

DISTRICT OF COLUMBIA.

CHAPTER 1.—NUMBER OF INHABITANTS.

Population of the District.—This chapter gives the population of the District of Columbia by divisions arbitrarily selected by the Census Office, and by police precincts, as enumerated at the Thirteenth Census, taken as of April 15, 1910, with comparative statements of population where possible.

The population of the District of Columbia is 331,069. Compared with a population of 278,718 in 1900, this represents an increase during the last dec-

ade of 52,351, or 18.8 per cent. During the same period the total population of the United States increased 21 per cent.

The following table shows the population of the District of Columbia at each census from 1800 to 1910, inclusive, together with the increase and per cent of increase during each decade, in comparison with the per cent of increase for the United States as a whole.

CENSUS YEAR.	Population.	INCREASE OVER PRECEDING CENSUS.		Per cent of increase for the United States.
		Number.	Per cent.	
1910.....	331,069	52,351	18.8	21.0
1900.....	278,718	48,326	21.0	20.7
1890.....	230,392	52,768	29.7	25.5
1880.....	177,624	45,924	34.9	30.1
1870.....	131,700	56,620	75.4	22.6
1860.....	75,080	23,393	45.3	35.6
1850.....	51,687	7,975	18.2	35.9
1840.....	43,712	3,878	9.7	32.7
1830.....	39,834	6,795	20.6	33.5
1820.....	33,039	9,016	37.5	33.1
1810.....	24,023	9,930	70.5	36.4
1800.....	14,093

Although Congress did not assume jurisdiction over the District of Columbia until 1801 its population was returned in the Federal census reports for 1800. During the 20 years from 1800 to 1820 the population considerably more than doubled. The growth of population during the next 20 years was very much slower, the decade 1820-1830 showing an increase of about one-fifth and the succeeding decade, 1830-1840, an increase of less than one-tenth. During the next

decade, 1840-1850, however, the population of the District increased nearly one-fifth (18.2 per cent), notwithstanding the retrocession in 1846 of a portion of its territory to Virginia. During the succeeding 20 years, 1850-1870, the growth of population was very rapid, the increase for the decade 1860-1870, 75.4 per cent, being the largest shown for the District at any Federal census. Since 1870 the growth of the population has been slower with each succeed-

HISTORICAL NOTE.—The District of Columbia, the seat of the Federal Government, was named in honor of Christopher Columbus.

The first white man known to have visited the territory now constituting the District of Columbia was Capt. Henry Fleet, an English trader, who made an expedition up the Potomac in 1632. The first settlers within the present limits of the District probably came to the site of Georgetown as early as 1665, but the place was not incorporated until 1789.

The Constitution of the United States contains a provision (sec. 8, Art. I) giving Congress exclusive jurisdiction "over such district (not exceeding ten miles square) as may, by cession of particular states, and the acceptance of Congress, become the seat of the government of the United States * * *." In December, 1788, the Maryland Legislature passed an act ceding to the United States "any district in this state, not exceeding ten miles square, which the Congress may fix upon and accept for the seat of government of the United States." A year later a similar act was passed by the Virginia Legislature. In 1790 and 1791 Congress passed acts authorizing the establishment of the District of Columbia and making certain stipulations concerning its limits, and in March of the latter year President Washington proclaimed the boundaries of the District, which comprise the present area, together with about 30 square miles on the Virginia side of the Potomac, the whole forming a tract 10 miles square, with diagonals extending due north and south and due east and west. Georgetown and Alexandria were thus both included, the latter at the southern angle of the District.

Congress first met in Washington in November, 1800, and early in the following year assumed jurisdiction over the District, but continued in force the laws of Maryland and Virginia on the northern and southern sides, respectively, of the Potomac. In 1802 the city of Washington was incorporated.

In 1846 Congress retroceded to Virginia the tract obtained from that state, leaving the District of Columbia with its present limits.

In 1871 Congress repealed the charters of Washington and Georgetown and provided a territorial form of government for the District, under which it was allowed a Delegate in Congress. This territorial government was abolished in 1874 and there was substituted a temporary board of three commissioners appointed by the President. In 1878 Congress established the present form of government for the District, under which the legislative power is exercised directly by Congress, while the executive authority is in the hands of a board of three commissioners appointed by the President.

No elections are held in the District of Columbia, and its citizens have no right to vote elsewhere. Officers and employees of the Federal Government in the District of Columbia usually retain their citizenship in the state from which they were appointed or in which they have a legal residence.

The city of Washington has been coextensive with the District of Columbia since February 11, 1895, when, by act of Congress, Georgetown was made a part of Washington.

ing decade, the percentages of increase ranging from 34.9 for the decade 1870-1880 to 18.8 for the decade 1900-1910. The absolute increase during this 40-year period was, nevertheless, 199,369, or nearly seven times the absolute increase of the first period of 40 years, from 1800 to 1840. The population of the present area of the District of Columbia prior to 1850 was, as follows: 1840, 33,745; 1830, 30,261; 1820, 23,336; 1810, 15,471; 1800, 8,144.

A comparison of the rates of increase for the District with those for the United States, as given in the table on page 285, shows that the rate of increase for the District has fallen below that for the United States during only four decades, namely, 1820-1830, 1830-1840, 1840-1850, and 1900-1910. Of these, the decade 1830-1840 is the only one during which the rate of increase for the District was less than half that for the country as a whole. The decade showing the greatest difference between the two rates was 1860-1870, when the rate for the District was more than three times that for the country as a whole. The population of the District in 1910 was more than twenty-three times as large as in 1800, while the population of the United States in 1910 was seventeen times that in 1800.

Density of population.—The total land area of the District is 60 square miles. The average number of persons to the square mile in 1910 was 5,517.8; in 1900 and 1890 it was 4,645.3 and 3,972.3, respectively.

Divisions and districts.—The following table shows the population of the District of Columbia at the censuses of 1910, 1900, and 1890, respectively, distributed among the three divisions recognized before the county government of the District was abolished in 1874, together with the percentage of the total population contained in each division at each of the censuses named.

AREA.	POPULATION.			PER CENT OF TOTAL POPULATION.		
	1910	1900	1890	1910	1900	1890
The District	331,069	278,718	230,392	100.0	100.0	100.0
Washington (original limits) ..	230,630	218,196	188,932	69.7	78.3	82.0
Georgetown (original limits) ..	16,046	14,549	14,046	4.8	5.2	6.1
Remainder of District	84,393	45,973	27,414	25.5	16.5	11.9

The most notable feature of this table is the increase in the proportion of the total population of the District in the territory outside of the original limits of Washington and Georgetown, from 11.9 per cent in 1890 to 16.5 per cent in 1900 and 25.5 per cent in 1910, with corresponding decreases in the proportion of the population in both Washington and Georgetown.

In order to show the growth by smaller areas, the Bureau of the Census has further distributed the population of the District in 1910 and 1900, respectively, according to nine districts which are shown in the map on page 288. The districts are as follows:

WASHINGTON (ORIGINAL LIMITS).

District 1, Northwest.—The area south of Florida Avenue between North Capitol Street and Rock Creek, north of the Mall and the Capitol Grounds.

District 2, Northeast.—The area between the Anacostia River (Eastern Branch) and North Capitol Street, north of East Capitol Street and south of Florida Avenue and Benning Road.

District 3, Southwest.—The area south of the Mall and the Capitol Grounds, west of South Capitol Street and north of the Potomac River.

District 4, Southeast.—The area south of East Capitol Street, east of South Capitol Street and north of the Anacostia River (Eastern Branch).

GEORGETOWN (ORIGINAL LIMITS).

District 5.—The area comprising what was formerly known as Georgetown.

FORMER WASHINGTON COUNTY.

District 6.—The area west of Rock Creek, exclusive of Georgetown.

District 7.—The area between North Capitol Street extended and Rock Creek, north of Florida Avenue.

District 8.—The area between North Capitol Street extended and the Anacostia River (Eastern Branch), north of Florida Avenue and Benning Road.

District 9.—The area south and east of the Anacostia River (Eastern Branch).

The following table shows the population of the District of Columbia at the last two censuses, namely, those of 1910 and 1900, distributed according to the nine districts, as previously defined, together with the increase and per cent of increase during the decade.

AREA.	1910	1900	INCREASE: ¹ 1900-1910	
			Number.	Per cent.
District of Columbia	331,069	278,718	52,351	18.8
WASHINGTON (original limits)	230,630	218,196	12,434	5.7
District 1	120,284	117,090	3,194	2.7
District 2	40,959	36,884	4,075	11.0
District 3	32,513	32,747	-234	-0.7
District 4	36,874	31,475	5,399	17.2
GEORGETOWN (original limits)	16,046	14,549	1,497	10.3
District 5	16,046	14,549	1,497	10.3
FORMER WASHINGTON COUNTY	84,393	45,973	38,420	83.6
District 6	6,670	4,805	1,865	38.8
District 7	49,067	23,127	25,940	112.2
District 8	12,126	6,873	5,253	76.4
District 9	16,530	11,168	5,362	48.0

¹ A minus sign (-) denotes decrease.

As shown by this table, that part of the District comprising the original city of Washington increased during the last decade, 12,434, or 5.7 per cent, that part comprising the original city of Georgetown 1,497,

or 10.3 per cent, and that part comprising the former Washington County, or the remainder of the District, 38,420, or 83.6 per cent. Thus it is seen that the part of the District outside of the former limits of Washington and Georgetown grew most rapidly, its rate of increase being more than fourteen times that for Washington and more than eight times that for Georgetown. Of the nine districts considered in this table, district 7, or the area between North Capitol Street extended and Rock Creek, north of Florida Avenue, showed the most rapid growth in population, the increase for the decade being 25,940, or 112.2 per cent. District 1, the area south of Florida Avenue between North Capitol Street and Rock Creek, north of the Mall and the Capitol Grounds, showed the slowest growth, the increase being 3,194, or 2.7 per cent. District 3, or the area south of the Mall and the Capitol Grounds, west of South Capitol Street and north of the Potomac River, showed a decrease of 234, or seven-tenths of 1 per cent. No district within the old limits of Washington or Georgetown increased in population as rapidly as the District as a whole.

Of the decennial increase in the population of the District, namely, 52,351, nearly three-fourths (73.4 per cent) was in that part of the District outside of the former limits of Washington and Georgetown, somewhat less than one-fourth (23.8 per cent) within the former limits of Washington, and less than 3 per cent (2.9) within the former limits of Georgetown.

Police precincts.—The population of the District of Columbia in 1910 is distributed by police precincts in the table following.

POLICE PRECINCT.	1910	POLICE PRECINCT.	1910
The District	331,069	Precinct 6	10,990
Precinct 1	7,153	Precinct 7	22,716
Precinct 2	36,629	Precinct 8	44,098
Precinct 3	30,285	Precinct 9	44,284
Precinct 4	32,513	Precinct 10	42,851
Precinct 5	36,867	Precinct 11	13,683

The boundaries of the police precincts are as follows:

Precinct 1.—The area bounded by K Street NW., Seventh, B (and B extended) SW., to Sixteenth Street extended, Sixteenth Street extended, east boundary White House Grounds, Madison Place, Vermont Avenue, and Fifteenth Street.

Precinct 2.—The area bounded by Q Street NW., Florida Avenue and First Street NE., K and Fifteenth Streets NW.

Precinct 3.—The area bounded by Q Street NW., Fifteenth Street, Vermont Avenue, Madison Place, east boundary White House Grounds, Sixteenth Street extended, Tidal Reservoir, Highway Bridge, Potomac River, and Rock Creek.

Precinct 4.—The area bounded by B Street extended and B Street SW., Seventh Street, dividing line between northwest and southwest, South Capitol Street, Anacostia River, Potomac River, Highway Bridge, Tidal Reservoir, and Sixteenth Street extended.

Precinct 5.—The area bounded by East Capitol Street, Anacostia River, and South Capitol Street.

Precinct 6.—The area bounded by K Street, Second Street NE., Union Station, First Street NE., boundary line between the northern sections and the southern sections, and Seventh Street NW.

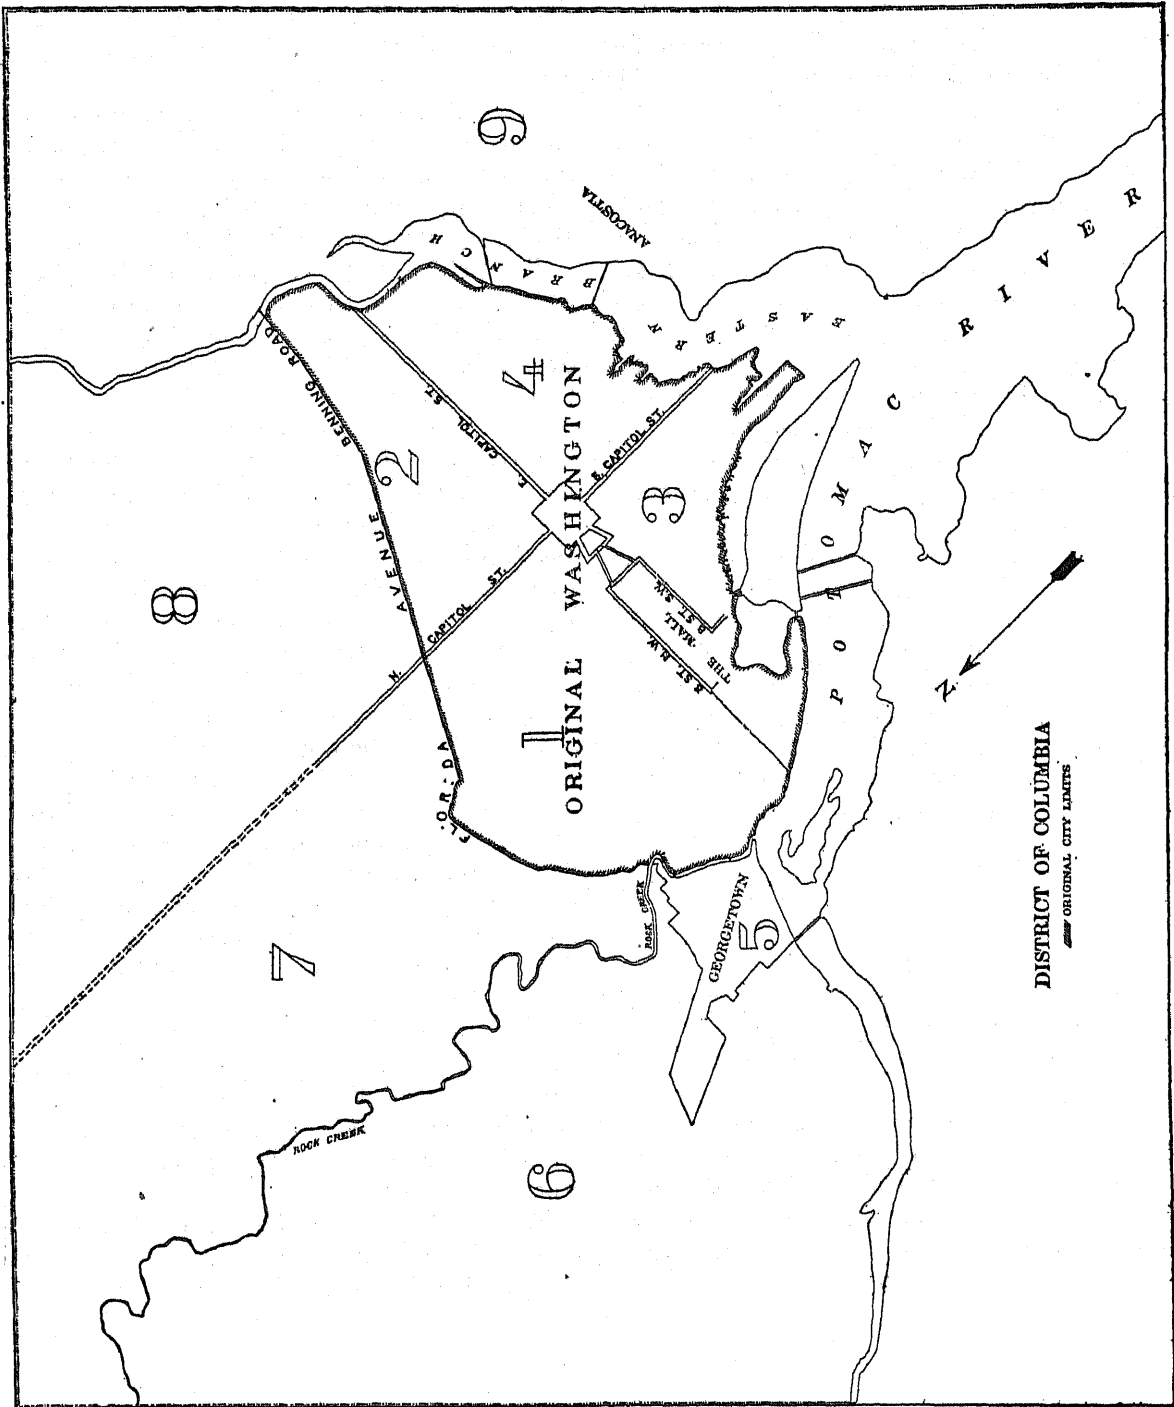

Precinct 7.—The area bounded by Rock Creek, Potomac River, and District line, including Analostan Island.

Precinct 8.—The area bounded by Florida Avenue, Barry Place, Barry Place extended, College Street, College Street extended, Channing Street, First Street NW., and T Street, Brentwood Road, line drawn from intersection of Brentwood Road and Seventh Street NE., to intersection of Third Street, Florida Avenue NE., Florida Avenue, and Q Street.

Precinct 9.—The area bounded by the District line, Bowen Road, Ridge Road, Anacostia Road, East Capitol Street extended and East Capitol Street, First Street NE., Union Station, Second Street NE., K Street, First Street NE., Florida Avenue, line drawn from intersection of Third Street and Florida Avenue NE. to intersection of Brentwood Road and Seventh Street NE., Brentwood Road, Eighteenth Street NE., and Queens Chapel Road.

Precinct 10.—The area bounded by the District line, Queens Chapel Road, Eighteenth Street, Brentwood Road, T Street, First Street NW., Channing Street, College Street extended, College Street, Barry Place extended, Barry Place, Florida Avenue, Q Street, and Rock Creek.

Precinct 11.—The area bounded by East Capitol Street extended, Anacostia Road, Ridge Road, Bowen Road, District line, Potomac River, and Anacostia River.

CHAPTER 2.—COMPOSITION AND CHARACTERISTICS OF THE POPULATION.

