129.1	\$15,505	\$13,986	\$293	\$1,226	\$108.32
1900.....	124.2	7,588	6,684	170	734	53.84
1890.....	126.7	6,140	5,247	143	750	41.41
1880.....	123.8	4,598	3,943	132	513	31.87
1870.....	127.6	4,358	3,631	136	591	28.45
1860.....	145.9	3,480	2,854	120	506	19.50
1850.....	158.0	1,663	1,261	84	318	7.99

<sup>1</sup> Averages are based on "all farms" in state.

<sup>2</sup> Computed gold values, being 80 per cent of the currency values reported.

The average size of the Illinois farm decreased from 158 acres in 1850 to 123.8 acres in 1880. Since 1880 there has been a net increase of 5.3 acres. The average farm now contains 129.1 acres, and is larger than at any earlier census since 1860.

The average value of an Illinois farm, including its equipment, has grown during the last decade from \$7,588 to \$15,505, of which about \$14,000 represents the value of land and buildings, \$1,226 the value of live stock, and \$293 the value of implements and machinery. During the last decade the average value of land and buildings per acre of land has increased

\$54.48, or, in other words, has a little more than doubled. The value per farm of equipment, which includes implements and machinery and live stock, is nearly four times as great as it was 60 years ago.

Farm tenure: 1880 to 1910.—The following table shows the distribution of the farms of the state according to character of tenure at each census since 1880:

TENURE.	1910	1900	1890	1880
Number of all farms.....	251,872	264,151	240,681	255,741
Farms operated by owners and managers.....	147,493	160,453	158,848	175,497
Farms consisting of owned land only.....	107,300	124,128	(1)	(1)
Farms consisting of owned and hired land.....	37,807	34,375	(1)	(1)
Farms operated by managers.....	2,386	1,950	(1)	(1)
Farms operated by tenants.....	104,379	103,698	81,833	80,244
Share tenants.....	43,551	65,525	52,651	59,624
Share-cash tenants <sup>2</sup> .....	23,665		29,182	20,620
Cash tenants.....	32,120	5,043		
Tenure not specified <sup>3</sup> .....	5,043			
Per cent of farms operated by—				
Owners and managers.....	58.6	60.7	66.0	68.6
Tenants.....	41.4	39.3	34.0	31.4
Share and share-cash.....	26.7	24.8	21.9	23.3
Cash and nonspecified.....	14.8	14.5	12.1	8.1

<sup>1</sup> Not reported separately.

<sup>2</sup> Share-cash tenants were doubtless largely included with share tenants in 1900, 1890, and 1880.

<sup>3</sup> Prior to 1910 nonspecified tenants were included with cash tenants.

It is significant that the decrease of 12,279 in the total number of farms during the last decade is due entirely to a decrease of 12,960 in the number of farms operated by owners and managers, the number of those operated by tenants having increased 681.

In 1880 about thirty-one out of every one hundred Illinois farms were operated by tenants. This proportion increased during the following decades, and in 1910 about forty-one out of every one hundred farms were thus operated. Of these 41 tenant farms almost 15 were operated by cash tenants, including those with nonspecified tenure, and about 26 by share tenants and share-cash tenants.

Throughout the 30-year period, 1880 to 1910, the proportion of all farms operated by cash tenants (including those for which the form of tenure was not reported) has been increasing. Share tenants and share-cash tenants also show a net increase in proportion, though much less than cash tenants. In actual number of farms operated, cash tenants increased rapidly from 1880 to 1900, then decreased somewhat during the last decade. Share tenants' and share-cash tenants' farms, however, decreased considerably in number between 1880 and 1890, increased greatly during the next decade, and somewhat in the last 10 years. In 1880 share tenants and share-cash tenants were almost three times as numerous as cash tenants, including those with nonspecified tenure, and in 1910 they were considerably less than twice as numerous.

The next table shows the acreage, improved acreage, and value of land and buildings for farms operated by owners (including part owners), managers, and tenants, respectively.

FARMS OPERATED BY—	ALL LAND IN FARMS (ACRES).		IMPROVED LAND IN FARMS (ACRES).		VALUE OF LAND AND BUILDINGS.	
	1910	1900	1910	1900	1910	1900
Total.....	32,522,937	32,794,728	23,048,323	27,698,219	\$3,522,792,570	\$1,765,581,550
Owners.....	17,787,039	19,671,602	15,033,192	10,241,421	1,765,592,310	991,034,530
Managers.....	558,463	454,378	428,467	337,036	65,008,033	28,923,390
Tenants.....	14,177,411	12,668,748	12,586,664	11,119,863	1,691,792,227	744,723,630

The following table shows the per cent distribution, by tenure groups, of the items in the preceding table, and also the number of farms:

FARMS OPERATED BY—	PER CENT OF TOTAL..							
	Number of farms.		All land in farms.		Improved land in farms.		Value of land and buildings.	
	1910	1900	1910	1900	1910	1900	1910	1900
Total.....	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Owners.....	57.6	60.0	54.7	60.0	53.6	58.6	50.1	56.2
Managers.....	0.9	0.7	1.7	1.4	1.5	1.2	1.8	1.6
Tenants.....	41.4	39.3	43.6	38.6	44.9	40.1	48.0	42.2

It will be seen that, in 1910, 54.7 per cent of all land in farms was in farms operated by their owners (including part owners), 1.7 per cent in farms operated by managers, and 43.6 per cent in farms operated by tenants, the percentage for tenants and for managers being higher and that for owners lower than in 1900.

As shown by the next table, the average size of farms operated by managers in 1910 (234.1 acres) was nearly one and three-fourths times as great as that of farms operated by tenants (135.8 acres), which was in turn larger than that of farms operated by owners (122.6 acres). The average size of farms operated by tenants and by managers increased between 1900 and 1910, while that of farms operated by owners decreased. In 1910 the percentage of farm land improved was highest for farms operated by tenants and lowest for farms operated by managers.

FARMS OPERATED BY—	AVERAGE ACRES PER FARM.				PER CENT OF FARM LAND IMPROVED.	AVERAGE VALUE OF LAND AND BUILDINGS.				
	All land.		Improved land.			Per farm.		Per acre.		
	1910	1900	1910	1900		1910	1900	1910	1900	
Total.....	129.1	134.2	111.4	104.9	86.2	84.5	\$13,998	\$6,684	\$108.32	\$53.84
Owners.....	122.6	124.1	103.6	102.5	84.5	82.0	12,170	6,258	99.29	50.42
Managers.....	234.1	233.0	170.0	173.3	78.7	74.4	27,248	14,833	116.41	63.05
Tenants.....	135.8	122.2	120.0	107.2	88.8	87.8	16,209	7,182	110.33	58.78

**Farm mortgages: 1890 to 1910.**—The Eleventh Census (1890) was the first to collect data relating to mortgage debt on farms. The basis of the returns was the "farm home" occupied by its owner. The same class of information was secured by the population schedules of the Twelfth Census (1900). The agricultural schedules of the Thirteenth Census (1910) secured practically the same information, except that the basis was "owned farms" instead of "owned farm homes"—a difference involving, however, no appreciable incomparability.

The following table relates to farms operated by persons owning all or part of the land, and shows for 1910 (1) the number of such farms reported as free from mortgage; (2) the number reported as mortgaged; and (3) the number for which no mortgage reports were secured. Comparable items are included for 1900 and 1890.

