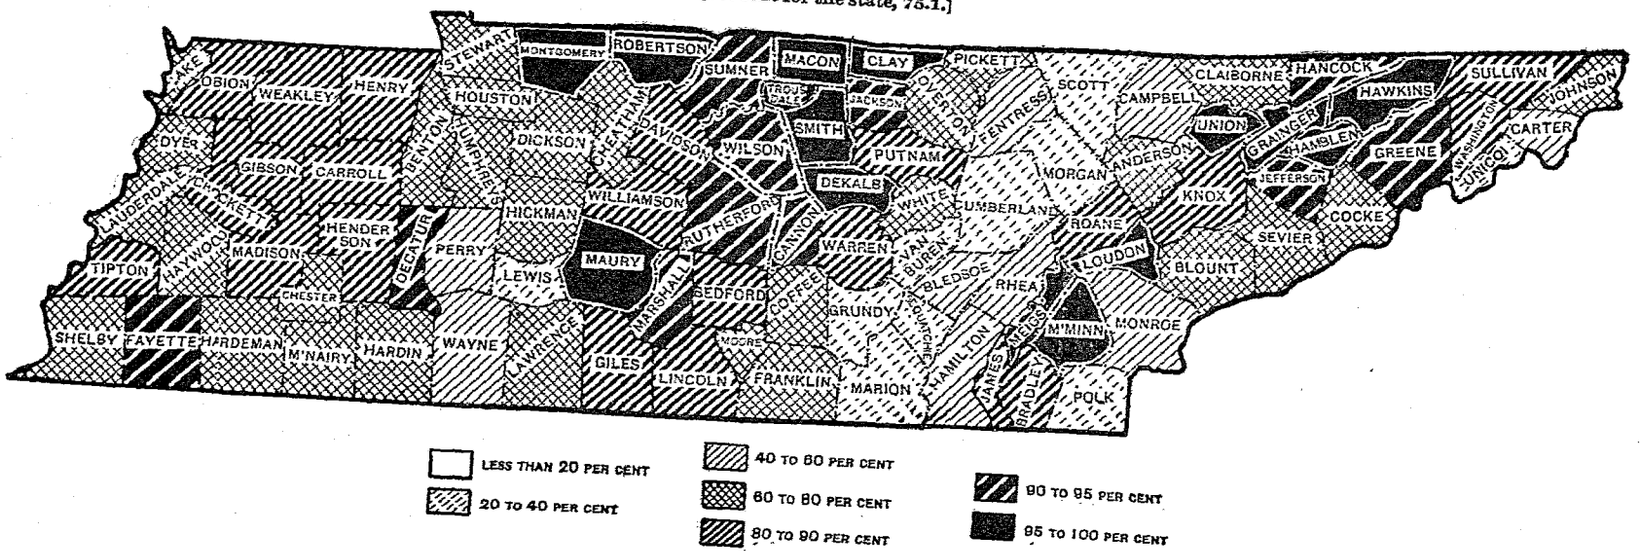
PER CENT OF LAND AREA IN FARMS, AND AVERAGE VALUE OF FARM LAND PER ACRE, IN TENNESSEE, BY COUNTIES: 1910.

PER CENT OF LAND AREA IN FARMS.

[Per cent for the state, 75.1.]

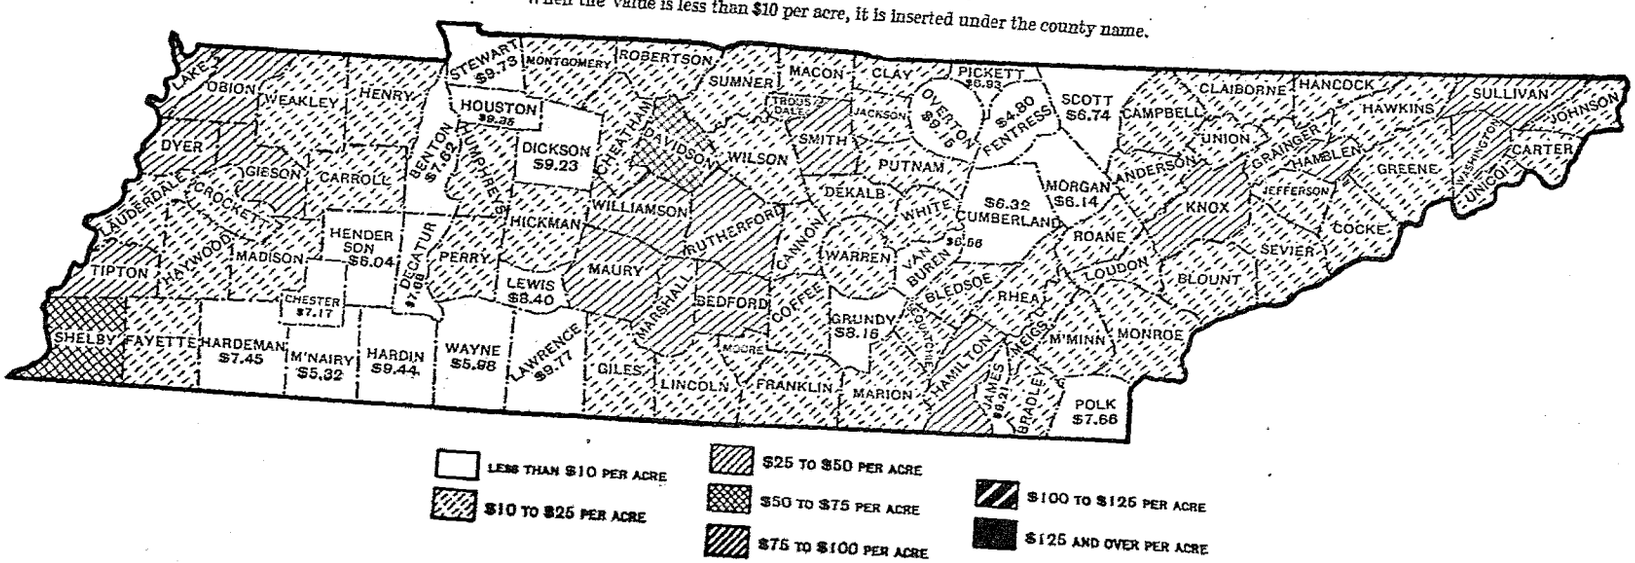


(956)

AVERAGE VALUE OF FARM LAND PER ACRE.

[Average for the state, $18.53.]

When the value is less than $10 per acre, it is inserted under the county name.



TENNESSEE.

FARMS AND FARM PROPERTY.

Tennessee ranks seventeenth in population and thirty-third in land area among the states and territories of continental United States. The surface of the state rises from an altitude of about 250 feet along the Mississippi River to altitudes in excess of 3,000 feet in the mountains of the eastern border. The state falls naturally into three main divisions. Western Tennessee consists of a low Coastal Plain region, prevailingly less than 350 feet above sea level, bordered by alluvial bottom lands along the Mississippi River. It comprises a level or gently rolling stretch of country extending to the Tennessee River. Middle Tennessee stretches from the vicinity of the Tennessee River eastward to the Cumberland Plateau. It consists of two main parts, the elevated Highland Rim and the centrally located Limestone Basin. The Highland Rim attains to altitudes of 1,200 feet and even to altitudes of 1,300 or 1,400 feet along its extreme eastern margin. Eastern Tennessee comprises the Cumberland Plateau, which rises gently from the high altitudes of the Highland Rim and overlooks the great limestone valley of eastern Tennessee, which is a continuation southward of the Great Valley of Virginia. This is bounded to the east by the Appalachian Ranges along the extreme eastern line of the state.

The Limestone Basin is undulating to hilly, and the altitudes range from 500 feet above sea level to 900 feet. The Cumberland Plateau rises to an altitude in excess of 2,000 feet. The limestone valley of eastern Tennessee is rolling to hilly in its immediate surface features, although comprising altitudes less than that of the adjacent plateau and mountain system. The limestone valley ranges in altitude from 700 or 800 feet to altitudes in excess of 1,000 feet. There are numerous small included ranges and ridges within the valley. The extreme eastern Appalachian Mountain section rises from altitudes of 1,000 feet to altitudes above 3,000 feet in the higher mountains along the eastern border.

The soils of western Tennessee consist of heavy loams and clays in the alluvial bottom lands along the Mississippi River. The loess covering of western Tennessee gives rise to large stretches of silty loams. The Coastal Plains soils along the Tennessee River are principally sandy and sandy loam soils. Within this section cotton, tobacco, wheat, and oats constitute the principal crops grown upon the different soils. The soils of the Highland Rim consist of gray silty loams, stony loams, and heavy clay soils. The Limestone Basin region is occupied by brown loams, silty loams, and clay loams very similar to those of the blue grass region of Kentucky, to the Great Valley of Virginia, and to the limestone valley of eastern Tennessee. The soils of the Cumberland Plateau are derived principally from sandstone and shale rock and consist of loams, silty loams, and prevalently of fine sandy loams and stony loams. The soils of the limestone valley are principally heavy brown loams and clay loams. These soils are similar to those of the limestone basin of central Tennessee and to the blue grass region of Kentucky. Within the Appalachian Mountain region the soils are chiefly derived from the sandstone and shale rocks and are similar to those of the Cumberland Plateau.

The two maps on the opposite page show, for the different counties, the proportion of the total land area which is in farms and the average value of farm land per acre. Of the state's entire land area approximately three-fourths (75.1 per cent) is in farms. As shown by the first map, the farm land falls nowhere below 20 per cent of the land area of any county and occupies over 95 per cent of the area of 15 counties. Eleven counties have from 90 to 95 per cent of their land in farms, and 22 from 80 to 90 per cent. The proportion is from 60 to 80 per cent in 29 counties, or more than one-fourth of all the counties in the state. In 9 counties the proportion is from 40 to 60 per cent, and in 10 from 20 to 40 per cent. Counties of each of these several classes are found in various parts of the state. It may be noted, however, that most of the counties in which less than 60 per cent of the land area is in farms are located in the mountainous regions of the state.

The average value of farm land per acre for the state as a whole is $18.53, and, as shown by the second map, in a majority of the counties, well distributed over the state, the average is $10 to $25 per acre. In 23 counties the average is less than $10 per acre, while in 16 counties it is $25 to $50, of which 5 are located near the Mississippi River, in the extreme western part of the state, 6 in the Limestone Basin, and 5 in the limestone valley. The average is $50 to $75 per acre in 2 counties, Shelby, lying in the extreme southwestern corner of the state, and Davidson, in the north central part, in which counties are located, respectively, the cities of Memphis and Nashville.

Progress during the decade 1900 to 1910.—Between 1900 and 1910 there was an increase of 21,389, or 9.5 per cent, in the number of farms in Tennessee, as compared with an increase of 8.1 per cent in the population and of 6.3 per cent in the acreage of improved farm land. During the decade the total farm acreage decreased slightly, the decrease being 1.5 per cent. On account of the increase in the number of farms and of the decrease in the farm acreage, the

average size of farms, which was 90.6 acres in 1900, had decreased to 81.5 acres in 1910.

The total value of farm property, which includes that of land, buildings, implements and machinery, and live stock (domestic animals, poultry, and bees), is $612,521,000 and has increased by $271,319,000, or 79.5 per cent, since 1900. Land alone increased in value 83.9 per cent, compared with an increase of 82 per cent in the value of live stock, of 72.8 per cent in that of buildings, and of 39.8 per cent in that of implements and machinery.

In considering the increase of values in agriculture the general increase in the prices of commodities in the last 10 years should be borne in mind.

The average value of a farm, including its equipment, is $2,490, an increase of $971, or 63.9 per cent, over that in 1900. The average value of land per acre has advanced $8.60, or 86.6 per cent, since 1900.

The following table summarizes for the state the more significant facts relating to population and land area, the number, value, and acreage of farms, and the value of all other farm property in 1910 and 1900:

NUMBER, AREA, AND VALUE OF FARMS.	1910 (April 15)	1900 (June 1)	INCREASE.[1] Amount.	INCREASE.[1] Per cent.
Population	2,184,789	2,020,616	164,173	8.1
Number of all farms	246,012	224,623	21,389	9.5
Approximate land area of the state.....acres..	26,679,680	26,679,680	.....	.....
Land in farms.....acres..	20,041,657	20,342,058	−300,401	−1.5
Improved land in farms.....acres..	10,890,484	10,245,950	644,534	6.3
Average acres per farm	81.5	90.6	−9.1	−10.0
Value of farm property:				
Total	$612,520,836	$341,202,025	$271,318,811	79.5
Land	371,415,783	202,013,790	169,401,993	83.9
Buildings	109,106,804	63,136,960	45,969,844	72.8
Implements and machinery	21,202,171	15,232,670	6,059,501	39.8

Average value of all property per farm	$2,490	$1,519	$971	63.9
Average value of land per acre	$18.53	$9.93	$8.60	86.6

[1] A minus sign (−) denotes decrease.

Population, number of farms, and farm acreage: 1850 to 1910.—The table following presents, for the state as a whole for each census from 1850 to 1910, inclusive, a statement of the total population, the number of farms, and the acreage of farm land and of improved land in farms. It also gives the percentage of the land area in farms, the percentage of farm land improved, and the percentage of increase during each decade in the number of farms and in the land in farms.

CENSUS YEAR.	Population.	FARMS. Number.	FARMS. Per cent of increase.	LAND IN FARMS. All land. Acres.	All land. Per cent of increase.[1]	Improved land (acres).	Per cent of land area in farms.	Per cent of farm land improved.
1910	2,184,789	246,012	9.5	20,041,657	−1.5	10,890,484	75.1	54.3
1900	2,020,616	224,623	28.8	20,342,058	0.9	10,245,950	76.2	50.4
1890	1,767,518	174,412	5.3	20,161,583	−2.4	9,502,000	75.6	46.4
1880	1,542,359	165,650	40.2	20,666,915	5.5	8,490,556	77.5	41.1
1870	1,258,520	118,141	43.4	19,581,214	−5.3	6,843,278	73.4	34.9
1860	1,109,801	82,368	18.2	20,669,165	8.9	6,795,337	77.5	32.9
1850	1,002,717	72,735	.....	18,984,022	.....	5,175,173	71.2	27.3

[1] A minus sign (−) denotes decrease.

In the 60 years since 1850 the population of the state has increased continuously and quite uniformly from 1,002,717 to 2,184,789, or 117.9 per cent. The number of farms in Tennessee, which is now 246,012, has increased continuously since 1850, the increase for the entire 60 years amounting to 173,277. During the last decade the increase was 9.5 per cent, and that between 1890 and 1900, 28.8 per cent. The most important changes took place between 1860 and 1880.

The land surface of Tennessee is approximately 26,679,680 acres. Of this area, 20,041,657 acres, or 75.1 per cent, are included in farms. This amount of farm land is less by 300,401 acres, or 1.5 per cent, than that reported in 1900. A decrease of considerably more than 400,000 acres is recorded in the farm acreage in the counties in the mountainous parts of the state, where much woodland and other unimproved land probably reported as in farms in 1900 was not so reported in 1910. The amount actually included in farms has not changed greatly since 1850, there being at that time 71.2 per cent of all land of the state included in farms. Slight decreases are recorded for three of the six decades covered by the table. The largest decrease occurred between 1860 and 1870, amounting to 5.3 per cent. This was doubtless due to the effects of the Civil War. Ten years later, in 1880, the land reported as being in farms was almost identical with that reported in 1860. In addition to some recovery in farming, there was a special effort made in 1880 to secure a full report. The large acreage thus reported accounts in a measure for the apparent decrease during the following decade.

Of the total farm acreage, 10,890,484 acres, or 54.3 per cent, are reported as improved land. For the entire period covered by the table the number of acres

of improved land has continuously increased. During the 60 years an unbroken rise has occurred in the proportion which improved land has formed of all land in farms. It should be noted, however, that the increase in improved acreage has not kept pace with the increase in number of farms.

Values of farm property: 1850 to 1910.—The agricultural changes in Tennessee since 1850, as reflected in the values of the several classes of farm property, are shown in the table which follows:

CENSUS YEAR.	FARM PROPERTY.							
	Total.		Land and buildings.		Implements and machinery.		Domestic animals, poultry, and bees.	
	Value.	Per cent of increase.[1]	Value.	Per cent of increase.[1]	Value.	Per cent of increase.[1]	Value.	Per cent of increase.[1]
1910	$612,520,836	79.5	$480,522,587	81.2	$21,292,171	39.8	$110,706,078	82.0
1900	341,202,025	9.0	265,150,750	9.3	15,232,670	53.3	60,818,605	0.9
1890	312,891,050	20.0	242,700,540	17.4	9,936,880	0.7	60,254,230	38.0
1880	259,456,170	15.0	206,749,837	18.1	9,954,863	38.0	43,651,470	−0.9
1870[2]	225,621,847	−33.6	174,994,997	−35.5	6,559,590	−22.5	44,067,260	−26.8
1860	340,036,202	155.3	271,358,985	177.3	8,465,702	57.9	60,211,425	100.9
1850	133,189,438	.....	97,851,212	.....	5,360,210	.....	29,978,016	.....

[1] A minus sign (−) denotes decrease.
[2] Computed gold values, being 80 per cent of the currency values reported.

The total wealth in the form of farm property is $612,521,000, an increase of $271,319,000, or 79.5 per cent, over the amount in 1900. Of the total value in 1910 nearly four-fifths (78.4 per cent) is contributed by land and buildings, 18.1 per cent by live stock, and 3.5 per cent by implements and machinery. The value of land and buildings is $480,523,000, an increase of $215,372,000, or 81.2 per cent, since 1900.

In 1850 the total value of farm property was $133,189,000, and by 1860 it had increased to $340,036,000, a gain of 155.3 per cent. The total value in 1860 was greater than at any succeeding census until 1900, and the value of land and buildings greater than at any later census until 1910. A considerable decrease occurred between 1860 and 1870, due to the destructive effects of the Civil War. Since 1870 the value has continuously increased. An uninterrupted advance since that time has also occurred in the value of implements and machinery, and since 1880 in that of live stock. In all three classes the absolute gain during the last decade has been greater than that during any other decade covered by the table.

Average acreage and values per farm: 1850 to 1910.—The average size of a Tennessee farm decreased continuously from 261 acres in 1850 to 81.5 acres in 1910, which is at a rate of nearly 30 acres each decade. The decrease during the last decade, however, was only 9.1 acres. In 1850 and in 1860 the "plantation" was the common farm unit in a considerable part of the state, as it had been during the first half of the century. The relatively high average size of farms at those two censuses is partly accounted for by the fact that each plantation was reported as one farm. During the last 50 years most plantations have gradually been divided into small parcels of land largely operated by tenants. Each tenant holding of the plantation is reported as a farm, and each tenant as a farmer, whether or not the owner of the property lives on the plantation and directs the operation. This accounts for the fact that during the last 50 years the number of farms reported increased 198.7 per cent, while there was an increase of only 60.3 per cent in the acreage of improved farm land, and a decrease of 3 per cent in the total amount of land in farms.

In the case of many plantations, most of the land in these plantations is now worked by tenants, each of whom is reported as a farmer and the land operated by him as a farm, yet there is a supervision by the owner, so that in a sense the entire plantation may be said to constitute a single farm. The Bureau of the Census has recently made an investigation of the extent to which the plantation unit of farm management still prevails, the results of which will appear in a later report.

Bearing in mind the definition of a farm as it applies to conditions in Tennessee, it is to be noted that the average value is $2,490, of which $1,953 represents the value of land and buildings, $450 that of live stock, and $87 that of implements and machinery. Although the aggregate value of farm property was advancing, the average value per farm fell from $1,910 in 1870 to $1,566 in 1880, and again from $1,794 in 1890 to $1,519 in 1900. These decreases were no doubt due chiefly to the division of the larger places into smaller farms operated by tenants. This movement seems to have slackened, yet by reason of the great rise in values the farm, notwithstanding its smaller size, has a much greater average value than 10 years ago.

The average value of land and buildings per acre increased from $8.04 in 1870 to $13.03 in 1900, and to $23.98 in 1910. Thus it is to be noted that whereas the increase during the 30 years prior to 1900 amounted to only $4.09 per acre, that during the last decade amounted to $10.95. Before the war there had been an upward movement in average value per acre, the value in 1850 being $5.15, and that in 1860, $13.13. The decrease of over $4 per acre between 1860 and 1870 was probably largely the effect of the war.