Introduction.—The first chapter having given the number of inhabitants of the District of Columbia by districts and police precincts and the decennial increase and the density of population, the present chapter deals with the composition and characteristics of the population. The two chapters cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—This chapter contains a general table (Table I) presenting statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, for the District of Columbia as a whole and for each of the nine districts shown on the map in Chapter 1, page 288.

A series of summary tables (numbered 1 to 10) reproduces from the general table the more important totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

The population of the District of Columbia is essentially urban or suburban in character, and no attempt has been made to define the small areas which might be classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of the District of Columbia, 236,128, or 71.3 per

cent, are whites, and 94,446, or 28.5 per cent, negroes. The corresponding percentages in 1900 were 68.7 and 31.1, respectively. In 6 of the 9 subdivisions into which the District has been divided, 15 to 25 per cent of the population is negro, and in the 3 remaining divisions the percentages are 35.9, 36.3, and 41, respectively.

Native whites of native parentage constitute 50.4 per cent of the total population and 70.6 per cent of the white population. Native whites of foreign or mixed parentage constitute only 13.6 per cent of the total population and foreign-born whites 7.4 per cent.

Sex (Table 2).—In the total population there are 158,050 males and 173,019 females, or 91.3 males to 100 females. In 1900 the ratio was 90 to 100. Among the whites there are 94.9 males to 100 females; among the negroes, 82.2. For all native whites combined the ratio is 93.1 to 100, as compared with 113 to 100 for the foreign-born whites.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—45.5 per cent were born in the District of Columbia and 54.5 per cent elsewhere in the country; of the native white population, 53.3 per cent were born outside the District, and of the native negro, 57.1 per cent.

Foreign nationalities (Table 5).—Of the foreign-born white population of the District, persons born in Ireland represent 21.9 per cent; Germany, 21.3; Russia, 13.9; Italy, 11.3; England, 10.8; Canada, 4.6; Scotland, 2.9; France, 2.1; Austria, 1.9; Sweden, 1.5; Greece, 1.4; Switzerland, 1.2; other countries, 5.1 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Ireland contributed 27.8 per cent; Germany, 26.4; England, 11.1; Russia, 8.3; Italy, 6.6; Canada, 3.9; Scotland, 2.9; France, 1.5; Austria, 1.2; Sweden, 1 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 103,761, representing 31.3 per cent of the population. Of such males, 73 per cent are white and 26.6 per cent negro. Native whites represent 61.7 per cent of the total number and foreign-born whites 11.3 per cent. Of the 11,738 foreign-born white males of voting age, 6,474, or 55.2 per cent, are naturalized. Males of militia age—18 to 44—number 78,349.

Age (Table 7).—Of the total population, 8.1 per cent are under 5 years of age, 15 per cent from 5 to 14 years, inclusive, 18.9 per cent from 15 to 24, 36.1 per cent from 25 to 44, and 21.5 per cent 45 years of age and over. The foreign-born white population com-

prises comparatively few children, only 4.6 per cent of this class being under 15 years of age, while nearly five-sixths (83.1 per cent) are 25 years of age and over. The negro population as compared with the native white comprises a smaller percentage under 20 years of age and a larger percentage from 20 to 44 years of age, inclusive.

School attendance (Table 8).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 79,249, of whom 50,859, or 64.2 per cent, attended school. In addition to these, 1,529 persons under 6 and 2,300 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 64.6; for girls, 63.8. For children from 6 to 14 years, inclusive, the percentage attending school was 86.7. The percentage for children of this age was highest among native whites of foreign or mixed parentage, 88.7, although the percentage for native whites of native parentage, 87.8, was only slightly lower; for foreign-born whites the percentage was 86.4; and for negroes, 83.7. (See Table I.)

Illiteracy (Table 9).—There are 13,812 illiterates in the District of Columbia, representing 4.9 per cent of the total population 10 years of age and over, as compared with 8.6 per cent in 1900. The percentage of illiteracy is 13.5 among negroes, 8.2 among foreign-born whites, and 0.5 among native whites. It is 0.6 for native whites of native parentage and 0.4 for native whites of foreign or mixed parentage.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the proportion of illiterates is very small, only 1 per cent. (See Table I.)

Marital condition (Table 10).—In the population 15 years of age and over, 40.2 per cent of the males are single and 34.5 per cent of the females. The percentage married is 53.8 for males and 48.8 for females, and the percentage widowed 5.2 and 15.7, respectively. The percentages of those reported as divorced, 0.4 and 0.6, respectively, are believed to be too small, because

of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that women marry younger. Thus 7.9 per cent of the females from 15 to 19 years of age are married, as compared with 0.8 per cent of the males, and 40.7 per cent of the females from 20 to 24 years are married, as compared with 21.2 per cent of the males. In the next age group, 25 to 34 years, the difference largely disappears. In the age group 35 to 44 the percentage married is greater among the males, while in the age group 45 and over it very greatly exceeds that for females. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 57.6 for males, 54.5 for females; native whites of native parentage, 53 and 48.8, respectively; native whites of foreign or mixed parentage, 50.4 and 49.4; negroes, 55.6 and 47.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life.

Dwellings and families.—The total number of dwellings in the District of Columbia is 58,513, and the total number of families 71,339, indicating that in a considerable number of cases two or more families occupy the same dwelling. (See Table I.) The average number of persons per dwelling is 5.7, and the average number per family, 4.6.

TABLE 1.—COLOR, NATIVITY, AND PARENTAGE.

FLORIDA.

CHAPTER 1.—NUMBER OF INHABITANTS.

Introduction.—This chapter gives the population of Florida, by counties and minor civil divisions, as enumerated at the Thirteenth Census, taken as of April 15, 1910, with comparative statements of population where possible, and a statement and discussion for the state as a whole of the population living in urban and in rural territory. The statistics are given in detail in two general tables.

Table 1 (p. 303) shows the population of Florida, distributed according to counties and minor civil divisions, at the last three Federal censuses, namely, those of 1910, 1900, and 1890. In this table the counties are arranged alphabetically, while the primary divisions in each county are given in numerical order. The figures for secondary divisions are printed in italics. The changes in boundaries, name, or form of organization that have taken place since 1900 are indicated in the footnotes to the table. For changes between 1890 and 1900 reference must be made to the census report of 1900.

It may be noticed that the county totals as given in Table 1 for 1900 and 1890 sometimes exceed the aggregate population of the minor civil divisions as shown in the table. This is for the most part due to the territorial changes that have been made in the minor civil divisions of certain counties since 1890. In a few cases, however, certain divisions returned separately at one census were returned in combination with other divisions at another census.

Table 2 (p. 311) shows the cities and the incorporated towns in Florida, alphabetically arranged, with their population in 1910, 1900, and 1890.

The population of Florida, by counties, at each of the last five Federal censuses, from 1870 to 1910, inclusive; the increase during the last two decades; the density of the total and the rural population at the census of 1910; and the distribution of the population at the last two Federal censuses according

to urban and rural districts, are given in Table I of Chapter 2.

The tables and text of the present chapter contain few technical expressions whose meaning is not apparent. The census usage in regard to certain terms is, however, explained below:

Density of population.—The density of population of a state or county is obtained by dividing its total population by the number of square miles in its land area. In calculating the density of rural population, the same divisor is used as it is not practicable to ascertain and deduct the exact area covered by the urban districts, and even if this could be done with accuracy the deduction of this area from the total land area would ordinarily make no appreciable difference in the resulting quotient.

Minor civil divisions.—The counties are divided generally into smaller political units which bear different designations in the different parts of the country, such as towns, townships, election precincts, etc. Of these minor civil divisions those which rank next to the county as geographic areas are termed primary divisions. In many instances, however, these primary divisions contain political units of still smaller area, such as incorporated villages or boroughs. These smaller political units are referred to as secondary divisions.

Urban and rural population defined.—The Census Bureau, for purposes of discussion, has defined urban population as that residing in cities and other incorporated places of 2,500 inhabitants or more, and rural population as that residing outside of such incorporated places.

The comparisons of the urban and rural population in 1910 with that at earlier enumerations may be made either with respect to the varying proportions of the two classes at successive enumerations or with respect to the increase between enumerations. In order to contrast the *proportion* of the total population living in urban or rural territory at the census of 1910 with the proportion urban or rural at the preceding census, it is necessary to classify the territory according to the conditions *as they existed* at each census. In this comparison a place having less than 2,500 inhabitants in 1900 and over 2,500 in 1910 is classed with the rural population for 1900 and with the urban for 1910. On the other hand, in order to present fairly the contrast between urban and rural communities, as regards their *rate of growth*, it is necessary to consider the changes in population for the *same* territory which have occurred from one decennial census to another. For this purpose the territory which in 1910 was urban or rural, as the case may be, is taken as the basis, and the population in 1900 for the same territory (so far as separately

HISTORICAL NOTE.—Florida was given this name by its discoverer, Ponce de Leon, a Spaniard, who sighted the coast near the present site of St. Augustine on Easter Sunday (*Pascua Florida*, the Feast of Flowers) of the year 1513.

Ponce de Leon and other Spanish explorers made attempts at settlement in Florida, but it remained for the French to found the first colony at the mouth of the St. Johns in 1564. The next year Spaniards destroyed this colony and founded St. Augustine, which was the first permanent settlement. In 1586 this city was burned by Sir Francis Drake; in 1665 it was plundered by English buccaneers. Rivalry between the English colonies and the Spanish settlements continued and St. Augustine was attacked at the beginning of the eighteenth century by the English in the Carolinas, and later by the Georgians under Oglethorpe.

In 1763, under the terms of the Treaty of Paris, Spain transferred Florida to Great Britain in exchange for Cuba, which had been recently conquered by England.

Later in the same year the province was divided into east and west Florida, with the Apalachicola River as the boundary between the two, the British claiming the Mississippi as the western limit. In 1783 Great Britain retroceded the Floridas to Spain. The region south of the thirty-first parallel and between the Mississippi and Perdido Rivers, which had been claimed by both France and Spain, was in dispute between the United States and Spain from 1803, the year in which the United States acquired Louisiana from France, until 1819, when Florida was purchased by the United States from Spain. In July, 1821, the transfer was made, and in 1822 a territorial government was established for east and west Florida, which together comprised the same area as the present state; in the following year east and west Florida were united.

In 1839 Florida adopted a state constitution, but was not admitted to the Union until March, 1845.

reported at that census) is presented, even though part of the territory may, on the basis of its population at the earlier census, have then been in a different class. This avoids the disturbing effect on comparisons which would arise from the passage, for

example, of communities formerly classed as rural into the urban group. These two distinct forms of comparison are made in Table I of Chapter 2 for the state as a whole and for each county separately for the last two Federal censuses.

TOTAL POPULATION, INCREASE, AND DISTRIBUTION.

Population of the state.—The population of Florida is 752,619. Compared with a population of 528,542 in 1900, this represents an increase during the last decade of 224,077, or 42.4 per cent. During the same period the total population of the United States increased 21 per cent. The growth of the state during the decade was somewhat more rapid than during the pre-

ceding decade, 1890-1900, when the rate was 35 per cent.

The following table shows the population of Florida at each Federal census from 1830 to 1910, inclusive, together with the increase and per cent of increase during each decade, in comparison with the per cent of increase for the United States as a whole.

CENSUS YEAR.	Population.	INCREASE OVER PRECEDING CENSUS.		Per cent of increase for the United States.
		Number.	Per cent.	
1910.....	752,619	224,077	42.4	21.0
1900.....	528,542	137,120	35.0	20.7
1890.....	391,422	121,929	45.2	25.5
1880.....	269,498	81,745	43.5	30.1
1870.....	187,748	47,324	33.7	22.6
1860.....	140,424	52,979	60.6	35.6
1850.....	87,445	32,968	60.5	35.9
1840.....	54,477	19,747	56.9	32.7
1830.....	34,780			

Florida was organized as a territory in 1822 and appears in the Federal census reports for the first time in 1830. The population of the state, while showing a substantial growth during each decade, increased more rapidly during the first three decades, 1830-1860, than during the five decades since 1860. The rates of increase for the first three decades ranged from 56.9 per cent to 60.6 per cent, while the rates for the decades since 1860 ranged from 33.7 per cent to 45.2 per cent.

A comparison of the rates of increase for the state with those for the United States, as given in the preceding table, shows that the state has increased in population more rapidly than the country as a whole during every decade since 1830. For the last decade, 1900-1910, the rate of increase for the state was more than twice that for the country as a whole. The population of the state in 1910 was more than twenty-one times that in 1830, while that of the United States was only about seven times the corresponding figure for 1830.

Principal cities.—Florida has 39 cities. Jacksonville, the largest, has a population of 57,699, and Tampa, the second city, a population of 37,782. Pensacola, with 22,982 inhabitants, and Key West, with 19,945 inhabitants, are the other cities in the state having over 10,000 inhabitants. There are also 6 cities having from 5,000 to 10,000, 10 from 2,500 to 5,000, and 19 having less than 2,500 inhabitants.

Table 2 shows the population in 1910 of all the cities of the state with comparative figures, where possible, for 1900 and 1890. The table on page 299 shows the population of the four cities having in 1910 over 10,000

inhabitants, as reported at each census since their incorporation either as cities or towns, so far as figures are available, together with the increase during each decade.

Of the cities included in this table, Tampa shows the highest rate of increase during the last decade, namely, 138.5 per cent, and Key West the lowest, 16.5 per cent. Jacksonville has had a very rapid growth, the rate of increase being lower than 100 per cent in only two decades of the six reported. During the last decade the population considerably more than doubled, the numerical increase being larger than during any previous decade.

Counties.—Florida has 47 counties. The population of these counties ranges from 4,075 in St. Lucie County to 78,374 in Hillsboro County.

The following territorial changes have been made in the organized counties of Florida since 1900: Part of Brevard County was taken in 1905 to form St. Lucie County and part of Dade County was taken in 1909 to form Palm Beach County.

Owing to the organization since 1900 of 2 new counties from parts of other counties as shown above, the comparison of increase or decrease in population is made for only 43 counties and for two combinations of counties. The combinations of counties are Brevard with St. Lucie, and Palm Beach with Dade. In order to determine the actual rate of increase for these counties, it is necessary to add the population of the new county to that of the old county from which it was formed. Forty counties and the two combinations of counties increased in population during the last decade. The rates of increase for the 40 counties

that show an increase range from 3.5 per cent in Columbia County to 117.6 per cent in Hillsboro County, and the absolute increases from 289 in Baker County to 42,361 in Hillsboro County. The combined counties of St. Lucie and Brevard increased 70.5 per cent in population, while the combined counties of Palm Beach and Dade increased 253.4 per cent. Three counties—Hamilton, Leon, and Wakulla—decreased in population during the last decade, the percentages of decrease being 0.5, 2.3, and 6.7, respectively. The aggregate increase of population from 1900 to 1910 in the two combinations of counties and in the 40 counties that showed an increase was 224,940; the aggregate decrease of population in the 3 counties that showed a decrease was 863. The difference, 224,077, is, of course, the total increase of population in the state.

The maps on page 301 show the increase or decrease in the total and the rural population, respectively, of each county of Florida during the last decade. In the counties shown in white the population decreased; for the other counties the different rates of increase are indicated by differences in shading.

Density of population.—The total land area of the state is 54,861 square miles. The average number of persons to the square mile in 1910 was 13.7; in 1900 and 1890 it was 9.6 and 7.1, respectively. The average number per square mile for the United States as a whole in 1910 was 30.9.

The density of population is given by counties in Table 1 of Chapter 2 and in the maps on page 302, both for the entire population and for that living in rural territory, excluding in the latter case the population of places of 2,500 or more, but not excluding the land area of such places.

Lee County, with 4,031 square miles, has the largest area, and Holmes County, with 458 square miles, has the smallest area. Duval County, containing Jacksonville city, has the highest density of any county, namely, 95.6 persons per square mile, while Lee County, with 1.6 persons per square mile, has the lowest density.

Minor civil divisions.—The political divisions into which counties are subdivided are collectively termed

“Minor civil divisions.” In Florida the counties are divided into 777 primary divisions, comprising that number of election precincts. There are also 148 secondary divisions, comprising 38 cities and 110 incorporated towns. These secondary divisions usually form parts of the precincts in which they are wholly or partly located. There are 6 cities and 1 town, however, which are either coextensive with the precincts in which they are located or which comprise several precincts and two other cities each of which comprises several precincts and parts of other precincts.

Urban and rural population compared.—The following table presents the population of Florida at the Federal censuses of 1910, 1900, and 1890, respectively, distributed among cities and towns grouped according to specified limits of population, together with the percentage of the total population contained in each group at each of the censuses named. The classification is based upon the population as it existed at each census.

As shown by this table, the urban territory of the state in 1910—that is, the cities and incorporated towns of 2,500 inhabitants or more—contained 219,080 inhabitants, or 29.1 per cent of the total population, while 533,539 inhabitants, or 70.9 per cent, lived in rural territory. The urban territory as it existed in 1900—that is, the incorporated places then having 2,500 inhabitants or more—contained 107,031 inhabitants, or 20.3 per cent of the total population, while 421,511 inhabitants, or 79.7 per cent, lived in rural territory. There has thus been a considerable increase in the proportion of urban population. For the United States as a whole the urban population constituted 46.3 per cent of the total population in 1910 and 40.5 per cent of the total population in 1900.

In 1900 Jacksonville, the only city having at that time over 25,000 inhabitants, contained 5.4 per cent of the total population of the state. Between 1900 and 1910 Tampa passed the 25,000 population mark and in 1910 these two cities contained 12.7 per cent of the total population of the state. In 1910 and in 1900 the combined population of cities having between 2,500 and 25,000 inhabitants represented 16.4 per cent and 14.9 per cent, respectively, of the state total. In 1890 all the urban population of the state,

Cities and towns of less than 2,500 inhabitants.....	125	87,509	79	53,497	56	30,519	11.6	10.1	7.8
Other rural territory.....		446,030		368,014		283,545	59.3	69.6	72.4

or 19.8 per cent of the total, was included in cities having from 2,500 to 25,000 inhabitants each.

The urban population of the state is distributed among 20 cities and 3 towns, while the rural population is in 125 incorporated cities and towns of less than 2,500 inhabitants each and in the unincorporated territory. The 125 cities and towns of less than 2,500 inhabitants each have an aggregate population of 87,509, representing 11.6 per cent of the total population of the state. These places comprised 30 having from 1,000 to 2,500 inhabitants each, with a combined population of 45,325; 30 having from 500 to 1,000 inhabitants each, with a combined population of 22,267; and 65 having less than 500 inhabitants each, with a combined population of 19,917. The population living in unincorporated territory represents 59.3 per cent of the total.