CLASS.	OWNED FARMS. <sup>1</sup>		OWNED FARM HOMES.		OWNED FARM HOMES. <sup>2</sup>	
	1910		1900		1890	
	Number.	Per cent. <sup>3</sup>	Number.	Per cent. <sup>3</sup>	Number.	Per cent.
Total.....	145,107		158,394		180,065	
Free from mortgage.....	86,713	60.8	92,702	60.7	101,305	63.3
Mortgaged.....	55,792	39.2	60,093	39.3	58,760	36.7
Unknown.....	2,602		5,629			

<sup>1</sup> Includes all farms owned in whole or in part by the operator.  
<sup>2</sup> The 1,813 "owned farm homes" for which no reports were secured were distributed between "free from mortgage" and "mortgaged" in 1890.  
<sup>3</sup> Per cent of combined total of "free from mortgage" and "mortgaged."

In 1910 the total number of farms owned in whole or in part by the operators was 145,107. Of this number, 86,713 were reported as free from mortgage; 55,792 were reported as mortgaged; and for 2,602 no report relative to mortgage indebtedness was obtained. The number of mortgaged farms constituted 39.2 per cent of the total number of owned farms, exclusive of those for which no mortgage report was obtained. The percentage is almost exactly the same as it was in 1900, but is slightly larger than it was in 1890. It may be noted that the percentages given for the three censuses are comparable, but that the number of mortgaged and unmortgaged farms reported in 1890 are not entirely comparable with the numbers reported at the later censuses, because at the census of 1890 the farms for which no reports were secured were distributed between the two classes of mortgaged and unmortgaged farms. It can be seen, however, that from 1890 to 1900 farms free from mortgage decreased in number and farms mortgaged increased, while from 1900 to 1910 both classes decreased.

The statement of mortgage debt and of the value of mortgaged farm property is restricted to the farms of those farmers who own all of their land and report the amount as well as the fact of indebtedness. Of the 55,792 farms reported as mortgaged, 38,662 are wholly owned by the farmers, and for 36,938 of these the amount of mortgage debt is reported. Only these last-mentioned farms are included for 1910 in the next table, which presents data relating to mortgaged farms for 1910 and 1890. In this connection it should be noted that in 1890 the amount of mortgage debt of farms with incomplete reports was estimated according to the percentages and averages obtained from farms with full reports, but that no such estimate is here made for 1910. The table gives a comparative statement of the value of mortgaged farms owned entirely by their operators and the amount of indebtedness, together with the average value of such farms;

the average debt per farm, and the average equity per farm for 1910 and 1890. Data regarding the amount of mortgage debt were not obtained in 1900.

	OWNED FARMS OR FARM HOMES MORTGAGED.		INCREASE.	
	1910 <sup>1</sup>	1890 <sup>2</sup>	Amount.	Per cent.
Number.....	36,938	58,760		
Value—Land and buildings.....	\$454,857,222	\$285,706,170		
Amount of mortgage debt.....	\$115,799,046	\$98,940,935		
Per cent of debt to value.....	25.6	34.6		
Average value per farm.....	\$12,314	\$4,862	\$7,452	153.3
Average debt per farm.....	\$3,135	\$1,684	\$1,451	86.2
Average equity per farm.....	\$9,179	\$3,178	\$6,001	188.8

<sup>1</sup> Includes only farms consisting wholly of owned land and reporting value of farm and amount of debt.  
<sup>2</sup> Includes all owned farm homes, estimates being made of value of farms and amount of debt for all defective reports.

The average debt of mortgaged farms increased in 20 years from \$1,684 to \$3,135, or 86.2 per cent, while the average value of such farms rose from \$4,862 to \$12,314, or 153.3 per cent, so that the owner's equity increased on the average from \$3,178 to \$9,179, or 188.8 per cent. As a result of the greater relative increase in farm value than in farm debt, the mortgage indebtedness, which was over a third of the value of the farms in 1890, had decreased in 1910 to slightly more than a quarter of this value.

Farms by size groups: 1910 and 1900.—The following table shows the distribution of farms by size groups at the censuses of 1910 and 1900:

SIZE GROUP.	NUMBER OF FARMS.		INCREASE. <sup>1</sup>		PER CENT OF TOTAL.	
	1910	1900	Number.	Per cent.	1910	1900
	<b>Total.....</b>	<b>251,872</b>	<b>284,151</b>	<b>-12,279</b>	<b>-4.6</b>	<b>100.0</b>

1,000 acres and over.....	203	282	-79	-28.0	0.1	0.1

<sup>1</sup> A minus sign (-) denotes decrease.

Nearly one-third of the Illinois farms have an acreage of between 100 and 174; next in importance are the farms with 50 to 99 acres which comprise 23 per cent of the total. The farms with an acreage between 175 and 259 constitute 15.2 per cent of all Illinois farms. These three classes, ranging from 50 to 259 acres, together comprise seven-tenths of all farms. The number of places "under 3 acres," where agriculture is carried on, was reported as less than half as great in 1910 as 10 years ago. This decrease may be due to a different interpretation by the enumerators as to what to include as a small farm, or may represent an actual decrease in that type of farm. Farms with an acreage of between 3 and 9 increased 27.3 per cent in number from 1900 to 1910. The number of all the sizes of farms with an acreage of between 10

and 174 has decreased. The larger farms, having an acreage of between 175 and 499, have increased in number, while the farms with over 500 acres, which formed less than 1 per cent of all farms at either census, decreased by 288. Farms between 3 and 19 acres and farms between 100 and 499 acres constitute a larger proportion of all farms in 1910 than in 1900, while the proportion of farms between 20 and 99 acres in size fell off.

The following table shows the total and improved acreage and the value of land and buildings for farms of various size groups, consolidating into one group the farms of less than 20 acres (numbering in all 20,294), and also the farms of between 175 and 499 acres (numbering 57,755):

SIZE GROUP (ACRES).	ALL LAND IN FARMS (ACRES).		IMPROVED LAND IN FARMS (ACRES).		VALUE OF LAND AND BUILDINGS.	
	1910	1900	1910	1900	1910	1900
<b>Total.....</b>	<b>32,522,937</b>	<b>32,794,728</b>	<b>28,048,323</b>	<b>27,699,219</b>	<b>\$3,522,792,570</b>	<b>\$1,765,561,550</b>

The following table shows the per cent distribution, by size groups, of the items presented in the preceding table, and also of the number of farms:

SIZE GROUP.	PER CENT OF TOTAL.							
	Number of farms.		All land in farms.		Improved land in farms.		Value of land and buildings.	
	1910	1900	1910	1900	1910	1900	1910	1900
<b>Total.....</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>
Under 20 acres.....	8.1	7.4	0.6	0.6	0.6	0.6	1.7	2.1
20 to 49 acres.....	13.2	15.6	3.5	4.4	3.5	4.4	3.2	4.2
50 to 99 acres.....	23.0	24.9	13.3	15.2	13.5	15.4	11.5	14.1
100 to 174 acres.....	32.0	30.8	33.7	33.7	34.5	34.7	33.3	33.9
175 to 499 acres.....	22.9	20.4	44.4	41.1	44.2	40.7	46.2	41.4
500 to 999 acres.....	0.7	0.8	3.5	3.8	3.0	3.3	3.3	3.4
1,000 acres and over.....	0.1	0.1	1.0	1.2	0.7	0.8	0.8	0.8

Of the total farm acreage of the state in 1910, 44.4 per cent was in farms of 175 to 499 acres, and 33.7 per cent in farms of 100 to 174 acres, these two being from the standpoint of aggregate acreage the most important size groups. Between 1900 and 1910 the proportion of the total acreage in farms of 175 to 499 acres increased somewhat, the proportion in farms of 100 to 174 and also that in farms of less than 20 acres remained the same, while the proportion in farms of all the other size groups decreased.