The changes which have taken place during the past 60 years in the average acreage of Tennessee farms and in the average values of the various classes of farm property, as well as in the average value per acre of land and buildings, are shown in the following table:

CENSUS YEAR.	Average acres per farm.	AVERAGE VALUE PER FARM.[1]				Average value of land and buildings per acre.
		All farm property.	Land and buildings.	Implements and machinery.	Domestic animals, poultry, and bees.	
1910	81.5	$2,490	$1,953	$87	$450	$23.98
1900	90.6	1,519	1,180	68	271	13.03
1890	115.6	1,794	1,392	57	345	12.04
1880	124.8	1,566	1,248	55	264	10.00
1870[2]	165.7	1,910	1,481	56	373	8.94
1860	250.9	4,128	3,294	103	731	13.13
1850	261.0	1,831	1,345	74	412	5.15

[1] Averages are based on "all farms" in state.
[2] Computed gold values, being 80 per cent of the currency values reported.

Farm tenure: 1880 to 1910.—The following table shows the distribution of the farms of the state according to character of tenure at each census since 1880:

TENURE.	1910	1900	1890	1880
Number of all farms	246,012	224,623	174,412	165,650
Farms operated by owners and managers	144,951	133,483	120,622	108,454
Farms consisting of owned land only	120,081	118,545	(1)	(1)
Farms consisting of owned and hired land	24,044	13,652	(1)	(1)
Farms operated by managers	826	1,286	(1)	(1)
Farms operated by tenants	101,061	91,140	53,790	57,196
Share tenants	68,247	62,792	34,028	37,930
Share-cash tenants [2]	2,884			
Cash tenants	27,436	28,348	19,762	19,266
Tenure not specified [3]	2,494			
Per cent of farms operated by—				
Owners and managers	58.9	59.4	69.2	65.5
Tenants	41.1	40.6	30.8	34.5
Share and share-cash	28.0	28.0	19.5	22.9
Cash and nonspecified	12.2	12.6	11.3	11.6

[1] Not reported separately.
[2] Share-cash tenants were doubtless largely included with share tenants in 1900, 1890, and 1880.
[3] Prior to 1910 nonspecified tenants were included with cash tenants.

The number of all farms, and therefore of all farm operators, is 246,012. Of the farm operators, 144,125 are classified as owners, 826 as managers, and 101,061 as tenants. Of the owners, 120,081 operate exclusively land owned by them, while 24,044 operate land which they rent in addition to that which they own. Tenants are further distributed according to the character of their tenancy; thus 68,247 are reported as share tenants, 2,884 as share-cash tenants, 27,436 as cash tenants, and for 2,494 no report relative to character of tenure was secured.

While the total number of farm operators in the state increased by 80,362, or 48.5 per cent, since 1880, the number of tenant farms increased by 43,865, or 76.7 per cent. The tenants formed 34.5 per cent of all farm operators in 1880, and this proportion rose to 41.1 per cent in 1910. The proportion of tenants was indeed somewhat less in 1890 than in 1880, but in 1900 it was considerably larger, and in 1910 increased slightly. No data were secured prior to 1880 concerning the number of farms operated by tenants.

For the sake of comparison with the earlier figures, the share and share-cash tenants of this census have been grouped together, and likewise the cash tenants and those for whom the form of tenure is not specified. During the whole period covered by the table the share group has been much larger than the cash group. The share group now, as in 1900, is more than twice as large as the cash group, but in 1890 and 1880 was a little less than twice as large.

The next table shows, for white and colored farmers combined and for each class separately, the total and improved acreage and the value of land and buildings for farms operated by owners (including part owners), managers, and tenants, respectively.

FARMS OPERATED BY—	ALL LAND IN FARMS (ACRES).		IMPROVED LAND IN FARMS (ACRES).		VALUE OF LAND AND BUILDINGS.	
	1910	1900	1910	1900	1910	1900
All farmers	20,041,657	20,342,058	10,890,484	10,245,950	$480,522,587	$265,150,750
Owners	14,672,647	14,523,975	7,461,499	6,906,009	332,367,052	181,871,038
Managers	334,029	383,754	115,918	143,039	10,992,818	6,076,790
Tenants	5,034,991	5,434,329	3,313,067	3,195,912	137,162,117	76,802,330
White	18,435,579	18,701,962	9,728,208	9,209,149	438,330,021	244,560,600
Owners	14,081,961	14,030,151	7,111,807	6,635,165	320,187,872	176,594,590
Managers	317,247	371,788	109,140	137,038	10,188,313	6,288,700
Tenants	4,036,371	4,300,023	2,507,261	2,436,946	107,953,836	61,677,250
Colored	1,606,078	1,550,096	1,162,276	1,036,801	42,192,566	20,590,150
Owners	590,676	493,824	349,692	270,934	12,179,780	5,277,040
Managers	17,682	11,966	6,778	6,001	804,505	388,090
Tenants	997,720	1,044,306	805,806	758,866	29,208,281	14,925,080

The following table shows, for white and colored farmers combined and for each class separately, the per cent distribution by tenure groups of the items in the preceding table, and also of the number of farms:

FARMS OPERATED BY—	PER CENT OF TOTAL.							
	Number of farms.		All land in farms.		Improved land in farms.		Value of land and buildings.	
	1910	1900	1910	1900	1910	1900	1910	1900
All farmers	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Owners	58.6	58.9	73.2	71.4	68.5	67.4	69.2	68.6
Managers	0.3	0.6	1.7	1.9	1.1	1.4	2.3	2.5
Tenants	41.1	40.6	25.1	26.7	30.4	31.2	28.5	28.9
White	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Owners	64.2	64.4	76.4	74.7	73.1	72.0	73.0	72.2
Managers	0.4	0.6	1.7	2.0	1.1	1.5	2.3	2.6
Tenants	35.4	35.0	21.9	23.4	25.8	26.5	24.6	25.2
Colored	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Owners	27.9	27.8	36.8	31.9	30.1	26.1	28.9	25.6
Managers	0.1	0.2	1.1	0.8	0.6	0.7	1.9	1.9
Tenants	71.9	71.9	62.1	67.4	69.3	73.2	69.2	72.5

It will be seen that, in 1910, 73.2 per cent of all land in farms was in farms operated by their owners (including part owners), 1.7 per cent in farms operated by managers, and 25.1 per cent in farms operated by tenants, the percentage for managers and for tenants being slightly lower and that for owners higher than in 1900.

Of all land in farms operated by white farmers, 76.4 per cent was in farms operated by their owners, and 21.9 per cent in tenant farms, while of that in farms operated by colored farmers, 36.8 per cent was in farms operated by owners, and 62.1 per cent in tenant farms. The proportion of farm land which was in farms operated by owners increased between 1900 and 1910 for each class of farmers, the increase being rather more pronounced in the case of colored than white farmers.

As shown by the next table the average size of farms operated by managers in 1910 (405.5 acres) was about four times as great as that of farms operated by owners (101.8 acres), which was in turn about twice as large as that of farms operated by tenants (49.8 acres). The average size of farms operated by owners

and by tenants decreased from 1900 to 1910, while that of farms operated by managers increased materially. In 1910 the percentage of farm land improved was highest for tenant farms and lowest for those operated by managers.

The average size of farms operated by white farmers in 1910 (88.8 acres) was more than twice as large as that of farms of colored farmers (41.9 acres); both classes of farms have decreased in size between 1900 and 1910. The proportion of land improved was larger for farms of colored farmers than for those of white farmers, being, respectively, 72.4 and 52.8 per cent of the total acreage in each class of farms.

Farm mortgages: 1890 to 1910.—The Eleventh Census (1890) was the first to collect data relating to mortgage debt on farms. The basis of the returns was the "farm home" occupied by its owner. The same class of information was secured by the population schedules of the Twelfth Census (1900). The agricultural schedules of the Thirteenth Census (1910) secured practically the same information, except that the basis was "owned farms" instead of "owned farm homes"—a difference involving, however, no appreciable incomparability.

The following table relates to farms operated by persons owning all or part of the land, and shows for 1910 (1) the number of such farms reported as free from mortgage; (2) the number reported as mortgaged; and (3) the number for which no mortgage reports were secured. Comparable items are included for 1900 and 1890.

CLASS.	OWNED FARMS.[1]		OWNED FARM HOMES.		OWNED FARM HOMES.[2]	
	1910		1900		1890	
	Number.	Per cent.[3]	Number.	Per cent.[3]	Number.	Per cent.
Total	144,125	.....	132,731	.....	106,777	.....
Free from mortgage	118,285	83.1	112,038	88.5	103,346	96.8
Mortgaged	24,006	16.9	14,699	11.5	3,431	3.2
Unknown	1,834	.....	5,394	.....	.....	.....

[1] Includes all farms owned in whole or in part by the operator.
[2] The 584 "owned farm homes" for which no reports were secured were distributed between "free from mortgage" and "mortgaged" in 1890.
[3] Per cent of combined total of "free from mortgage" and "mortgaged."

In 1910 the total number of farms owned in whole or in part by the operators was 144,125. Of this number, 118,285 were reported as free from mortgage; 24,006 were reported as mortgaged; and for 1,834 no report relative to mortgage indebtedness was obtained. The number of mortgaged farms constituted 16.9 per cent of the total number of owned farms, exclusive of those for which no mortgage report was obtained. The percentage is considerably higher than it was in 1890, and somewhat higher than in 1900. It may be noted that the percentages given for the three censuses are comparable, but that the number of mortgaged and unmortgaged farms reported in 1890 is not entirely comparable with the numbers reported at the later censuses because at the census of 1890 the farms for which no reports were secured were distributed between the two classes of mortgaged and unmortgaged farms. It can be seen, however, that from 1890 to 1910 the increase in the number of mortgaged farms was greater than that in the number free of mortgage.

The statement of mortgage debt and of the value of mortgaged farm property is restricted to the farms of those farmers who own all of their land and report the amount as well as the fact of indebtedness. Of the 24,006 farms reported as mortgaged, 18,778 are wholly owned by the farmers, and for 17,362 of these the amount of mortgage debt is reported. Only these last-mentioned farms are included for 1910 in the next table, which presents data relating to mortgaged farms for 1910 and 1890. In this connection it should be noted that in 1890 the amount of mortgage debt of farms with incomplete reports was estimated according to the percentages and averages obtained from farms with full reports, but that no such estimate is here made for 1910. The table gives a comparative statement of the value of mortgaged farms owned entirely by their operators and the amount of indebtedness, together with the average value of such farms, the average debt per farm, and the average equity per farm for 1910 and 1890. Data regarding the amount of mortgage debt were not obtained in 1900.

	OWNED FARMS OR FARM HOMES MORTGAGED.		INCREASE.	
	1910[1]	1890[2]	Amount.	Per cent.
Number	17,362	3,431	.....	.....
Value—Land and buildings	$47,232,059	$5,705,348	.....	.....
Amount of mortgage debt	$12,626,330	$2,289,436	.....	.....
Per cent of debt to value	26.7	40.1	.....	.....
Average value per farm	$2,720	$1,663	$1,057	63.6
Average debt per farm	$727	$667	$60	9.0
Average equity per farm	$1,993	$996	$997	100.1

[1] Includes only farms consisting wholly of owned land and reporting value of farm and amount of debt.
[2] Includes all owned farm homes, estimates being made of value of farms and amount of debt for all defective reports.

The average debt of mortgaged farms increased in the 20 years from $667 to $727, or 9 per cent. During this same period the average value of such farms increased from $1,663 to $2,720 or 63.6 per cent. Thus the owner's equity increased from $996 to

$1,993, or more than doubled. As a result of the greater relative increase in the total farm value than in the total farm debt, the mortgage indebtedness, which was 40.1 per cent of the value of the mortgaged farm in 1890, was only 26.7 per cent of this value in 1910.

Farms by size groups: 1910 and 1900.—The following table shows the distribution of farms by size groups at the censuses of 1910 and 1900:

SIZE GROUP.	NUMBER OF FARMS.		INCREASE.[1]		PER CENT OF TOTAL.	
	1910	1900	Number.	Per cent.	1910	1900

[1] A minus sign (−) denotes decrease.
[2] Less than one-tenth of 1 per cent.

Nearly three-tenths (29.4 per cent) of the farms in Tennessee are from 20 to 49 acres in size, nearly one-fourth (24.4 per cent) from 50 to 99 acres, and over one-sixth (16.9 per cent) from 100 to 174 acres. Thus more than seven-tenths of all the farms in the state are between 20 and 174 acres in size. About one-fifth of the total number are under 20 acres in size, while the farms of 175 acres or over constitute about one-tenth of the total. A comparison of the distribution of farms by size groups in 1910 and 1900 discloses the fact that increases occurred in each of the groups from 3 to 99 acres, while each of the groups embracing farms of 100 acres and over show decreases. The number of places "under 3 acres" reported as farms is now about one-eighth as great as 10 years ago. This decrease may be due to a different interpretation by the enumerators as to what constitutes a small farm, or may represent an actual decrease in that type of farm.

Farms of 20 to 49 acres and of 50 to 99 acres each constituted 25.6 per cent of the total number operated by white farmers, and farms of 100 to 174 acres, with 18.9 per cent of the total, ranked next in importance; among colored farmers, 49.8 per cent of the farms were of 20 to 49 acres, and 18 per cent and 17.9 per cent were farms of 10 to 19 acres and 50 to 99 acres, respectively. Of the farms operated by colored farmers 74 per cent were farms of less than 50 acres, as compared with 43.9 per cent of the farms of white farmers.

The following table shows the total and improved acreage and the value of land and buildings for farms of various size groups, consolidating into one group the farms of less than 20 acres (numbering in all 47,341), and also the farms of between 175 and 499 acres (numbering 22,450):

SIZE GROUP.	ALL LAND IN FARMS (ACRES).		IMPROVED LAND IN FARMS (ACRES).		VALUE OF LAND AND BUILDINGS.	
	1910	1900	1910	1900	1910	1900
Total	**20,041,657**	**20,342,058**	**10,800,484**	**10,245,950**	**$480,522,587**	**$295,150,750**
Under 20 acres	547,322	430,110	501,007	384,225	31,506,673	12,848,370
20 to 49 acres	2,240,374	1,937,942	1,800,374	1,509,172	74,475,941	33,491,100
50 to 99 acres	4,147,088	3,935,990	2,581,648	2,371,520	104,010,256	54,932,240
100 to 174 acres	5,256,026	5,371,931	2,802,232	2,734,766	113,109,169	65,883,560
175 to 499 acres	5,724,087	6,216,250	2,619,991	2,658,087	130,220,288	76,322,580
500 to 999 acres	1,189,042	1,285,379	422,571	407,131	23,618,050	13,012,000
1,000 acres and over	937,718	1,164,456	162,661	180,130	13,482,310	8,660,900

The following table shows the per cent distribution, by size groups, of the items presented in the preceding table, and also of the number of farms:

SIZE GROUP.	PER CENT OF TOTAL.							
	Number of farms.		All land in farms.		Improved land in farms.		Value of land and buildings	
	1910	1900	1910	1900	1910	1900	1910	1900
Total	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**	**100.0**
Under 20 acres	19.2	16.3	2.7	2.1	4.6	3.8	6.6	4.3
20 to 49 acres	29.4	27.4	11.2	9.5	16.5	14.7	15.5	12.6
50 to 99 acres	24.4	25.5	20.7	19.3	23.7	23.1	21.6	20.7
100 to 174 acres	16.9	18.9	26.2	26.4	25.7	26.7	23.6	24.8
175 to 499 acres	9.1	10.8	28.6	30.6	24.1	26.0	25.0	28.8
500 to 999 acres	0.8	0.9	5.9	6.3	3.9	4.0	4.9	4.9
1,000 acres and over	0.2	0.3	4.7	5.7	1.5	1.8	2.8	3.3

Of the total farm acreage of the state in 1910, 28.6 per cent was in farms of 175 to 499 acres, and 26.2 per cent in farms of 100 to 174 acres, these two being from the standpoint of aggregate acreage the most important size groups. There were no notable changes between 1900 and 1910 in the per cent distribution of farm acreage by size groups, the proportion in farms of under 100 acres showing a slight increase, and that in farms of 100 acres and over a corresponding decrease.

As shown by the next table, the percentage of farm land improved diminishes as the average size of the farms increases. For this reason and also because buildings have normally a higher value in proportion to farm acreage on small than on large farms, the average value of land and buildings per acre of land also diminishes with the increase in the size of the farms; it is much higher for the farms under 20 acres in size than for those of any other group.

SIZE GROUP.	PER CENT OF FARM LAND IMPROVED.		AVERAGE VALUE OF LAND AND BUILDINGS.			
			Per farm.		Per acre.	
	1910	1900	1910	1900	1910	1900
Total	54.3	50.4	$1,953	$1,180	$23.98	$13.03
Under 20 acres	91.5	89.3	666	352	57.57	29.87
20 to 49 acres	80.4	77.9	1,031	545	33.24	17.28
50 to 99 acres	62.3	60.3	1,731	950	25.08	13.96
100 to 174 acres	53.3	50.9	2,725	1,551	21.54	12.26
175 to 499 acres	45.8	42.8	5,355	3,144	21.00	12.28
500 to 999 acres	35.5	31.7	12,577	6,323	19.86	10.12
1,000 acres and over	17.3	15.5	28,030	15,302	14.38	7.44

Color and nativity of farmers: 1910.—Prior to the census of 1910 no attempt was made to secure information on the farm schedules concerning the nativity of farmers. The table which follows shows the color and nativity of farm operators by character of tenure for 1910.

Of the farmers in Tennessee, 207,704, or over five-sixths of the total number, were whites and 38,308, or 15.6 per cent, nonwhites. All but 883 of the white farmers were native born; while of the nonwhite farmers nearly all, 38,300, were negroes, only 8 being Indians. It is significant to note the form of tenure among these different classes. Thus, of the native white farmers, 35.5 per cent were tenants, as compared with only 17.8 per cent among the foreign-born white farmers. Among nonwhite farmers the tenants constituted over seven-tenths (71.9 per cent) of the total number.

Of the 883 foreign-born white farmers in Tennessee in 1910, 248 were born in Germany, 131 in Switzerland, 110 in England, 99 in Italy, and 80 in Ireland. Other European countries were represented by a total of 205 farmers, and non-European countries by 10.

COLOR AND NATIVITY.	FARM OPERATORS.							
	Total.					Per cent of total.		
	Number.	Per cent distribution.	Owners.	Tenants.	Managers.	Owners.	Tenants.	Managers.
Total	246,012	100.0	144,125	101,061	826	58.6	41.1	0.3
Native white	206,821	84.1	132,710	73,347	764	64.2	35.5	0.4
Foreign-born white	883	0.4	715	157	11	81.0	17.8	1.2
Negro and other nonwhite	38,308	15.6	10,700	27,557	51	27.9	71.9	0.1

DOMESTIC ANIMALS, POULTRY, AND BEES.

Domestic animals on farms: 1910.—The census of 1910 was taken as of April 15, and that of 1900 as of June 1. Since a great many domestic animals are born during the six weeks between April 15 and June 1, and on the other hand a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not closely comparable, and the same is true in somewhat less degree of the values. For this reason the figures for 1900 are not presented in this bulletin, but in the general reports of the census the figures for the several states will be presented and the extent to which their comparability is affected by the change in the date of enumeration will be discussed.

Of the total number of farms enumerated, 234,060, or 95.1 per cent, report domestic animals of some kind, the number without any domestic animals being 11,952.

Cattle are reported by 85.4 per cent of all farms, "dairy cows" by 83.5 per cent, and "other cows" by 17.3 per cent. The total number of cows increased materially during the decade, and the average value of "dairy cows" increased from $25.30 to $30.22, while that of "other cows" decreased from $19.40 to $17.52. In 1900 the census was taken as of date June 1, after all the spring calves were born, and the group "calves" included all cattle less than one year of age, while the census of 1910 was taken as of April 15, and only calves born in 1910 were included in the comparative group. As a result the number of calves decreased from 236,000 to 114,187 and their average value decreased from $6.81 to $6.12.