The table shows further that in all cities and incorporated towns, including those of less than 2,500 inhabitants, there was in 1910 a population of 306,589, or 40.7 per cent of the population of the state. The population of all incorporated places, as they existed in 1900, was 160,528, or 30.4 per cent of the population of the state.

Table I of Chapter 2 shows 7 counties having a larger proportion and 5 counties a smaller proportion of urban population in 1910 than in 1900. Five counties and one combination of counties, which were wholly rural in 1900, were partly urban in 1910, while 26 counties and one combination of counties were wholly rural at both censuses.

In order to compare the *rate of growth* in urban and rural communities it is necessary in each case, as previously explained, to consider the changes in population which have occurred in the *same* territory from one decennial census to another. With this end in view places classed as urban or rural according to their population in 1910 are taken as a basis and the aggregate population in 1910 and in 1900 of the same places is then compared. Thus, as shown in the table in the next column, the total population in 1910 of those cities and towns which at that time had 2,500 inhabitants or more was 219,080; in 1900 the total population of these same places (so far as separately reported) was 126,287. It may be

noted that the latter figure exceeds the total population in 1900 of those places which at that time had over 2,500 inhabitants each, 107,031 (see table above), by 19,256. The difference is the result of the passage, between 1900 and 1910, of certain communities from the rural to the urban class, and of annexations of territory during the same period.

In the table following the population for the state as a whole is distributed so as to show, for 1910 and 1900, the combined population of the cities having in 1910 25,000 inhabitants or more, of cities and towns having from 2,500 to 25,000 inhabitants, and the population of the remainder of the state.

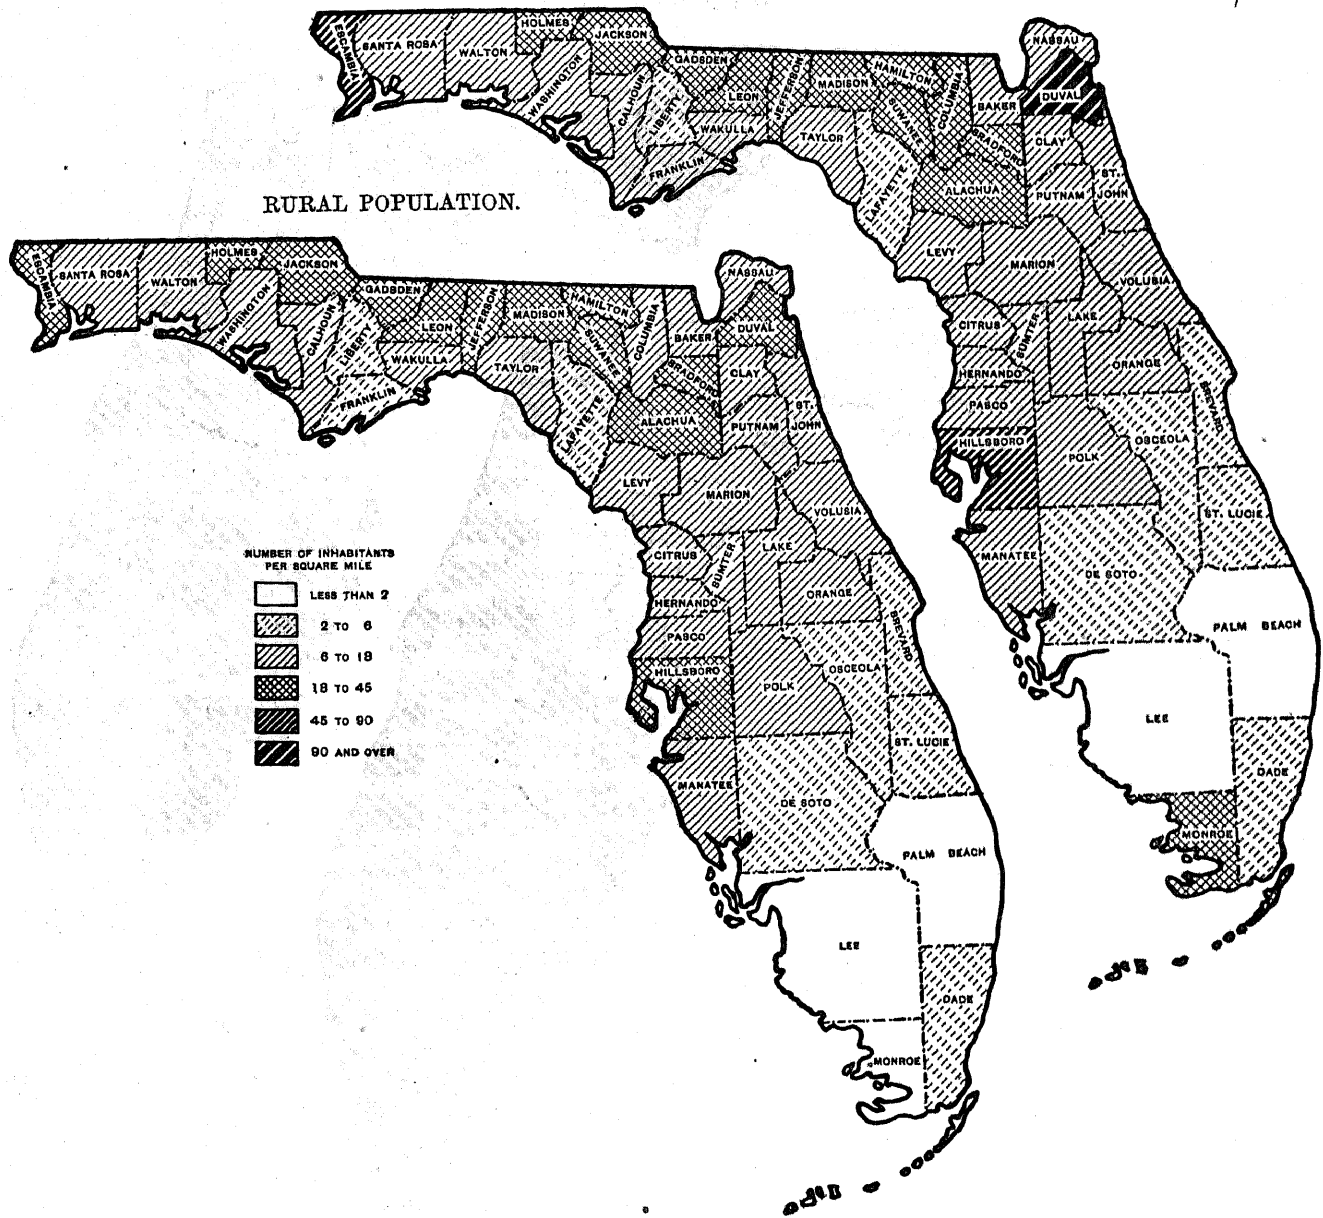

CLASS OF PLACES.	POPULATION.		INCREASE: 1900-1910	
	1910	1900	Number.	Per cent.
The state.....	752,619	528,542	224,077	42.4
Urban territory in 1910.....	219,080	126,287	92,793	73.5
Cities and towns of—				
25,000 inhabitants or more in 1910.....	95,481	45,174	50,307	111.4
2,500 to 25,000 inhabitants in 1910.....	123,599	81,113	42,486	52.4
Remainder of the state.....	533,539	402,255	131,284	32.6

A comparison of the total population in 1910 of cities and towns having a population of not less than 2,500 each with the total population of the same places in 1900, as given in the above table, shows an increase of 73.5 per cent. This represents the rate of growth of urban communities as thus defined. During the same period the rural population, comprising that of the remainder of the state, increased 32.6 per cent. The population of urban areas thus increased more than twice as fast as rural. For the United States as a whole urban population increased 34.8 per cent in the last decade and rural population 11.2 per cent. As shown by Table I of Chapter 2, there are five counties in which rural population decreased but only one in which there was a decrease of urban population.

It also appears from this table that the group of urban places having 25,000 inhabitants or more increased more than twice as rapidly as the group comprising places having from 2,500 to 25,000 inhabitants.

DENSITY OF POPULATION OF FLORIDA, BY COUNTIES: 1910.

TOTAL POPULATION

Rural population is defined as that residing outside of incorporated places having 2,500 inhabitants or more.

² Incorporated in 1907.

³ Precinct 24 organized from parts of precincts 2 and 3 in 1906.

⁴ Incorporated in 1905.

⁵ Name changed from Cow Creek in 1908.

⁶ Precinct 23 organized from part of precinct 5 in 1906.

⁷ Incorporated in 1908.

⁸ Precinct 25 organized from part of precinct 7 in 1908.

⁹ Part taken to form part of precinct 22 in 1906.

¹⁰ Incorporated in 1901.

¹¹ Name changed from Windsor in 1905. Part taken to form part of precinct 22 in 1906.

¹² Name changed from Yular in 1902.

¹³ Incorporated in 1903.

¹⁴ Organized from parts of precincts 8, 14, and 15 in 1906.

¹⁵ Precinct 7 organized from parts of precincts 1 and 5 in 1907.

¹⁶ Precinct 8 organized from part of precinct 4 in 1904.

¹⁷ Precinct 9 organized from parts of precincts 2 and 4 in 1904.

¹⁸ No population reported.

¹⁹ Name changed from Pine Grove in 1902.

²⁰ Part taken to form St. Lucie County in 1905.

²¹ No comparison of population can be made; county redistricted in 1908.

²² Incorporated as a city in 1909.

²³ County total includes population (836) of precincts 1, 3, 5, and 9, not returned separately in 1890.

²⁴ Precinct 13 organized from part of precinct 1 in 1904.

²⁵ Parts taken to form precinct 14 in 1908 and part of precinct 12 in 1900.

²⁶ Part taken to form part of precinct 11 in 1904.

²⁷ Name changed from Board Head in 1904. Part taken to form part of precinct 11 in 1904.

²⁸ Name changed from Juniper Creek in 1904. Part taken to form part of precinct 12 in 1900.

²⁹ Organized from parts of precincts 4 and 7 in 1904.

³⁰ Organized from parts of precincts 3 and 9 in 1900.

³¹ Organized from part of precinct 3 in 1903.

³² County total includes population (200) of precinct 12, Fairmount, annexed to precinct 2; and population (69) of precinct 13, Fort Cooper, annexed to precinct 10, since 1900.

³³ No comparison of population can be made; county redistricted between 1890 and 1900.

³⁴ Precinct 12 annexed in 1908.

³⁵ Precinct 13 annexed in 1908.

³⁶ County total includes population (85) of precinct 12, Lakeside, annexed to precincts 6 and 7 since 1900.

³⁷ Returned as Belmore in 1900. Part of precinct 12 annexed in 1907.

³⁸ Part of precinct 12 annexed in 1907.

TABLE 1.—POPULATION OF MINOR CIVIL DIVISIONS: 1910, 1900, AND 1890—Continued.

¹ County total includes population (2,310) of precincts 2 and 3, not returned separately in 1890.

² Precinct 13 organized from part of precinct 1 in 1910.

³ Incorporated as a city in 1907.

⁴ Part annexed to precinct 4 in 1907.

⁵ Name changed from Scotland in 1907. Part of precinct 3 annexed in 1907.

⁶ Incorporated in 1906.

⁷ Precinct 12 organized from part of precinct 8 in 1910.

⁸ Incorporated in 1908.

⁹ Incorporated in 1909.

¹⁰ Incorporated in 1900.

¹¹ Returned as Corinth Church in 1900.

¹² Returned as Smithville in 1900.

¹³ County totals include population (278 in 1900; 395 in 1890) of old precinct 3, annexed to precincts 1 and 4 since 1900.

¹⁴ Part of old precinct 3 annexed since 1900.

¹⁵ Precinct 9 organized from part of precinct 2 in 1902.

¹⁶ Precinct 3 organized from part of precinct 6 since 1900.

¹⁷ County total includes population (548) of that part of precinct 6 outside of Tampa city, annexed to Tampa city and population (358) of that part of precinct 27 outside of Tampa city; parts taken to form precinct 41, part of precinct 31, and part annexed to Tampa city, since 1900.

¹⁸ No comparison of population can be made; county redistricted between 1890 and 1900.

¹⁹ Precinct 37 organized from part of precinct 1 in 1907.

²⁰ Precinct 36 organized from parts of precincts 2 and 3 in 1907.

²¹ Parts taken to form precinct 44 in 1907 and part of precinct 34 in 1908.

²² Name changed from Horse Pond in 1907. Part taken to form precinct 43 in 1907.

²³ Part taken to form part of precinct 35 in 1907.

²⁴ Part taken to form precinct 33 in 1904.

²⁵ Part taken to form part of precinct 34 in 1906.

²⁶ Precinct 38 organized from part of precinct 26 in 1907.

²⁷ Parts taken to form precincts 39 and 40 in 1907 and part of precinct 30 in 1900.

²⁸ Organized from part of precinct 19 in 1904; part taken to form part of precinct 35 in 1907.

²⁹ Organized from parts of precincts 4 and 21 in 1906.

³⁰ Organized from parts of precincts 16, 24, and 33 in 1907.

³¹ Incorporated in 1905.

³² Organized from part of precinct 28 in 1907; part annexed to Tampa city in 1907.

³³ Organized from part of precinct 27 in 1907; part annexed to Tampa city in 1907.

³⁴ Organized from part of precinct 21 in 1907; part annexed to Tampa city in 1907.

³⁵ Organized from part of precinct 5 in 1907.

³⁶ Organized from part of precinct 4 in 1907.

³⁷ Precinct 30 organized from parts of precincts 27 and 28, precinct 31 from part of precinct 27, and precinct 32 from part of precinct 20, in 1900; part of precinct 31 taken to form precinct 42 in 1907; parts of precincts 6 (comprising part of Fort Brook town), 27, 30, 31, 39, 40, 41, and 42 annexed in 1907.

³⁸ Parts taken to form precinct 18 in 1906 and part of precinct 16 in 1900.

³⁹ Part taken to form precinct 17 in 1902.

TABLE 1.—POPULATION OF MINOR CIVIL DIVISIONS: 1910, 1900, AND 1890—Continued.

[Precinct means election precinct. For changes in boundaries, etc., between 1900 and 1910, see footnotes; for those between 1890 and 1900, see Reports of the Twelfth Census: 1900, Vol. I, Table 5.]

CHAPTER 2.—COMPOSITION AND CHARACTERISTICS OF THE POPULATION.

Introduction.—The first chapter having given the number of inhabitants of Florida by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural, the present chapter deals with the composition and characteristics of the population. The two chapters cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this chapter consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for the two cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of Jacksonville, the only city of more than 50,000.

A series of summary tables (numbered 1 to 14) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Florida, 443,634, or 58.9 per cent, are whites, and 308,669, or 41 per cent, negroes. The corresponding percentages in 1900 were 56.3 and 43.7, respectively. In 28 of the 47 counties negroes constitute from 25 to 50 per cent of the population, and in 10 the population is more than one-half negro. (See map on page 319.)

Native whites of native parentage constitute almost one-half (49.7 per cent) of the total population of the state and 84.3 per cent of the white population. Native whites of foreign or mixed parentage constitute only 4.8 per cent of the total population, and foreign-born whites 4.5 per cent.

Of the urban population, 37.1 per cent are native whites of native parentage; of the rural, 54.8 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 11.1 and 2.1 per cent, respectively. The percentage of foreign-born whites is 11.2 in the urban population and 1.7 in the rural; the percentage of negroes is 40.4 in the urban and 41.2 in the rural.

Sex (Table 2).—In the total population of the state there are 394,166 males and 358,453 females, or 110 males to 100 females. In 1900 the ratio was 108.7 to 100. Among the whites there are 110.2 males to 100 females; among the negroes, 109.5. For all native whites combined the ratio is 107 to 100, as compared with 157.6 to 100 for the foreign-born whites. In the urban population there are 102.8 males to 100 females, and in the rural, 113.1.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—65 per cent were born in Florida and 35 per cent outside the state; of the native white population, 35.5 per cent were born outside the state, and of the native negro, 34.3 per cent.

Persons born outside the state constitute a much larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Table 5).—Of the foreign-born white population of Florida, persons born in Cuba represent 26.3 per cent; Italy, 13.4; Spain, 12.4;

England, 8.6; Germany, 7.2; West Indies (except Cuba and Porto Rico), 5.6; Canada, 5; Ireland, 3.2; Turkey, 3.1; Greece, 2.6; Sweden, 2.2; all other countries, 10.5 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Cuba contributed 22.5 per cent; Germany, 10.7; Italy, 10.6; England, 10.6; Spain, 7.9; West Indies (except Cuba and Porto Rico), 7; Ireland, 5.3; Canada, 5.1; Scotland, 2.4; Sweden, 2.2 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 214,195, representing 28.5 per cent of the population. Of such males, 58 per cent are whites and 41.9 per cent negroes. Native whites represent 49.9 per cent of the total number and foreign-born whites 8.1 per cent. Of the 17,445 foreign-born white males of voting age, 5,959, or 34.2 per cent, are naturalized. Males of militia age—18 to 44—number 171,688.

Age (Tables 7, 8, and 12).—Of the total population, 12.9 per cent are under 5 years of age, 22.8 per cent from 5 to 14 years, inclusive, 20.5 per cent from 15 to 24, 28.5 per cent from 25 to 44, and 14.9 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 8.9 per cent of this class being under 15 years of age, while nearly three-fourths (72.3 per cent) are 25 years of age and over. The negro population comprises a somewhat smaller proportion of children under 15 than the native white population of native parentage.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 34.3 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 26.2 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 243,917, of whom 128,659, or 52.7 per cent, attended school. In addition to these, 2,547 persons under 6 and 2,149 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 51.8; for girls, 53.7. For children from 6 to 14 years, inclusive, the percentage attending school was 66. The percentage for children of this age among native whites of foreign or mixed parentage was 76.1; among native whites of native parentage, 72.1; among foreign-born whites, 63.5; and among negroes, 57.1. (See Table I.) In urban communities the percentage of children of that age attending school was 73.3, and in rural, 63.6.

Illiteracy (Table 10).—There are 77,816 illiterates in the state, representing 13.8 per cent of the total population 10 years of age and over, as compared with the much higher figure, 21.9 per cent, in 1900. The percentage of illiteracy is 25.5 among negroes, 10.5 among foreign-born whites, and 5 among native

whites. It is 5.2 for native whites of native parentage and 2.2 for native whites of foreign or mixed parentage.