In general, as shown by the next table, the percentage of farm land improved diminishes as the size of the farms increases. Owing to the fact that buildings have normally a higher value in proportion to farm acreage on small than on large farms, the average value of land and buildings is very much higher for farms of under 20 acres than for those in any other group; the

average value is higher in farms of the three size groups of between 100 and 999 acres, however, than in those of the two size groups of between 20 and 99 acres.

SIZE GROUP.	PER CENT OF FARM LAND IMPROVED.		AVERAGE VALUE OF LAND AND BUILDINGS.			
			Per farm.		Per acre.

1,000 acres and over.....	63.2	57.6	138,115	51,702	87.06	37.90

**Color and nativity of farmers: 1910.**—Prior to the Thirteenth Census no attempt was made to secure information on the farm schedules concerning the nativity of farmers.

Over six-sevenths of the Illinois farmers were native whites, and nearly one-seventh foreign-born whites, only 1,425, or 0.6 per cent, being other than white, comprising 1,422 negroes, 2 Indians, and 1 Chinese. Of the

native whites, 41.9 per cent were tenants, as compared with 38.2 per cent among foreign-born whites and 43.4 per cent among the nonwhites.

Of the 33,394 foreign-born white farmers in Illinois in 1910, 17,811 were born in Germany, 4,267 in Sweden, 2,422 in England, 2,185 in Ireland, 998 in Holland, 982 in Norway, 878 in Denmark, 679 in Canada, and 626 in Switzerland. Other European countries were represented by a total of 2,473 farmers, and non-European countries, other than Canada, by 73.

The table which follows shows the color and nativity of farm operators by character of tenure for 1910:

COLOR AND NATIVITY.	FARM OPERATORS.							
	Total.		Own-ers.	Ten-ants.	Man-agers.	Per cent of total.		
	Num-ber.	Per cent dis-tribution.				Own-ers.	Ten-ants.	Man-agers.

#### DOMESTIC ANIMALS, POULTRY, AND BEES.

**Domestic animals on farms: 1910.**—The census of 1910 was taken as of April 15, and that of 1900 as of June 1. Since a great many domestic animals are born during the six weeks between April 15 and June 1, and on the other hand a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not closely comparable, and the same is true in somewhat less degree of the values. For this reason the figures for 1900 are not presented in this chapter, but in the general reports of the census the figures for the several states will be presented and the extent to which their comparability is affected by the change in the date of enumeration will be discussed.

Of the total number of farms enumerated, 246,353, or 97.8 per cent, report domestic animals of some kind, the number without any domestic animals being only 5,519.

Of all the farms in the state, 91.7 per cent report cattle, 90.6 per cent "dairy cows," and only 23.7 per cent "other cows." About 1 per cent of the farms reporting cattle have no dairy cows. The total number of cows increased somewhat during the decade, while the average value of dairy cows increased from \$34.02 to \$39.22. The farms reporting dairy cows show an average of nearly 5 per farm.

The census of 1900 was taken as of June 1, after all the spring calves were born, while that of 1910 was taken as of April 15, before the close of the calving season and when the calves on hand were on the

average younger than at the enumeration of 1900. As a result, the calves enumerated were fewer in number and of lower average value in 1910 than in 1900, the number decreasing from 723,322 to 324,079, and the average value decreasing from \$9.95 to \$7.64.

Horses are reported by 93.5 per cent of all the farms in the state, while 33.3 per cent report colts born in 1909 and 15.4 per cent report spring colts. The average value of mature horses is reported as \$120.55.

More than one farmer out of every five reports mules. The average values of mules of the different age groups are somewhat higher than those of horses of the corresponding age groups.

Sheep and lambs are reported from 26,262 farms, or 10.4 per cent of all the farms in the state. Of these 26,262 farms, 84.5 per cent report spring lambs, the number of the latter being equal to 68.8 per cent of the number of ewes. Ewes are reported from all but 962 of the farms reporting sheep, and for the farms reporting the average is 23 ewes per farm. The farms reporting rams and wethers show an average of over 6 per farm.

Of all farms, 75.8 per cent report swine, the average number being over 24 per farm reporting. The average value of the swine reported as "hogs and pigs born before January 1, 1910," is \$12.45, while that of spring pigs is about one-seventh as much.

The next table summarizes the statistics of domestic animals on farms for the state, recorded as of April 15, 1910. Cattle and sheep are divided into age and sex

groups, while horses, mules, and swine are presented by age groups only.

AGE AND SEX GROUP.	FARMS REPORTING.		ANIMALS.		
	Number.	Percent of all farms.	Number.	Value.	Average value.

**Poultry on farms: 1910 and 1900.**—The following table gives the numbers of the various kinds of poultry reported in 1910 and 1900, together with their value and the number of farms reporting each kind in 1910:

KIND.	1910 (April 15)				1900 (June 1)
	Farms reporting.		Number of fowls.	Value.	
	Number.	Percent of all farms.			
Total.....	237,185	94.2	21,409,835	\$11,696,650	17,737,262
Chickens.....	237,067	94.1	20,563,850	10,841,491	16,600,728
Turkeys.....	43,324	17.2	189,411	374,544	446,020
Ducks.....	37,424	14.9	201,350	109,124	382,857
Geese.....	42,759	17.0	226,491	217,111	307,657
Guinea fowls.....	14,206	5.8	84,057	25,547	(1)
Pigeons.....	6,703	2.7	144,288	27,445	(2)
All other <sup>3</sup> .....	69	(4)	408	1,388	(2)

<sup>1</sup> Included with chickens.  
<sup>2</sup> Not reported.  
<sup>3</sup> 47 farms report 151 peafowls, valued at \$381; 9 farms report 155 wild ducks, valued at \$475; 7 farms report 40 pheasants, valued at \$274; 4 farms report 55 wild geese, valued at \$183; 2 farms report 7 wild turkeys, valued at \$75.  
<sup>4</sup> Less than one-tenth of 1 per cent.

The increase in the number of fowls on Illinois farms during the last decade is 20.7 per cent, while

the value shows an increase from \$6,415,000 to \$11,697,000, or 82.3 per cent. This increase in number results from a gain in the number of chickens sufficient to offset a decrease in the number of turkeys, ducks, and geese. The number of farms reporting poultry decreased from 247,034 to 237,165, but the average number of fowls per farm reporting increased from 72 to 90. The value of poultry and the number of farms reporting were obtained in 1900 for the total of all fowls only, and not for each kind as in 1910.

**Bees on farms: 1910 and 1900.**—The number of farms reporting bees has decreased from 34,932 in 1900 to 29,741 in 1910, or 14.9 per cent. The number of colonies of bees decreased from 179,953 to 155,846, or 13.4 per cent, and their value increased from \$486,164 to \$487,733, or 0.3 per cent. The average value of bees per farm reporting was \$13.92 in 1900 and \$16.40 in 1910. About one farm in every eight reports bees.

**Domestic animals not on farms: 1910.**—Most of the domestic animals not on farms are found in cities, towns, and villages. Statistics for such animals are shown below. No provision was made by law to secure data pertaining to poultry and bees not on farms. In the next table age groups are omitted for the sake of brevity.

KIND.	Number of inclosures reporting.	ANIMALS.		
		Number.	Value.	Average value.
Total.....	130,179	.....	\$34,791,066	.....
All cattle.....	41,068	77,255	3,223,121	\$41.72
Dairy cows.....	40,138	61,192	2,338,728	45.69
Horses.....	106,719	234,629	28,833,742	122.89
Mules.....	2,730	10,838	1,523,689	140.59
Asses and burros.....	298	412	94,263	228.79
Swine.....	11,771	70,973	914,690	12.59
Sheep.....	261	31,069	191,308	6.10
Goats.....	1,107	1,900	10,253	5.40

As would be expected, horses are by far the most important class of domestic animals not on farms, both in number and in value; cattle, nearly two-thirds of which are dairy cows, rank next in importance.