Horses are reported by 62.5 per cent of all the farms in the state, but only 10 per cent report yearlings and 6 per cent report spring colts. The average value of mature horses is over twice that reported in 1900. Mules are reported by one-half of the farms in the state. Their number is about four-fifths that of horses and their average values slightly greater than those of horses of like ages.

The next table summarizes the statistics of domestic animals for the state, recorded as of April 15, 1910. Cattle and sheep are divided into age and sex groups, while horses, mules, and swine are presented by age groups only.

Sheep are reported from 29,987 farms, or 12.2 per cent of all the farms in the state. Of the 29,087 farms, 82.9 per cent report spring lambs, the number of the latter being 75.5 per cent of the number of ewes. The average flock in the state, including all classes, is about 27 sheep, while in 1900 it was 13.

Of all farms, 73.9 per cent report swine, the average number being about eight per farm reporting. About one-fifth of the farms report spring pigs, which number is only slightly over one-fourth of all swine, this relatively small proportion being due largely, no doubt, to the early date of enumeration. The average value of the swine reported as "hogs and pigs born before January 1, 1910," is $6.39, while that of spring pigs is $2.06.

AGE AND SEX GROUP.	FARMS REPORTING.		ANIMALS.		
	Number.	Percent of all farms.	Number.	Value.	Average value.
Total	234,060	95.1	.....	$106,608,122	.....

[1] Less than one-tenth of 1 per cent.

Poultry on farms: 1910 and 1900.—The following table gives the numbers of the various kinds of poultry reported in 1910 and 1900, together with their value, and the number of farms reporting each kind in 1910:

KIND.	1910 (April 15)				1900 (June 1)
	Farms reporting.		Number of fowls.	Value.	Number of fowls
	Number.	Per cent of all farms.			
Total	222,711	90.5	8,056,145	$3,757,337	6,971,737
Chickens	222,447	90.4	7,341,469	3,290,008	6,184,210
Turkeys	32,016	13.0	118,514	211,394	103,307
Ducks	21,922	8.9	142,292	52,303	202,432
Geese	41,901	17.0	366,637	170,856	391,608
Guinea fowls	12,811	5.2	68,841	18,463	(1)
Pigeons	1,597	0.6	17,688	3,618	(2)
All other [3]	122	(4)	704	1,695	(2)

[1] Included with chickens.
[2] Not reported.
[3] One hundred and sixteen farms reported 650 peafowls, valued at $1,575; 5 farms reported 50 wild geese, valued at $110; and 1 farm reported 4 pheasants, valued at $10.
[4] Less than one-tenth of 1 per cent.

The increase in the number of fowls on Tennessee farms during the last decade was 1,084,408, or 15.6 per cent, while the increase in value was 65.1 per cent. The number of farms reporting poultry increased from 207,562 to 222,711, or 7.3 per cent. Of the farms reporting poultry, all but 264 report chickens, which class represents over nine-tenths of the number and about seven-eighths of the value of all poultry. While chickens have increased in number, all other classes separately reported in 1910 diminished. The value of poultry and the number of farms reporting were obtained in 1900 for the total of all fowls only, and not for each kind as in 1910.

Bees on farms: 1910 and 1900.—The number of farms reporting bees has decreased from 38,225 in 1900 to 27,706 in 1910, or 27.5 per cent. The number of colonies of bees decreased from 225,788 to 144,481, or 36 per cent, and their value decreased from $486,536 to $340,619, or 30 per cent. The average value per colony was $2.36 in 1910, as against $2.15 in 1900. The average value of bees per farm reporting was $12.73 in 1900 and $12.29 in 1910. About one farm out of every nine reports bees.

Domestic animals not on farms: 1910.—Most of the domestic animals not on farms are found in cities, towns, and villages. Statistics for such animals are shown below. No provision was made by law to secure data pertaining to poultry and bees not on farms. In the table below age groups are omitted for the sake of brevity; but it may be noted that in cities and villages a comparatively small proportion of the animals of each class are in the younger age groups.

KIND.	Number of inclosures reporting.	ANIMALS.		
		Number.	Value.	Average value.
Total	50,628	.....	$10,307,140	.....
All cattle	31,577	55,202	1,606,097	$29.05
Dairy cows	30,396	36,854	1,372,816	37.25
Horses	23,520	43,753	6,079,213	138.94
Mules	4,371	14,302	2,167,905	151.56
Asses and burros	280	453	85,914	189.66
Swine	17,205	55,729	349,449	6.27
Sheep	282	3,487	12,525	3.59
Goats	716	2,066	6,367	3.08

Horses are by far the most important class of domestic animals not on farms when value is considered; but the number of swine and of cattle (including dairy cows) is greater than the number of horses.

Domestic animals on farms and not on farms: 1910.—The following table gives the total number and value of domestic animals, distinguishing those on farms from those not on farms:

KIND.	DOMESTIC ANIMALS.					
	Total.		On farms.		Not on farms.	
	Number.	Value.	Number.	Value.	Number.	Value.
Total	.....	$116,915,262	.....	$106,608,122	.....	$10,307,140
All cattle	1,051,821	22,296,785	996,529	20,690,718	55,292	1,606,067
Dairy cows	433,958	13,372,571	397,104	11,999,755	36,854	1,372,816
Horses	393,462	45,399,257	349,709	39,320,044	43,753	6,079,213
Mules	290,157	37,268,715	275,855	35,100,810	14,302	2,167,905
Asses and burros	8,442	1,160,980	7,989	1,075,066	453	85,914
Swine	1,443,667	7,679,071	1,387,938	7,329,622	55,729	349,449
Sheep	798,520	3,021,721	795,033	3,009,196	3,487	12,525
Goats	45,626	89,033	43,560	82,666	2,066	6,367

The total value of all domestic animals in the state in 1910 was $116,915,000, of which the value of animals not on farms constituted 8.8 per cent.

LIVE STOCK PRODUCTS.

The returns for live stock products obtained at the census of 1910, like those for crops, relate to the activities of the calendar year 1909. It is impossible to give a total representing the annual production of live stock products for the reason that, as shown elsewhere, the total value of products from the business of raising domestic animals for use, sale, or slaughter can not be calculated from the census returns. Even if this value could be ascertained and were added to the value of the crops the sum would not correctly represent the total value of farm products, because, as already more fully explained, duplication would result from the fact that part of the crops are fed to the live stock.

Dairy products: 1909 and 1899.—The following table shows the principal statistics relative to dairy products in 1909, with certain comparative statistics for 1899:

	FARMS REPORTING.		Number or quantity.	Unit.	VALUE.	
	Number.	Per cent of all farms.			Total.	Average per unit.
Dairy cows on farms April 15, 1910	205,360	83.5	397,104	Head		
On farms reporting dairy products in 1909	184,925	75.2	365,102	Head		
On farms reporting milk produced in 1909	183,807	74.7	358,917	Head		
Specified dairy products, 1909:						
Milk reported			117,101,970	Gals		
Butter made	188,629	76.7	39,827,996	Lbs	$7,302,901	$0.10
Cheese made	140	0.1	18,592	Lbs	2,168	0.12
Milk sold	6,461	2.6	6,814,200	Gals	1,210,092	0.18
Cream sold	147	0.1	145,976	Gals	101,266	0.69
Butter fat sold	70	(1)	32,345	Lbs	9,014	0.28
Butter sold	72,409	29.4	9,066,307	Lbs	1,890,272	0.21
Cheese sold	83	(1)	11,883	Lbs	1,334	0.11
Total receipts from sales, 1909					3,211,978	
Total value of milk, cream, and butter fat sold and butter and cheese made, 1909					8,715,441	
Specified dairy products, 1899:						
Butter made	152,027	67.7	20,091,696	Lbs		
Cheese made	130	0.1	26,622	Lbs		
Butter sold			5,102,022	Lbs	819,203	0.16
Cheese sold			15,073	Lbs	1,643	0.10

[1] Less than one-tenth of 1 per cent.

The number of farms reporting dairy cows on April 15, 1910, was 205,360, but only 184,925 reported dairy products in 1909. That there should be this difference is not surprising. Doubtless some farmers who had dairy cows in 1910 had none in 1909, while other farmers neglected to give information for the preceding year, or were unable to do so, perhaps because the farm was then in other hands. Dairy products in general are somewhat less accurately reported than the principal crops. This is particularly the case as regards the quantity of milk produced. The number of farms which made any report of milk produced during 1909 was 183,807 (slightly less than the total number reporting dairy products), and the number of dairy cows on such farms on April 15, 1910, was 359,000. The amount of milk reported was 117,102,000 gallons; assuming that there were the same number of cows in 1909 as in 1910, this would represent an average of 326 gallons per cow. In considering this average, however, it should be borne in mind that the quantity of milk reported is probably deficient and that the distinction between dairy and other cows is not always strictly observed in the census returns.

By reason of the incompleteness of the returns for milk produced, the Census Bureau has made no attempt to determine the total value of dairy products for 1909. For convenience a partial total has been presented comprising the reported value of milk and cream sold as such and sold on the butter fat basis and the reported value of butter and cheese made, whether for home consumption or for sale. The total thus obtained for 1909 is $8,715,000, which may be defined as the total value of dairy products exclusive of milk and cream used on the farm producing.

Only a small proportion of the milk reported as produced by Tennessee farmers in 1909 was sold as such. The butter made on farms in 1909 was valued at $7,393,000.

Comparisons are made between 1909 and 1899 for but few of the census items relating to dairy products, for the reason that in 1899 estimates were made for farms with incomplete reports, which was not done at the census of 1910. The figures for milk produced and milk sold are particularly affected, but those for butter and cheese are approximately comparable. The table shows a material increase between 1899 and 1909 in the amount of butter made and a decrease in the production of cheese.

Wool: 1909 and 1899.—The next table gives statistics as to the production of wool on farms, the figures being partly based on estimates.[1]

The total number of sheep of shearing age in Tennessee on April 15, 1910, was 470,000, representing an increase of 52.8 per cent as compared with the number on June 1, 1900 (308,000). The approximate production of wool during 1909 was 496,000 fleeces, weighing 1,854,000 pounds, and valued at $466,000. Of these totals about one-fifth represents estimates. The number of fleeces produced in 1909 was 43.1 per cent greater than in 1899. The average weight per fleece in 1909 was 3.7 pounds, as compared with 4 pounds

[1] Farmers should be able in general to report the production of wool more accurately than that of dairy products. There were, however, 9,768 farmers who reported the possession of 121,397 sheep of shearing age on April 15, 1910, without reporting any wool produced in 1909. Probably in a large proportion of cases this failure was due to the fact that they did not have these sheep, or did not occupy the same farm, during the preceding year. The returns of farms reporting wool in 1909 but no sheep of shearing age on April 15, 1910, would partially make up this deficiency, but it is believed that it many cases enumerators, having found that a farm had no sheep in 1910, omitted the inquiry as to wool produced in 1909, and thus missed more or less wool actually produced. It is a fairly safe assumption that the entire production of wool in 1909 bore the same relation to the entire number of sheep of shearing age on April 15, 1910, as the production of wool on those farms reporting both production and sheep bore to the number of sheep reported on such farms. Statistics for this group of farms are given in the table, and the total wool product, estimated on the basis of the above assumption, is also given.

in 1899, and the average value per pound was 25 cents, as compared with 19 cents in 1899.

	Number of farms reporting.	Sheep of shearing age.	WOOL PRODUCED. Fleeces (number).	Weight (pounds).	Value.
Sheep of shearing age on farms April 15, 1910	20,431	470,337			
Wool produced, as reported, 1909	21,345		394,037	1,475,841	$369,751
On farms reporting sheep April 15, 1910	19,663	348,040	367,964	1,375,598	346,063
On other farms	1,682		26,073	100,243	23,688
Total production of wool (partly estimated):					
1909			495,079	1,854,172	466,459
1899			346,715	1,395,295	263,351
Increase, 1899 to 1909			148,364	458,877	203,108
Per cent of increase			43.1	32.9	77.1

Goat hair and mohair: 1909 and 1899.—Although 4,859 farmers reported 43,560 goats and kids on their farms April 15, 1910, only 115 reported the production of goat hair or mohair during 1909. These farmers reported 1,342 fleeces, weighing 3,428 pounds and valued at $1,053. Although the production is still unimportant, some increase is shown over that in 1899.

Poultry products: 1909 and 1899.—The statement below gives data relative to the production and sale of eggs and poultry:

	Number of farms reporting.	Number of fowls on hand.	PRODUCT. Quantity.	Value.
Fowls on farms April 15, 1910	222,711	8,056,145		
On farms reporting eggs produced in 1909	198,708	7,586,306		
On other farms	24,003	469,839		
			Dozens.	
Eggs produced, as reported, 1909	200,477		39,352,433	$6,793,640
Total production of eggs (partly estimated):				
1909			42,043,104	7,258,146
1899			31,807,990	3,115,335
Increase, 1899 to 1909			10,235,114	4,142,811
Per cent of increase			32.2	133.0
Eggs sold, as reported, 1909	172,934		24,597,449	4,248,340
Fowls on farms April 15, 1910:				
On farms reporting poultry raised in 1909	198,570	7,532,207		
On other farms	24,141	523,938		
			No. of fowls.	
Poultry raised, as reported, 1909	200,935		16,282,590	5,398,647
Total poultry raised (partly estimated):				
1909			17,415,208	5,774,175
1899				4,282,740
Increase, 1899 to 1909				1,491,435
Per cent of increase				34.8
Fowls sold, as reported, 1909	139,461		5,330,639	2,075,702

The total number of fowls on Tennessee farms on April 15, 1910, was 8,056,000. Of the 222,711 farms reporting fowls, 24,003 did not report any eggs produced in 1909, and 24,141 did not report any poultry raised in 1909. The production of eggs actually reported for the year 1909 was 39,352,000 dozens, valued at $6,794,000. According to the Twelfth Census reports, the production of eggs in 1899 was 31,808,000 dozens, the value being $3,115,000. The latter figures, however, are somewhat in excess of the actual returns at that census, because they include estimates made to cover those cases where the schedules reported fowls on hand without reporting the production of eggs. In order to make the returns for 1909 comparable with those published for 1899, similar estimates have been made, the method of estimate and the justification therefor being substantially the same as in the case of wool. The total production of eggs in 1909, including these estimates, was 42,043,000 dozens, valued at $7,258,000. The total production of poultry in 1909, including estimates made on the same basis as for eggs, was 17,415,000 fowls, valued at $5,774,000.

Honey and wax: 1909.—Although, as noted elsewhere, 27,706 farms reported 144,481 colonies of bees on hand April 15, 1910, 10,123 of these farms, with 30,164 colonies on hand April 15, 1910, made no report of honey or wax produced in 1909. The actual returns show the production of 1,468,123 pounds of honey, valued at $175,791, and 28,864 pounds of wax, valued at $7,271; the true totals are doubtless somewhat above these figures.

Sale or slaughter of domestic animals on farms: 1909 and 1899.—The following statement presents statistics relating to the sale or slaughter of domestic animals by Tennessee farmers during the year 1909, with certain items for 1899:

	FARMS REPORTING. Number.	Per cent of all farms.	Number of animals.	VALUE. Total.	Average.
1909—All domestic animals:					
Sold				$37,637,861	
Slaughtered				12,209,506	
Calves:					
Sold	46,097	18.7	114,620	792,033	$6.91
Slaughtered	2,916	1.2	9,548	61,648	6.46
Other cattle:					
Sold	83,836	34.1	540,891	11,569,003	21.39
Slaughtered	10,838	4.4	33,483	590,467	17.63
Horses:					
Sold	22,486	9.1	39,011	3,885,888	99.61
Mules:					
Sold	30,327	12.3	78,170	10,753,877	137.57
Asses and burros:					
Sold	644	0.3	1,535	214,304	139.61
Swine:					
Sold	74,122	30.1	1,082,134	8,480,007	7.84
Slaughtered	163,704	66.6	742,123	11,494,380	15.49
Sheep:					
Sold	14,178	5.8	456,484	1,921,073	4.21
Slaughtered	3,722	1.5	13,490	54,078	4.01
Goats:					
Sold	1,107	0.5	9,988	20,776	2.08
Slaughtered	1,080	0.4	4,563	8,933	1.96
1899—All domestic animals:					
Sold[1]				11,121,141	
Slaughtered				8,350,040	

[1] Schedules called for receipts from sales of animals raised on the farms reporting.

The total value of domestic animals sold during 1909 was $37,638,000, and that of animals slaughtered on farms $12,210,000, making an aggregate of $49,847,000. This total, however, involves considerable duplication, resulting from the resale or slaughter of animals which had been purchased by the farmers during the same year.

The value of the cattle (including calves) sold during 1909 represented about one-third of the total value of animals sold, and the value of mules and of swine sold constituted most of the remainder.

The census of 1900 called for the receipts from the sale of all domestic animals raised on the farms report-

ing and the total value of those slaughtered during 1899, which amounted, respectively, to $11,121,000 and $8,350,000. The item of sales is not closely comparable with that for 1909, when the inquiry covered all sales, whether of animals raised on the farms reporting or elsewhere. It is believed, however, that in many cases the returns for 1899 also included receipts from sales of animals not actually raised on the farms reporting.

CROPS.

Summary: 1909 and 1899.—The following table summarizes the census data relative to all of the farm crops of 1909 and 1899. It includes not only general farm crops, but also flowers and plants, nursery products, and forest products of farms. In comparing one year with the other it should be borne in mind that acreage is on the whole a better index of the general changes or tendencies of agriculture than either the quantity or the value of the crops, since variations in quantity may be due largely to temporarily favorable or unfavorable climatic conditions, and variations in the value of the crops are largely affected by changes in prices. (See also discussion of "Total value of farm products.")

	ACRES.				PER CENT OF IMPROVED LAND OCCUPIED.		VALUE OF PRODUCTS.					
	1909	1899	Increase.[1]		1909	1899	1909	1899	Increase.[1]		Per cent of total.

[1] A minus sign (−) denotes decrease. [2] Less than one-tenth of 1 per cent. [3] Includes value of raisins and other dried fruits, wine, cider, vinegar, etc.

The total value of crops in 1909 was $120,706,000. Of this amount, 89.9 per cent was contributed by crops for which the acreage as well as the value was reported, the remainder consisting of the value of by-products (straw, garden and grass seeds, etc.) derived from the same land as other crops reported, or of orchard fruits, nuts, forest products, and the like. The combined acreage of crops for which acreage was reported was 6,365,143, representing 58.4 per cent of the total improved land in farms (10,890,484 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage for which was not reported.

The general character of Tennessee agriculture is indicated by the fact that somewhat less than one-half (45.8 per cent) of the total value of crops in 1909 was contributed by the cereals, about one-sixth (17.1 per cent) by cotton, and about one-tenth (10.5 per cent) by hay and forage. The remainder, representing in value 26.6 per cent of the total, consisted mostly of potatoes and other vegetables, forest products, tobacco, and fruits and nuts.

The total value of crops in 1909 was 70.6 per cent greater than in 1899, this increase being no doubt due in part to higher prices. There was a decrease of 4.7 per cent in the total acreage of crops for which acreage was reported, the principal absolute decrease being that in the acreage of cereals, and the principal absolute increase that in the acreage of hay and forage.

General farm crops, minor grains and seeds, and sundry minor crops: 1879 to 1909.—The next table presents statistics for 1909 regarding cereals, other grains and seeds, hay and forage, potatoes, tobacco, cotton, and sundry minor crops.

The leading crops covered by the table, in the order of their importance as judged by value, are corn, $45,819,000; cotton, $17,967,000; hay and forage, $12,618,000; wheat, $6,913,000; tobacco, $5,662,000; cotton seed (estimated), $2,716,000; and oats, $2,378,000. It should be noted, however, that vegetables, exclusive of potatoes and sweet potatoes and yams, are more important than most of the crops presented in this table; the statistics for vegetables appear in a later table.

The total acreage of the combined cereals is about four times as great as that of hay and forage, and their value is almost four and one-half times as great. The leading cereal is corn, it having an acreage and value about three-fourths and five-sixths as great as the cereals combined. Of the others, wheat and oats rank in the order named in both acreage and value.

"Other tame or cultivated grasses" ranks first in acreage and second in value among the hay and forage crops, while "timothy and clover mixed" stands second in acreage and first in value. "Clover alone" and "grains cut green" are third and fourth, respectively, in both acreage and value. "Timothy alone" ranks fifth. These five crops combined constitute about seven-eighths of the entire crop.