For all classes combined, illiterates are fewer in urban than in rural communities, 8.4 per cent as against 16.2. For native whites the percentage illiterate is 1.1 in urban communities as compared with 6.4 in rural; for negroes the percentages are 15.4 and 30.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 9.9. (See Table I.)

Marital condition (Tables 11 and 13).—In the population 15 years of age and over, 36.4 per cent of the males are single and 23.5 per cent of the females. The percentage married is 56.3 for males and 63.8 for females, and the percentage widowed 5.2 and 11.2, respectively. The percentages of those reported as divorced, 0.6 and 0.8, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that women marry younger. Thus 21.5 per cent of the females from 15 to 19 years of age are married, as compared with 1.6 per cent of the males; 64.1 per cent of the females from 20 to 24 years are married, as compared with 29.4 per cent of the males; and among those from 25 to 34 years the percentages are 81.2 and 65.7, respectively. In the next age group, 35 to 44, the difference practically disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 58.6 for males, 67.9 for females; native whites of native parentage, 57.7 and 64.1, respectively; native whites of foreign or mixed parentage, 48.3 and 56.1, respectively; negroes, 54.9 for males and 63.7 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married is slightly higher for males, and decidedly higher for females, in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Florida is 165,818, and the total number of families 171,422, indicating that in very few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.5, and the average number per family, 4.4.

PER CENT OF NEGROES IN TOTAL POPULATION OF FLORIDA, BY COUNTIES: 1910.

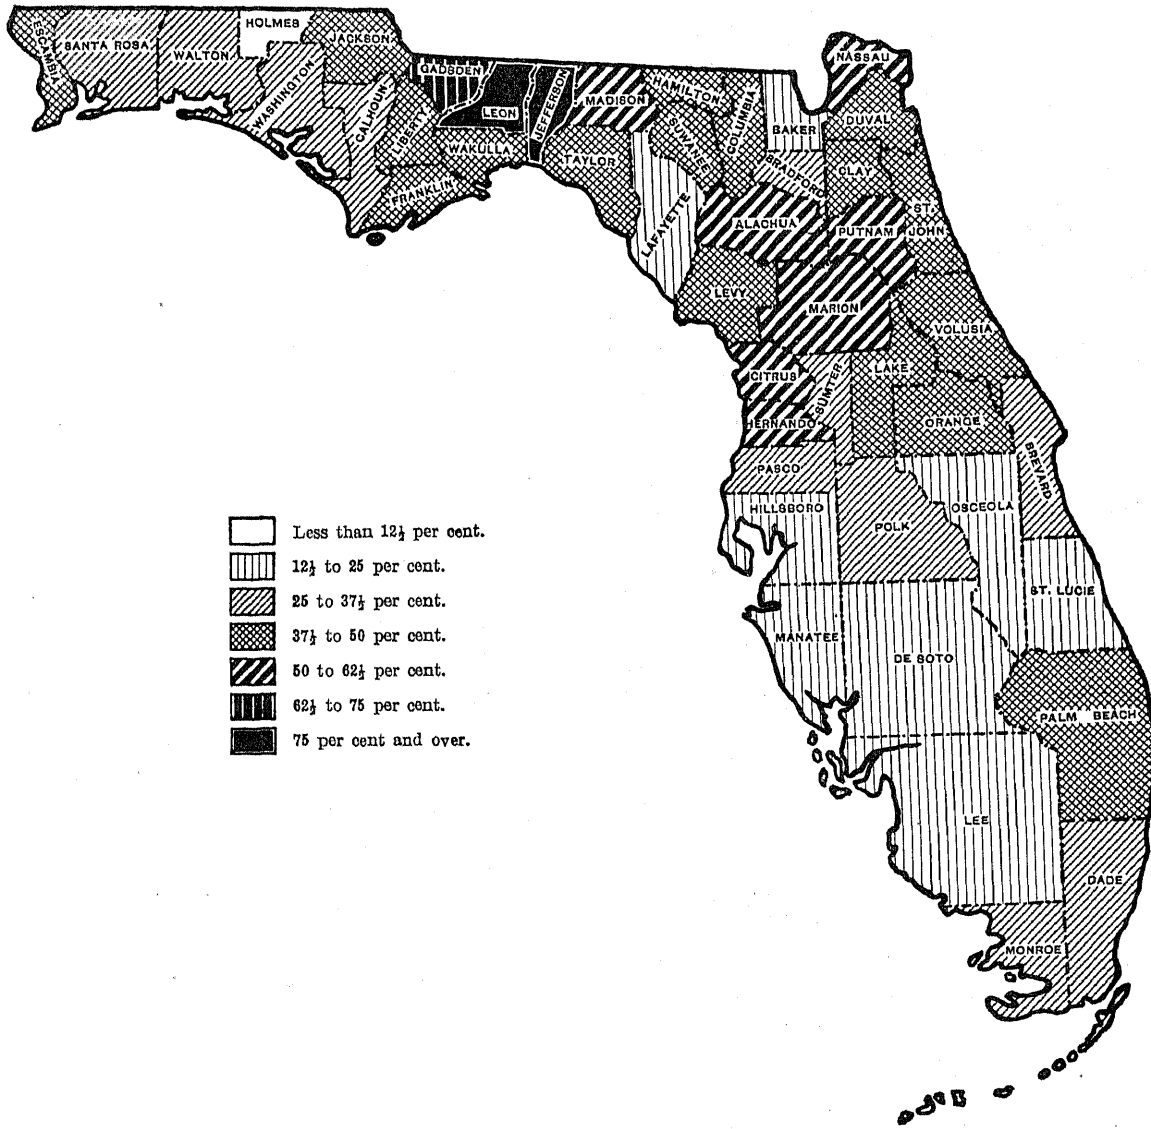

TABLE I.—COMPOSITION AND CHARACTERISTICS OF THE
[Per cent not shown where base is less than 100.]

SUBJECT.	THE STATE.	Alachua.	Baker.	Bradford.	Brevard. ¹	Calhoun.	Citrus. ¹	Clay.	Columbia.
POPULATION									
Total population, 1910.....	752,619	34,305	4,805	14,090	24,717	7,465	6,731	6,118	17,689
1900.....	525,542	32,245	4,516	10,295	25,168	5,132	5,391	5,035	17,094
1890.....	391,422	22,934	3,333	7,516	3,401	1,681	2,394	5,154	12,877
1880.....	269,493	16,462	2,303	6,112	1,478	1,530	2,538	9,539
1870.....	187,743	17,328	1,325	3,671	1,216	998	2,098	7,335
Increase, 1900-1910.....	224,077	2,060	289	3,795	2-441	2,333	1,340	481	595
Per cent of increase.....	42.4	6.4	6.4	36.9	-8.5	45.5	24.9	8.5	3.5
Increase, 1890-1900.....	137,120	9,311	1,183	2,779	1,757	3,451	2,997	481	4,217
Per cent of increase.....	35.0	40.6	35.5	37.0	51.7	205.3	125.2	0.3	32.7
Land area (square miles).....	54,861	1,262	587	539	1,025	1,192	620	617	792
Population per square mile, 1910.....	13.7	27.2	8.2	26.1	4.6	6.3	10.9	9.9	22.3
Rural population per square mile, 1910.....	9.7	22.3	8.2	26.1	4.6	6.3	10.9	9.9	16.0
URBAN AND RURAL TERRITORY.									
Urban, 1910—Places of 2,500 or more in 1910.....	219,080	6,183	5,032
Same places in 1900.....	126,257	3,633	4,013
Per cent of increase, 1900-1910.....	73.5	70.2	25.4
Rural, 1910—Remainder of county in 1910.....	533,539	28,122	4,805	14,090	24,717	7,465	6,731	6,118	12,657
Same territory in 1900.....	402,255	28,612	4,516	10,295	3,327	5,132	5,391	5,035	13,081
Per cent of increase, 1900-1910.....	32.6	-1.7	6.4	36.9	41.8	45.5	24.9	8.5	-3.2
Urban, 1900—Places of 2,500 or more in 1900.....	107,031	3,633	4,013
Rural, 1900—Remainder of county in 1900.....	421,511	28,612	4,516	10,295	5,158	5,132	5,391	5,035	13,081
Per cent in places of 2,500 or more, 1910.....	29.1	16.0	25.4
Per cent in places of 2,500 or more, 1900.....	20.3	11.3	23.5
COLOR AND NATIVITY									
White.....	443,634	15,212	3,646	10,101	3,311	5,325	3,096	3,662	9,277
Number in 1900.....	297,355	13,279	3,325	7,568	4,003	3,028	2,754	3,303	7,773
Number in 1880.....	224,949	8,673	2,638	5,961	1,138	2,090	3,652	6,593
Negro.....	308,609	19,092	1,159	3,987	1,399	2,140	3,635	2,453	8,411
Number in 1900.....	280,730	13,865	1,191	2,727	1,074	2,040	2,637	1,832	9,327
Number in 1880.....	166,180	13,800	745	1,565	641	549	304	1,521	6,424

NOTES REGARDING CHANGES IN BOUNDARIES, ETC.

COUNTIES.

BREVARD.—Part of Volusia annexed in 1879; part taken to form part of Osceola in 1887; part taken to form St. Lucie in 1905. (See also Note 1.)

CITRUS.—Organized from part of Hernando in 1887.

DADE.—Part taken to form Palm Beach in 1909. (See also Note 2.)

DE SOTO.—Organized from part of Manatee in 1887.

HERNANDO.—Parts taken to form Citrus and Pasco in 1887.

HILLSBORO.—Part annexed to Polk in 1874.

LAFAYETTE.—Part annexed to Taylor in 1877.

LAKE.—Organized from parts of Orange and Sumter in 1887.

LEE.—Organized from part of Monroe in 1887.

LEVY.—Part of Marion annexed in 1877.

MANATEE.—Part taken to form De Soto in 1887.

MARION.—Part annexed to Levy in 1877.

MONROE.—Part taken to form Lee in 1887.

ORANGE.—Part of Sumter annexed in 1872; parts taken to form parts of Lake and Osceola in 1887.

OSCEOLA.—Organized from parts of Brevard and Orange in 1887.

PALM BEACH.—Organized from part of Dade in 1909. (See also Note 2.)

PASCO.—Organized from part of Hernando in 1887; part annexed to Polk between 1890 and 1900.

POLK.—Part of Hillsboro annexed in 1874 and part of Pasco annexed between 1890 and 1900.

ST. LUCIE.—Organized from part of Brevard in 1905. (See also Note 1.)

SUMTER.—Part annexed to Orange in 1872 and part taken to form part of Lake in 1887.

TAYLOR.—Part of Lafayette annexed in 1877.

VOLUSIA.—Part annexed to Brevard in 1879.

NOTE 1.—*Brevard and St. Lucie Counties combined.*—Total population: 1910, 8,792; 1900, 5,158; increase, 1900-1910, 3,634; per cent of increase, 70.5. Rural population—1910, 8,792; same territory in 1900, 5,158; per cent of increase, 70.5. Rural population—1900, 5,158.

NOTE 2.—*Dade and Palm Beach Counties combined.*—Total population: 1910, 17,510; 1900, 4,955; increase, 1900-1910, 12,555; per cent of increase, 253.4. Urban population—1910, 5,471; same places in 1900, 1,681; per cent of increase, 225.5. Rural population—1910, 12,039; same territory in 1900, 3,274; per cent of increase, 267.7. Rural population—1900, 4,955. Per cent in places of 2,500 or more in 1910, 31.2.

CITIES.

TAMPA.—Parts of precincts 6 (comprising part of Fort Brook town), 27, 30, 31, 39, 40, 41, and 42 annexed in 1907.

GEORGIA.

CHAPTER 1.—NUMBER OF INHABITANTS.

Introduction.—This chapter gives the population of Georgia, by counties and minor civil divisions, as enumerated at the Thirteenth Census, taken as of April 15, 1910, with comparative statements of population where possible, and a statement and discussion for the state as a whole of the population living in urban and in rural territory. The statistics are given in detail in two general tables.

Table 1 (p. 342) shows the population of Georgia, distributed according to counties and minor civil divisions, at the last three censuses, namely, those of 1910, 1900, and 1890. In this table the counties are arranged alphabetically, while the primary divisions in each county are given in numerical order. The figures for secondary divisions for the most part are printed in italics. The changes in boundaries, name, or form of organization that have taken place since 1900 are indicated in the footnotes to the table. For changes between 1890 and 1900 reference must be made to the census report of 1900.

It may be noticed that the county totals as given in Table 1 for 1900 and 1890 sometimes exceed the aggregate population of the minor civil divisions as shown in the table. This is for the most part due to the territorial changes that have been made in the minor civil divisions of certain counties, and to the formation of new counties, since 1900. In a few cases divisions returned separately at the census of 1910 were not so returned at the census of 1890.

Table 2 (p. 360) shows the cities and the incorporated towns and villages of Georgia, alphabetically arranged, with their population in 1910, 1900, and 1890.

The population of Georgia, by counties, at each of the last five censuses, from 1870 to 1910, inclusive; the increase during the last two decades; the density

of the total and the rural population at the census of 1910; and the distribution of the population at the last two censuses according to urban and rural districts, are given in Table I of Chapter 2.

The tables and text of the present chapter contain few technical expressions whose meaning is not apparent. The census usage in regard to certain terms is, however, explained below:

Density of population.—The density of population of a state or county is obtained by dividing its total population by the number of square miles in its land area. In calculating the density of rural population, the same divisor is used as it is not practicable to ascertain and deduct the exact area covered by the urban districts, and even if this could be done with accuracy the deduction of this area from the total land area would ordinarily make no appreciable difference in the resulting quotient.

Minor civil divisions.—The counties are divided generally into smaller political units which bear different designations in the different parts of the country, such as towns, townships, election precincts, militia districts, etc. Of these minor civil divisions those which rank next to the county as geographic areas are termed primary divisions. In many instances, however, these primary divisions contain political units of still smaller area, such as cities, incorporated villages, towns, or boroughs. These smaller political units are referred to as secondary divisions.

Urban and rural population defined.—The Census Bureau, for purposes of discussion, has defined urban population as that residing in cities and other incorporated places of 2,500 inhabitants or more, and rural population as that residing outside of such incorporated places.

The comparisons of the urban and rural population in 1910 with that at earlier enumerations may be made either with respect to the varying proportions of the two classes at successive enumerations or with respect to the increase between enumerations. In order to contrast the *proportion* of the total population living in urban or rural territory at the census of 1910 with the proportion urban or rural at the preceding census, it is necessary to classify the territory according to the conditions *as they existed* at each census. In this comparison a place having less than 2,500 inhabitants in 1900 and over 2,500 in 1910 is classed with the rural population for 1900 and

HISTORICAL NOTE.—Georgia, the last of the thirteen original colonies in order of settlement, was named in honor of George II of England.

The region now forming this state was first explored in 1540, when De Soto, a Spaniard, traversed it on his way from Florida to the Mississippi. French explorers also visited this region within the next 25 years, but no permanent settlements were made by either the French or the Spanish. Mining operations, however, were begun by the Spanish in 1560 and continued during a period of more than a hundred years.

The greater part of what is now Georgia was included in the Carolina grant of 1663 and all was included in the Carolina grant of 1665 made by King Charles II to the proprietors of Carolina. No settlements within the present limits of the state were made under these grants, and in 1729 seven of the eight proprietors sold their shares of the territory to the English Crown. In June, 1732, the "Trustees for Establishing the Colony of Georgia in America" obtained a royal charter granting them all the lands between the Savannah and the Altamaha, and from the heads of these rivers to the Pacific Ocean. Twelve years later Lord Carteret sold to the trustees the remaining eighth of the Carolina grant.

The first settlement within the limits of what is now Georgia was made at Savannah in February, 1733, by colonists under James Oglethorpe, one of the trustees.

One of the objects of the colony was to provide a refuge for the oppressed and the destitute, especially poor debtors, orphans, friendless children and youth, and sufferers from religious persecution in Germany and other continental countries.

In 1763 the charter of the trustees expired and Georgia became a royal province, with the St. Marys River as the southern boundary. South Carolina, however, did not relinquish its claim to the tract between the Altamaha and St. Marys Rivers until 1787.

At the close of the Revolution the territory claimed by Georgia extended westward to the Mississippi. In 1798 the area now in Alabama and Mississippi north of the thirty-first parallel and south of the latitude of the mouth of the Yazoo (about 32° 30') was organized as the territory of Mississippi. In 1802 Georgia ceded to the United States all its claims to the region between its present western boundary and the Mississippi; and at the same time the northern boundary of the state, which had been a few miles south of the thirty-fifth parallel, was fixed at that line. Since 1802 the boundaries of the state have remained unchanged.

The Indian claims to lands in Georgia were relinquished at various times between the close of the Revolution and the year 1835.

Georgia was one of the thirteen original colonies. It adopted a state constitution in 1777, and ratified the Federal Constitution in 1788.

with the urban for 1910. On the other hand, in order to present fairly the contrast between urban and rural communities, as regards their *rate of growth*, it is necessary to consider the changes in population for the *same* territory which have occurred from one decennial census to another. For this purpose the territory which in 1910 was urban or rural, as the case may be, is taken as the basis, and the population in 1900 for the same territory (so far as separately reported

at that census) is presented, even though part of the territory may, on the basis of its population at the earlier census, have then been in a different class. This avoids the disturbing effect on comparisons which would arise from the passage, for example, of communities formerly classed as rural into the urban group. These two distinct forms of comparison are made in Table I of Chapter 2 for the state as a whole and for each county separately for the last two censuses.

TOTAL POPULATION, INCREASE, AND DISTRIBUTION.

Population of the state.—The population of Georgia is 2,609,121. Compared with a population of 2,216,331 in 1900, this represents an increase during the last decade of 392,790, or 17.7 per cent. During the same period the total population of the United States increased 21 per cent. The growth of the state during this decade was somewhat slower than during

the preceding decade, 1890–1900, when the rate was 20.6 per cent.

The following table shows the population of Georgia at each census from 1790 to 1910, inclusive, together with the increase and per cent of increase during each decade, in comparison with the per cent of increase for the United States as a whole.