**Domestic animals on farms and not on farms: 1910.**—The following table gives the total number and value of domestic animals, distinguishing those on farms from those not on farms:

KIND.	DOMESTIC ANIMALS.					
	Total.		On farms.		Not on farms.	
	Number.	Value.	Number.	Value.	Number.	Value.

The total value of all domestic animals in the state in 1910 was \$331,410,000, of which the value of animals not on farms constituted 10.5 per cent.

## LIVE STOCK PRODUCTS.

The returns for live stock products obtained at the census of 1910, like those for crops, relate to the activities of the calendar year 1909. It is impossible to give a total representing the annual production of live stock products for the reason that, as shown elsewhere, the total value of products from the business of raising domestic animals for use, sale, or slaughter can not be calculated from the census returns. Even if this value could be ascertained and were added to the value of the crops the sum would not correctly represent the total value of farm products, because, as already more fully explained, duplication would result from the fact that part of the crops are fed to the live stock.

**Dairy products: 1909 and 1899.**—The following table shows the principal statistics relative to dairy products in 1909, with certain comparative statistics for 1899:

	FARMS REPORTING.		Number or quantity.	Unit.	VALUE.	
	Num-ber.	Per cent of all farms.			Total.	Average per unit.
Dairy cows on farms April 15, 1910.....	228,267	90.6	1,050,223	Head		
On farms reporting dairy products in 1909.....	202,336	80.3	960,993	Head		
On farms reporting milk produced in 1909.....	184,993	73.4	849,951	Head		
Specified dairy products, 1909:						
Milk reported.....			320,240,399	Gals.		
Butter made.....	168,486	66.9	46,609,992	Lbs.	\$10,403,217	\$0.23
Cheese made.....	379	0.2	81,918	Lbs.	8,390	0.10
Milk sold.....	31,674	12.6	168,031,333	Gals.	18,314,172	0.12
Cream sold.....	7,157	2.8	2,104,362	Gals.	1,515,676	0.72
Butter fat sold.....	6,649	2.6	4,637,745	Lbs.	1,210,748	0.26
Butter sold.....	114,723	45.5	24,442,251	Lbs.	5,674,830	0.23
Cheese sold.....	173	0.1	54,502	Lbs.	5,423	0.10
Total receipts from sales, 1909.....					26,720,849	
Total value of milk, cream, and butter fat sold and butter and cheese made, 1909.....					31,542,209	
Specified dairy products, 1899:						
Butter made.....	186,084	70.4	52,493,450	Lbs.		
Cheese made.....	600	0.2	323,485	Lbs.		
Butter sold.....			26,395,166	Lbs.	4,306,553	0.16
Cheese sold.....			203,237	Lbs.	24,850	0.09

The number of farms reporting dairy cows on April 15, 1910, was 228,267, but only 202,336 reported dairy products in 1909. That there should be this difference is not surprising. Doubtless some farmers who had dairy cows in 1910 had none in 1909, while other farmers neglected to give information for the preceding year, or were unable to do so, perhaps because the farm was then in other hands. Dairy products in general are somewhat less accurately reported than the principal crops. This is particularly the case as regards the quantity of milk produced. The number of farms which made any report of milk produced during 1909 was 184,993 (considerably less than the total number reporting dairy products), and the number of dairy cows on such farms on April 15, 1910, was

850,000. The amount of milk reported was 320,240,000 gallons; assuming that there were the same number of cows in 1909 as in 1910, this would represent an average of 377 gallons per cow. In considering this average, however, it should be borne in mind that the quantity of milk reported is probably deficient and that the distinction between dairy and other cows is not always strictly observed in the census returns.

By reason of the incompleteness of the returns for milk produced, the Census Bureau has made no attempt to determine the total value of dairy products for 1909. For convenience a partial total has been presented, comprising the reported value of milk, cream, and butter fat sold and the reported value of butter and cheese made, whether for home consumption or for sale. The total thus obtained for 1909 is \$31,542,000, which may be defined as the total value of dairy products exclusive of milk and cream used on the farm producing.

About one-half of the milk produced in Illinois in 1909 was sold as such. A comparatively large quantity of milk and cream was sold on the butter fat basis. The butter made on farms was valued at \$10,493,000.

Comparisons are made between 1909 and 1899 for but few of the census items relating to dairy products, for the reason that in 1899 estimates were made for farms with incomplete reports, which was not done at the census of 1910. The figures for milk produced and milk sold are particularly affected, but those for butter and cheese are approximately comparable. The table shows a material decrease between 1899 and 1909 in the amount of butter made and a still greater relative decrease in the production of cheese.

**Wool: 1909 and 1899.**—The next table gives statistics as to the production of wool on farms, the figures being partly based on estimates.<sup>1</sup>

The total number of sheep of shearing age in Illinois on April 15, 1910, was 658,000, representing an increase of 4.7 per cent as compared with the number on June 1, 1900 (629,000). The approximate production of wool during 1909 was 682,000 fleeces, weighing 4,971,000 pounds and valued at \$1,299,000. Of these totals

<sup>1</sup> Farmers should be able, in general, to report the production of wool more accurately than that of dairy products. There were, however, 9,543 farmers who reported the possession of 180,881 sheep of shearing age on April 15, 1910, without reporting any wool produced in 1909. Probably in a large proportion of cases this failure was due to the fact that they did not have these sheep, or did not occupy the same farm, during the preceding year. The returns of farms reporting wool in 1909 but no sheep of shearing age on April 15, 1910, would partially make up this deficiency, but it is believed that in many cases enumerators, having found that a farm had no sheep in 1910, omitted the inquiry as to wool produced in 1909 and thus missed more or less wool actually produced. It is a fairly safe assumption that the entire production of wool in 1909 bore the same relation to the entire number of sheep of shearing age on April 15, 1910, as the production of wool on those farms reporting both production and sheep bore to the number of sheep reported on such farms. Statistics for this group of farms are given in the table, and the total wool product, estimated on the basis of the above assumption, is also given.

about one-sixth represents estimates. The number of fleeces produced in 1909 was 1.1 per cent greater than in 1899. The average weight per fleece in 1909 was 7.3 pounds, as compared with 7.1 pounds in 1899, and the average value per pound was 26 cents, as compared with 20 cents in 1899.

	Number of farms reporting.	Sheep of shearing age.	WOOL PRODUCED.		
			Fleeces (number).	Weight (pounds).	Value.
Sheep of shearing age on farms April 15, 1910.....	25,504	658,484			
Wool produced, as reported, 1909.....	17,714		560,654	4,051,170	\$1,058,609
On farms reporting sheep April 15, 1910.....	15,961	477,003	494,904	3,605,776	942,332
On other farms.....	1,753		65,750	445,394	116,277
Total production of wool (partly estimated):					
1909.....			682,337	4,971,380	1,299,218
1899.....			674,625	4,799,742	968,746
Increase, 1899 to 1909.....			7,712	171,638	332,472
Per cent of increase.....			1.1	3.6	34.4

**Goat hair and mohair: 1909 and 1899.**—Although 2,040 farmers reported 12,435 goats on their farms April 15, 1910, only 184 reported the production of goat hair or mohair during 1909. These farmers reported 4,117 fleeces, weighing 14,922 pounds and valued at \$4,008. Although the production is still unimportant, an increase is shown over that in 1899. Many farmers who have goats do not produce goat hair or mohair, but it is believed that the report is somewhat short of the actual production.