Cotton, which after corn is the leading crop in value, has an acreage about one-fourth as great but a product more than one-third as valuable. The acreage is less than that of hay and forage, but the product is nearly one and one-half times as great in value.

Tobacco, with an acreage far smaller than that of wheat, has a value which falls a little below it. Potatoes and sweet potatoes and yams are crops of considerable importance.

CROP.	Farms reporting.	Acres harvested.	QUANTITY. Amount.	Unit.	Value.

Cotton seed (estimated)	.....	.....	132,278	Tons.	2,715,670
Sundry minor crops, total [4]	.....	1,854	.....	.....	31,072
Broom corn	2,220	1,348	347,664	Lbs..	27,733
Ginseng	11	6	.....	.....	3,292

[1] Includes small amounts of broom corn seed, sorghum cane seed, and sunflower seed.
[2] A considerable amount of this acreage is probably a duplication of other crop acreage.
[3] The entire acreage from which these seeds were secured is believed to be included in the acreage given elsewhere for hay and forage, flowers and plants, etc.
[4] Includes small amounts of hemp and hops.

The fluctuations in the acreages of some of the principal crops during the past 30 years are shown in the table following.

Of the six crops included in the next table, the acreages of but two, hay and forage and tobacco, show a constant increase during the 30 years, which is the more rapid in the case of hay and forage. The acreage of cotton reached its maximum in 1909, but the slow advance since 1879 was broken by a decrease from 1889 to 1899. The acreage of corn in 1909, while slightly greater than that of 30 years before, was somewhat less than in 1899. The acreage of oats fluctuated throughout the 30 years, with a decrease for the period. The acreage of wheat shows the greatest variation, the high points being in 1879 and 1899, the low points in 1889 and 1909. The latter is the lowest for the period.

CROP YEAR.	ACRES HARVESTED. Corn.	Oats.	Wheat.	Hay and forage.	Tobacco.	Cotton.
1909	3,146,348	342,086	619,861	1,052,816	90,468	787,516
1899	3,374,574	235,313	1,426,112	645,617	71,849	623,137
1889	2,701,324	588,138	877,361	571,553	51,471	747,471
1879	2,904,873	468,566	1,196,563	191,651	41,532	722,562

The following table shows for 1909 and 1899 the percentage which the farms reporting specified crops represented of all farms, the percentage of improved land devoted to these crops, and the percentage of increase or decrease in the acreage of each crop during the decade, together with the average yields and average values per acre for 1909:

CROP.	PER CENT OF FARMS REPORTING. 1909	1899	PER CENT OF IMPROVED LAND. 1909	1899	Per cent of increase in acres, 1899 to 1909. [1]	AVERAGE YIELD PER ACRE. 1909	AVERAGE VALUE PER ACRE. 1909
Corn	85.8	92.0	28.9	32.9	−6.8	21.5 Bu.	$14.56
Oats	18.1	16.6	3.1	2.3	45.4	13.8 Bu.	6.95
Wheat	17.9	38.5	5.7	13.9	−56.5	10.5 Bu.	11.15
Hay and forage	42.0	52.7	9.7	6.3	63.1	1.02 Tons.	11.98
Tobacco	10.4	12.4	0.8	0.7	25.9	760.0 Lbs.	62.58
Cotton	27.5	23.8	7.2	6.1	26.4	0.34 Bale.	22.81

[1] A minus sign (−) denotes decrease.

Out of every 100 farmers in the state, corn is reported by 86; hay and forage, by 42; cotton, by 28; oats, by 18; wheat, by 18; and tobacco, by 10. Of these percentages, corn, wheat, hay and forage, and tobacco are decreases, oats and cotton, increases, compared with their status of 1899. It may be noted, in connection with the fact that the percentage of farms reporting hay and forage decreased during the decade from 52.7 per cent to 42 per cent, that this decrease is more apparent than real and is due to the omission of "cornstalks" at the census of 1910. Hence the percentages pertaining to this crop for the years 1899 and 1909 are not comparable.

The six crops included in the preceding table cover about 55 per cent of the improved land of the state. Corn and wheat show decreases, while oats, hay and forage, tobacco, and cotton show increases in the proportion of improved land occupied. The decrease in the acreage of the combined cereals is 918,681 acres, or 18.2 per cent; the increase in that of hay and forage, 407,199 acres, or 63.1 per cent.

The average value per acre of the cereals is $13.37. Of the important cereals, corn stands above this average, oats and wheat below it. In average value per acre the combined cereals was greater than that of

hay and forage by $1.39, slightly over one-fifth that of tobacco, and more than one-half that of cotton.

In acreage corn is found quite evenly distributed throughout the state, with, however, the larger acreages located almost entirely in the western and central parts. Obion County, in the northwestern corner, is the leading county in the production of this crop. The largest actual gain is reported for Obion County; the largest actual loss for Wilson County. Of the total cotton acreage more than nine-tenths is reported by those counties lying between the Mississippi and Tennessee Rivers, Shelby County, in the southwestern corner of the state, reporting the largest acreage. Of these counties only 2, Hardeman and McNairy on the southern boundary, show decreases. The largest absolute increase is reported for Dyer County. In the acreage of hay and forage only 2 counties show decreases, Jackson and Pickett, located about the middle of the northern part of the state. Knox County, in the eastern portion of the state, reports the largest acreage. In the acreage of wheat every county but 1 shows a decrease, Obion County reporting the greatest loss. More than nine-tenths of the total tobacco acreage is reported by 12 counties, nearly all of which lie along the western half of the northern boundary. Robertson County, with 17,655 acres, or nearly one-fifth of the total acreage, is the leading county. Oats are grown pretty generally throughout the state. For Maury County the largest acreage is reported. Four counties—Maury, Williamson, Marshall, and Rutherford—forming a compact group near the center of the state, report almost one-sixth of the acreage of oats. The acreage of potatoes is quite evenly distributed throughout the state. Maury County reports the largest acreage. Sweet potatoes and yams are also found generally spread throughout the state. Shelby County reports the greatest acreage.

Vegetables, flowers and plants, and nursery products: 1909 and 1899.—The table which follows shows details with regard to vegetables (not including potatoes and sweet potatoes and yams, which appear elsewhere), and also with regard to flowers and plants and nursery products.

In 1909 the total acreage of potatoes and other vegetables was 167,234 and their value $10,430,975. Excluding (so far as separately reported[1]) potatoes and sweet potatoes and yams, the acreage of vegetables was 100,055 and their value $7,016,000, both acreage and value being decidedly greater than in 1899.

The raising of flowers and plants and of nursery products was also of some importance in Tennessee, 4,215 acres being devoted to them in 1909, and the output being valued at $1,042,282. Most of the product was raised on farms where these branches of agriculture were carried on as an important business.

[1] It is probable that some of the potatoes and sweet potatoes and yams raised in farm gardens were not reported separately by farmers, but were included in their returns for vegetables.

CROP.	FARMS REPORTING, 1909		ACRES.		VALUE OF PRODUCTS.	
	Number.	Per cent of all farms.	1909	1899	1909	1899

All other farms	59	[2]	.....	.....	8,529	.....

[1] Does not include 16,191 farms which reported that they had vegetable gardens, but gave no information as to their products.
[2] Less than one-tenth of 1 per cent.

Small fruits: 1909 and 1899.—The following table shows data with regard to small fruits on farms:

CROP.	Number of farms reporting, 1909	ACRES.		Quantity (quarts), 1909	Value, 1909
		1909	1899		
Small fruits, total	.....	**12,539**	**12,944**	**13,895,403**	**$923,613**
Strawberries	6,046	10,761	11,548	12,339,584	835,739
Blackberries and dewberries	3,884	1,514	733	1,316,100	65,475
Raspberries and loganberries	830	253	471	222,331	20,031
Currants	52	2	12	3,720	261
Gooseberries	141	0	114	13,740	1,205
Other berries	1	(1)	66	12	1

[1] Reported in small fractions.

Strawberries are by far the most important of the small fruits raised in Tennessee, with blackberries and dewberries ranking next. The total acreage of small fruits in 1909 was 12,539 and in 1899, 12,944, a decrease of 3.1 per cent. The production in 1909 was 13,895,000 quarts, as compared with 15,200,000 in 1899, and the value was $924,000 in 1909, as compared with $593,000 in 1899.

Orchard fruits, grapes, nuts, and tropical fruits: 1909 and 1899.—The following table presents data with regard to orchard fruits, grapes, nuts, and tropical fruits. The acreage devoted to these products was not ascertained. In comparing one year with the other the number of trees or vines of bearing age is on the whole a better index of the general changes or tendencies than the quantity of product, but the data for the censuses of 1910 and 1900 are not closely comparable, and the product is therefore compared, although variations may be due largely to temporarily favorable or unfavorable climatic conditions.

The total quantity of orchard fruits produced in 1909 was 6,485,000 bushels, valued at $3,459,000. Apples contributed nearly three-fourths of this quantity, peaches and nectarines most of the remainder. The production of grapes in 1909 amounted to 1,979,480 pounds, valued at $85,423; that of nuts to 783,570 pounds, valued at $14,041; and tropical fruits, produced in 1909, were valued at $4,127.

The production of all orchard fruits together in 1909 was 15.8 per cent more than that in 1899, while the production of grapes decreased decidedly. The value of orchard fruits increased from $1,480,000 in 1899 to $3,459,000 in 1909, and that of grapes decreased from $120,199 in 1899 to $85,423 in 1909. It should be noted in this connection that the values for 1899 include the value of more advanced products derived from orchard fruits or grapes, such as cider, vinegar, dried fruits, and the like, and may therefore involve some duplication, while the values shown for 1909 relate only to the products in their original condition.

Tropical fruits, total		[5] **2,703**		[6] **889**		[5] **4,127**	
Figs	617	2,287	226	793	68,535	4,070	5,690

[1] Expressed in bushels for orchard fruits and pounds for grapes, nuts, and figs.
[2] Included with "unclassified."
[3] Consists of products not separately named by the enumerator, but grouped under the designation "all other."
[4] Includes Persian or English walnuts, almonds, Japanese chestnuts, Japanese walnuts, Spanish walnuts, white walnuts, Spanish chestnuts, chinquapins, and hazelnuts.
[5] Includes oranges, lemons, and Japanese persimmons.

The following table shows the quantities of the more advanced products manufactured by farmers from orchard fruits and grapes. Values were not called for on the schedule.

PRODUCT.	FARMS REPORTING, 1909		QUANTITY PRODUCED.		
	Number.	Percent of all farms.	Unit.	1909	1899
Cider	4,734	1.9	Gals	213,916	295,218
Vinegar	8,645	3.5	Gals	191,915	180,338
Wine and grape juice	1,903	0.8	Gals	16,576	28,567
Dried fruits	13,252	5.4	Lbs	857,903	2,533,810

Sugar crops: 1909 and 1899.—The table below shows data with regard to maple trees and their products, and also for sugar beets and sorghum cane. The total value of sorghum cane and sirup produced in 1909 was $1,146,000, as compared with $647,000 in 1899.

PRODUCT.	FARMS REPORTING.		Acres.	PRODUCT.		
	Number.	Percent of all farms.		Amount.	Unit.	Value.
Maple sugar and sirup:						
Total, 1909	164	0.1	[1] 4,107			$1,333
Sugar made	115	[2]		4,326	Lbs	881
Sirup made	80	[2]		373	Gals	452
Total, 1899	64	[2]				336
Sugar made				1,100	Lbs	167
Sirup made				171	Gals	169
Sugar beets, 1909 [3]	123	[2]	167	420	Tons	2,810
Sorghum cane:						
Total, 1909 [4]						1,145,932
Cane grown	47,130	19.2	52,907	205,901	Tons	
Sirup made	42,416	17.2		2,076,339	Gals	981,407
Total, 1899						647,129
Cane grown	45,461	20.2	31,364	226,523	Tons	
Cane sold as such				21,886	Tons	61,793
Sirup made				2,047,655	Gals	585,336

[1] Number of trees.
[2] Less than one-tenth of 1 per cent.
[3] Used as root forage.
[4] Includes cane used as coarse forage.

Forest products: 1909 and 1899.—The census schedules for 1910 called for the "value of all firewood, fencing material, logs, railroad ties, telegraph and telephone poles, materials for barrels, bark, naval stores, or other forest products cut or produced in 1909, whether used on farm, sold, or on hand April 15, 1910;" and also, in a separate item, for the "amount received from sale of standing timber in 1909." There were 132,750 farms in Tennessee (54 per cent of all farms in the state) which reported forest products in 1909, the total value of such products being $8,510,710, as compared with $5,086,624 in 1899, an increase of 67.3 per cent. Of the value in 1909, $4,559,591 was reported as that of products used or to be used on the farms themselves, $3,050,280 as that of products sold or for sale, and $900,839 as the amount received for standing timber. It should be noted that forest products not produced on farms are not included.

Miscellaneous crops: 1909.—Straw and cornstalks derived as by-products from the production of grain and corn have a considerable value for feed and other purposes. They are, however, mainly consumed on the farms producing them. The Census Bureau made no attempt to ascertain the total quantity or value of these products, but the schedules called for the quantity and value of those sold during the year 1909. The returns show that 413 farmers in Tennessee sold 2,002 tons of straw, for which they received $10,330, and that 846 farmers sold 1,273 tons of cornstalks and leaves, for which they received $9,679.

SELECTED FARM EXPENSES AND RECEIPTS.

Farm expenses: 1909 and 1899.—The next table shows the number of farms reporting expenditures for labor, feed, and fertilizer at the census of 1910, as well as the sums expended in 1909 and 1899.

Of the farmers in Tennessee, over one-third (36 per cent) hire labor, and the total expenditure is $8,448,000, or an average of $95.28 per farmer hiring. Of the total amount expended, $1,411,000 is in the form of

rent and board. During the decade the total expenditure for labor increased by $3,718,000, or 78.6 per cent. For no census prior to 1910 were reports secured of the value of rent and board furnished or tabulation made of the number of farmers reporting expenditure for labor.

EXPENSE.	1909			1899	INCREASE.	
	Farms reporting.		Amount.	Amount.	Amount.	Per cent.
	Number.	Per cent of all farms.				
Labor	88,670	36.0	$8,448,059	$4,730,370	$3,717,689	78.6
Feed	70,212	28.5	3,570,551	(1)	.....	.....
Fertilizer	53,498	21.7	1,216,296	898,070	318,226	35.4

[1] Not reported at the census of 1900.

Nearly three-tenths (28.5 per cent) of all the farmers report some expenditure for feed, while 21.7 per cent report the purchase of fertilizer. The total amount, $1,216,000, reported as paid for fertilizer shows an increase of $318,000, or 35.4 per cent, since 1899, and now averages $22.74 per farm reporting. At prior censuses no tabulation was made of the number of farmers reporting expenditures for fertilizer. The expenditure for feed amounts to $3,571,000 and averages $50.85 per farm reporting.

Receipts from sale of feedable crops: 1909.—An effort was made at the census of 1910 to secure as complete a statement as possible of the sales as well as the production of the more *important feedable crops (that* is, crops ordinarily fed to live stock). The following table summarizes the data reported:

CROP.	FARMS REPORTING.		QUANTITY SOLD.		Amount received.
	Number.	Per cent of all farms.	Amount.	Unit.	
Total	.....	.....	.....	.....	$6,713,697
Corn	48,552	19.7	7,092,466	Bu	4,875,550
Oats	11,058	4.5	1,166,503	Bu	580,721
Barley	57	(1)	13,018	Bu	9,224
Hay and coarse forage	15,102	6.1	98,250	Tons	1,248,193

[1] Less than one-tenth of 1 per cent.

While the total amount expended by Tennessee farmers for the purchase of feed in 1909 was $3,571,000, the total receipts from the sale of feed by those reporting sales amounted to $6,714,000.

COUNTY TABLES.

Tables 1 to 6, which follow, present by counties the more important agricultural data collected at the Thirteenth Census, 1910.

Table 1 shows the population, number of farms, land and farm area, value of farm property, and number and value of domestic animals and of poultry and bees, as of April 15, 1910. Comparative data for June 1, 1900, are given in italics for certain items.

Table 2 gives the number of farms, the farm acreage, and the value of farm property operated by owners, tenants, and managers, collected as of April 15, 1910. Statistics of farm mortgages are included in this table. (See explanation in text.) Comparative data for June 1, 1900, are given in italics for certain items.

Table 3 gives statistics pertaining to the products of live stock on farms (dairy products, poultry and eggs, honey and wax, and wool and mohair); also the number and value of domestic animals sold or slaughtered on farms for the year 1909.

Table 4 shows the total value of farm crops and the principal classes thereof, together with the acreage (or trees of bearing age) and production of the principal crops for the year 1909.

Table 5 gives statistics relating to selected farm expenses for 1909 and also shows the receipts from the sale of feedable crops.

Table 6 shows the number and value of domestic animals in barns and inclosures not on farms, by classes, together with the number of dairy cows and mature horses and mules, on April 15, 1910.

Change of boundaries.—In comparing the data secured in 1910 with that of 1900, the following changes in county boundaries should be considered: A part of Wayne County was annexed to Perry County in 1909 and Island No. 25, of Lauderdale County, was ceded to Arkansas in 1905.

Changes in 1900 figures.—After the volumes of the Twelfth Decennial United States Census (1900) had been printed, a further detailed study and analysis of the data there presented brought to light certain errors in the total farm acreage of Union County. The corrected acreage is *140,932*, and *not 152,918 as shown* in the county tables.

Explanation for 1910 figures.—The boundaries of the counties in the state of Tennessee are very irregular, and many of the county lines have not been surveyed and marked on the ground. It is, therefore, impossible to secure a map that shows with absolute accuracy the correct location of the county lines. Further, the original surveys on which the areas of farms are described in deeds are based on lines run by a magnetic compass, and are, therefore, more or less inaccurate, and sometimes exaggerate the actual areas. As a result of these conditions, in a few counties the areas of farm land reported by the census enumerators and that of all land reported by local assessors for tax purposes exceed the total land area computed by planimeter measurements from state and county maps. In some cases this probably represents land actually situated in adjoining counties and in others an exaggerated statement of the land actually located in the county. These conditions affect the areas of Hamblen, Loudon, Macon, Robertson, Smith, and Trousdale Counties, giving them a larger farm area in 1910 than the land area as computed, and giving to Hamblen, Macon, Robertson, Smith, and Trousdale Counties larger assessed areas in most years than the land surface of these counties as computed from maps.

TABLE 1.—FARMS AND FARM PROPERTY,

[Comparative data for June 1, 1900, in italics.]