CENSUS YEAR.	Population.	INCREASE OVER PRECEDING CENSUS.		Per cent of increase for the United States.
		Number.	Per cent.	
1910.....	2,609,121	392,790	17.7	21.0
1900.....	2,216,331	378,978	20.6	20.7
1890.....	1,837,353	295,173	19.1	25.5
1880.....	1,542,180	358,071	30.2	30.1
1870.....	1,184,109	126,823	12.0	22.6
1860.....	1,057,286	151,101	16.7	35.6
1850.....	906,185	214,793	31.1	35.9
1840.....	691,392	174,569	33.8	32.7
1830.....	516,823	175,834	51.6	33.5
1820.....	340,089	88,556	35.1	33.1
1810.....	252,433	89,747	55.2	36.4
1800.....	162,686	80,138	97.1	35.1
1790.....	82,548

It will be noticed from this table that during the first six decades the rate of growth was much higher than during the last six. During the first 60 years, 1790–1850, the rate of increase did not fall below 31 per cent in any decade, and the population at the end of the period was nearly eleven times as great as at the beginning. During the last 60 years, 1850–1910, the rates of increase ranged from 12 per cent to 30.2 per cent, and the population in 1910 was somewhat less than three times that of 1850. The numerical increase during the last decade was larger than that shown for any previous decade.

A comparison of the rates of increase for the state with those for the United States, as given in the above table, shows that during each decade from 1790 to 1840 the rate of increase for the state was higher than the rate for the United States. Since 1840 the rate of increase for the state has been lower than the rate for the country as a whole, except for the decade 1870–1880, when the rates were nearly identical, that of the state, however, being slightly the larger. The population of the state in 1910 was a little more than thirty-one and one-half times as large as in 1790, when the First Census was taken, while the population of the United States in 1910 was twenty-three times that in 1790.

Principal cities.—Georgia has 116 cities. Atlanta, the largest, has a population of 154,839, and Savan-

nah, the second city, a population of 65,064. Augusta, Macon, and Columbus, with 41,040, 40,665, and 20,554 inhabitants, respectively, are the only other cities in the state having over 20,000 inhabitants. There are also 4 cities having from 10,000 to 20,000, 13 having from 5,000 to 10,000, 13 having from 2,500 to 5,000, and 81 having less than 2,500 inhabitants.

Table 2 shows the population in 1910 of all the cities of the state with comparative figures, where possible, for 1900 and 1890. The table on page 337 shows the population of the five cities having in 1910 over 20,000 inhabitants, as reported at each census since their incorporation either as cities or towns, so far as figures are available, together with the increase during each decade.

Of the cities included in this table, Macon shows the highest rate of increase during the last decade, namely, 74.7 per cent, and Augusta the lowest, 4.1 per cent. Two cities, Savannah and Augusta, show a lower rate of increase for the last decade, 1900–1910, than for the preceding one, 1890–1900.

Atlanta has shown a very rapid growth since its incorporation, the rate of increase being over 70 per cent for every decade except 1890–1900, when it was only 37.1 per cent. The absolute increase during the last decade was very nearly as great as the total population of the city in 1890.

¹ A minus sign (-) denotes decrease.
² Not returned separately in 1850; in 1852, according to a census taken by local authorities, it had a population of 10,217.
³ Not returned separately.

Counties.—Georgia has 146 counties. The population of these counties ranges from 3,309 in Echols County to 177,733 in Fulton County.

The following territorial changes have been made in the counties of Georgia since 1900: Part of Jasper has been annexed to Newton; part of Oglethorpe was annexed in 1906 to Clarke; part of Clayton was annexed in 1908 to Fulton; part of Dooly was taken in 1905 to form Crisp; parts of Dooly, Irwin, Wilcox, and Worth were taken in 1905 to form Turner; parts of Irwin and Wilcox were taken in 1906 to form Ben Hill; parts of Berrien, Irwin, and Worth were taken in 1905 to form Tift; parts of Bulloch, Burke, Emanuel, and Screven were taken in 1905 to form Jenkins; parts of Emanuel, Montgomery, and Tattnall were taken in 1905 to form Toombs; parts of Appling and Coffee were taken in 1905 to form Jeff Davis; parts of Franklin and Habersham were taken in 1905 to form Stephens; and parts of Decatur and Thomas were taken in 1905 to form Grady.

Owing to the organization since 1900 of nine new counties from parts of other counties as shown above, the comparison of increase or decrease in population is made for only 120 counties and for five combinations of counties. The counties combined in order to determine their actual rates of increase are Decatur, Thomas, and Grady; Appling, Coffee, and Jeff Davis; Franklin, Habersham, and Stephens; Ben Hill, Tift, Turner, Crisp, Irwin, Wilcox, Berrien, Worth, and Dooly; and Jenkins, Bulloch, Burke, Emanuel, Screven, Toombs, Montgomery, and Tattnall. Ninety-five counties and the five combinations of counties increased in population during the last decade, while 25 counties decreased in population. The rates of

increase for the counties which do not enter into the combinations and which show increases, range from one-tenth of 1 per cent in Heard County to 66.8 per cent in Ware County, and the absolute increases of the same group of counties range from 12 in Heard County to 60,370 in Fulton County. The combinations of counties show rates of increase ranging from 20.6 to 52.4 per cent. The rates of decrease for the counties which do not enter into the combinations and which show decreases range from two-tenths of 1 per cent in Washington County to 26.8 per cent in Lumpkin County, and the absolute decreases of the same group of counties range from 53 in Washington County to 2,419 in Stewart County. The aggregate increase of population from 1900 to 1910 in the five combinations of counties and in the 95 remaining counties that showed increases was 411,324; the aggregate decrease of population in the 25 counties that showed decreases was 18,534. The difference, 392,790, is, of course, the total increase of population in the state.

The maps on page 340 show the increase or decrease in the total and the rural population, respectively, of each county of Georgia during the last decade. In the counties shown in white the population decreased; for the other counties the different rates of increase are indicated by differences in shading.

Density of population.—The total land area of the state is 58,725 square miles. The average number of persons to the square mile in 1910 was 44.4; in 1900 and 1890 it was 37.7 and 31.3, respectively. The average number per square mile for the United States as a whole in 1910 was 30.9.

The density of population is given by counties in Table I of Chapter 2 and in the maps on page 341, both

for the entire population and for that living in rural territory, excluding in the latter case the population of places of 2,500 inhabitants or more, but not excluding the land area of such places.

Clinch County, with 961 square miles, has the largest area, and Clarke County, with 114 square miles, has the smallest area. Fulton County, containing all of Atlanta city except part of one ward, has the highest density of any county, namely, 971.2 persons per square mile, while Charlton County, with 5.2 persons per square mile, has the lowest density.

Minor civil divisions.—The political divisions into which counties are subdivided are collectively termed "Minor civil divisions." In Georgia the counties are divided into 1,558 primary divisions, comprising that number of militia districts. There are also 561 sec-

ondary divisions, comprising 116 cities, 427 incorporated towns, and 18 incorporated villages. These secondary divisions usually form parts of the militia districts in which they are wholly or partly located, but 5 cities and 1 town are coextensive with one or more militia districts, while 2 cities each comprise 2 militia districts and parts of others.

Urban and rural population compared.—The following table presents the population of Georgia at the censuses of 1910, 1900, and 1890, respectively, distributed among places grouped according to specified limits of population, together with the percentage of the total population contained in each group at each of the censuses named. The classification is based upon the population of each place as it existed at each census.

Rural territory.....		2,070,471		1,869,949		1,579,881	79.4	84.4	86.0
Cities, towns, and villages of less than 2,500 inhabitants.....	516	285,803	344	193,680	211	126,717	11.0	8.7	6.9
Other rural territory.....		1,784,668		1,676,269		1,453,164	68.4	75.6	79.1

As shown by the above table, the urban territory of the state in 1910—that is, the cities and incorporated towns having 2,500 inhabitants or more—contained 538,650 inhabitants, or 20.6 per cent of the total population, while 2,070,471 inhabitants, or 79.4 per cent, lived in rural territory. The urban territory as it existed in 1900—that is, the cities and incorporated towns then having 2,500 inhabitants or more—contained 346,382 inhabitants, or 15.6 per cent of the total population, while 1,869,949 inhabitants, or 84.4 per cent, lived in rural territory. There has thus been a considerable increase in the proportion of urban population. For the United States as a whole the urban population constituted 46.3 per cent of the total population in 1910 and 40.5 per cent of the total population in 1900.

In 1910 the two cities then having more than 50,000 inhabitants each, Atlanta and Savannah, contained 8.4 per cent of the total population of the state. The corresponding percentage for 1900 was 6.5, while in 1890 Atlanta, the only city having over 50,000 inhabitants, comprised 3.6 per cent of the total population of the state. The combined population of the groups of urban places having less than 50,000 inhabitants each comprised 12.2, 9.1, and 10.4 per cent

of the total population of the state at the censuses of 1910, 1900, and 1890, respectively.

In 1910 the urban population of the state was contained in 35 cities and 10 towns, while the rural population was in 516 incorporated places of less than 2,500 inhabitants each and in the unincorporated territory. The 516 places of less than 2,500 inhabitants each had an aggregate population of 285,803, constituting 11 per cent of the total population of the state. These places comprise 85 having from 1,000 to 2,500 inhabitants each, with a combined population of 131,865; 101 having from 500 to 1,000 inhabitants each, with a combined population of 70,974; and 330 having less than 500 inhabitants each, with a combined population of 82,964. The population living in unincorporated territory constitutes 68.4 per cent of the total population of the state.

The above table shows further that in all incorporated places, including those of less than 2,500 inhabitants, there was in 1910 a population of 824,453, or 31.6 per cent of the population of the state. The population of all incorporated places, as they existed in 1900, was 540,062, or 24.4 per cent of the population of the state.

Table I of Chapter 2 shows that 21 counties and two combinations of counties had a larger proportion and 6 counties a smaller proportion of urban population in 1910 than in 1900. Nine counties and three combinations of counties which were wholly rural in 1900 were partly urban in 1910, while 84 counties were wholly rural at both censuses.

In order to compare the *rate of growth* in urban and rural communities it is necessary in each case, as previously explained, to consider the changes in population which have occurred in the *same* territory from one decennial census to another. With this end in view places classed as urban or rural according to their population in 1910 are taken as a basis and the aggregate population in 1910 and in 1900 of the same places is then compared. Thus, as shown in the next table, the total population in 1910 of the cities and towns which at that time had 2,500 inhabitants or more was 538,650; in 1900 the total population of the same places was 376,052. It may be noted that the latter figure exceeds the total population in 1900 of those cities and towns which at that time had over 2,500 inhabitants each, 346,382 (see table on p. 338), by 29,670. The difference is the result of the passage, since 1900, of certain communities from the rural to the urban class, and of annexations of territory during the same period.

A comparison of the total population in 1910 of cities and towns having a population of not less than 2,500 each with the total population of the same places in 1900, as given in the next table, shows an increase of 43.2 per cent. This represents the rate of growth of urban communities as thus defined. During the same period the rural population, comprising that of the remainder of the state, increased 12.5 per cent. The population of urban areas thus increased about three and one-half times as fast as rural. For the United States as a whole urban population increased

34.8 per cent in the last decade and rural population 11.2 per cent.

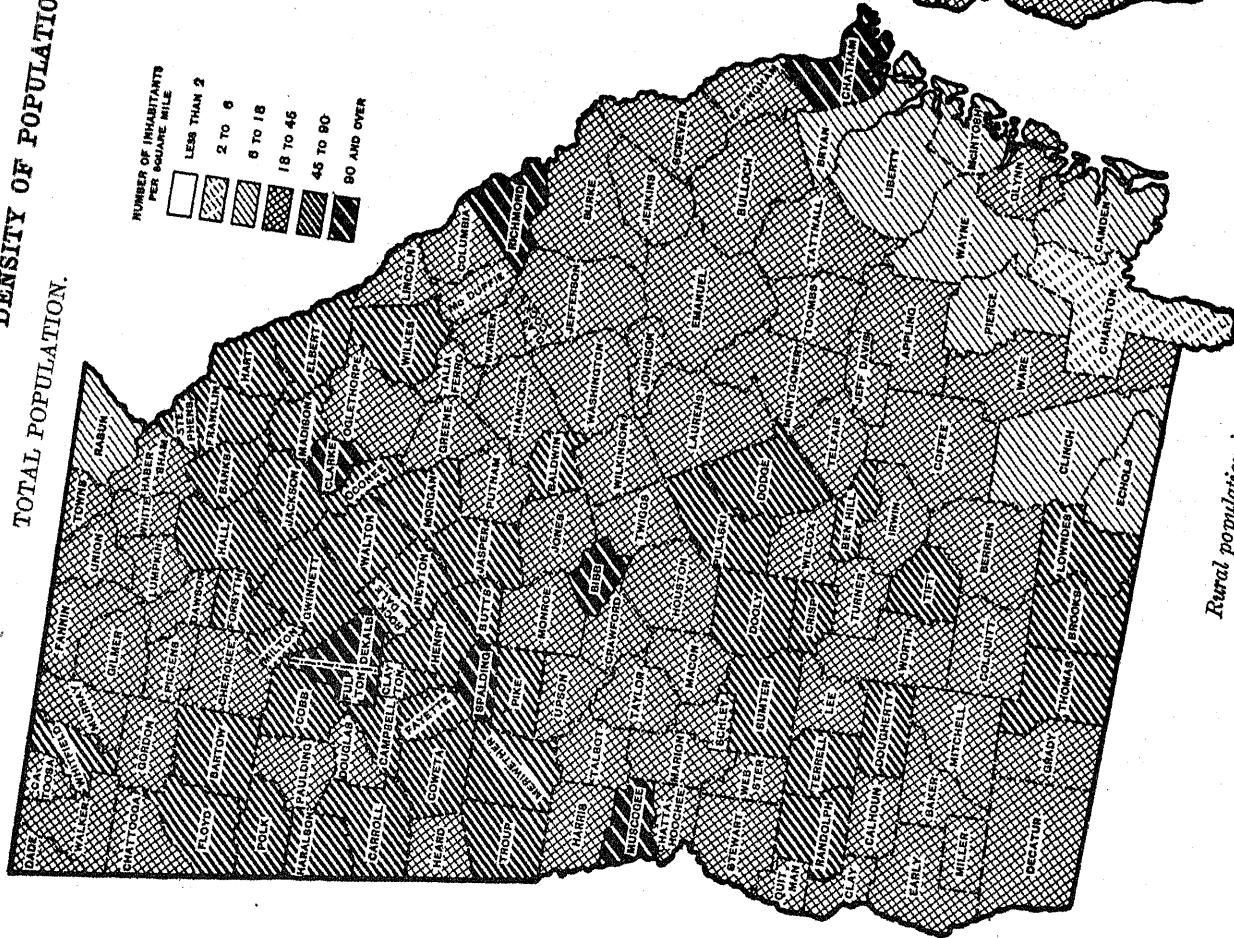

In the following table the population for the state as a whole is distributed so as to show, for 1910 and 1900, the population of the city of Atlanta, the combined population of the other cities having in 1910 over 25,000 inhabitants, the combined population of cities and towns having from 2,500 to 25,000 inhabitants, and the population of the remainder of the state.

CLASS OF PLACES.	POPULATION.		INCREASE: 1900-1910.	
	1910	1900	Number.	Per cent.
The state	2,609,121	2,216,331	392,790	17.7
Urban territory in 1910.....	538,650	376,052	162,598	43.2
City of Atlanta.....	154,839	92,203	62,636	67.9
Other cities of 25,000 inhabitants or more in 1910.....	146,769	116,957	29,812	25.5
Cities and towns of 2,500 to 25,000 inhabitants in 1910.....	237,042	166,892	70,150	42.0
Remainder of the state.....	2,070,471	1,840,279	230,192	12.5

From this table it appears that the city of Atlanta increased in population during the last decade less than four times as rapidly as the state as a whole. The growth of the remaining urban territory was less rapid than that shown for Atlanta. The group comprising places of over 25,000 inhabitants increased nearly one and one-half times the rate for the state as a whole, while the group comprising places of from 2,500 to 25,000 inhabitants increased almost two and one-half times that rate. The rate of increase for rural territory was somewhat more than two-thirds that for the state as a whole.

It also appears from this table that of the increase in the total population of the state during the decade, namely, 392,790, less than one-sixth was in the city of Atlanta. The larger fraction of this increase, or nearly three-fifths, was contributed by rural territory.

DENSITY OF POPULATION OF GEORGIA, BY COUNTIES: 1910.
TOTAL POPULATION.

Rural population is defined as that residing outside of incorporated places having 2,500 inhabitants or more.

RURAL POPULATION.

1 No. 1611 organized from part of No. 625 in 1904.
 2 Incorporated in 1903.
 3 Incorporated in 1904.
 4 No. 1603 organized from part of No. 1548 in 1903.
 5 Part taken to form part of Toombs County in 1905.
 6 County totals include population (2,342 in 1900; 1,468 in 1890) of No. 51, taken to form part of No. 1654 and part of Toombs County since 1900.
 7 Incorporated in 1909.
 8 No. 1600 organized from parts of Nos. 394 and 1450 in 1904.
 9 Incorporated in 1908.
 10 Parts taken to form parts of Nos. 1654 and 1668 in 1907.
 11 Incorporated as a city in 1901.
 12 Name changed from Zaldee in 1906. Parts taken to form parts of Nos. 1654 and 1668 in 1907.
 13 Incorporated in 1902.
 14 Part taken to form part of No. 1668 in 1907.

15 Organized from parts of Nos. 51, 1343, and 1386 in 1907.
 16 Incorporated in 1907.
 17 Organized from parts of Nos. 1343, 1386, and 1567 in 1907.
 18 Incorporated in 1901.
 19 Incorporated in 1906.
 20 County total includes population (1,576) of Nos. 675 and 774, not returned separately; and population (17,303) of Columbus city, returned independently, in 1890.
 21 Part of No. 773 (ward 3 of Columbus city) annexed in 1907.
 22 Not returned separately in 1890.
 23 Part annexed to No. 773 since 1900.
 24 Includes population of part of Columbus city.
 25 Part annexed to No. 668 in 1907; part of No. 772 (wards 7 and 8 of Columbus city) annexed since 1900.
 26 Part of Jasper County annexed since 1900.
 27 Part taken to form part of No. 1618 in 1905.

No. 179, Anderson.....	1,075	1,056	1,084				

¹ Parts taken to form parts of Turner and Ben Hill Counties in 1905 and 1906, respectively.

² County total includes population (545) of No. 1171, taken to form No. 1667 and part of Ben Hill County; and population (1,308) of No. 1317, taken to form part of Turner County since 1900.

³ County total includes population (1,053) of Nos. 1171 and 1317, not returned separately in 1890.

⁴ Name changed from Glnhouse in 1902. Part taken to form No. 1593 in 1902.

⁵ Returned as 1,277 in 1900.

⁶ No. 1630 organized from parts of Nos. 1321 and 1546 in 1906.

⁷ Organized from part of No. 1103 in 1902.

⁸ Incorporated in 1906.

⁹ Incorporated in 1902.