**Poultry products: 1909 and 1899.**—The statement below gives data relative to the production and sale of eggs and poultry:

	Number of farms reporting.	Number of fowls on hand.	PRODUCT.	
			Quantity.	Value.
Fowls on farms April 15, 1910.....	237,165	21,409,835		
On farms reporting eggs produced in 1909.....	214,100	20,061,542		
On other farms.....	23,065	1,348,293		
Eggs produced, as reported, 1909.....	214,863		93,554,983	\$17,698,603
Total production of eggs (partly estimated):				
1909.....			100,119,418	18,940,454
1899.....			86,402,670	8,942,401
Increase, 1899 to 1909.....			13,716,748	9,998,053
Per cent of increase.....			15.9	111.8
Eggs sold, as reported, 1909.....	198,309		62,036,857	11,745,315

On farms reporting poultry raised in 1909.....	216,529	20,270,103		
On other farms.....	20,636	1,139,732		
Poultry raised, as reported, 1909.....	218,132		No. of fowls.	14,584,010
Total poultry raised (partly estimated):				
1909.....			32,352,888	15,404,028
1899.....				11,307,599
Increase, 1899 to 1909.....				4,096,429
Per cent of increase.....				36.2
Fowls sold, as reported, 1909.....	178,866		12,096,388	6,335,037

The total number of fowls on Illinois farms on April 15, 1910, was 21,410,000. Of the 237,165 farms reporting fowls, 23,065 did not report any eggs produced in 1909, and 20,636 did not report any poultry raised in 1909. The production of eggs actually reported for the year 1909 was 93,555,000 dozens, valued at \$17,699,000. According to the Twelfth Census

reports the production of eggs in 1899 was 86,403,000 dozens, the value being \$8,942,000. The latter figures, however, are somewhat in excess of the actual returns at that census, because they include estimates made to cover those cases where the schedules reported fowls on hand without reporting the production of eggs. In order to make the returns for 1909 comparable with those published for 1899 similar estimates have been made, the method of estimate and the justification therefor being substantially the same as in the case of wool. The total production of eggs in 1909, including these estimates, was 100,119,000 dozens, valued at \$18,940,000. The total production of poultry in 1909, including estimates made on the same basis as for eggs, was 32,353,000 fowls, valued at \$15,404,000.

**Honey and wax: 1909.**—Although, as noted elsewhere, 29,741 farms reported 155,846 colonies of bees on hand April 15, 1910, 16,726 of these farms, with 61,304 colonies on hand April 15, 1910, made no report of honey or wax produced in 1909. The actual returns show the production of 1,428,640 pounds of honey, valued at \$194,625, and 26,240 pounds of wax, valued at \$6,138. The true totals are doubtless somewhat above these figures.

**Sale or slaughter of domestic animals on farms: 1909 and 1899.**—The following statement presents statistics relating to the sale or slaughter of domestic animals by Illinois farmers during the year 1909, with certain items for 1899:

	FARMS REPORTING.		Number of animals.	VALUE.	
	Number.	Percent of all farms.		Total.	Average.
1909—All domestic animals:				\$132,622,547	
Sold.....				14,438,127	
Slaughtered.....					
Calves:					
Sold.....	89,410	35.5	410,590	3,078,769	\$7.50
Slaughtered.....	11,125	4.4	81,079	471,079	5.81
Other cattle:					
Sold.....	108,050	42.1	1,029,835	44,336,655	43.05
Slaughtered.....	19,120	7.6	38,466	1,011,427	26.29
Horses:

1899—All domestic animals:				69,462,993	
Sold.....				10,154,596	
Slaughtered.....					

<sup>1</sup> Less than one-tenth of 1 per cent.

<sup>2</sup> Schedules called for receipts from sales of animals raised on the farms reporting.

The total value of domestic animals sold during the year was \$132,623,000 and that of animals slaughtered on farms \$14,438,000, making an aggregate of \$147,061,000. This total, however, involves considerable duplication resulting from the resale or slaughter of animals which had been purchased by the farmers during the same year.

The value of the swine sold during 1909 represented about two-fifths of the total value of animals sold, and the value of the cattle (including calves) sold represented about one-third of the total.

The census of 1900 called for the receipts from the sale of all domestic animals raised on the farms reporting and the value of those slaughtered in 1899, which

amounted, respectively, to \$69,463,000 and \$10,155,000. The item of sales is not closely comparable with that for 1909, when the inquiry covered all sales whether of animals raised on the farms reporting or elsewhere. It is believed, however, that in many cases the returns for 1899 also included receipts from sales of animals not actually raised on the farms reporting.

CROPS.

**Summary: 1909 and 1899.**—The following table summarizes the census data relative to all of the farm crops of 1909 and 1899. It includes not only general farm crops, but also flowers and plants, nursery products, and forest products of farms. In comparing one year with the other it should be borne in mind that acreage is, on the whole, a better index of the general

changes or tendencies of agriculture than either the quantity or the value of the crops, since variations in quantity may be due largely to temporarily favorable or unfavorable climatic conditions, and variations in the value of the crops are largely affected by changes in prices. (See also discussion of "Total value of farm products.")

	ACRES.				PER CENT OF IMPROVED LAND OCCUPIED.		VALUE OF PRODUCTS.

<sup>1</sup> A minus sign (-) denotes decrease.

<sup>2</sup> Less than one-tenth of 1 per cent.

<sup>3</sup> Includes value of raisins and other dried fruits, wine, cider, vinegar, etc.

The total value of crops in 1909 was \$372,270,000. Of this amount, 97.4 per cent was contributed by crops for which the acreage as well as the value was reported, the remainder consisting of the value of by-products (straw, garden and grass seeds, etc.) derived from the same land as other crops reported, or of orchard fruits, nuts, forest products, and the like. The combined acreage of crops for which acreage was reported was 20,273,916, representing 72.3 per cent of the total improved land in farms (28,048,323 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage for which was not reported.

The general character of Illinois agriculture is indicated by the fact that about four-fifths (79.9 per cent) of the total value of crops in 1909 was contributed by the cereals, and about one-tenth (10.9 per cent) by hay and forage. The remainder, representing in value about 9 per cent of the total, consisted mainly of potatoes and other vegetables, flowers and plants, nursery products, fruits and nuts, and forest products.

The total value of crops in 1909 was 73.3 per cent greater than that in 1899. This increase was clearly due to higher prices. There was a decrease of 1.2 per cent in the total acreage of crops for which acreage was reported, the principal decreases being in the acreage of cereals and broom corn, which were offset in part by increases for most of the other crops.

**General farm crops, minor grains and seeds, and sundry minor crops: 1879 to 1909.**—The leading crops shown in the next table, in the order of their importance as judged by their value, are corn, \$198,350,000; oats, \$59,694,000; hay and forage, \$40,560,000; wheat, \$38,001,000; potatoes, \$6,402,000; and broom corn, \$1,457,000. It will be observed, however, that several crops, statistics for which appear elsewhere, are more important than several of the crops mentioned.

By far the most important crop is corn, the acreage being nearly two and one-half times as great and the value over three times as great as the acreage and value of oats, which ranks second in both respects. Hay and forage is third in both acreage and value,

having approximately one-third the acreage and one-fifth the value of corn. Wheat, with an acreage about two-thirds as great as that of hay and forage, has a value almost nineteen-twentieths as great as the latter crop. The cereals combined are about five times as great in acreage and over seven times as great in value as all hay and forage.

Of the hay and forage crops, "timothy alone" ranks first in both acreage and value, constituting in each respect nearly one-half of the total. Second in rank is "timothy and clover mixed," with an acreage a little less than one-fourth and a value a little more than one-fourth those of all hay and forage. Following in order of acreage are "clover alone," "coarse forage," "other tame or cultivated grasses," and "wild, salt, or prairie grasses." In value these crops rank in similar order, except that "wild, salt, or prairie grasses" precedes "other tame or cultivated grasses."