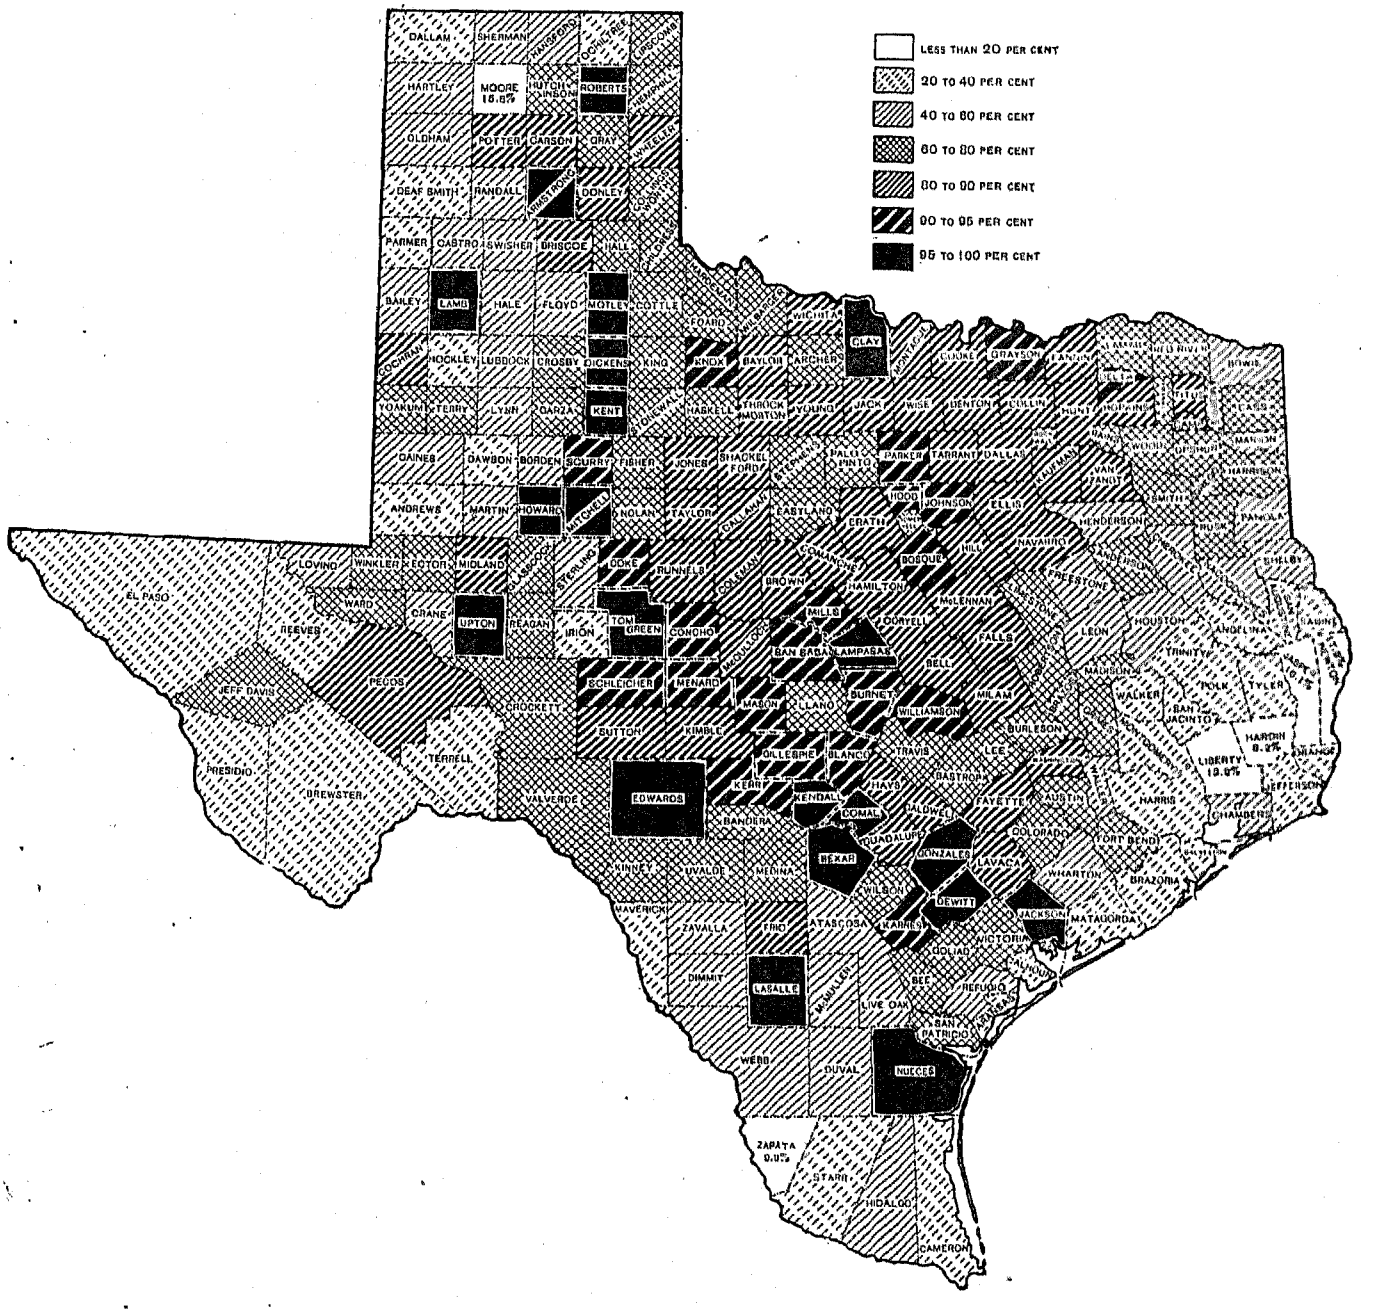
PER CENT OF LAND AREA IN FARMS IN TEXAS, BY COUNTIES: 1910.

[Per cent for the state, 67.]

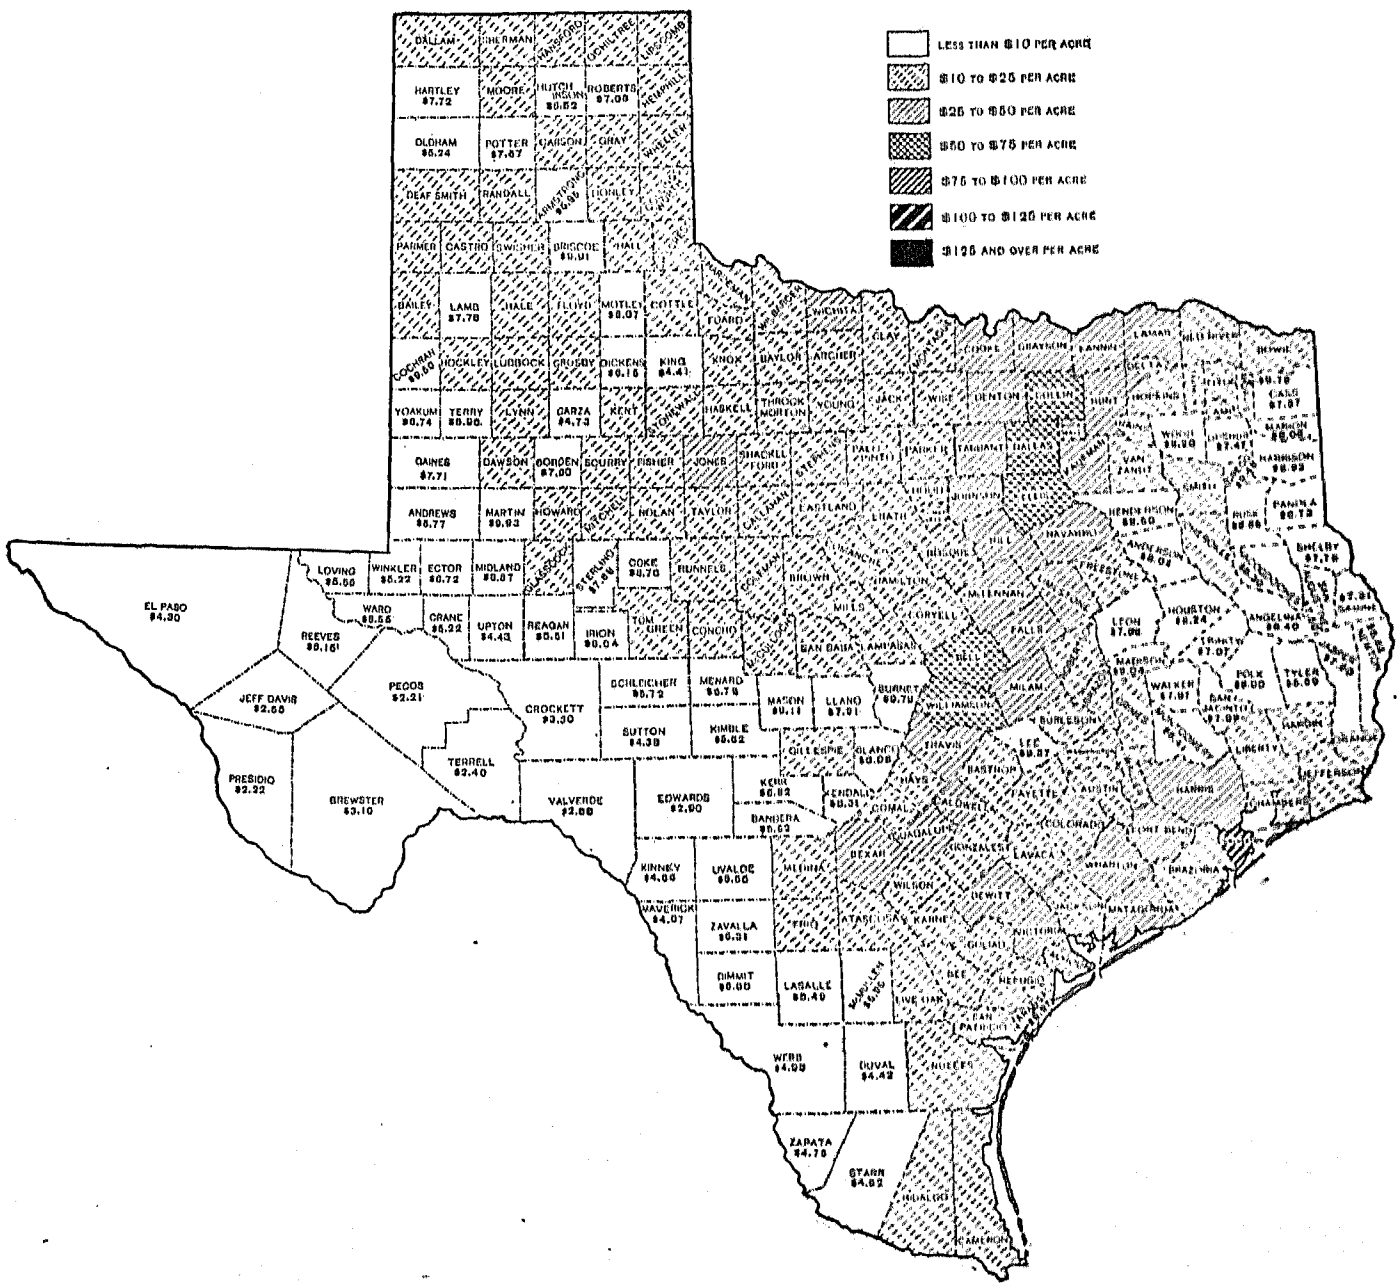
The per cent of land area in farms, when less than 20, is inserted under the county name.



AVERAGE VALUE OF FARM LAND PER ACRE IN TEXAS, BY COUNTIES: 1910.

[Average for the state, $14.53.]

When the value is less than $10 per acre, it is inserted under the county name.



TEXAS.

FARMS AND FARM PROPERTY.

Texas ranks first in land area and fifth in population among the states and territories of continental United States. The state rises from sea level along its southeastern coast line to altitudes in excess of 6,000 feet among the ranges which cross the extreme western or trans-Pecos region. In general the surface slopes gently upward from the Gulf coast inland to the central portion of the state. Central Texas is occupied by high plateaus and rolling prairies which in the western and northwestern portions of the state merge into the high plains section of the Panhandle and into the mountain and basin topography of the trans-Pecos region.

Immediately back from the coast line there extends a broad belt, known as the coast prairies, which reaches from the Sabine River to the Rio Grande and varies in width from 30 to 100 miles. Practically all of this stretch of country is nearly level, its inner margin scarcely rising to an altitude of 100 feet above the sea. Northeastern Texas, immediately inland from this coastal belt, consists of a rolling Coastal Plains section stretching from the Louisiana border to the vicinity of San Antonio. It is known as the east Texas timbered region. Its highest elevations rise to 500 and 600 feet above sea level. Lying along the Rio Grande, immediately west of the coastal prairie belt in southwestern Texas, is a broad tract which is known as the Rio Grande Embayment. It rises from the Rio Grande River in the form of rolling prairies to altitudes of 1,000 feet. The divisions are separated from the plateau section of central Texas by the broad belt of the Black and Grand prairies, which have their greatest breadth along the Red River, and extend southward in a narrowing belt just past San Antonio. The altitudes within this Cretaceous prairie section range from 450 feet to approximately 1,000 feet above sea level. In the northern portion of this prairie section a narrow timber belt known as the eastern cross timbers extends southward from the Red River, separating the Black Prairie from the Fort Worth Prairie. In this region also the Cretaceous prairies are bounded on the west by what is known as the western cross timbers. North central Texas consists of an elevated plateau much dissected by the larger streams and rising from an altitude of approximately 1,000 feet along its eastern boundary to altitudes in excess of 2,000 feet, where it merges into the high plains of the Panhandle section. The southern portion of this plateau region consists of the deeply dissected Lampasas cut plain and the central mineral region. The northern portion of the Panhandle and practically all of the western part of Texas lie within the high plains region at an altitude ranging from 2,000 to 5,000 feet above sea level. These high rolling plains are deeply cut by rivers which flow across them in gorges and "breaks," between which are broad stretches of rolling to nearly level plateau country. The high plains in the southwestern portion of the state are broken by the eastern Cordilleran Ranges which enter the state in the extreme western portion. Between these ranges there are numerous extensive intermountain basins, lying at altitudes from 2,000 to 4,000 feet above sea level, which constitute a continuance of the high plains southwest to the Rio Grande River. The southern portion of the high plains region is subdivided into the Edwards Plateau, east of the Pecos River, and the Stockton Plateau, west of it.

The surface features of the state of Texas thus possess a great diversity, ranging from a low coastal plains section through more elevated and rolling timber country and Cretaceous prairies to the plateau and high plains region of central and western Texas and to the mountain and basin region of the trans-Pecos country.

The soils of the coastal prairie are prevalently gray silty and fine sandy loams in the vicinity of the Sabine River. These gradually merge into brown and black sandy loam and loam soils which stretch from the vicinity of Houston and Galveston nearly to the Rio Grande. This region is also crossed by the alluvial bottoms of the principal Texas rivers whose soils consist of red and brown sandy loams or of black, sticky clays. The soils of the eastern Texas timbered region are gray sands, sandy loams, loam and clay soils of considerable variety which are usually rolling and well drained. The Cretaceous prairies of central Texas constitute the richest agricultural soils of large extent within the state. The prevailing soil is a black, waxy clay, although areas of loam and sandy loam are also found along the boundaries of the region. The soils of both cross timber belts are prevalently stony, sandy, and gravelly, resembling closely the soils found at the higher elevations in the rolling Coastal Plain.

The residual prairie region of Texas is occupied by sandstones, shale, and limestone rocks which give rise to a wide variety of soils. In the north central portion of the state the Permian red beds give rise to sandy and fine sandy loam soils of a red or brown color. In the cut plains region extensive areas of limestone give rise to brown loam and clay loam soils somewhat resembling those of the Cretaceous prairies.

Within the high plains region the soils are derived from calcareous, Tertiary, and Quaternary deposits. The soils are prevalently brown to reddish brown and include gravelly loams, sands, sandy loams, and silty clay loams, which are extensively developed in this

region. The greater portion of the Rio Grande Embayment has alluvial soils, chiefly silty loams and silty clays.

The average altitude of the state of Texas above sea level is estimated at approximately 1,700 feet, the western portion of the state lying above this altitude and the eastern portion uniformly below it.

Over the greater part of the state the rainfall is sufficient to insure successful grain crops without irrigation, and the normal annual precipitation ranges all the way from about 50 inches along the eastern boundary to about 10 inches in the western counties. Irrigation is practiced extensively, however, in the rice growing counties on and near the Gulf of Mexico, and in localities in the valleys of the Rio Grande and Pecos Rivers where the annual precipitation is light. In the remainder of the state irrigation is limited to gardens and special crops of small acreage.

The two maps on the preceding pages show, for the different counties, the proportion of the total land area in farms and the average value of farm land per acre. Of the state's entire land area about two-thirds (67 per cent) is in farms. The percentage varies widely in the different counties, but the most common proportion is from 60 to 80 per cent, the proportion in 68 counties falling between these figures. Seventy-nine counties have less than 60 per cent of their land in farms. Most of these are on or near the boundaries of the state, particularly in the southeastern part. A higher proportion of land in farms of from 80 to 90 per cent is found in 56 counties, located mainly in the north central part of the state. Scattered over the state there are as many as 42 counties which have more than 90 per cent of their land in farms; in 21 of these the proportion is from 90 to 95 per cent, and in an equal number 95 per cent and over.

For the state as a whole, the average value of farm land per acre is $14.53. In nearly half of the counties (119) the average is between $10 and $25. Ninety-one counties show an average value of less than $10 per acre. The greater number of these are in the western and southwestern parts of the state, but a few are in the extreme eastern part. Higher average values of farm land, ranging between $25 and $50, are found in 28 counties, nearly all of which are located in the eastern part of the state. Twenty of these lie in whole or in part in the belt of the Black and Grand Prairies before mentioned, where there are also six counties with average values between $50 and $75 per acre. In Galveston County, in the southeastern part of the state, in which the city of Galveston is located, the average value of farm land exceeds $75 per acre.

Progress during the decade 1900 to 1910.—The following table summarizes for the state the more significant facts relating to population and land area, the number, value, and acreage of farms, and the value of all other farm property in 1910 and 1900:

NUMBER, AREA, AND VALUE OF FARMS.	1910 (April 15)	1900 (June 1)	INCREASE.[1]	
			Amount.	Per cent.
Population	3,896,542	3,048,710	847,832	27.8
Number of all farms	417,770	352,190	65,580	18.6
Approximate land area of the state.....acres..	167,934,720	167,934,720	.....	.....
Land in farms.....acres..	112,435,067	125,807,017	−13,371,950	−10.6
Improved land in farms.....acres..	27,360,666	19,576,076	7,784,590	39.8
Average acres per farm	269.1	357.2	−88.1	−24.7
Value of farm property:				
Total	$2,218,645,164	$962,476,273	$1,256,168,891	130.5
Land	1,633,207,135	591,550,802	1,041,656,333	176.1
Buildings	210,001,260	100,222,811	109,778,449	109.5
Implements and machinery	56,790,260	30,125,705	26,664,555	88.5
Domestic animals, poultry, and bees	318,646,509	240,576,955	78,069,554	32.5
Average value of all property per farm	$5,311	$2,733	$2,578	94.3
Average value of land per acre	$14.53	$4.70	$9.83	209.1

[1] A minus sign (−) denotes decrease.

NOTE.—Ranges or ranches using the public domain for grazing purposes, but not owning or leasing land, were counted as farms in 1910 and 1900. They were included as owned or managed, free from mortgage, and under 3 acres in size. The counting of these ranges as farms affects all totals, averages, and percentages in which the number of farms is a factor. In 1910 there were 87 such ranges included as farms.

Between 1900 and 1910 there was an increase of 18.6 per cent in the number of farms in Texas, as compared with an increase of 27.8 per cent in the population. During the decade the total reported farm acreage decreased 10.6 per cent, while the acreage reported as improved increased 39.8 per cent. The increase in the number of farms and the decrease in farm acreage resulted in a lower average size of farms, which was 269.1 acres in 1910, as compared with 357.2 acres in 1900.

The total value of farm property, which includes land, buildings, implements and machinery, and live stock (domestic animals, poultry, and bees), is $2,218,645,000, representing an increase of 130.5 per cent since 1900. Land alone increased in value 176.1 per cent, as compared with an increase of 109.5 per cent in the value of buildings, of 88.5 per cent in that of implements and machinery, and of 32.5 per cent in that of live stock. In considering the increase of values in agriculture the general increase in the prices

of commodities in the last 10 years should be borne in mind.

The average value of a farm, including its equipment, is $5,311, an increase of 94.3 per cent since 1900. During the decade the average value of land per acre increased from $4.70 to $14.53, or more than trebled.

Irrigation.—Of the 417,770 farms in the state, 5,238, or 1.3 per cent, were reported as irrigated in 1909. The acreage reported as irrigated in 1909 was 451,130 acres, or 1.6 per cent of the improved land in farms. Of this acreage, 286,847 acres, or 63.6 per cent of the total irrigated area, was in the rice growing counties. The area to which enterprises existing in 1910 were capable of supplying water was 690,991 acres, and the total acreage included in irrigation projects, completed or under way in 1910, was 1,253,173 acres.

Population, number of farms, and farm acreage: 1850 to 1910.—The table following presents, for the state as a whole for each census from 1850 to 1910, inclusive, a statement of the total population, the number of farms, and the acreage of farm land and of improved land in farms. It also gives the percentage of the land area in farms, the percentage of farm land improved, and the percentage of increase during each decade in the number of farms and in the land in farms.