¹⁰ Organized from part of No. 1171 in 1907.

¹¹ Incorporated as a city in 1900.

¹² Incorporated in 1907.

¹³ Incorporated in 1904.

¹⁴ Incorporated in 1904.

¹⁵ Parts taken to form parts of Tift and Turner Counties in 1905.

¹⁶ No comparison of population can be made; numerous changes made since 1900.

¹⁷ Incorporated in 1900.

¹⁸ Incorporated in 1903.

¹⁹ Incorporated as a city in 1904.

²⁰ Incorporated as a city in 1906.

CHAPTER 2.—COMPOSITION AND CHARACTERISTICS OF THE POPULATION.

Introduction.—The first chapter having given the number of inhabitants of Georgia by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural, the present chapter deals with the composition and characteristics of the population. The two chapters cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this chapter consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of Atlanta.

A series of summary tables (numbered 1 to 15) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Georgia, 1,431,802, or 54.9 per cent, are whites, and 1,176,987, or 45.1 per cent, negroes. The corresponding percentages in 1900 were 53.3 and 46.7, respectively. In 49 of the 146 counties negroes constitute from 25 to 50 per cent of the population, and in 66 counties the population is more than 50 per cent negro. (See map on page 405.)

Native whites of native parentage constitute 53.3 per cent of the total population of the state, and 97.2 per cent of the white population. Native whites of foreign or mixed parentage constitute only 1 per cent of the total population, and foreign-born whites 0.6 per cent.

Of the urban population, 52.4 per cent are native whites of native parentage; of the rural, 53.5 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 3.6 and 0.3 per cent, respectively. The percentage of foreign-born whites is 2.2 in the urban population and 0.2 in the rural; the percentage of negroes is 41.7 in the urban and 46 in the rural.

Sex (Table 2).—In the total population of the state there are 1,305,019 males and 1,304,102 females, or 100.1 males to 100 females. In 1900 the ratio was 99.1 to 100. Among the whites there are 102.4 males to 100 females; among the negroes, 97.2. Among native whites the ratio is 101.9 to 100, as compared with 171.4 to 100 for the foreign-born whites. In the urban population there are 92.6 males to 100 females, and in the rural, 102.1.

State of birth (Tables 3 and 4).—Of the total native population—that is, population born in the United States—91.2 per cent were born in Georgia and 8.8 per cent outside the state; of the native white population, 10.6 per cent were born outside the state, and of the native negro, 6.8 per cent. Persons born outside the state constitute a much larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Tables 5 and 12).—Of the foreign-born white population of Georgia, persons born in Russia represent 21.4 per cent; Germany, 20.1; Ireland, 11; England, 10.9; Greece, 6.2; Canada, 5.2; Italy, 3.6; Scotland, 3.5; Turkey, 3.2; all other countries, 14.9 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Germany contributed 24.2 per cent; Ireland, 18.5; Russia, 13.4; England, 11.9; Canada, 4.6; Scotland, 4.3; Greece, 2.7; Italy, 2.4; France, 2 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 620,616, representing 23.8 per cent of the population. Of such males, 57 per cent are white and 43 per cent negroes. Native whites represent 55.6 per cent of the total number and foreign-born whites 1.4 per cent. Of the 8,513 foreign-born white males of voting age, 4,023, or 47.3 per cent, are naturalized. Males of militia age—18 to 44—number 497,095.

Age (Tables 7, 8, and 13).—Of the total population, 14.4 per cent are under 5 years of age, 25.4 per cent from 5 to 14 years, inclusive, 20.7 per cent from 15 to 24, 24.7 per cent from 25 to 44, and 14.6 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 5.4 per cent of this class being under 15 years of age, while nearly four-fifths (79.9 per cent) are 25 years of age and over.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 32.5 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 22.7 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 925,865, of whom 480,378, or 51.9 per cent, attended school. In addition to these, 7,863 persons under 6 and 6,540 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 51; for girls, 52.7. For children from 6 to 14 years, inclusive, the percentage attending school was 65.6. The percentage for children of this age among native whites of foreign or mixed parentage was 84.5; among foreign-born whites, 76; among native whites of native parentage, 74.8; and among negroes, 55.4. (See Table I.) In urban communities the percentage of children of that age attending school was 74.2, and in rural, 64.

Illiteracy (Table 10).—There are 389,775 illiterates in the state, representing 20.7 per cent of the total population 10 years of age and over, as compared with 30.5 per cent in 1900. The percentage of illiteracy is 36.5 among negroes, 7.8 among native whites, and 6 among foreign-born whites. It is 8 for native whites

of native parentage and 1.6 for native whites of foreign or mixed parentage.

Illiteracy is greater in rural than in urban communities for the total population—23.2 per cent as against 12—and also for each class of the population except foreign-born whites, whose literacy, since most of them arrive in this country when past the school age, is not determined by their immediate environment.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 14.1. (See Table I.)

Marital condition (Tables 11 and 14).—In the population 15 years of age and over, 34.2 per cent of the males are single and 26.5 per cent of the females. The percentage married is 60.4 for males and 60.2 for females, and the percentage widowed, 4.8 and 12.5, respectively. The percentages of those reported as divorced, 0.3 and 0.5, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that women marry younger. Thus 19.7 per cent of the females from 15 to 19 years of age are married, as compared with 3.1 per cent of the males, and 61.6 per cent of the females from 20 to 24 years of age are married, as compared with 38.9 per cent of the males. In the next age group, 25 to 34 years, the difference largely disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages married among those 15 years of age and over are as follows: Foreign-born whites, 58.7 for males, 63.4 for females; native whites of native parentage, 60.2 and 61.2, respectively; native whites of foreign or mixed parentage, 50.2 and 49.5; negroes, 60.9 and 59.3.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married is somewhat higher for males, and decidedly higher for females in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Georgia is 530,631, and the total number of families 553,264, indicating that in comparatively few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.9, and the average number per family, 4.7.

NOTES REGARDING CHANGES IN BOUNDARIES, ETC.

COUNTIES.

APPLING.—Part taken to form part of Jeff Davis in 1905. (See also Note 1.)

BANKS.—Part of Jackson annexed between 1870 and 1880.

BEN HILL.—Organized from parts of Irwin and Wilcox in 1906. (See also Note 2.)

BERRIEN.—Part taken to form part of Tift in 1905. (See also Note 2.)

BULLOCH.—Part taken to form part of Jenkins in 1905. (See also Note 3.)

BURKE.—Part taken to form part of Jenkins in 1905. (See also Note 2.)

CAMPBELL.—Part taken to form Douglas in 1870; part of Fayette annexed in 1870.

CARROLL.—Part of Douglas annexed in 1877.

CLARKE.—Part taken to form Oconee in 1875; part of Oglethorpe annexed in 1906.

CLAYTON.—Part annexed to Fulton in 1908.

COFFEE.—Part taken to form part of Jeff Davis in 1905. (See also Note 1.)

COLUMBIA.—Part taken to form part of McDuffie in 1870.

CRISP.—Organized from part of Dooly in 1905. (See also Note 2.)

DECATUR.—Part taken to form part of Grady in 1905. (See also Note 4.)

DODGE.—Organized from parts of Montgomery, Pulaski, and Telfair in 1870.

DOOLY.—Parts taken to form Crisp and part of Turner in 1905. (See also Note 2.)

DOUGLAS.—Organized from part of Campbell in 1870; part annexed to Carroll in 1877.

EMANUEL.—Parts taken to form parts of Jenkins and Toombs in 1905. (See also Note 3.)

FAYETTE.—Part annexed to Campbell in 1870.

FRANKLIN.—Part taken to form part of Stephens in 1905. (See also Note 5.)

FULTON.—Part of Clayton annexed in 1908.

GRADY.—Organized from parts of Decatur and Thomas in 1905. (See also Note 4.)

HABERSHAM.—Part taken to form part of Stephens in 1905. (See also Note 5.)

HENRY.—Part taken to form part of Rockdale in 1870.

IRWIN.—Parts taken to form parts of Tift and Turner in 1905, and part of Ben Hill in 1906. (See also Note 2.)

JACKSON.—Parts annexed to Banks between 1870 and 1880.

JEFF DAVIS.—Organized from parts of Appling and Coffee in 1905. (See also Note 1.)

JENKINS.—Organized from parts of Bulloch, Burke, Emanuel, and Screven in 1905. (See also Note 3.)

LIBERTY.—Part of McIntosh annexed in 1871.

MCDUFFIE.—Organized from parts of Columbia and Warren in 1870.

MCINTOSH.—Part annexed to Liberty in 1871.

MONTGOMERY.—Parts taken to form part of Dodge in 1870 and part of Toombs in 1905. (See also Note 3.)

NEWTON.—Part taken to form part of Rockdale in 1870.

OCONEE.—Organized from part of Clarke in 1875.

OGLETHORPE.—Part annexed to Clarke in 1906.

PULASKI.—Part taken to form part of Dodge in 1870.

ROCKDALE.—Organized from parts of Henry and Newton in 1870.

SCREVEN.—Part taken to form part of Jenkins in 1905. (See also Note 3.)

STEPHENS.—Organized from parts of Franklin and Habersham in 1905. (See also Note 5.)

TATTNALL.—Part taken to form part of Toombs in 1905. (See also Note 3.)

TELFAIR.—Part taken to form part of Dodge in 1870.

THOMAS.—Part taken to form part of Grady in 1905. (See also Note 4.)

TIFT.—Organized from parts of Berrien, Irwin, and Worth in 1905. (See also Note 2.)

TOOMBS.—Organized from parts of Emanuel, Montgomery, and Tattnall in 1905. (See also Note 3.)

TURNER.—Organized from parts of Dooly, Irwin, Wilcox, and Worth in 1905. (See also Note 2.)

WARREN.—Part taken to form part of McDuffie in 1870.

WILCOX.—Parts taken to form part of Turner in 1905 and part of Ben Hill in 1906. (See also Note 2.)

WORTH.—Parts taken to form parts of Tift and Turner in 1905. (See also Note 2.)

Note 1.—Appling, Coffee, and Jeff Davis Counties combined.—Total population: 1910, 40,321, 1900, 28,505; increase, 1900-1910, 11,816; per cent of increase, 41.5. Urban population—1910, 3,550; same places in 1900, 617; per cent of increase, 475.4. Rural population—1910, 36,771; same territory in 1900, 27,888; per cent of increase, 81.9. Rural population—1900, 28,505. Per cent in places of 2,500 or more in 1910, 8.8.

Note 2.—Ben Hill, Berrien, Crisp, Dooly, Irwin, Tift, Turner, Wilcox, and Worth Counties combined.—Total population: 1910, 136,208, 1900, 89,413; increase, 1900-1910, 46,865; per cent of increase, 52.4. Urban population—1910, 11,678; same places in 1900, 5,290; per cent of increase, 120.8. Rural population—1910, 124,500; same territory in 1900, 84,123; per cent of increase, 48.1. Urban population—1900, 3,473; rural population—1900, 85,940. Per cent in places of 2,500 or more in 1910, 8.6. Per cent in places of 2,500 or more in 1900, 3.9.

Note 3.—Bulloch, Burke, Emanuel, Jenkins, Montgomery, Screven, Tattnall, and Toombs Counties combined.—Total population, 1910, 180,007, 1900, 128,851; increase, 1900-1910, 51,156; per cent of increase, 24.2. Urban population—1910, 8,258; same places in 1900, 3,227; per cent of increase, 62.9. Rural population—1910, 154,749; same territory in 1900, 125,624; per cent of increase, 23.2. Rural population—1900, 128,851. Per cent in places of 2,500 or more in 1910, 3.3.

Note 4.—Decatur, Grady, and Thomas Counties combined.—Total population: 1910, 76,573, 1900, 60,530; increase, 1900-1910, 16,043; per cent of increase, 26.5. Urban population—1910, 10,944; same places in 1900, 7,963; per cent of increase, 37.4. Rural population—1910, 65,629; same territory in 1900, 52,567; per cent of increase, 24.8. Urban population—1900, 7,963; rural population—1900, 52,567. Per cent in places of 2,500 or more in 1910, 14.3. Per cent in places of 2,500 or more in 1900, 13.2.

Note 5.—Franklin, Habersham, and Stephens Counties combined.—Total population: 1910, 37,766, 1900, 31,304; increase, 1900-1910, 6,462; per cent of increase, 20.0. Urban population—1910, 3,120; same places in 1900, 2,170; per cent of increase, 43.4. Rural population—1910, 34,646; same territory in 1900, 29,128; per cent of increase, 18.9. Rural population—1900, 31,304. Per cent in places of 2,500 or more in 1910, 8.3.

INCORPORATED PLACES.

ALBANY.—Part of Militia District No. 1097 (East Albany village) annexed in 1910.

ATLANTA.—Part of Militia District No. 1379 (Edgewood town) and part of No. 1690 annexed in 1909; part of No. 530 (Oakland City town), part of No. 1511 (Battle Hill town), and part of No. 1348, Fulton County, annexed in 1910; and parts of No. 1362, Fulton County, annexed in 1905 and 1910.

CARROLLTON.—Part of Militia District No. 714 annexed in 1908.

MACON.—Parts of Militia District No. 1085 annexed in 1903, 1908, and 1910 and parts of Nos. 481 and 514 annexed in 1910.

ROME.—Parts of Militia District No. 919 (East Rome and North Rome towns) annexed in 1908.

IDAHO.

CHAPTER 1.—NUMBER OF INHABITANTS.

Introduction.—This chapter gives the population of Idaho, by counties and minor civil divisions, as enumerated at the Thirteenth Census, taken as of April 15, 1910, with comparative statements of population where possible, and a statement and discussion for the state as a whole of the population living in urban and in rural territory. The statistics are given in detail in two general tables.

Table 1 (p. 413) shows the population of Idaho in 1910, distributed according to counties and minor civil divisions, and, so far as possible, in comparison with similar figures for 1900 and 1890. The arrangement of counties and of the primary divisions in each county is alphabetical. The figures for secondary divisions are printed in italics. The changes in boundaries, name, or form of organization that have taken place since 1900 are indicated in the footnotes to the table. For changes between 1890 and 1900 reference must be made to the census report of 1900.

Owing to the numerous changes that have taken place during the period covered by this table in the election precincts which constitute the primary divisions of the counties, comparisons of the population in 1910 with that of 1900 and 1890 are in many cases impossible. Such comparisons are, however, made for all the precincts existing in 1910 which were also in existence at one or both of the earlier censuses, and which were returned separately at those censuses. In some counties the changes are so extensive and in others the information in regard to them is so incomplete that no comparisons can be made except for incorporated places. In addition, the population of two counties was not returned by precincts in 1890.

The total population in 1900 and 1890 of the counties returned by precincts for those years exceeds, except in the case of two counties in 1900, the aggre-

gate for the minor civil divisions shown in the table. In most instances this results from the fact that precincts or other civil divisions in existence in 1900 or 1890 had gone out of existence by 1910, their territory having been annexed to other precincts or having been taken to form new precincts. In some cases, however, precincts that were returned separately in 1910 were returned in combination with other precincts at one of the earlier censuses; in some cases precincts in one county in 1900 or 1890 were in another county at a later census; and in some cases still other factors contribute to the difference.

Table 2 (p. 420) shows the cities and incorporated towns and villages in Idaho, alphabetically arranged, with their population in 1910, 1900, and 1890.

The population of Idaho, by counties, at each of the last five censuses, from 1870 to 1910, inclusive; the increase during the last two decades; the density of the total and the rural population at the census of 1910; and the distribution of the population at the last two censuses according to urban and rural districts, are given in Table I of Chapter 2.

The tables and text of the present chapter contain few technical expressions whose meaning is not apparent. The census usage in regard to certain terms is, however, explained below:

Density of population.—The density of population of a state or county is obtained by dividing its total population by the number of square miles in its land area. In calculating the density of rural population, the same divisor is used as it is not practicable to ascertain and deduct the exact area covered by the urban districts, and even if this could be done with accuracy the deduction of this area from the total land area would ordinarily make no appreciable difference in the resulting quotient.

Minor civil divisions.—The counties are divided generally into smaller political units which bear different designations in the different parts of the country, such as towns, townships, election pre-

HISTORICAL NOTE.—The name Idaho is of Indian derivation and signifies "gem of the mountains."

The area now constituting this state was first visited by white men when an exploring expedition sent out by the United States Government under Lewis and Clark traversed it in 1805-6. The first permanent settlement was made in 1834, when a trading-post was established at Fort Hall, in what is now the south-eastern part of the state. Few white men came to this region, however, until 1800 when the discovery of gold on Oro Fino Creek attracted prospectors and miners in large numbers.

The Oregon country, of which Idaho originally formed a part, was, at the beginning of the nineteenth century, claimed by the United States, Great Britain, Spain, and Russia, each nation basing its right to possession on discoveries and explorations. Spanish and English navigators had visited the Oregon coast at various times during the sixteenth and succeeding centuries. Russia had made settlements in Alaska in the early part of the eighteenth century and for this reason laid claim to territory as far south as the present state of California. Americans from ships sent out by Boston merchants late in the eighteenth century were the first white men to explore the interior of the Oregon country.

All that remained of the Spanish claim after the cession of Louisiana to France in 1800 was relinquished at the time of the Florida Purchase in 1819, when Spain

transferred to the United States "all rights, claims, and pretensions to any country north of the forty-second parallel." In 1824 Russia surrendered to the United States all claims south of latitude 54° 40'. In 1818 a treaty had been concluded between the United States and England, under which the United States and Great Britain jointly occupied the Oregon region, but in 1846 this joint occupation was terminated by a treaty fixing the present boundary between the United States and Canada.

The territory of Oregon, which included the area now constituting the state of Idaho, was organized in 1848. In 1853 the territory of Washington was organized, and included what is now northern Idaho, but left southern Idaho still a part of Oregon territory. In 1859, when Oregon, with its present boundaries became a state, the remainder of the region now forming Idaho was added to Washington territory. In March, 1863, Idaho territory was organized from parts of the territories of Washington, Dakota, and Nebraska; it then included the area now comprising Idaho, Montana, and part of Wyoming. The organization of Montana and Wyoming as territories in 1864 and 1868, respectively, left Idaho with its present boundaries.

In 1889 a state constitution was adopted, under authority of an act of Congress, and in 1890 Idaho was admitted to the Union.

cincts, etc. Of these minor civil divisions, those which rank next to the county as geographic areas are termed "primary divisions." In many instances, however, these primary divisions contain political units of still smaller area, such as cities, incorporated villages, towns, or boroughs. These smaller political units are referred to as secondary divisions.