The following table presents statistics for 1909 regarding cereals, other grains and seeds, hay and forage, potatoes, tobacco, broom corn, and sundry minor crops:

CROP.	Farms reporting.	Acres harvested.	QUANTITY.		Value.

<sup>1</sup> The entire acreage from which these seeds were secured is believed to be included in the acreage given elsewhere for hay and forage crops, flowers and plants, etc.  
<sup>2</sup> Includes small amounts of hemp and hops.  
<sup>3</sup> Less than 1 acre.

Potatoes, broom corn, and dry peas are important both in acreage and value, varying from 138,052 acres for potatoes down to 38,452 for broom corn, and in value from \$6,402,000 for potatoes down to \$273,000 for dry peas. Sweet potatoes and yams also are a crop of considerable importance. In value "clover seed," "timothy seed," and "other tame grass seed" show important amounts.

The fluctuations in the acreages of some of the principal crops during the past 30 years are shown in the following table:

CROP YEAR.	ACRES HARVESTED.					
	Corn.	Oats.	Wheat.	Barley.	Hay and forage.	Potatoes.
1909.....	10,045,839	4,176,485	2,185,091	63,325	3,349,435	138,052

<sup>1</sup> Not reported.

The acreage in corn, the leading crop in 1909, exceeded that in 1879 by over a million. From 1879 to 1889 there was a loss of more than a million acres, followed during the next 10 years by a gain of 2,403,310 acres, and in the following decade by a loss of nearly a quarter of a million acres. The acreage of oats nearly doubled during the first decade, made a gain of 699,332 acres during the next 10 years, and a decrease of 393,549 during the last decade, the acreage in 1909 being a little more than double that of 30 years before. Wheat decreased in acreage during the two decades following 1879 and increased during the last 10 years, showing in 1909 an acreage about two-thirds as great as in 1879. The acreage of barley decreased rapidly between 1879 and 1899, but nearly trebled during the last decade, making the acreage in 1909 greater than in 1879. Barley, however, is not an important crop as compared with the others shown in the above table. For hay and forage the greatest acreage was reached in 1889, followed by a decrease during the next 10 years and again by a slight increase during the last decade, the acreage in 1909 being one-third greater than in 1879.

The following table shows for 1909 and 1899 the percentage which the farms reporting specified crops represented of all farms, the percentage of improved land devoted to these crops, and the percentage of increase or decrease in the acreage of each crop during the decade, together with the average yields and average values per acre for 1909:

CROP.	PER CENT OF FARMS REPORTING.		PER CENT OF IMPROVED LAND.		Per cent of increase in acres: 1899 to 1909 <sup>1</sup>	AVERAGE YIELD PER ACRE.	AVERAGE VALUE PER ACRE.
	1909	1899	1909	1899			
	1909	1899	1909	1899

Potatoes.....	75.4	68.9	0.5	0.5	1.2	88.1 Bu.	48.37

<sup>1</sup> A minus sign (-) denotes decrease.

Of every 100 farms 90 report corn, 75 report potatoes, 70 report hay and forage, 55 report oats, and 30 report wheat. It will be noticed that the percentages reporting corn and oats have decreased during the past decade, while the proportions reporting other crops enumerated in the preceding table have increased. These six crops together occupy about 71 per cent of the improved land of the state.

The average value per acre of cereals combined is \$17.99, corn ranking above this average, other cereals below it. The average value per acre of hay and forage is about two-thirds that of the combined cereals. The average value per acre of potatoes is over two and a half times the average value of the combined cereals.

While the production of corn is very general over the state, the greatest acreages are in the central counties. Within this district a small group of counties in the north central part of the state show increases for the past 10 years. Increases are also shown for nearly all the counties in the southern part of the state. The largest percentages of decrease are in Jo Daviess, Mason, Madison, Cass, Schuyler, Menard, Cumberland, Winnebago, Macoupin, and Stephenson Counties.

Oats are grown throughout the state, though in very small amounts in the southern counties. A decrease in the oat acreage is reported from the greater portion of the state, increases being shown in only a few scattered counties. Wheat, which is grown principally in the western and southern parts of the state, shows very great increases in the western counties during the last 10 years, but decreases in the acreages of this crop are recorded for most of the southern and for a few of the northern counties. The hay and forage acreage is very evenly distributed over the state. About one-third of the counties show decreases in acreage of this crop, the largest relative losses being reported for Hancock, Livingston, Kendall, Lawrence, and McDonough Counties. Alfalfa has thus far made little headway, although grown in every county except two. Over half of the alfalfa acreage of the state is reported from the six counties of Lake, McHenry, Alexander, Kane, Peoria, and Cook.

**Vegetables, flowers and plants, and nursery products: 1909 and 1899.**—In 1909 the total acreage of potatoes and other vegetables was 268,911 and their value \$16,300,654. Excluding (so far as reported separately <sup>1</sup>) potatoes and sweet potatoes and yams, the acreage of vegetables was 120,291 and their value \$9,392,000, both acreage and value being materially greater than in 1899. The table distinguishes between farms which make the raising of vegetables a business of some importance (having produced vege-

<sup>1</sup> It is probable that some of the potatoes and sweet potatoes and yams raised in farm gardens were not reported separately by farmers, but were included in their returns for vegetables.

tables valued at \$500 or more in 1909) and other farms, on most of which vegetables are raised mainly for home consumption. There were, in 1909, 2,227 farms in the first class, representing about three-tenths of the total acreage of vegetables and more than one-third of the total value, the average acreage of vegetables per farm for these farms being 16.5 and the average value of product per acre \$89.45.

The raising of flowers and plants and of nursery products is also comparatively important in Illinois, 4,793 acres being devoted to them in 1909, and the product being valued at \$4,517,085. Most of the product was raised on a few farms where these branches of agriculture were carried on as an important business.

The table which follows shows details with regard to vegetables (not including potatoes and sweet potatoes and yams, which appear elsewhere), and also with regard to flowers and plants and nursery products:

CROP.	FARMS REPORTING: 1909		ACRES.		VALUE OF PRODUCTS.	
	Number.	Per cent of all farms.	1909	1899	1909	1899
Vegetables, other than potatoes and sweet potatoes and yams, total.....	186,248	73.0	120,291	110,845	\$9,392,290	\$5,304,903

Other berries.....	1	( <sup>1</sup> )	608	208	.....

<sup>1</sup> Less than 1 acre.

Strawberries are by far the most important of the small fruits grown in Illinois, with blackberries and dewberries and raspberries and loganberries ranking second and third, respectively. The total acreage of small fruits in 1909 was 11,723 and in 1899, 16,794, a decrease of 30.2 per cent. The production in 1909

was 13,603,000 quarts as compared with 26,129,000 quarts in 1899, and the value \$1,110,000, as compared with \$1,293,000.

**Orchard fruits, grapes, nuts, and tropical fruits: 1909 and 1899.**—The following table presents data with regard to orchard fruits, grapes, nuts, and tropical fruits. The acreage devoted to these products was not ascertained. In comparing one year with the other the number of trees or vines of bearing age is on the whole a better index of the general changes or tendencies than the quantity of product, but the data for the censuses of 1910 and 1900 are not closely comparable and the product is therefore compared, although variations may be due largely to temporarily favorable or unfavorable climatic conditions.

CROP.	TREES OR VINES OF BEARING AGE: 1910		TREES OR VINES NOT OF BEARING AGE: 1910		PRODUCT.