CENSUS YEAR.	Population.	FARMS.		LAND IN FARMS.			Per cent of land area in farms.	Per cent of farm land improved.
				All land.				
		Number.	Per cent of increase.	Acres.	Per cent of increase.[1]	Improved land (acres).		
1910	3,896,542	417,770	18.6	112,435,067	−10.6	27,360,666	67.0	24.3
1900	3,048,710	352,190	54.4	125,807,017	144.7	19,576,076	74.9	15.6
1890	2,235,527	228,126	31.0	51,406,937	41.6	20,746,215	30.6	40.4
1880	1,591,749	174,184	185.0	36,292,210	97.3	12,650,314	21.6	34.9
1870	818,579	61,125	42.5	18,390,523	−27.4	2,964,836	11.0	16.1
1860	604,215	42,891	251.6	25,344,028	120.5	2,650,781	15.1	10.5
1850	212,592	12,198	.....	11,496,339	.....	643,976	6.8	5.6

[1] A minus sign (−) denotes decrease.

During the 60 years covered by the table the population of the state has increased continuously and quite regularly from 212,592 in 1850 to 3,896,542 in 1910. There has been an uninterrupted increase in the number of farms reported, the number increasing from 12,198 in 1850 to 417,770 in 1910, or at a rate averaging 6,760 per year. Between 1890 and 1900 the average rate of increase was 12,406 per year, while during the last decade the number increased at the rate of 6,558 per year.

The land surface of Texas is approximately 167,934,720 acres, of which area 112,435,067 acres, or 67 per cent, are occupied by farms. During the last decade the total amount of land in farms decreased 13,371,950 acres, or 10.6 per cent. This falling off is attributable in a very large measure to changes which have been taking place in the western section of the state, where in 1900 most of the land was held in large tracts used for grazing purposes. During the last 10 years much of this land has been bought by speculators for sale in small farms, and at the time of the census enumeration a considerable quantity of such land was either in the hands of these speculators or of purchasers who had not yet begun its cultivation. During the decade there was in fact a decrease of about 25,000,000 acres of farm land in this section of the state, this reduction being offset in part by an increase of farm land in the other sections.

The reported acreage of improved farm land increased 7,784,590 acres, or 39.8 per cent. Thus the proportion of land improved is higher at the census of 1910 than in 1900, being 24.3 per cent, as compared with 15.6 per cent in 1900.

In 1850 the total amount of land in farms was 11,496,339 acres, or 6.8 per cent of the land area. The total farm acreage increased during the next 10 years, but decreased during the decade 1860–1870, occupying in 1860 15.1 per cent of the land area, and in 1870 only 11 per cent. During the next 20 years the farm acreage nearly trebled and constituted, in 1890, 30.6 per cent of the land area, but this proportion had risen in 1900 to 74.9 per cent. Thus the amount of land reported in farms was about two and one-half times as large in 1900 as in 1890. Between 1850 and 1910 the acreage of improved farm land increased from 643,976 to 27,360,666 acres. The proportion of all farm land which was improved rose continuously from 5.6 per cent in 1850 to 40.4 per cent in 1890, indicating for this period a less rapid growth in the total than in the improved acreage. During the decade 1890–1900 the number of acres of improved land decreased. Because of this decrease and of the remarkable increase in the total acreage during that decade, the proportion of improved land fell rapidly, being only 15.6 per cent in 1900.

Values of farm property: 1850 to 1910.—The total wealth in the form of farm property is, as before stated, $2,218,645,000, of which 83.1 per cent represents land and buildings; 14.4 per cent, live stock; and 2.6 per cent, implements and machinery. The aggregate value of farm property increased during the last 10 years by $1,256,169,000, or 130.5 per cent. To this total increase, $1,151,435,000 was contributed by land and buildings, $78,070,000 by live stock, and $26,665,000 by implements and machinery. The total absolute gain is more than three times as great as that of any other decade covered by the table, while the percentage gain is nearly twice as great as that of the decade immediately preceding. Between 1850 and 1860 there was a marked increase in the value of all three classes of farm property, the aggregate value rising from $29,115,000 to $137,186,000, or 371.2 per cent. During the decade 1860–1870, however, there

was a considerable decline in the value of each class, the total value falling to $80,778,000 in 1870. This decline was due to the destructive effects of the Civil War.

In the 40 years since 1870 the aggregate value has shown an increase of $2,137,868,000, of which $175,307,000 took place in the first decade under consideration, $296,043,000 in the second, 1880 to 1890, and $410,349,000 in the third. Each class of farm property has shown a greater value at each successive census since 1870, the increase for the last 10 years being especially marked. Land and buildings at each census except 1870 and 1900 have constituted a larger proportion of the total value than at the census immediately preceding, and in the 60 years covered by the table this proportion has risen from 56.8 per cent of the total in 1850 to 83.1 per cent in 1910. Moreover, the relative value of live stock as compared with that of implements and machinery has undergone a considerable change. At the census of 1910 the value of implements and machinery is approximately one-sixth that of live stock, while it was about one-eighth as great in 1900 and less than one-tenth as great in 1890.

The agricultural changes in Texas since 1850, as reflected in the values of the several classes of farm property, are shown in the table which follows:

CENSUS YEAR.	FARM PROPERTY.							
	Total.		Land and buildings.		Implements and machinery.		Domestic animals, poultry, and bees.	
	Value.	Per cent of increase.[1]	Value.	Per cent of increase.[1]	Value.	Per cent of increase.[1]	Value.	Per cent of increase.[1]
1910	$2,218,645,164	180.5	$1,843,208,395	166.4	$56,790,260	88.5	$318,646,509	32.5
1900	902,476,273	74.3	691,773,013	73.0	30,125,705	110.2	240,576,955	73.8
1890	[2] 552,127,104	115.6	399,971,289	134.6	13,746,541	51.9	[2] 138,409,274	80.8
1880	[2] 256,084,364	217.0	170,408,886	254.2	9,051,491	233.1	[2] 76,563,987	155.7
1870 [3]	80,777,550	−41.1	48,119,960	−45.4	2,717,435	−56.6	29,940,155	−30.1

1850	29,114,030	.....	16,550,008	.....	2,151,704	.....	10,412,027	.....

[1] A minus sign (−) denotes decrease. [2] Includes estimated value of range animals. [3] Computed gold values, being 80 per cent of the currency values reported.

Average acreage and values per farm: 1850 to 1910.—The changes which have taken place during the past 60 years in the average acreage of Texas farms and in the average values of the various classes of farm property, as well as in the average value per acre of land and buildings, are shown in the following table:

CENSUS YEAR.	Average acres per farm.	AVERAGE VALUE PER FARM.[1]				Average value of land and buildings per acre.
		All farm property.	Land and buildings.	Implements and machinery.	Domestic animals, poultry, and bees.	
1910	200.1	$5,311	$4,412	$136	$763	$16.39
1900	357.2	2,733	1,964	85	683	5.50
1890	225.3	[2] 2,420	1,753	60	[2] 607	7.78
1880	208.4	[2] 1,470	979	52	[2] 440	4.70
1870 [3]	301.0	1,322	787	44	490	2.62
1860	590.9	3,198	2,054	146	998	3.48
1850	942.5	2,387	1,357	176	854	1.44

[1] Averages are based on "all farms" in state.
[2] Includes estimated value of range animals.
[3] Computed gold values, being 80 per cent of the currency values reported.

Because of the essentially different types of land and the distinct types of agricultural operations carried on in the several portions of the state, the percentages and averages in the preceding and other summary tables throughout this bulletin can not be relied upon as revealing a general condition or movement throughout the state. This is well illustrated in the figures for the average size of farms. At the censuses of 1850 and 1860, and to some extent at the census of 1870, the plantation was the common farm unit in a considerable portion of the eastern half of the state, and the large average size of farms at those three censuses may be partly accounted for by the fact that each plantation was reported as one farm.

During the last 40 years most plantations have been divided gradually into smaller parcels of land operated largely by tenants. Each of these tenant holdings is reported as a farm and each tenant as a farmer, whether or not the owner of the property lives on the plantation and directs the operations.

In the case of many plantations, although most of the land is now worked by tenants, each of whom is reported as a farmer operating his portion of land as a farm, yet there is some supervision by the owner, so that, in a sense, the entire plantation may be said to constitute a single farm. The Bureau of the Census has recently made an investigation of the extent to which the plantation unit of farm management still prevails, the results of which will appear in a later report.

While the subdivision of larger holdings in certain sections of the state has tended toward a reduction in the average size of farms, this tendency has been counteracted for the state as a whole in recent years by a contrary tendency toward large farms in the western half of the state, following the development of live stock farming on a large scale.

Perhaps the most striking characteristic of the western half of Texas is the great areas of arid and semiarid land utilized for grazing purposes only or left unutilized. The same was true until recently of the extreme southern portion. Upon this land are located many very large farms or ranches, which

tend to give a high average number of acres per farm. It is obvious that averages based on the totals of such diverse agricultural operations as cotton plantations and live stock ranches afford little opportunity for comparisons. It may be noted only that the average size of farms decreased from 942.5 acres in 1850 to 208.4 acres in 1880, then increased to 357.2 acres in 1900, and again decreased to 269.1 acres in 1910. The falling off in the average size of farms during the last decade may be accounted for by the decrease in the reported farm acreage in the western section of the state already discussed. The average size of farms in 1910 for each county of the state is shown in the tables at the close of this bulletin.

Bearing in mind the great diversity in the types of farms in the different sections of Texas, it may be noted that for the state as a whole the average value per farm is $5,311, of which $4,412 represents the value of land and buildings, $763 that of live stock, and $136 that of implements and machinery. The average value, which in 1850 was $2,387, increased to $3,198 in 1860, but decreased during the Civil War decade, and in 1870 was only $1,322. Since 1870 there has been an unbroken increase in the average value, the greatest increase occurring during the last decade, the next greatest during the decade 1880–1890. The average value of land and buildings per acre rose, with considerable fluctuation, from $1.44 in 1850 to $16.39 in 1910.

Farm tenure: 1880 to 1910.—The following table shows the distribution of the farms of the state according to character of tenure at each census since 1880:

TENURE.	1910	1900	1890	1880
Number of all farms	417,770	352,190	228,126	174,184
Farms operated by owners and managers	198,195	177,199	132,616	108,716
Farms consisting of owned land only	167,515	153,034	(1)	(1)
Farms consisting of owned and hired land	28,348	21,005	(1)	(1)
Farms operated by managers	2,332	2,560	(1)	(1)
Farms operated by tenants	219,575	174,991	95,510	65,468
Share tenants	184,753	140,181	75,420	53,370
Share-cash tenants [2]	8,639			
Cash tenants	17,549	25,810	20,081	12,089
Tenure not specified [3]	8,634			
Per cent of farms operated by—				
Owners and managers	47.4	50.3	58.1	62.4
Tenants	52.6	49.7	41.9	37.6
Share and share-cash	46.3	42.4	33.1	30.7
Cash and nonspecified	6.3	7.3	8.8	6.9

[1] Not reported separately.
[2] Share-cash tenants were doubtless largely included with share tenants in 1900, 1890, and 1880.
[3] Prior to 1910 nonspecified tenants were included with cash tenants.

The number of all farms, and therefore of all farm operators, is 417,770. Of the farm operators, 195,863 are classified as owners, 2,332 as managers, and 219,575 as tenants. Of the owners, 167,515 operate exclusively land owned by them, while 28,348 operate land which they rent in addition to that which they own. The tenants are classified according to the character of their tenancy; thus 184,753 are share tenants; 8,639 share-cash tenants; 17,549, cash tenants; while for 8,634 no report relative to character of tenure was secured.

While the total number of farm operators increased from 228,126 in 1890 to 417,770 in 1910, an increase of 83.1 per cent, the number of tenants increased from 95,510 to 219,575, or 129.9 per cent. The proportion of tenants has increased from 37.6 per cent of all farmers in 1880 to 52.6 per cent in 1910.

For the sake of comparison with the earlier figures the share and share-cash tenants of the census of 1910 have been grouped together, and likewise the cash tenants and those for whom the form of tenure was not specified. Throughout the 30-year period the cash group has been much smaller than the share group, and at the census of 1910 constitutes less than one-eighth of the total number of tenants. The cash tenants comprised slightly over one-seventh of all tenants in 1900, as compared with about one-fifth in 1890 and about one-sixth in 1880.

The following table shows, for white and colored farmers combined and for each class separately, the total and improved acreage and the value of land and buildings for farms operated by owners (including part owners), managers, and tenants, respectively:

FARMS OPERATED BY—	ALL LAND IN FARMS (ACRES).		IMPROVED LAND IN FARMS (ACRES).		VALUE OF LAND AND BUILDINGS.	
	1910	1900	1910	1900	1910	1900
All farmers	112,435,067	125,807,017	27,360,666	10,576,076	$1,843,208,395	$691,773,613
Owners	69,201,014	65,214,061	13,882,422	10,880,024	1,034,014,670	397,620,220
Managers	17,954,949	41,001,308	722,399	560,804	156,091,617	91,015,050
Tenants	25,279,104	18,601,648	12,755,845	8,135,248	653,102,108	203,132,343

Owners	67,334,272	63,453,305	12,936,404	10,035,431	1,003,327,398	381,730,980
Managers	17,860,265	41,054,234	714,273	552,100	154,909,067	90,508,510
Tenants	22,956,867	16,557,837	10,933,476	6,558,053	593,202,982	174,922,603
Colored	4,283,663	3,841,641	2,776,513	2,430,492	91,388,948	44,611,520
Owners	1,866,742	1,760,756	946,018	844,593	30,687,272	15,895,240
Managers	94,684	37,074	8,126	8,704	1,092,550	506,540
Tenants	2,322,237	2,043,811	1,822,369	1,577,195	59,809,126	28,209,740

The following table shows, for white and colored farmers combined and for each class separately, the per cent distribution by tenure groups of the items in the preceding table, and also of the number of farms:

FARMS OPERATED BY—	PER CENT OF TOTAL.							
	Number of farms.		All land in farms.		Improved land in farms.		Value of land and buildings.	
	1910	1900	1910	1900	1910	1900	1910	1900
All farmers	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Owners	46.9	49.6	61.6	51.8	50.7	55.6	56.1	57.5
Managers	0.6	0.7	16.0	33.4	2.6	2.9	8.5	13.2
Tenants	52.6	49.7	22.5	14.8	46.6	41.6	35.4	29.4
White	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Owners	50.2	53.9	62.3	52.0	52.6	58.5	57.3	59.0
Managers	0.6	0.9	16.5	34.4	2.9	3.2	8.8	14.0
Tenants	49.2	45.2	21.2	13.6	44.5	38.3	33.9	27.0
Colored	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Owners	30.4	30.7	43.6	45.8	34.1	34.8	33.5	35.6
Managers	0.1	0.1	2.2	1.0	0.3	0.4	1.2	1.1
Tenants	69.5	69.1	54.2	53.2	65.6	64.9	65.3	63.2

It will be seen that, in 1910, 61.6 per cent of all land in farms was in farms operated by their owners (including part owners), 16 per cent in farms operated by managers, and 22.5 per cent in farms operated by tenants, the percentage for owners and for tenants being higher and that for managers lower than in 1900.

Of all land in farms operated by white farmers, 62.3 per cent was in farms operated by their owners and 21.2 per cent in tenant farms, while of that in farms operated by colored farmers, 43.6 per cent was in farms operated by owners and 54.2 per cent in tenant farms. The proportion of land in farms operated by owners increased among white farmers between 1900 and 1910, while among colored farmers it showed a decrease.

As shown by the next table, the average size of farms operated by managers in 1910 (7,699.4 acres) was nearly 22 times as great as that of farms operated by owners (353.3 acres), which was in turn about three times as great as that of farms operated by tenants (115.1 acres). The average size of farms operated by owners and by managers decreased between 1900 and 1910, while that of farms operated by tenants increased. In 1910 the percentages of farm land improved was highest for farms operated by tenants and lowest for those operated by managers, being only 4 in the latter class of farms.

The average size of farms operated by white farmers in 1910 (310.9 acres) was about five times as large as that of farms of colored farmers (61.3 acres); the average size of farms of white farmers decreased decidedly between 1900 and 1910, while that of farms of colored farmers slightly increased. The proportion of land improved was larger for farms of colored farmers than for those of white farmers, being, respectively, 64.8 and 22.7 per cent of the total acreage in each class of farms.

FARMS OPERATED BY—	AVERAGE ACRES PER FARM.				PER CENT OF FARM LAND IMPROVED.		AVERAGE VALUE OF LAND AND BUILDINGS.			
	All land.		Improved land.				Per farm.		Per acre.

Farm mortgages: 1890 to 1910.—The Eleventh Census (1890) was the first to collect data relating to mortgage debt on farms. The basis of the returns was the "farm home" occupied by its owner. The same class of information was secured by the population schedules of the Twelfth Census (1900). The agricultural schedules of the Thirteenth Census (1910) secured practically the same information, except that the basis was "owned farms" instead of "owned farm homes"—a difference involving, however, no appreciable incomparability.

The following table relates to farms operated by persons owning all or part of the land, and shows for 1910 (1) the number of such farms reported as free from mortgage; (2) the number reported as mortgaged; and (3) the number for which no mortgage reports were secured. Comparable items are included for 1900 and 1890.

CLASS.	OWNED FARMS.[1]		OWNED FARM HOMES.		OWNED FARM HOMES.[2]	
	1910		1900		1890	
	Number.	Per cent.[3]	Number.	Per cent.[3]	Number.	Per cent.
Total	195,863	.....	171,975	.....	126,314	.....
Free from mortgage	128,082	66.7	125,504	76.6	119,093	94.3
Mortgaged	64,008	33.3	38,408	23.4	7,221	5.7
Unknown	3,773	.....	8,063	.....	.....	.....

[1] Includes all farms owned in whole or in part by the operator.
[2] The 981 "owned farm homes" for which no reports were secured were distributed between "free from mortgage" and "mortgaged" in 1890.
[3] Per cent of combined total of "free from mortgage" and "mortgaged."

In 1910 the total number of farms owned in whole or in part by the operators was 195,863. Of this number, 128,082 were reported as free from mortgage; 64,008 were reported as mortgaged; and for 3,773 no report relative to mortgage indebtedness was obtained. The number of mortgaged farms constituted 33.3 per cent of the total number of owned farms, exclusive of those for which no mortgage report was obtained. The percentage is much higher than it was in 1890 and somewhat higher than in 1900. It may be noted that the percentages given for the three censuses are comparable, but that the number of mortgaged and unmortgaged farms reported in 1890 is not entirely comparable with the numbers reported at the later censuses because at the census of 1890 the farms for which no reports were secured were distributed between the two classes of mortgaged and unmortgaged farms. It can be seen, however, that between 1890 and 1910 the absolute increase in the number of mortgaged farms was greater than that in the number free of mortgage.

The statement of mortgage debt and of the value of mortgaged farm property is restricted to the farms of those farmers who own all of their land and report the amount as well as the fact of indebtedness. Of the 64,008 farms reported as mortgaged, 52,207 are wholly owned by the farmers, and for 48,024 of these the amount of mortgage debt is reported. Only these last-mentioned farms are included for 1910 in the next table, which presents data relating to mortgaged farms for 1910 and 1890. In this connection it should

be noted that in 1890 the amount of mortgage debt of farms with incomplete reports was estimated according to the percentages and averages obtained from farms with full reports, but that no such estimate is here made for 1910. The table gives a comparative statement of the value of mortgaged farms owned entirely by their operators and the amount of indebtedness, together with the average value of such farms, the average debt per farm, and the average equity per farm for 1910 and 1890. Data regarding the amount of mortgage debt were not obtained in 1900.

	OWNED FARMS OR FARM HOMES MORTGAGED.		INCREASE.	
	1910 [1]	1890 [2]	Amount.	Per cent.
Number	48,024	7,221	.....	.....
Value—Land and buildings	$297,880,832	$15,583,093	.....	.....
Amount of mortgage debt	$76,089,272	$6,494,633	.....	.....
Per cent of debt to value	25.5	41.7	.....	.....
Average value per farm	$6,203	$2,158	$4,045	187.4
Average debt per farm	$1,584	$899	$685	76.2
Average equity per farm	$4,619	$1,259	$3,360	266.9

[1] Includes only farms consisting wholly of owned land and reporting value of farm and amount of debt.
[2] Includes all owned farm homes, estimates being made of value of farms and amount of debt for all defective reports.