Urban and rural population defined.—The Census Bureau, for purposes of discussion, has defined urban population as that residing in cities and other incorporated places of 2,500 inhabitants or more, and rural population as that residing outside of such incorporated places.

The comparisons of the urban and rural population in 1910 with that at earlier enumerations may be made either with respect to the varying proportions of the two classes at successive enumerations or with respect to the increase between enumerations. In order to contrast the *proportion* of the total population living in urban or rural territory at the census of 1910 with the proportion urban or rural at the preceding census, it is necessary to classify the territory

according to the conditions *as they existed* at each census. In this comparison a place having less than 2,500 inhabitants in 1900 and over 2,500 in 1910 is classed with the rural population for 1900 and with the urban for 1910. On the other hand, in order to present fairly the contrast between urban and rural communities, as regards their *rate of growth*, it is necessary to consider the changes in population for the *same* territory which have occurred from one decennial census to another. For this purpose the territory which in 1910 was urban or rural, as the case may be, is taken as the basis, and the population in 1900 for the same territory (so far as separately reported at that census) is presented, even though part of the territory may, on the basis of its population at the earlier census, have then been in a different class. This avoids the disturbing effect on comparisons which would arise from the passage, for example, of communities formerly classed as rural into the urban group. These two distinct forms of comparison are made in Table I of Chapter 2 for the state as a whole and for each county separately for the last two censuses.

TOTAL POPULATION, INCREASE, AND DISTRIBUTION.

Population of the state.—The population of Idaho is 325,594. Compared with a population of 161,772 in 1900, this represents an increase during the last decade of 163,822, or 101.3 per cent. During the same period the total population of the United States increased 21 per cent. During the decade 1890–1900 the popu-

lation of the state increased 73,224, or 82.7 per cent. The following table shows the population of Idaho at each census from 1870 to 1910, inclusive, together with the increase and per cent of increase during each decade, in comparison with the per cent of increase for the United States as a whole.

CENSUS YEAR.	Population.	INCREASE OVER PRECEDING CENSUS.		Per cent of increase for the United States.
		Number.	Per cent.	
1910.....	325,594	163,822	101.3	21.0
1900.....	161,772	73,224	82.7	20.7
1890.....	183,548	55,938	171.5	25.5
1880.....	32,610	17,611	117.4	30.1
1870.....	14,990			

¹ Includes population (4,103) of Indian reservations specially enumerated.

Idaho was organized as a territory in 1863 and appears in the Federal census reports for the first time in 1870. During the 40 years that have elapsed since 1870 its population has rapidly increased, the population in 1910 being nearly twenty-two times as great as in 1870. The percentage of increase has not fallen below 100 per cent except during the decade 1890–1900, when it was 82.7 per cent. The highest percentage of increase, 171.5 per cent, was during the decade 1880–1890.

During the 40 years in which the population of the state multiplied nearly twenty-two times, the population of the United States multiplied only a little more than two and one-third times.

Principal cities.—Idaho has 25 cities. Boise, the largest city, has a population of 17,358, and Pocatello, the next largest city, a population of 9,110, while Bellevue, the smallest city, has a population of 702. The aggregate population of the 25 cities is 88,504, or 27.2 per cent of the total population of the state.

The following table shows the population of the 5 cities having in 1910 over 5,000 inhabitants, as re-

ported at each census since their incorporation either as cities or towns, so far as figures are available, together with the increase during each decade.

CITY AND CENSUS YEAR.	Population.	INCREASE OVER PRECEDING CENSUS.	
		Number.	Per cent.
Boise:			
1910.....	17,358	11,401	191.4
1900.....	5,957	3,646	157.8
1890.....	2,811	412	21.7
1880.....	1,859	904	90.9
1870.....	995		
Coeur d'Alene:			
1910.....	7,291	6,783	1,335.2
1900.....	508	17	3.5
1890.....	491		
Lewiston:			
1910.....	5,043	3,618	149.2
1900.....	2,425	1,576	155.6
1890.....	849	110	14.9
1880.....	739		
Pocatello:			
1910.....	9,110	5,064	125.2
1900.....	4,046		
Twin Falls:			
1910.....	5,258		

Of the cities included in this table, Coeur d'Alene shows the highest percentage of increase during the last decade, namely, 1,335.2 per cent, and Pocatello the lowest, 125.2 per cent.

Table 2 shows the population in 1910 of all the cities of the state with comparative figures, where possible, for 1900 and 1890.

Counties.—Idaho has 23 counties. The population of these counties ranges from 3,001 in Custer County to 29,088 in Ada County.

The following territorial changes have been made in the counties of Idaho since 1900: In 1907 a part of Cassia County was taken to form Twin Falls County and a part of Kootenai County was taken to form Bonner County; in 1905 a part of Bingham County was annexed to Fremont County and a part of Shoshone County was annexed to Nez Perce County.

Owing to the organization since 1900 of two new counties from parts of other counties as shown above, the comparison of increase in population is made for only 19 counties and two combinations of counties. The combinations of counties are Bonner with Kootenai, and Twin Falls with Cassia. In order to determine the actual rate of increase for these counties, it is necessary to add the population of the new county to that of the old county from which it was formed. Each county and combination of counties in the state increased in population during the last decade. The rates of increase for the counties which do not enter into the combinations and which show increases range from 6.3 per cent in Owyhee County to 610.5 per cent in Lincoln County, and the absolute increases of the same group of counties range from 240 in Owyhee County to 17,826 in Canyon County. The combined counties of Kootenai and Bonner increased 255.7 per cent in population, while the combined counties of Twin Falls and Cassia increased 424.9 per cent. The two combinations of counties and five of the remaining counties show a larger percentage of increase than that shown for the state as a whole, which, as before stated, was 101.3 per cent.

The maps on page 411 show the increase in the total and the rural population, respectively, of each county

of Idaho during the last decade, the different rates of increase being indicated by differences in shading.

Density of population.—The total land area of the state is 83,354 square miles. The average number of persons to the square mile in 1910 was 3.9; in 1900 and 1890 it was 1.9 and 1.1, respectively. The average number per square mile for the United States as a whole in 1910 was 30.9.

The density of population is given by counties in Table I of Chapter 2 and in the maps on page 412, both for the entire population and for that living in rural territory, excluding in the latter case the population of places of 2,500 inhabitants or more, but not excluding the land area of such places.

Idaho County, with 11,012 square miles, has the largest area, and Bear Lake County, with 942 square miles, has the smallest area. Ada County, containing Boise city, has the highest density of any county, namely, 25.6 persons per square mile, while Owyhee County has the lowest density, namely, 0.5.

Minor civil divisions.—The political divisions into which counties are subdivided are collectively termed "Minor civil divisions." In Idaho the counties are divided into 566 primary divisions, comprising that number of election precincts. There are also 101 secondary divisions in the state, comprising 25 cities, 70 villages, and 6 towns. In Table 1 the population is shown by election precincts, and the population of cities, villages, and towns is presented in connection with the population of the election precincts included within their limits or of which they form a part. Besides these minor civil divisions there are two Indian reservations and part of another. These reservations, while independent of any county organization, for convenience are returned as parts of the counties in which they are wholly or partly located.

Urban and rural population compared.—The table following presents the population of Idaho at the censuses of 1910, 1900, and 1890, respectively, distributed among places grouped according to specified limits of population, together with the percentage of the total population contained in each group at each of the censuses named. The classification is based upon the population of each place as it existed at each census.

CLASS OF PLACES.	1910		1900		1890		PER CENT OF TOTAL POPULATION.		
	Number of places.	Population.	Number of places.	Population.	Number of places.	Population.	1910	1900	1890

Urban territory.....	12	69,898	2	10,003			21.5	6.2	
Cities of 10,000 inhabitants or more.....	1	17,358					5.3		
Cities of 5,000 to 10,000 inhabitants.....	4	27,702	1	5,957			8.5	3.7	
Cities of 2,500 to 5,000 inhabitants.....	7	24,838	1	4,048			7.6	2.5	
Rural territory.....		255,696		151,769		183,548	78.5	93.8	100.0
Cities, towns, and villages of less than 2,500 inhabitants.....	89	68,881	32	26,418	15	10,967	18.1	15.7	12.4
Other rural territory.....		196,815		126,351		177,581	60.4	78.1	87.6

¹Includes population (4,163) of Indian reservations specially enumerated.

As shown by this table, the urban territory of the state in 1910—that is, the incorporated places of 2,500 inhabitants or more—contained 69,898 inhabitants, or 21.5 per cent of the total population, while 255,696 inhabitants, or 78.5 per cent, lived in rural territory. The urban territory as it existed in 1900—that is, the incorporated places then having 2,500 inhabitants or more—contained only 10,003 inhabitants, or 6.2 per cent of the total population, while 151,769 inhabitants, or 93.8 per cent, lived in rural territory. There has thus been a large increase in the proportion of urban population. For the United States as a whole the urban population constituted 46.3 per cent of the total population in 1910 and 40.5 per cent of the total population in 1900.

In 1900 the urban territory of the state consisted of only two cities of over 2,500 inhabitants each, while in 1910 it comprised 12 cities each having at least that population.

The 89 places of less than 2,500 inhabitants each have an aggregate population of 58,881, or 18.1 per cent of the total population of the state. These places comprise 19 having from 1,000 to 2,500 inhabitants each, with a combined population of 28,596; 25 having from 500 to 1,000 inhabitants each, with a combined population of 17,358; and 45 having less than 500 inhabitants each, with a combined population of 12,927. The population living in unincorporated territory represents 60.4 per cent of the total population of the state.

This table further shows that in all incorporated places, including those of less than 2,500 inhabitants, there was in 1910 a population of 128,779, or 39.6 per cent of the population of the state. The population of all incorporated places, as they existed in 1900, was 35,421, or 21.9 per cent of the total population of the state.

Table I of Chapter 2 shows that two counties and the two combinations of counties had a larger proportion of urban population in 1910 than in 1900. Six counties which were wholly rural in 1900 were partly urban in 1910, while 11 counties were wholly rural at both censuses.

In order to compare the *rate of growth* in urban and rural communities it is necessary in each case, as

previously explained, to consider the changes in population which have occurred in the *same* territory from one decennial census to another. With this end in view places classed as urban or rural according to their population in 1910 are taken as a basis and the aggregate population in 1910 and in 1900 of the same places is then compared. Thus, as shown in the following table, the total population in 1910 of those places which at that time had 2,500 inhabitants or more was 69,898; in 1900 the total population of these same places (so far as separately reported) was 22,107. It may be noted that the latter figure exceeds the total population in 1900 of those places which at that time had over 2,500 inhabitants each, 10,003, (see table on page 409) by 12,104. The difference is the net result of the passage, since 1900, of certain communities from the rural to the urban class.

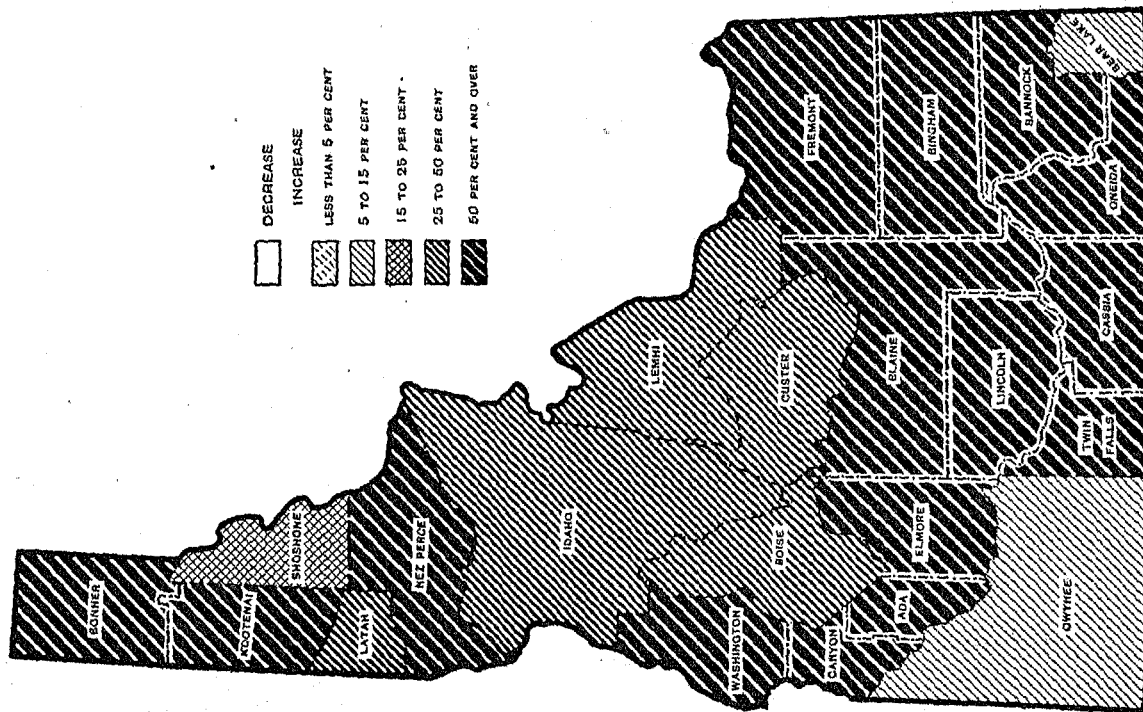

In the following table the population for the state as a whole is distributed so as to show, for 1910 and 1900, the combined population of the cities having over 2,500 inhabitants and the population of the remainder of the state.

CLASS OF PLACES.	POPULATION.		INCREASE: 1900-1910	
	1910	1900	Number.	Per cent.
The state.....	885,594	161,772	163,822	101.8
Cities of 2,500 or more in 1910.....	69,898	22,107	47,791	216.2
Remainder of the state.....	255,696	139,665	116,031	83.1

A comparison of the total population in 1910 of places having a population of not less than 2,500 each with the total population of the same places in 1900, as given in the above table, shows an increase of 216.2 per cent. This represents the rate of growth of urban communities as above defined. During the same period the rural population, comprising that of the remainder of the state, increased 83.1 per cent. Urban population thus increased more than twice as rapidly as that of the state as a whole, and more than two and one-half times as rapidly as rural. For the United States as a whole urban population increased 34.8 per cent in the last decade and rural population 11.2 per cent.

PER CENT OF INCREASE OR DECREASE OF POPULATION OF IDAHO, BY COUNTIES: 1900-1910.

TOTAL POPULATION.

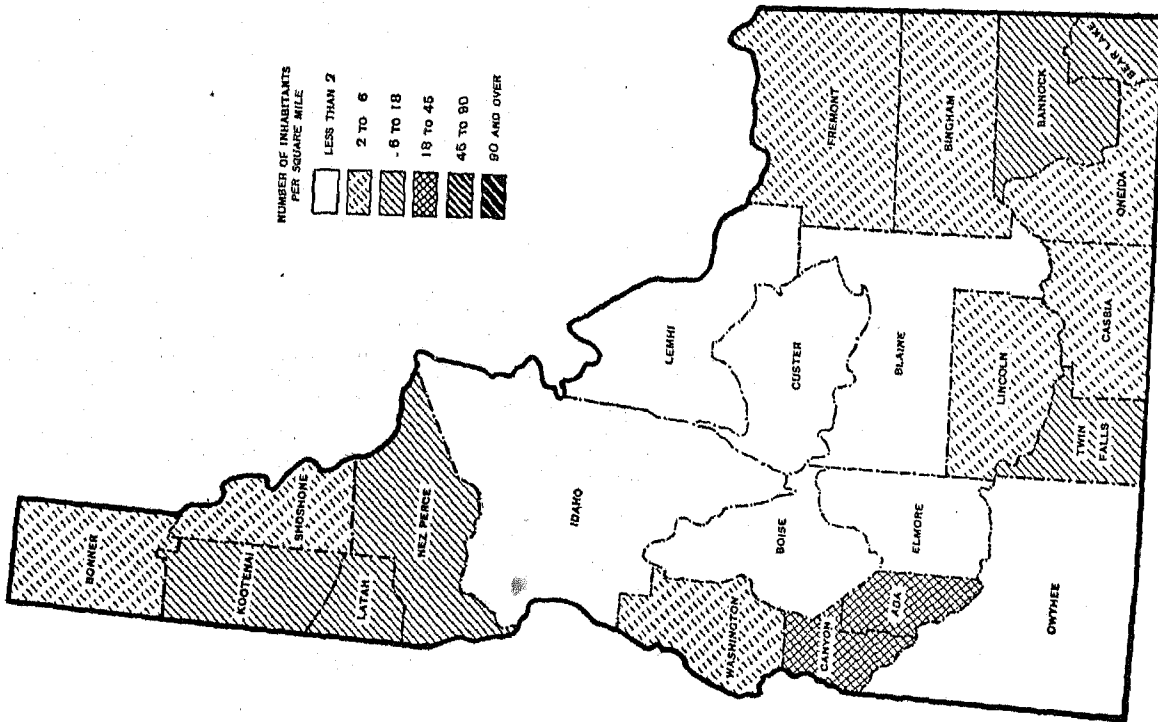

RURAL POPULATION.

Rural population is defined as that residing outside of incorporated places having 2,500 inhabitants or more.