<sup>1</sup> Expressed in bushels for orchard fruits and pounds for grapes, nuts, and figs.  
<sup>2</sup> Included with "unclassified."  
<sup>3</sup> Consists of products not separately named by the enumerator, but grouped under the designation "all other."  
<sup>4</sup> Includes almonds, hazelnuts, Japanese walnuts, filberts, beechnuts, Siberian nuts, and other nuts.  
<sup>5</sup> Includes Japanese persimmons.

The total quantity of orchard fruits produced in 1909 was 4,939,000 bushels, valued at \$3,858,000. Apples contributed about three-fifths of this quantity; peaches and nectarines ranking next in importance. The production of grapes in 1909 amounted to 16,583,000 pounds, valued at \$426,000, and that of nuts to 714,478 pounds, valued at \$20,550.

The production of all orchard fruits together in 1909 was 49.4 per cent less in quantity than in 1899, and the production of grapes also declined. The value of orchard fruits, however, increased from \$3,779,000 in 1899 to \$3,858,000 in 1909, and that of grapes from \$383,000 in 1899 to \$426,000 in 1909. It should be

noted in this connection that the values for 1899 include the value of more advanced products derived from orchard fruits or grapes, such as cider, vinegar, dried fruits, and the like, and may therefore involve some duplication, while the values shown for 1909 relate only to the products in their original condition.

The following table shows the quantities of the more advanced products manufactured by farmers from orchard fruits and grapes. Values were not called for on the schedule.

PRODUCT.	FARMS REPORTING: 1909		QUANTITY PRODUCED.		
	Num- ber.	Percent of all farms.	Unit.	1909	1899
Cider.....	7,335	2.9	Gals....	678,437	2,365,304

Dried fruits.....	1,809	0.7	Lbs....	126,376	1,526,420

**Sugar crops: 1909 and 1899.**—The table below shows data with regard to maple trees and their products, and for sugar beets and sorghum cane. The total value of sorghum cane and sirup produced in 1909 was \$496,000 and in 1899, \$223,000; the total value of sugar beets produced in 1909 was \$77,732 and in 1899, \$36,223, and that of maple sugar and sirup produced in 1909 was \$23,502, as compared with \$9,841 in 1899.

PRODUCT.	FARMS REPORTING.		Acres.	PRODUCT.		
	Num- ber.	Percent of all farms.		Amount.	Unit.	Value.
<b>Maple sugar and sirup:</b>

Sirup made.....				625,939	Gals....	209,087

<sup>1</sup> Number of trees.  
<sup>2</sup> Less than one-tenth of 1 per cent.  
<sup>3</sup> Includes beets used as root forage.  
<sup>4</sup> Includes cane used as coarse forage.

**Forest products: 1909 and 1899.**—The census schedules for 1910 called for the "value of all firewood, fencing material, logs, railroad ties, telegraph and telephone poles, materials for barrels, bark, naval stores, or other forest products cut or produced in 1909, whether used on farm, sold, or on hand April 15, 1910;" and also, in a separate item, for the "amount received from sale of standing timber in 1909." There were 54,618 farms in Illinois (21.7 per cent of all farms in the state) which reported forest products in 1909, the

total value of such products being \$3,325,259, as compared with \$2,555,890 in 1899, an increase of 30.1 per cent. Of the value in 1909, \$2,178,103 was reported as that of products used or to be used on the farms themselves, \$976,216 as that of products sold or for sale, and \$170,940 as the amount received for standing timber. It should be noted that forest products not produced on farms are not included in this report.

**Miscellaneous crops: 1909.**—Straw and cornstalks derived as by-products from the production of grain

and corn have a considerable value for feed and other purposes. They are, however, mainly consumed on the farms producing them. The Census Bureau made no attempt to ascertain the total quantity or value of these products, but the schedules called for the quantity and value of those sold during the year 1909. The returns show that 5,613 farmers in Illinois sold, during 1909, 59,602 tons of straw, for which they received \$214,603, and that 637 farmers sold 7,831 tons of cornstalks and leaves, for which they received \$23,262.

#### SELECTED FARM EXPENSES AND RECEIPTS.

**Farm expenses: 1909 and 1899.**—The next table shows the number of farms reporting expenditures for labor, feed, and fertilizer at the census of 1910, as well as the sums expended in 1909 and 1899:

EXPENSE.	1909		Amount.	1899	INCREASE. <sup>1</sup>	
	Farms reporting.			Amount.	Amount.	Per cent.
	Number.	Percent of all farms.				
Labor.....	139,941	55.6	\$36,308,376	\$22,182,550	\$14,125,826	63.7
Feed.....	94,143	37.4	13,915,628	( <sup>2</sup> )		
Fertilizer.....	11,207	4.4	615,594	830,000	-215,006	-25.9

<sup>1</sup> A minus sign (-) denotes decrease.

<sup>2</sup> Not reported at the census of 1900.

Over half of the farmers hire labor, and the average amount expended by those hiring is \$259. Of the total spent for labor, 22.9 per cent is in the form of rent and board. During the decade the total expended for labor increased 63.7 per cent. At prior censuses no tabulation was made of the number of farmers reporting expenditures for labor.

About three farmers out of every eight report some expenditure for feed, while less than 1 out of 20 re-

ports the purchase of fertilizer. About three-fourths as much was spent for fertilizer in 1909 as in 1899, the average expenditure in 1909 for fertilizer per farm reporting being \$54.93.

**Receipts from sale of feedable crops: 1909.**—An effort was made at the census of 1910 to secure as complete a statement as possible of the sales as well as of the production of the more important feedable crops (that is, crops ordinarily fed to live stock). The following table summarizes the data reported:

CROP.	FARMS REPORTING.		QUANTITY SOLD.		Amount received.
	Number.	Per cent of all farms.	Amount.	Unit.	
<b>Total</b> .....					<b>\$104,425,194</b>
Corn.....	102,733	40.8	128,618,179	Bu.....	70,454,460
Oats.....	80,222	31.9	69,981,461	Bu.....	28,182,106
Barley.....	1,403	0.6	305,044	Bu.....	164,784
Hay and coarse forage....	40,654	16.1	665,217	Tons...	5,623,834

While the total amount expended by Illinois farmers for the purchase of feed in 1909 was \$13,916,000, the total receipts from sales of feed by those reporting sales amounted to \$104,425,000.

## COUNTY TABLES.

Tables 1 to 6, which follow, present by counties the more important agricultural data collected at the Thirteenth Census, 1910.

Table 1 shows the population, number of farms, land and farm area, value of farm property, and number and value of domestic animals and of poultry and bees, as of April 15, 1910. Comparative data for June 1, 1900, are given in italics for certain items.

Table 2 gives the number of farms, the farm acreage, and the value of farm property operated by owners, tenants, and managers, collected as of April 15, 1910. Statistics of farm mortgages are included in this table. (See explanation in text.) Comparative data for June 1, 1900, are given in italics for certain items.

Table 3 gives statistics pertaining to the products of live stock on farms (dairy products, poultry and eggs, honey and wax, and wool and mohair); also the number and value of domestic animals sold or slaughtered on farms for the year 1909.

Table 4 shows the total value of farm crops and the principal classes thereof, together with the acreage (or trees of bearing age) and production of the principal crops for the year 1909.

Table 5 gives statistics relating to selected farm expenses for 1909 and also shows the receipts from the sale of feedable crops.

Table 6 shows the number and value of domestic animals in barns and inclosures not on farms, by classes, together with the number of dairy cows and mature horses and mules, on April 15, 1910.

TABLE 1.—FARMS AND FARM PROPERTY,

[Comparative data for June 1, 1900, in italics.]

	THE STATE.	Adams.	Alexander.	Bond.	Boone.	Brown.