The average debt of mortgaged farms increased in the 20 years from $899 to $1,584, or 76.2 per cent, while the average value of such farms increased from $2,158 to $6,203, or 187.4 per cent. Thus the owner's equity rose from $1,259 in 1890 to $4,619 in 1910, or 266.9 per cent. As a result of the greater relative increase in the total farm value than in the total farm debt, the mortgage indebtedness, which was 41.7 per cent of the value of the mortgaged farms in 1890, was only 25.5 per cent of this value in 1910.

Farms by size groups: 1910 and 1900.—More than one-fourth (26.9 per cent) of the farms in Texas are from 50 to 99 acres in size, nearly one-fourth (23.6 per cent) from 20 to 49 acres, and nearly one-fourth (22.6 per cent) from 100 to 174 acres. Hence nearly three-fourths of all the farms in the state are from 20 to 174 acres in size. About one-fifth are 175 acres or over, while the farms of less than 20 acres constitute about 7 per cent of the total. The number of places "under 3 acres" reported as farms is now less than one-third as great as 10 years ago. This decrease may be due to a different interpretation by the enumerators as to what constitutes a small farm, or may represent an actual decrease in that type of farm. A slight decrease, amounting to less than 1 per cent in each case, is shown in the "20 to 49 acres" group and the group "1,000 acres and over." The number of farms in all the other groups increased, but the relative importance of the groups has been changed somewhat during the decade. The very large farms and those of 10 to 49 acres constitute a smaller proportion of all farms in 1910 than in 1900; farms of 50 to 999 acres and those of 3 to 9 acres a larger proportion.

The next table shows the distribution of farms by size groups at the censuses of 1910 and 1900.

Farms of 50 to 99 acres constituted 27.2 per cent of the farms of white farmers, and farms of 100 to 174 acres ranked second, with 24.8 per cent of the total; among colored farmers, 46 per cent of the farms were farms of 20 to 49 acres, and 25.3 per cent farms of 50 to 99 acres. Of the farms operated by colored farmers, 58.7 per cent were farms of less than 50 acres, as compared with 25 per cent of the farms of white farmers.

SIZE GROUP.	NUMBER OF FARMS.		INCREASE.[1]		PER CENT OF TOTAL.

500 to 999 acres	202	151	51	33.8	0.3	0.2
1,000 acres and over	54	55	—1	—1.8	0.1	0.1

[1] A minus sign (—) denotes decrease. [2] Less than one-tenth of 1 per cent.

The following table shows the total and improved acreage and the value of land and buildings for farms of various size groups, consolidating into one group the farms of less than 20 acres (numbering in all 29,371), and also the farms of between 175 and 499 acres (numbering 59,049):

SIZE GROUP (ACRES).	ALL LAND IN FARMS (ACRES).		IMPROVED LAND IN FARMS (ACRES).		VALUE OF LAND AND BUILDINGS.	
	1910	1900	1910	1900	1910	1900
Total	**112,435,067**	**125,807,017**	**27,360,666**	**19,576,076**	**$1,843,208,395**	**$691,773,613**
Under 20	329,754	326,955	307,435	308,213	26,976,349	12,037,460
20 to 49	3,230,581	3,220,806	2,927,042	2,921,937	142,443,379	61,725,990
50 to 99	7,713,441	6,201,082	5,744,806	4,203,274	207,601,312	105,235,530
100 to 174	12,272,384	9,255,798	7,089,634	4,637,336	373,734,548	124,518,073
175 to 499	15,937,878	11,852,793	6,452,197	3,976,249	380,435,229	128,328,070
500 to 999	8,021,554	6,730,330	2,060,976	1,266,437	157,105,181	47,785,570
Over 1,000	64,320,475	88,159,247	2,778,516	2,172,630	515,822,397	212,142,020

The next table shows the per cent distribution, by size groups, of the items presented in the preceding table, and also of the number of farms.

Of the total farm acreage of the state in 1910, 57.2 per cent was in farms of 1,000 acres and over, this being from the standpoint of aggregate acreage the most important size group, although it comprised only 2.7 per cent of the total number of farms. The most notable change between 1900 and 1910 was the decrease in the proportion of the total acreage which was in farms of 1,000 acres and over, offset by increases in the proportion in farms of every

other size group, except that of under 20 acres, for which it remained the same.

SIZE GROUP.	PER CENT OF TOTAL.							
	Number of farms.		All land in farms.		Improved land in farms.		Value of land and buildings.	
	1910	1900	1910	1900	1910	1900	1910	1900
Total	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Under 20 acres	7.0	7.9	0.3	0.3	1.1	1.6	1.5	1.7
20 to 49 acres	23.6	28.1	2.9	2.6	10.7	14.9	6.1	8.9
50 to 99 acres	26.9	25.1	6.9	5.0	21.0	21.9	14.5	15.2
100 to 174 acres	22.6	20.3	10.9	7.4	25.9	23.7	20.3	18.0
175 to 499 acres	14.1	12.5	14.2	9.4	23.6	20.3	21.1	18.5
500 to 999 acres	3.1	2.9	7.7	5.4	7.5	6.5	8.5	6.9
1,000 acres and over	2.7	3.2	57.2	70.1	10.2	11.1	28.0	30.7

As shown by the next table, the percentage of farm land improved diminishes as the average size of the farms increases. For this reason and also because buildings have normally a higher value in proportion to farm acreage on small than on large farms, the average value of land and buildings per acre of land also diminishes with the increase in the size of the farms; it is very much higher for the farms under 20 acres in size than for those of any other group.

SIZE GROUP.	PER CENT OF FARM LAND IMPROVED.		AVERAGE VALUE OF LAND AND BUILDINGS.			
			Per farm.		Per acre.	
	1910	1900	1910	1900	1910	1900
Total	24.3	15.6	$4,412	$1,964	$16.39	$5.50
Under 20 acres	93.2	94.3	918	434	81.81	30.82
20 to 49 acres	90.6	90.7	1,141	623	34.81	19.16
50 to 99 acres	74.5	68.6	2,385	1,189	34.70	16.81

1,000 acres and over	4.3	2.3	46,374	18,907	8.02	2.41

Color and nativity of farmers: 1910.—Prior to the Thirteenth Census no attempt was made to secure information on the farm schedules concerning the nativity of farmers. The table which follows shows the color and nativity of farm operators by character of tenure for 1910:

COLOR AND NATIVITY.	FARM OPERATORS.							
	Total.		Owners.	Tenants.	Managers.	Per cent of total.		
	Number.	Per cent distribution.				Owners.	Tenants.	Managers.
Total	417,770	100.0	195,863	219,575	2,332	46.9	52.6	0.6
Native white	318,088	76.4	157,010	158,958	2,120	49.5	49.8	0.7
Foreign-born white	28,864	6.9	16,721	12,012	131	57.9	41.6	0.5
Negro and other nonwhite	69,918	16.7	21,232	48,605	81	30.4	69.5	0.1

Of the farmers in Texas, 347,852, or nearly five-sixths of the total number, were whites and 69,918, or approximately one-sixth, nonwhites. All but 28,864 of the white farmers were native born. Of the nonwhite farmers, 69,816 were negroes, 52 Indians, 44 Japanese, and 6 Chinese. Of the native white farmers, 49.8 per cent were tenants, as compared with 41.6 per cent among the foreign-born white farmers. Of the nonwhite farmers, the tenants constituted nearly seven-tenths (69.5 per cent) of the total number.

Of the 28,864 foreign-born white farmers in Texas in 1910, 10,815 were born in Germany; 5,236 in Austria; 1,026 in Sweden; 825 in England; and 710 in Italy. Other European countries were represented by a total of 3,170 farmers, and non-European countries by 7,082.

DOMESTIC ANIMALS, POULTRY, AND BEES.

Domestic animals on farms: 1910.—The census of 1910 was taken as of April 15, and that of 1900 as of June 1. Since a great many domestic animals are born during the six weeks between April 15 and June 1, and on the other hand a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not closely comparable, and the same is true in somewhat less degree of the values. For this reason the figures for 1900 are not presented in this bulletin, but in the general reports of the census the figures for the several states will be presented and the extent to which their comparability is affected by the change in the date of enumeration will be discussed.

Of the total number of farms enumerated, 402,365, or 96.3 per cent, report domestic animals of some kind, the number without any domestic animals being 15,405.

The total value of live stock on farms, including domestic animals, poultry, and bees in 1910 was $318,647,000, of which domestic animals contributed $313,165,000. The value of cattle represented 41.7 per cent of the total value of live stock; that of horses and mules, 49.6 per cent; that of swine, 3.7 per cent; that of sheep and lambs, 2 per cent; and that of poultry, 1.5 per cent, the other classes being insignificant.

Cattle are reported by 80.6 per cent of all farms, "dairy cows" by 77.8 per cent, and "other cows" by only 23.7 per cent. The average value of "dairy cows" increased from $23.22 to $27.28, while that of cows not kept for dairy purposes decreased from $19.78 to $18.84. The average number of "dairy cows" per farm reporting is about 3, while the average number of "other cows" per farm reporting that class is about 25. In 1900 the average number of "other cows" was about 36 per farm reporting.

Horses are reported by 76.4 per cent of all the farms in the state, but 12.4 per cent report yearling colts, and only 7 per cent spring colts. The average values of horses have more than doubled since 1900. Mules are reported by 58.1 per cent of the farms, and number nearly three-fifths as many as horses.

Their average values are considerably higher than those of horses of the corresponding age groups.

Sheep and lambs are reported from only 6,876 farms, or 1.6 per cent of all farms in the state. Of the 6,876 farms, 77.3 per cent report spring lambs, the number of the latter being equal to 46.3 per cent of the number of ewes. The average flock in the state, including all classes, is about 263 sheep, and the average number of ewes is about 143 per farm reporting that class.

Of all farms, 70.3 per cent report swine, the average number being about 8 per farm reporting. The average value of the swine reported as "hogs and pigs born before January 1, 1910," is $6.14, and that of spring pigs is $2.24.

The following table summarizes the statistics of domestic animals on farms for the state, recorded as of April 15, 1910. Cattle and sheep are divided into age and sex groups, while horses, mules, and swine are presented by age groups only.

AGE AND SEX GROUP.	FARMS REPORTING.		ANIMALS.		
	Number.	Per cent of all farms.	Number.	Value.	Average value.
Total	402,365	96.3	.....	$313,164,540	.....

Goats	7,937	1.9	1,135,244	2,514,077	2.21

[1] Less than one-tenth of 1 per cent.

Poultry on farms: 1910 and 1900.—The number of fowls on Texas farms decreased 1,191,737, or 8 per cent, during the last decade, while their value increased $1,207,674, or 33.6 per cent. The number of farms reporting poultry increased from 304,713 to 357,363, or 17.3 per cent. All classes of fowls decreased in number, but the percentage losses were much greater for turkeys, ducks, and geese than for chickens. This last class represents 93 per cent of the number and 86.1 per cent of the value of all poultry. The value of poultry and the number of farms reporting were obtained in 1900 for the total of all fowls only, and not for each kind as in 1910.

The following table gives the numbers of the various kinds of poultry reported in 1910 and 1900, together with their value and the number of farms reporting each kind in 1910:

KIND.	1910 (April 15)				1900 (June 1)
	Farms reporting.		Number of fowls.	Value.	Number of fowls.
	Number.	Per cent of all farms.			
Total	357,363	85.5	13,669,645	$4,806,642	14,861,382
Chickens	350,875	85.4	12,719,572	4,139,450	13,502,302
Turkeys	76,429	18.3	363,666	440,526	648,671
Ducks	14,007	3.4	74,910	30,241	234,664
Geese	26,807	6.4	244,991	126,701	415,709
Guinea fowls	27,828	6.7	170,107	47,042	(1)
Pigeons	5,584	1.3	95,625	14,536	(2)
Ostriches	1	(3)	12	6,000	36
All other [4]	222	0.1	762	2,056	(2)

[1] Included with chickens.
[2] Not reported.
[3] Less than one-tenth of 1 per cent.
[4] 218 farms reported 736 peafowls, valued at $1,010; 2 farms reported 20 pheasants, valued at $130; and 2 farms reported 6 wild geese, valued at $7.

Bees on farms: 1910 and 1900.—The number of farms reporting bees has decreased from 60,043 in 1900 to 37,881 in 1910, or 36.9 per cent. The number of colonies of bees decreased from 392,644 to 238,107, or 39.4 per cent, and their value decreased from $749,483 to $675,327, or 9.9 per cent. The average value of bees per farm reporting was $12.48 in 1900 and $17.83 in 1910. About nine farms in every hundred report bees.

Domestic animals not on farms: 1910.—Most of the domestic animals not on farms are found in cities, towns, and villages. Statistics for such animals are shown below. No provision was made by law to secure data pertaining to poultry and bees not on farms. In the table below age groups are omitted for the sake of brevity.

KIND.	Number of inclosures reporting.	ANIMALS.		
		Number.	Value.	Average value.
Total	127,539	.....	$26,269,303	.....
All cattle	74,505	204,814	5,971,525	$29.16
Dairy cows	71,435	102,349	4,320,478	42.21
Horses	86,914	153,513	15,509,356	101.03
Mules	9,800	30,975	3,920,539	126.57
Asses and burros	1,593	2,698	202,644	75.11
Swine	28,662	93,695	623,412	6.65
Sheep	213	4,008	13,655	3.41
Goats	1,129	14,901	28,172	1.89

Horses are by far the most important class of domestic animals not on farms when value is considered, but the number of cattle (including dairy cows) is greater than the number of horses.

Domestic animals on farms and not on farms: 1910.—The total value of all domestic animals in the state in 1910 was $339,434,000, of which the value of animals not on farms constituted 7.7 per cent.

The following table gives the total number and value of domestic animals, distinguishing those on farms from those not on farms:

KIND.	DOMESTIC ANIMALS.					
	Total.		On farms.		Not on farms.	
	Number.	Value.	Number.	Value.	Number.	Value.
Total	.....	**$339,433,843**	.....	**$313,164,540**	.....	**$26,269,303**
All cattle	7,139,400	138,957,404	6,934,586	132,985,879	204,814	5,971,525
Dairy cows	1,116,216	31,978,006	1,013,867	27,657,528	102,349	4,320,478
Horses	1,323,581	99,533,991	1,170,068	84,024,635	153,513	15,509,356
Mules	706,533	77,899,684	675,558	73,979,145	30,975	3,920,539
Asses and burros	23,106	1,922,718	20,408	1,720,074	2,698	202,644
Swine	2,430,058	12,262,778	2,336,363	11,639,366	93,695	623,412
Sheep	1,812,717	6,315,019	1,808,709	6,301,364	4,008	13,655
Goats	1,150,145	2,542,249	1,135,244	2,514,077	14,901	28,172

LIVE STOCK PRODUCTS.

The returns for live stock products obtained at the census of 1910, like those for crops, relate to the activities of the calendar year 1909. It is impossible to give a total representing the annual production of live stock products for the reason that, as shown elsewhere, the total value of products from the business of raising domestic animals for use, sale, or slaughter can not be calculated from the census returns. Even if this value could be ascertained and were added to the value of the corps the sum would not correctly represent the total value of farm products, because, as already more fully explained, duplication would result from the fact that part of the crops are fed to the live stock.

Dairy products: 1909 and 1899.—The following table shows the principal statistics relative to dairy products in 1909, with certain comparative statistics for 1899:

	FARMS REPORTING.		Number or quantity.	Unit.	VALUE.	
	Number.	Per cent of all farms.			Total.	Average per unit.
Dairy cows on farms April 15, 1910	324,983	77.8	1,013,807	Head.	.....	.....
On farms reporting dairy products in 1909	268,684	64.3	874,807	Head.	.....	.....
On farms reporting milk produced in 1909	260,032	62.2	832,843	Head.	.....	.....
Specified dairy products, 1909:						
Milk reported	.....	.....	197,039,954	Gals.	.....	.....
Butter made	266,724	63.8	04,903,214	Lbs.	$12,911,632	$0.20

Cheese sold	.....	.....	76,148	Lbs.	7,462	0.10

[1] Less than one-tenth of 1 per cent.

The number of farms reporting dairy cows on April 15, 1910, was 324,983, but only 268,684 reported dairy products in 1909. That there should be this difference is not surprising. Doubtless some farmers who had dairy cows in 1910 had none in 1909, while other farmers neglected to give information for the preceding year or were unable to do so, perhaps because the farm was then in other hands. Dairy products in general are somewhat less accurately reported than the principal crops. This is particularly the case as regards the quantity of milk produced. The number of farms which made any report of milk produced during 1909 was 260,032 (somewhat less than the total number reporting dairy products), and the number of dairy cows on such farms on April 15, 1910, was 833,000. The amount of milk reported was 197,040,000 gallons; assuming that there were the same number of cows in 1909 as in 1910 this would represent an average of 237 gallons per cow. In considering this average, however, it should be borne in mind that the quantity of milk reported is probably deficient and that the distinction between dairy and other cows is not always strictly observed in the census returns.

By reason of the incompleteness of the returns for milk produced, the Census Bureau has made no attempt to determine the total value of dairy products for 1909. For convenience a partial total has been presented comprising the reported value of milk and cream sold as such and sold on the butter fat basis and the reported value of butter and cheese made, whether for home consumption or for sale. The total thus obtained for 1909 is $15,680,000, which may be defined as the total value of dairy products exclusive of milk and cream used on the farms producing.

Only a small proportion of the milk reported as produced by Texas farmers in 1909 was sold as such. The butter made on farms in 1909 was valued at $12,912,000.

Comparisons are made between 1909 and 1899 for but few of the census items relating to dairy products, for the reason that the 1899 estimates were made for farms with incomplete reports, which was not done at the census of 1910. The figures for milk produced and milk sold are particularly affected, but those for butter and cheese are approximately comparable. The table shows a decided increase between 1899 and 1909 in the amount of butter made, and also an increase in the production of cheese.

Wool: 1909 and 1899.—The table below gives statistics as to the production of wool on farms, the figures being partly based on estimates:[1]

	Number of farms reporting.	Sheep of shearing age.	Wool produced. Fleeces (number).	Wool produced. Weight (pounds).	Wool produced. Value.
Sheep of shearing age on farms April 15, 1910	6,564	1,377,724			
Wool produced, as reported, 1909	4,169		1,641,416	8,371,754	$1,799,089
On farms reporting sheep April 15, 1910	3,916	1,088,690	1,586,107	8,105,120	1,740,167
On other farms	253		55,309	266,634	58,922
Total production of wool, (partly estimated):					
1909			2,007,365	10,257,779	2,202,342
1899			2,038,535	9,638,002	1,428,122
Increase, 1899 to 1909			−31,170	619,777	774,220
Per cent of increase			−1.5	6.4	54.2

[1] A minus sign (−) denotes decrease.

The total number of sheep of shearing age in Texas on April 15, 1910, was 1,378,000, representing a decrease of 4.3 per cent as compared with the number on June 1, 1900 (1,440,000). The approximate production of wool during 1909 was 2,007,000 fleeces, weighing 10,258,000 pounds, and valued at $2,202,000. Of these totals about one-fifth represents estimates. The number of fleeces produced in 1909 was 1.5 per cent less than in 1899. The average weight per fleece in 1909 was 5.1 pounds, as compared with 4.7 pounds in 1899, and the average value per pound was 21 cents, as compared with 15 cents in 1899.

Goat hair and mohair: 1909 and 1899.—Although 7,937 farmers reported 1,135,244 goats and kids on their farms April 15, 1910, only 1,544 reported the production of goat hair or mohair during 1909. These farmers, however, reported 1,077,463 fleeces, weighing 1,997,924 pounds and valued at $468,219. The importance of the production increased decidedly between 1899 and 1909. Many farmers who have goats do not produce goat hair or mohair, but it is believed that the report is somewhat short of the actual production.

Poultry products: 1909 and 1899.—The next statement gives data relative to the production and sale of eggs and poultry.