1 No comparisons of population for 1900 and 1890 can be made; information as to changes in minor civil divisions incomplete.
 2 Incorporated in 1902.
 3 Incorporated in 1903.
 4 County total includes population (394) of Chub Springs precinct, parts taken to form Henry and Wayan precincts and part annexed to Salt River precinct since 1900; and population (1,229) of that part of county returned as Pocatello precinct No. 1 in 1900.
 5 Mink Creek precinct organized from part of Cleveland precinct in 1902.
 6 Grace precinct organized from part of Gentile Valley precinct in 1900.
 7 Organized from part of Chub Springs precinct in 1900.
 8 Robin and Inkom precincts organized from parts of Portneuf precinct in 1900 and 1904, respectively.
 9 Treasureton precinct organized from part of Oxford precinct in 1900.
 10 Parts taken to form parts of Pocatello precincts Nos. 5 and 6 in 1902.
 11 Part taken to form Pocatello precinct No. 4 in 1900 and parts of Pocatello precincts Nos. 5 and 6 in 1902.
 12 Organized from part of Pocatello precinct No. 3 in 1900; parts taken to form parts of Pocatello precincts Nos. 5 and 6 in 1902.
 13 Organized from parts of Pocatello precincts Nos. 1, 2, 3, and 4 in 1902.
 14 Incorporated in 1908.
 15 Part of Chub Springs precinct annexed in 1900.
 16 Returned in 1900 as in Bannock and Bingham Counties only.
 17 County totals include population (290 in 1900; 240 in 1890) of Thomas Fork precinct, taken to form Geneva and Raymond precincts since 1900; population (1,816 in 1900) of East and West Montpelier precincts, not returned separately in 1900; population (1,370 in 1890) of Montpelier precinct, taken to form East and West Mont-

pelier precincts; and population (139 in 1890) of Preston precinct, annexed to East Montpelier precinct, between 1890 and 1900.
 18 Bern precinct organized from part of Ovid precinct in 1904.
 19 Incorporated in 1909.
 20 Wardboro precinct organized from part of East Montpelier precinct in 1900.
 21 Not returned separately in 1900.
 22 Organized from part of Thomas Fork precinct in 1902.
 23 Organized from parts of Liberty and Paris precincts in 1904.
 24 Parts taken to form Sharon precinct in 1904 and part of Lanark precinct in 1904.
 25 Part taken to form part of Lanark precinct in 1904.
 26 Name changed from Nuphar in 1908.
 27 Organized from part of Liberty precinct in 1904.
 28 Part annexed to Fremont County in 1905.
 29 County total includes population (1,350) of Blackfoot precinct, taken to form Blackfoot precincts Nos. 1 and 2; population (1,462) of Idaho Falls precinct, taken to form Idaho Falls precincts Nos. 1 to 4; and population (387) of Teton precinct, annexed to Fremont County, since 1900.
 30 No comparison of population for 1890 can be made; information as to changes in minor civil divisions incomplete.
 31 Aberdeen precinct organized from part of Danilson Springs precinct in 1908.
 32 Incorporated in 1906.
 33 Incorporated in 1906.
 34 Organized from part of Blackfoot precinct in 1902.
 35 Incorporated in 1907.
 36 Coltman precinct organized from part of Fairview precinct in 1906.
 37 Organized from parts of Iona and Willow Creek precincts in 1903.

TABLE 1.—POPULATION OF MINOR CIVIL DIVISIONS: 1910, 1900, AND 1890—Continued.

[Precinct means election precinct. For changes in boundaries, etc., between 1900 and 1910, see footnotes; for those between 1890 and 1900, see Reports of the Twelfth Census: 1900, Vol. I, Table 5.]

¹ County total includes population (1,008) of Emmett precinct, taken to form North, South, and West Emmett precincts and part of Bromwell precinct; population (506) of Lower Boise precinct, taken to form Notus and Parma precincts; population (1,290) of Nampa precinct, taken to form East, South, and West Nampa precincts and parts of Homestead and Midway precincts; and population (1,394) of Payette precinct, taken to form West Payette precinct and parts of Fruitland and North and South Payette precincts, since 1900.

² Organized from parts of Emmett and Stuart precincts in 1906.

³ Franklin precinct organized from part of East Caldwell precinct in 1900.

⁴ Organized from part of Nampa precinct in 1902.

⁵ Fargo precinct organized from part of Roswell precinct in 1908.

⁶ Organized from parts of New Plymouth and Payette precincts in 1908.

⁷ Organized from part of West Caldwell precinct in 1908.

⁸ Organized from parts of Nampa and West Caldwell precincts in 1900.

⁹ Organized from parts of Nampa and West Caldwell precincts in 1908.

¹⁰ Part taken to form part of Fruitland precinct in 1908.

¹¹ Incorporated in 1908.

¹² Organized from part of Emmett precinct in 1904.

¹³ Incorporated in 1900.

¹⁴ Organized from parts of Payette and Stuart precincts in 1902.

¹⁵ Organized from part of Lower Boise precinct in 1906.

¹⁶ Incorporated in 1904.

¹⁷ Organized from part of West Caldwell precinct in 1906.

¹⁸ Organized from part of Nampa precinct in 1906.

¹⁹ Parts taken to form parts of North and South Payette precincts in 1902 and part of Bromwell precinct in 1906.

²⁰ Parts taken to form South Caldwell and Greenleaf precincts in 1906 and 1908, respectively, and parts of Homestead and Midway precincts in 1906 and 1908, respectively.

²¹ Organized from part of Payette precinct in 1908.

²² Part taken to form Twin Falls County in 1907.

²³ County totals include population (268 in 1900; 329 in 1890) of Butte, Rook Creek, and Salmon Falls precincts, taken to form Twin Falls County; population (118 in 1900; 167 in 1890) of Clear Creek precinct, taken to form Bridge and Standrod pre-

dicts; and population (4 in 1900; 32 in 1890) of Jesse precinct, taken to form Burley precinct and part of Marshfield precinct, since 1900.

²⁴ Parts taken to form Rosston precinct in 1906 and part of Marshfield precinct in 1908.

²⁵ Organized from part of Clear Creek precinct in 1908.

²⁶ Organized from part of Jesse precinct in 1906.

²⁷ Locust precinct organized from part of Oakley precinct in 1906.

²⁸ Organized from parts of Albion and Jesse precincts in 1908.

²⁹ Organized from part of Albion precinct in 1900.

³⁰ County totals include population (90 in 1900; 166 in 1890) of Bonanza precinct, taken to form Loon Creek and Sunbeam precincts since 1900; population (54 in 1890) of Crystal precinct, annexed to Clayton precinct; population (70 in 1890) of Ramshorn precinct, annexed to Bay Horse precinct; and population (19 in 1890) of Sea Foam precinct, abandoned, between 1890 and 1900.

³¹ Incorporated in 1907.

³² Mackay precinct organized from part of Houston precinct in 1902.

³³ Organized from part of Bonanza precinct in 1904.

³⁴ Incorporated in 1901.

³⁵ Organized from part of Bonanza precinct in 1908.

³⁶ County total includes population (79) of Neal precinct, part taken to form Smiths Prairie precinct and part annexed to Mayfield precinct since 1900.

³⁷ County total includes population (84) of Big Camas precinct, annexed to Little Camas precinct; and population (17) of Smiths Prairie precinct, taken to form part of Neal precinct, between 1890 and 1900.

³⁸ Big Camas precinct organized from part of Little Camas precinct in 1908.

³⁹ Organized from parts of Pine Grove and Smiths Prairie precincts in 1906.

⁴⁰ Part of Neal precinct annexed in 1906.

⁴¹ Part taken to form part of Fall Creek precinct in 1906.

⁴² Organized from part of Neal precinct in 1902; part taken to form part of Fall Creek precinct in 1906.

⁴³ Part of Bingham County annexed in 1905.

⁴⁴ No comparison of population can be made; county redistricted since 1900.

⁴⁵ Incorporated in 1906.

¹ Incorporated in 1904.
² Incorporated in 1910.
³ Incorporated in 1907.
⁴ Incorporated in 1905.
⁵ Incorporated in 1903.
⁶ Incorporated in 1900.
⁷ County total includes population (1,587) of Grangeville precinct, taken to form Grangeville precincts Nos. 1 to 4 since 1900; population (68) of Koooskia village, incorrectly returned as a precinct in 1900; and population (427) of that part of county not located by precincts in 1900.
⁸ Not returned by precincts in 1890.
⁹ Organized from part of Nez Perce Indian Reservation in 1900.
¹⁰ Parts taken to form Tahoe precinct in 1902 and part of Stites precinct in 1901.
¹¹ Organized in 1902.
¹² Incorporated in 1901.
¹³ Deer Creek and Joseph precincts organized from parts of Forks precinct in 1900 and 1903, respectively.
¹⁴ Dewey precinct organized from part of Mount Idaho precinct in 1904.
¹⁵ Organized since 1900.
¹⁶ Organized from part of Pollock precinct in 1900.
¹⁷ Organized from part of Grangeville precinct in 1904.
¹⁸ Incorporated as a city in 1903.
¹⁹ Organized from part of Stuart precinct in 1902.
²⁰ Organized in 1903.
²¹ Organized from part of Woodland precinct in 1904.
²² Name changed from Rapid River in 1902. Part taken to form Goff precinct in 1900.
²³ Organized from parts of Clearwater and Stuart precincts in 1901.
²⁴ Parts taken to form Lorena precinct in 1902 and part of Stites precinct in 1901.
²⁵ Exclusive of population of Koooskia village.
²⁶ Incorrectly returned as a precinct in 1900.
²⁷ Organized from part of Clearwater precinct in 1902.
²⁸ Organized from part of Nez Perce Indian Reservation in 1900; part taken to form Pleasant View precinct in 1904.
²⁹ Part taken to form Bonner County in 1907.
³⁰ County total includes population (3,336) of Bonners Ferry, Boulder, Boundary, Clarks Fork, Coconilla, Granite, Hope, Kootenai, Lakeview, Markham, Naples, Northdale, Priest Lake, Priest River, Sandpoint, Senaogoteon, Spirit Valley, and Valley precincts, taken to form Bonner County; and population (93) of Elk Mountain precinct, annexed to Santa precinct, since 1900.
³¹ Incorporated in 1900.
³² Parts taken to form Kootenai, Lewis, and Sherman precincts in 1903 and Lincoln precinct in 1903.
³³ Incorporated as a city in 1906.
³⁴ Organized from part of Santa precinct in 1904.
³⁵ Organized from part of Santa precinct in 1903.
³⁶ Organized from part of Coeur d'Alene precinct in 1903.

TABLE 1.—POPULATION OF MINOR CIVIL DIVISIONS: 1910, 1900, AND 1890—Continued.

[Precinct means election precinct. For changes in boundaries, etc., between 1900 and 1910, see footnotes; for those between 1890 and 1900, see Reports of the Twelfth Census: 1900, Vol. I, Table 5.]

CHAPTER 2.—COMPOSITION AND CHARACTERISTICS OF THE POPULATION.

Introduction.—The first chapter having given the number of inhabitants of Idaho by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural, the present chapter deals with the composition and characteristics of the population. The two chapters cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this chapter consists of three general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for Boise, the only city of more than 10,000 inhabitants; and Table III for cities of 2,500 to 10,000 inhabitants.

A series of summary tables (numbered 1 to 12) reproduces from the general tables the more important state totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had at-

tended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Idaho, 203,599, or 62.5 per cent, are native whites of native parentage; 75,195, or 23.1 per cent, are native whites of foreign or mixed parentage; and 40,427, or 12.4 per cent, are foreign-born whites. The corresponding percentages in 1900 were 55.5, 26.4, and 13.5, respectively, the comparison indicating a considerable increase in the proportion of native whites of native parentage. In 1910 Indians constituted 1.1 per cent of the population; Japanese, 0.4; Chinese, 0.3; and negroes, 0.2 per cent. In the counties the proportion of whites of foreign birth varies from 5.8 per cent in Washington to 30.2 per cent in Shoshone, and the proportion of native whites of foreign or mixed parentage from 13.2 per cent in Washington to 41.8 per cent in Bear Lake. (See maps on page 427.)

The composition of the urban population of the state as regards race, nativity, and parentage does not differ materially from that of the rural population, the percentage of foreign-born whites being, however, slightly higher in the urban population (13.6) than in the rural (12.1), while the Indian population is almost exclusively rural.

Sex (Table 2).—In the total population of the state there are 185,546 males and 140,048 females, or 132.5 males to 100 females. In 1900 the ratio was 136.5 to 100. Among native whites the ratio is 121.9 to 100 and among foreign-born whites 227.5 to 100. In the urban population there are 129.5 males to 100 females, and in the rural, 133.3.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—31.9 per cent were born in Idaho and 68.1 per cent outside the state; of the native white population, 68.8 per cent were born outside the state; of the native Indian, 13.8 per cent; and of the native negro, 88.9 per cent. Persons born outside the state constitute a larger proportion of the native population in urban than in rural communities.

Foreign nationalities (Table 5).—Of the foreign-born white population of Idaho, persons born in Canada represent 13.3 per cent; Germany, 12.5; Sweden, 12.3; England, 12.3; Norway, 6.3; Denmark, 5.6; Italy, 5.1; Greece, 4.6; Ireland, 4.4; Austria, 3.9;

all other countries, of which 10 are specified in Table 5, 19.7 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, England contributed 18.2 per cent; Germany, 14.9; Canada, 11.6; Sweden, 9.5; Denmark, 6.5; Ireland, 6.3; Norway, 5.3; Scotland, 3.9; Switzerland, 2.9; Wales, 2.7; Italy, 2.3; Austria, 2 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 110,863, representing 34 per cent of the population. Of such males, 53.2 per cent are native whites of native parentage, 20.4 per cent native whites of foreign or mixed parentage, 23.3 per cent foreign-born whites, 1.8 per cent Chinese and Japanese, 0.9 per cent Indians, and 0.3 per cent negroes. Of the 25,844 foreign-born white males of voting age, 12,817, or 49.6 per cent, are naturalized. Males of militia age—18 to 44—number 86,384.

Age (Tables 7 and 8).—Of the total population, 12.4 per cent are under 5 years of age, 20.9 per cent from 5 to 14 years, inclusive, 19.1 per cent from 15 to 24, 31 per cent from 25 to 44, and 16.2 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 3.4 per cent of this class being under 15 years of age, while more than four-fifths (83.1 per cent) are 25 years of age and over. Of the native whites of foreign or mixed parentage, 44 per cent are 25 and over, and of the native whites of native parentage, 40.7 per cent.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Of the urban population, 36.6 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 29.5 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 96,819, of whom 66,779, or 69 per cent, attended school. In addition to these, 632 persons under 6 and 1,192 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 68; for girls, 70.1. For children from 6 to 14 years, inclusive, the percentage attending school was 82.1. The percentage for children of this age among native whites of foreign or mixed parentage was 84.1; among native whites of native parentage, 82; and among foreign-born whites, 76.2. (See Table I.) There is little difference between urban and rural communities as regards the percentage of school attendance.

Illiteracy (Table 10).—There are 5,453 illiterates in the state, representing 2.2 per cent of the total population 10 years of age and over, as compared with 4.6 per cent in 1900. The percentage of illiteracy is 6.9 among foreign-born whites, 0.3 among native whites, 59.4 among Indians, and 6.4 among negroes.

For all classes combined, the percentage of illiterates is 1.7 in urban communities and 2.3 in rural. For each class separately, except the foreign-born whites, the

percentage is somewhat higher in rural communities than in urban.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is very low, being only 0.8. (See Table I.)

Marital condition (Table 11).—In the population 15 years of age and over, 45.9 per cent of the males are single and 24.7 per cent of the females. The percentage married is 49.2 for males and 67.8 for females, and the percentage widowed 3.4 and 6.4, respectively. The percentages of those reported as divorced, 0.7 both for males and for females, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is accounted for partly by the excess of males in the total population, and partly by the fact that women marry younger. Thus 11.6 per cent of the females from 15 to 19 years of age are married, as compared with 0.7 per cent of the males; and 60.8 per cent of the females from 20 to 24 years are married, as compared with 17.2 per cent of the males. For those from 25 to 34 years, the percentages are 85.7 for females as against 52 for males, and for those from 35 to 44, 90.2 and 70.9, respectively, while in the age group 45 and over the difference practically disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 49 for males and 77.5 for females; native whites of native parentage, 49.9 and 66.7, respectively; native whites of foreign or mixed parentage, 48.3 and 65.4, respectively; Indians, 64.3 and 68.6, respectively; negroes, 40.6 for males and 54.1 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married, both for males and females, is somewhat higher in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Idaho is 71,830, and the total number of families 73,669, indicating that in very few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.5, and the average number per family, 4.4.

NOTES REGARDING CHANGES IN BOUNDARIES, ETC.

COUNTIES.

ADA.—Parts taken to form Canyon in 1892 and part of Washington in 1879.
 BANNOCK.—Organized from part of Bingham in 1893.
 BEAR LAKE.—Organized from part of Oneida in 1875.
 BINGHAM.—Organized from part of Oneida in 1885; parts taken to form Bannock and part of Fremont in 1893 and part annexed to Fremont in 1905.
 BLAINE.—Organized from Alturas and part of Logan in 1895.
 BOISE.—Part taken to form part of Custer in 1881.
 BONNER.—Organized from part of Kootenai in 1907. (See also Note 1.)
 CANYON.—Organized from part of Ada in 1892.
 CASSIA.—Organized from part of Owyhee in 1879; part taken to form Twin Falls in 1907. (See also Note 2.)
 CUSTER.—Organized from parts of Alturas, Boise, Idaho, and Lemhi in 1881.
 ELMORE.—Organized from part of Alturas in 1889.
 FREMONT.—Organized from parts of Bingham and Lemhi in 1893 and part of Bingham annexed in 1905.
 IDAHO.—Parts taken to form part of Washington in 1879 and part of Custer in 1881.
 KOOTENAI.—Part taken to form Bonner in 1907. (See also Note 1.)
 LATAH.—Organized from part of Nez Perce in 1888.
 LEMHI.—Parts taken to form part of Custer in 1881 and part of Fremont in 1893.
 LINCOLN.—Organized from part of Logan in 1895.
 NEZ PERCE.—Part taken to form Latah in 1888; part of Shoshone annexed in 1905.

92399°—13—28

ONEIDA.—Parts taken to form Bear Lake in 1875 and Bingham in 1885.

OWYHEE.—Part taken to form Cassia in 1879.

SHOSHONE.—Part annexed to Nez Perce in 1905.

TWIN FALLS.—Organized from part of Cassia in 1907. (See also Note 2.)

WASHINGTON.—Organized from parts of Ada and Idaho in 1879.

NOTE 1.—*Bonner and Kootenai Counties combined.*—Total population: 1910, 36,336; 1900, 10,210; increase, 1900-1910, 26,119; per cent of increase, 255.7. Urban population—1910, 10,234; same places in 1900, 508; per cent of increase, 1,924.4. Rural population—1910, 26,061; same territory in 1900, 9,708; per cent of increase, 168.3. Rural population—1900, 10,210. Per cent in places of 2,500 or more in 1910, 28.3.

NOTE 2.—*Cassia and Twin Falls Counties combined.*—Total population: 1910, 20,740; 1900, 3,951; increase, 1900-1910, 16,789; per cent of increase, 424.0. Urban population—1910, 6,258. Rural population—1910, 15,482; same territory in 1900, 3,951; per cent of increase, 291.9. Rural population—1900, 3,951. Per cent in places of 2,500 or more in 1910, 25.4.

NOTE 3.—In computing this increase the population of Indian reservations in 1900 has been deducted from the total population of the county in order to make that total comparable with the total for 1890, which does not include the population of Indian reservations. The population thus deducted in the several counties was as follows: Bannock, 448; Bingham, 930; Kootenai, 752; and Lemhi, 486.

CITIES.

SANDPOINT.—Incorporated as a city in 1907.

TWIN FALLS.—Incorporated in 1908.