TABLE 2.—NUMBER, ACREAGE, AND VALUE OF FARMS CLASSIFIED BY TENURE; COLOR

[Comparative data for June 1, 1900, in italics.]

	THE STATE.	Adams.	Alexander.	Bond.	Boone.	Brown.
<b>FARMS OPERATED BY OWNERS</b>						
1	Number of farms.....	145,107	2,631	374	1,244	672
2	Number of farms in 1900.....	<i>158,503</i>	<i>2,687</i>	<i>438</i>	<i>1,517</i>	<i>770</i>
3	Per cent of all farms.....	57.6	63.2	53.6	63.5	50.8
4	Per cent of all farms in 1900.....	<i>60.0</i>	<i>63.6</i>	<i>56.7</i>	<i>69.0</i>	<i>58.5</i>
5	Land in farms..... acres.....	17,787,063	320,210	48,256	142,340	80,003
6	Improved land in farms..... acres.....	15,033,192	252,591	26,592	125,167	68,681
7	Value of land and buildings..... dollars.....	1,705,992,310	26,088,401	1,818,326	7,730,973	8,578,378
<b>Degree of ownership:</b>						
8	Farms consisting of owned land only.....	107,300	2,036	340	820	600
9	Farms consisting of owned and hired land.....	37,807	595	34	424	60
<b>Color and nativity of owners:</b>						
10	Native white.....	123,907	2,306	306	1,138	462
11	Foreign-born white.....	20,411	317	8	90	210
12	Negro and other nonwhite.....	789	8	60	10	51
<b>FARMS OPERATED BY TENANTS</b>						
13	Number of farms.....	104,379	1,368	317	704	640
14	Number of farms in 1900.....	<i>108,698</i>	<i>1,496</i>	<i>327</i>	<i>587</i>	<i>547</i>
15	Per cent of all farms.....	41.4	33.0	45.4	36.0	48.4
16	Per cent of all farms in 1900.....	<i>39.3</i>	<i>35.4</i>	<i>42.4</i>	<i>30.8</i>	<i>41.4</i>
17	Land in farms..... acres.....	14,177,411	160,555	32,513	70,490	91,116
18	Improved land in farms..... acres.....	12,586,664	131,941	22,254	71,492	76,397
19	Value of land and buildings..... dollars.....	1,691,702,227	13,127,091	1,396,266	4,201,395	9,395,410
<b>Form of tenancy:</b>						
20	Share tenants.....	43,551	706	132	311	287
21	Share-cash tenants.....	23,605	231	7	220	8
22	Cash tenants.....	32,120	382	127	85	340
23	Tenure not specified.....	5,043	40	51	88	5
<b>Color and nativity of tenants:</b>						
24	Native white.....	91,014	1,287	209	668	387
25	Foreign-born white.....	12,747	75	6	28	253
26	Negro and other nonwhite.....	618	6	42	8	5
<b>FARMS OPERATED BY MANAGERS</b>						
27	Number of farms.....	2,386	37	7	10	6
28	Number of farms in 1900.....	<i>1,960</i>	<i>41</i>	<i>7</i>	<i>4</i>	<i>7</i>
29	Land in farms..... acres.....	558,403	6,000	2,127	1,456	1,103
30	Improved land in farms..... acres.....	428,467	4,041	1,047	1,250	1,013
31	Value of land and buildings..... dollars.....	65,008,033	520,880	106,410	90,600	126,800
<b>MORTGAGE DEBT REPORTS<sup>1</sup></b>						
<b>For all farms operated by owners:</b>						
32	Number free from mortgage debt.....	86,713	1,489	214	701	365
33	Number with mortgage debt.....	55,792	1,121	149	525	303
34	Number with no mortgage report.....	2,602	21	11	18	4
<b>For farms consisting of owned land only:</b>						
35	Number reporting debt and amount.....	36,938	790	131	304	287
36	Value of their land and buildings..... dollars.....	454,857,222	7,017,735	621,150	1,720,970	3,182,705
37	Amount of mortgage debt..... dollars.....	115,799,646	1,927,492	107,448	467,392	1,154,492
38	Per cent of value of land and buildings.....	25.5	27.5	17.3	27.2	36.2

<sup>1</sup> No mortgage reports were secured for farms operated by tenants and managers. (See explanation in text.)

TABLE 3.—LIVE STOCK PRODUCTS, AND DOMESTIC ANIMALS

<b>LIVE STOCK PRODUCTS</b>						
<b>Dairy Products</b>						
1	Dairy cows on farms reporting dairy products..... number.....	969,993	13,434	717	10,411	16,018
2	Dairy cows on farms reporting milk produced..... number.....	849,951	12,885	673	9,902	12,685
3	Milk—Produced..... gallons.....	320,240,399	3,766,264	246,270	3,997,756	7,088,946
4	Sold..... gallons.....	158,031,333	1,633,495	22,485	3,589,286	8,608,499
5	Cream sold..... gallons.....	2,104,352	20,533	.....	320	24,537
6	Butter fat sold..... pounds.....	4,637,745	24,790	.....	.....	46,143
7	Butter—Produced..... pounds.....	46,609,992	807,134	68,323	91,978	37,178
8	Sold..... pounds.....	24,442,251	470,656	10,702	45,710	30,288
9	Cheese—Produced..... pounds.....	81,918	821	.....	140	.....
10	Sold..... pounds.....	54,502	500	.....	.....	.....
11	Value of dairy products, excluding home use of milk and cream..... dollars.....	31,542,209	320,108	10,801	394,222	949,388
12	Receipts from sale of dairy products..... dollars.....	26,720,849	245,528	9,536	382,952	947,807
<b>Poultry Products</b>						
13	Poultry—Raised..... number.....	30,030,613	599,771	45,229	257,106	129,450
14	Sold..... number.....	12,096,388	199,004	10,005	106,342	61,597
15	Eggs—Produced..... dozens.....	93,554,983	1,557,274	108,667	927,790	455,747
16	Sold..... dozens.....	62,030,857	1,022,306	50,366	729,332	299,252
17	Value of poultry and eggs produced..... dollars.....	32,282,613	512,513	39,427	291,845	155,056
18	Receipts from sale of poultry and eggs..... dollars.....	18,080,352	284,167	15,843	176,220	92,957
<b>Honey and Wax</b>						
19	Honey produced..... pounds.....	1,428,640	21,925	3,463	5,725	5,910
20	Wax produced..... pounds.....	26,240	361	77	68	170
21	Value of honey and wax produced..... dollars.....	200,763	2,631	566	932	878
<b>Wool, Mohair, and Goat Hair</b>						
22	Wool, fleeces shorn..... number.....	560,654	13,548	120	4,307	35,897
23	Mohair and goat hair, fleeces shorn..... number.....	4,117	567	.....	25	.....
24	Value of wool and mohair produced..... dollars.....	1,062,617	26,533	207	7,753	48,501
<b>DOMESTIC ANIMALS SOLD OR SLAUGHTERED</b>						
25	Calves—Sold or slaughtered..... number.....	491,669	5,357	304	6,930	13,074
26	Other cattle—Sold or slaughtered..... number.....	1,068,301	16,287	442	4,109	6,038
27	Horses, mules, and asses and burros—Sold..... number.....	220,379	3,032	405	1,901	843
28	Swine—Sold or slaughtered..... number.....	4,507,854	103,821	6,297	20,753	21,088
29	Sheep and goats—Sold or slaughtered..... number.....	542,745	9,152	126	3,017	4,408
30	Receipts from sale of animals..... dollars.....	132,022,547	2,416,500	101,643	604,593	726,027
31	Value of animals slaughtered..... dollars.....	14,438,127	192,126	31,666	118,366	25,804