	Number of farms reporting.	Number of fowls on hand.	Product. Quantity.	Product. Value.
Fowls on farms April 15, 1910	357,363	13,669,645		
On farms reporting eggs produced in 1909	292,277	12,159,036		
On other farms	65,086	1,510,609		
			Dozens.	
Eggs produced, as reported, 1909	294,655		62,479,894	$9,586,114
Total production of eggs (partly estimated):				
1909			77,845,047	11,943,546
1899			58,040,810	4,672,187
Increase, 1899 to 1909			19,804,237	7,271,359
Per cent of increase			34.1	155.6
Eggs sold, as reported, 1909	186,254		24,747,035	3,867,795
Fowls on farms April 15, 1910:				
On farms reporting poultry raised in 1909	287,197	11,956,144		
On other farms	70,166	1,713,501		
			No. of fowls.	
Poultry raised, as reported, 1909	290,517		22,440,311	6,543,395
Total poultry raised (partly estimated):				
1909			25,656,350	7,481,165
1899				5,311,362
Increase, 1899 to 1909				2,169,803
Per cent of increase				40.9
Fowls sold, as reported, 1909	142,183		5,761,078	2,042,147

The total number of fowls on Texas farms on April 15, 1910, was 13,670,000. Of the 357,363 farms reporting fowls, 65,086 did not report any eggs produced in 1909, and 70,166 did not report any poultry raised in 1909. The production of eggs actually reported for the year 1909 was 62,480,000 dozens, valued at $9,586,000. According to the Twelfth Census reports the production of eggs in 1899 was 58,041,000 dozens, the value being $4,672,000. The latter figures, however, are somewhat in excess of the actual returns at that census, because they include estimates made to cover those cases where the schedules reported fowls on hand without reporting the production of eggs. In order to make the returns for 1909 comparable with those published for 1899 similar estimates have been made, the method of estimate and the justification therefor being substantially the same as in the case of wool. The total production of eggs in 1909, including these estimates, was 77,845,000 dozens, valued at $11,944,000. The total production of poultry in 1909, including estimates made on the same basis as for eggs, was 25,656,000 fowls, valued at $7,481,000.

Honey and wax: 1909.—Although, as noted elsewhere, 37,881 farms reported 238,107 colonies of bees on hand April 15, 1910, 20,749 of these farms, with 81,387 colonies on hand April 15, 1910, made no report of honey or wax produced in 1909. The actual returns show the production of 3,093,097 pounds of honey, valued at $308,488, and 58,402 pounds of wax, valued at $14,310; the true totals are doubtless somewhat above these figures.

Sale or slaughter of domestic animals on farms: 1909 and 1899.—The total value of domestic animals sold during 1909 was $78,648,000, and that of animals slaughtered on farms $15,152,000, making an aggregate of $93,800,000. This total, however, involves considerable duplication, resulting from the resale or slaughter

[1] Farmers should be able in general to report the production of wool more accurately than that of dairy products. There were, however, 2,648 farmers who reported the possession of 289,124 sheep of shearing age on April 15, 1910, without reporting any wool produced in 1909. Probably in a large proportion of cases this failure was due to the fact that they did not have these sheep, or did not occupy the same farm, during the preceding year. The returns of farms reporting wool in 1909, but no sheep of shearing age on April 15, 1910, would partially make up this deficiency, but it is believed that in many cases enumerators, having found that a farm had no sheep in 1910, omitted the inquiry as to wool produced in 1909 and thus missed more or less wool actually produced. It is a fairly safe assumption that the entire production of wool in 1909 bore the same relation to the entire number of sheep of shearing age on April 15, 1910, as the production of wool on those farms reporting both production and sheep bore to the number of sheep reported on such farms. Statistics for this group of farms are given in the table, and the total wool product, estimated on the basis of the above assumption, is also given.

of animals which had been purchased by the farmers during the same year.

The value of the cattle (including calves) sold during 1909 represented about three-fourths of the total value of animals sold; and the value of mules sold, representing about one-tenth of the total, ranked next in importance.

The census of 1900 called for the receipts from the sale of all domestic animals raised on the farms reporting and the value of those slaughtered during 1899, which amounted, respectively, to $34,357,000 and $11,033,000. The item of sales is not closely comparable with that for 1909, when the inquiry covered all sales whether of animals raised on the farms reporting or elsewhere. It is believed, however, that in many cases the returns for 1899 also included receipts from sales of animals not actually raised on the farms reporting.

The next statement presents statistics relating to the sale or slaughter of domestic animals by Texas farmers during the year 1909, with certain items for 1899.

	FARMS REPORTING.		Number of animals.	VALUE.	
	Number.	Per cent of all farms.		Total.	Average.
1909—All domestic animals:					
Sold	.....	.....	.....	$78,647,800	.....

[1] Schedules called for receipts from sales of animals raised on the farms reporting.

CROPS.

Summary: 1909 and 1899.—The following table summarizes the census data relative to all of the farm crops of 1909 and 1899. It includes not only general farm crops, but also flowers and plants, nursery products, and forest products of farms. In comparing one year with the other it should be borne in mind that acreage is, on the whole, a better index of the general changes or tendencies of agriculture than either the quantity or the value of the crops, since variations in quantity may be due largely to temporarily favorable or unfavorable climatic conditions, and variations in the value of the crops are largely affected by changes in prices. (See also discussion of "Total value of farm products.")

	ACRES.				PER CENT OF IMPROVED LAND OCCUPIED.		VALUE OF PRODUCTS.					
	1909	1899	Increase.[1]		1909	1899	1909	1899	Increase.[1]		Per cent of total.	
			Amount.	Per cent.					Amount.	Per cent.	1909	1899
All crops	.....	.....	.....	.....	.....	.....	$298,133,466	$166,964,711	$131,168,755	78.6	100.0	100.0

[1] A minus sign (−) denotes decrease. [2] Less than one-tenth of 1 per cent. [3] Includes value of raisins and other dried fruits, wine, cider, vinegar, etc.

The total value of crops in 1909 was $298,133,000. Of this amount, 96.4 per cent was contributed by crops for which the acreage as well as the value was reported, the remainder consisting of the value of by-products (straw, garden and grass seeds, etc.) derived from the same land as other crops reported, or of orchard fruits, nuts, forest products, and the like. The combined acreage of crops for which acreage was reported was 18,389,092, representing 67.2 per cent of the total improved land in farms (27,360,666 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage for which was not reported.

The general character of Texas agriculture is indicated by the fact that nearly two-thirds (63.3 per cent) of the total value of crops in 1909 was contributed by cotton and less than one-fourth (22.5 per cent) by the cereals. The remainder, representing 14.2 per cent of the total, consisted mostly of hay and forage, potatoes and other vegetables, and forest products.

The total value of crops in 1909 was 78.6 per cent greater than in 1899, this increase being no doubt due in part to higher prices. There was an increase of 21.7 per cent in the total acreage of crops for which acreage was reported. The greatest absolute increase was in the acreage of cotton, and the only important decrease was in the acreage of cereals.

General farm crops, minor grains and seeds, and sundry minor crops: 1879 to 1909.—The following table presents statistics for 1909 regarding cereals, other grains and seeds, hay and forage, potatoes, tobacco, cotton, broom corn, and sundry minor crops:

CROP.	Farms reporting.	Acres harvested.	QUANTITY. Amount.	QUANTITY. Unit.	Value.
Cereals, total	.....	**6,716,304**	**100,047,969**	Bu...	**$67,109,923**

Broom corn	531	9,448	2,308,490	Lbs..	140,533
Sundry minor crops, total[4]	.....	5	.....	.....	140

[1] Includes small amounts of soy beans and sunflower seed.
[2] A considerable amount of this acreage is probably a duplication of other crop acreage.
[3] The entire acreage from which these seeds were secured is believed to be included in the acreage given elsewhere for hay and forage crops, flowers and plants, etc.
[4] Includes small amounts of willows and chufas.

The leading crops covered by the table, in the order of their importance as judged by value, are cotton, $162,735,000; corn, $50,565,000; cotton seed (estimated), $25,939,000; hay and forage, $12,824,000; rough rice, $6,106,000; kafir corn and milo maize, $3,785,000; oats, $3,700,000; wheat, $2,891,000; and sweet potatoes and yams, $2,198,000. It should be noted, however, that the values of other crops, statistics for which appear elsewhere in this report, are greater than those of several of the crops listed above.

Cotton is the leading crop, with an acreage exceeding that of all other crops enumerated in the table, and a value almost twice as great. Corn is the leading cereal, the total acreage and value of all the other cereals being about one-third as great as those of corn. Of the other cereals rice stands first in value and fourth in acreage. In both acreage and value kafir corn and milo maize, oats, and wheat follow in the order named.

Among the hay and forage crops, "coarse forage" stands first both in acreage and value. "Wild, salt, or prairie grasses" is second in acreage and third in value, while "other tame or cultivated grasses" ranks third in acreage and second in value. These three crops together constitute about four-fifths of the acreage and three-fourths of the value of the entire crop.

The value of peanuts, sweet potatoes and yams, and potatoes combined is only about two-fifths as great as that of hay and forage.

The fluctuations in the acreages of some of the principal crops during the past 30 years are shown in the following table:

CROP YEAR.	ACRES HARVESTED. Corn.	Oats.	Wheat.	Rough rice.	Hay and forage.	Cotton.
1909	5,130,052	440,001	326,176	237,586	1,311,967	9,930,179
1899	5,017,690	847,225	1,027,047	8,711	938,024	0,960,367
1889	3,079,907	528,024	352,477	178	377,523	3,934,525
1879	2,468,587	238,010	373,570	335	58,033	2,178,435

The acreage of cotton shows an uninterrupted and strikingly rapid increase throughout the period. During the first decade, 1879–1889, the absolute increase was 1,756,090 acres; during the second, 3,025,842 acres; and during the last, 2,969,812 acres. As a result, the cotton acreage is more than four and one-half times that of 30 years ago. Corn also has increased in acreage, but less rapidly. For the period it shows a continuous rise, the greatest gain, 1,937,783 acres, occurring during the second decade, 1889–1899. During the 20 years since 1889 hay and forage has more than trebled in acreage. Wheat shows a slight decrease in acreage for the first decade, a large increase for the second, but in the last decade it has fallen to a point lower than in 1889. Oats show a substantial gain in acreage for the first 20 years of the period, with a marked loss during the last 10 years, decreasing by almost one-half. Rice, from insignificant acreages in the first years of the period and a comparatively small one in 1899, has increased strikingly (more than 225,000 acres) during the last ten years.

The following table shows for 1909 and 1899 the percentage which the farms reporting specified crops represented of all farms, the percentage of improved land devoted to these crops, and the percentage of increase or decrease in the acreage of each crop during the decade, together with the average yields and average values per acre for 1909:

CROP.	PER CENT OF FARMS REPORTING.		PER CENT OF IMPROVED LAND.		Per cent of increase in acres, 1899 to 1909.[1]	AVERAGE YIELD PER ACRE.	AVERAGE VALUE PER ACRE.
	1909	1899	1909	1899		1909	1909
Corn	69.0	86.1	18.8	25.6	2.2	14.7 Bu.	$9.86
Oats	7.2	21.7	1.6	4.3	−48.1	16.0 Bu.	8.41
Wheat	1.6	11.3	1.2	5.3	−68.3	7.9 Bu.	8.86
Kafir corn and milo maize	5.7	0.4	2.1	0.1	2,413.4	10.2 Bu.	0.60
Rough rice	0.3	(2)	0.9	(2)	2,027.4	37.8 Bu.	25.70
Hay and forage	26.5	27.1	4.8	4.8	39.9	0.96 Ton.	9.77
Cotton	75.8	80.6	36.3	35.6	42.7	0.25 Bale.	16.39

[1] A minus sign (−) denotes decrease. [2] Less than one-tenth of 1 per cent.

Cotton is reported by 76 farms out of every 100, corn by 69, hay and forage by 27, oats by 7, kafir corn and milo maize by 6, and wheat by 2. Only 0.3 per cent of the farms report rice. Of the above percentages those for corn, oats, wheat, hay and forage, and cotton are lower than in 1899, while those for kafir corn and milo maize and rice are higher.

The seven crops included in the above table cover about 66 per cent of the improved land, as compared with about 76 per cent in 1899. Corn, oats, and wheat show decreases in the proportion of improved land occupied, as compared with that of 1899, while kafir corn and milo maize, rice, and cotton show increases. Hay and forage occupies the same proportion as in 1899. The decrease in the acreage of the cereals is 216,487 acres, or 3.1 per cent; the increase in that of hay and forage, 373,943 acres, or 39.9 per cent.

The average value per acre of the combined cereals is $9.99. Of the cereals, only rice stands above this average, its value being more than two and one-half times as great. The average value per acre of hay and forage is slightly less than that of the combined cereals, and that of cotton is greater by $6.40.

The principal acreages of cotton are found in the counties of the eastern half of the state, forming a group which stretches from the Red River on the north nearly to the southern and southeastern boundaries. There is, however, a concentration of the acreage in those counties lying in the portion of the state described as the Calcareous prairies. To a greater or less extent, 22 counties are included in this section, and these counties together report about one-third of the total acreage. Ellis County leads, with 274,666 acres. Several other counties—Hill, McLennan, Williamson, and Navarro—also run over 200,000 acres. The greatest absolute gain is reported for Runnels County; the greatest absolute loss for Fayette County.

In acreage corn follows very closely the same section as cotton. In fact, the large acreages of corn are found almost invariably in the counties that report large acreages of cotton. Collin County leads in corn acreage. Increases are recorded for several single counties and also for a number of groups of more or less importance. The main group is made up of a row of counties, two to three in width, stretching across the state from the extreme eastern line along the Red River until it meets that section topographically described as the high plains region, where the bulk of the increases are located. The largest absolute increase is reported for Wilbarger County. Hay and forage is quite evenly distributed throughout the state. The important acreages, as a rule, are reported for the counties of the Panhandle, the Red River Valley, the north central, and the south central parts of the state. Randall County leads in the hay and forage acreage. Though increases are prevalent throughout the state, decreases are reported for a number of counties. The greatest absolute increase is recorded for Randall County.

Rice is reported for 19 counties, almost all of which lie in the upper portion of the Coastal Plain prairie on and near the Gulf of Mexico. Jefferson County reports the greatest acreage. Over two-thirds of the total acreage is recorded for three counties—Jefferson, Matagorda, and Wharton. The principal acreages of kafir corn and milo maize are found in the counties just to the northwest of the center of the state and extending into the Panhandle. These 17 counties together report over one-half of the total acreage. More than one-half of the acreage of oats is reported for 13 counties, consisting of two groups and three scattered counties. One group of seven counties is located in the northeastern part of the state on or near the Red River, while the second, a group of three counties, is in the east central part of the state. Grayson County reports the largest acreage.

In the acreage of wheat remarkably high relative decreases are reported from almost every county in the wheat growing section of the state. The Panhandle section, however, and a few scattered counties report increases. The greatest falling off in acreage is recorded for the counties of the Red River Valley and for those in the central part of the eastern half of the state. The greatest absolute loss is shown by Collin County, the decrease amounting to 67,387 acres.

Potatoes and sweet potatoes and yams are reported principally from the eastern half of the state, Harris County reporting the greatest acreage. There is a concentration of the peanut acreage in the northeastern and eastern portions of the state. Houston and Panola Counties report the greatest acreages.

Vegetables, flowers and plants, and nursery products: 1909 and 1899.—The table which follows shows details

with regard to vegetables (not including potatoes and sweet potatoes and yams, which appear elsewhere), and also with regard to flowers and plants and nursery products:

CROP.	FARMS REPORTING, 1909		ACRES.		VALUE OF PRODUCTS.	
	Number.	Per cent of all farms.	1909	1899	1909	1899
Vegetables, other than potatoes and sweet potatoes and yams, total	[1] 180,564	44.7	124,690	111,899	$8,099,300	$5,260,038
Farms reporting a product of $500 or over	1,338	0.3	19,439	.....	2,040,758	.....
All other farms	185,226	44.3	105,251	.....	6,058,548	.....
Flowers and plants, total	182	[2]	335	167	474,360	120,249
Farms reporting a product of $250 or over	92	[2]	.....	.....	466,820	.....
All other farms	90	[2]	.....	.....	7,540	.....
Nursery products, total	233	0.1	3,847	2,093	1,253,110	314,511
Farms reporting a product of $250 or over	132	[2]	.....	.....	1,236,445	.....
All other farms	101	[2]	.....	.....	16,665	.....

[1] Does not include 95,021 farms which reported that they had vegetable gardens, but gave no information as to their products.
[2] Less than one-tenth of 1 per cent.

In 1909 the total acreage of potatoes and other vegetables was 202,792 and their value $12,122,255. Excluding (so far as separately reported [1]) potatoes and sweet potatoes and yams, the acreage of vegetables was 124,690 and their value $8,099,000, both acreage and value being materially greater than in 1899. The table distinguishes between farms which make the raising of vegetables a business of some importance (having produced vegetables valued at $500 or more in 1909) and other farms, on most of which vegetables are raised mainly for home consumption. There were in 1909, 1,338 farms in the first class, representing about one-sixth of the total acreage of vegetables and about one-fourth of the total value, the average acreage of vegetables for these farms being 14.5 and the average value of product per acre $104.98.

The raising of flowers and plants and of nursery products was also of some importance in Texas, 4,182 acres being devoted to them in 1909, and the output being valued at $1,727,470. Most of the product was raised on farms where these branches of agriculture were carried on as an important business.

Small fruits: 1909 and 1899.—Strawberries are by far the most important of the small fruits raised in Texas, with blackberries and dewberries ranking next. The total acreage of small fruits in 1909 was 5,053, and in 1899, 3,904, an increase of 29.4 per cent. The production in 1909 was 6,183,000 quarts, as compared with 5,209,000 quarts in 1899, and the value was $480,000 in 1909, as compared with $305,000 in 1899.

[1] It is probable that some of the potatoes and sweet potatoes and yams raised in farm gardens were not reported separately by farmers, but were included in their returns for vegetables.

The following table shows data with regard to small fruits on farms:

CROP.	Number of farms reporting, 1909	ACRES.		Quantity (quarts), 1909	Value, 1909
		1909	1899		
Small fruits, total	.....	5,053	3,904	6,182,742	$480,331
Strawberries	1,423	2,161	1,301	4,207,036	334,651
Blackberries and dewberries	5,450	2,773	2,304	1,868,110	138,557
Raspberries and loganberries	224	104	103	97,052	6,302
Currants	49	6	4	4,873	496
Gooseberries	11	9	1	5,042	325
Other berries	.....	.....	41	.....	.....

Orchard fruits, grapes, nuts, and tropical fruits: 1909 and 1899.—The following table presents data with regard to orchard fruits, grapes, nuts, and tropical fruits. The acreage devoted to these products was not ascertained. In comparing one year with the other the number of trees or vines of bearing age is on the whole a better index of the general changes or tendencies than the quantity of product, but the data for the censuses of 1910 and 1900 are not closely comparable, and the product is therefore compared, although variations may be due largely to temporarily favorable or unfavorable climatic conditions.

CROP.	TREES OR VINES OF BEARING AGE, 1910		TREES OR VINES NOT OF BEARING AGE, 1910		PRODUCT.		
					1909		1899
	Farms reporting.	Number.	Farms reporting.	Number.	Quantity.	Value.	Quantity.

Lemons	125	1,231	541	7,231	[7] 224	469	.....

[1] Bushels.
[2] Included with "unclassified."
[3] Consists of products not separately named by the enumerator, but grouped under the designation "all other."
[4] Pounds.
[5] Includes chestnuts, hickory nuts, chinquapins, Japanese walnuts, Spanish walnuts, filberts, Japanese chestnuts, French walnuts, hazelnuts, butternuts, and other nuts.
[6] Includes dates, bananas, pineapples, and pomegranates.
[7] Boxes.

The total quantity of orchard fruits produced in 1909 was 1,090,000 bushels, valued at $1,061,000. Peaches and nectarines contributed about two-thirds

of this quantity; apples, pears, and plums and prunes most of the remainder. The production of grapes in 1909 amounted to 1,803,000 pounds, valued at $78,000, and that of nuts to 5,946,000 pounds, valued at $563,000, the tropical fruits produced in 1909 were valued at $123,000.

The production of all orchard fruits together in 1909 was 53.8 per cent less in quantity than in 1899, and the production of grapes also decreased. The value of orchard fruits decreased from $1,345,000 in 1899 to $1,061,000 in 1909, and that of grapes from $126,355 in 1899 to $78,325 in 1909. It should be noted that the values for 1899 include the value of more advanced products derived from orchard fruits or grapes, such as cider, vinegar, dried fruits, and the like, and may therefore involve some duplication, while the values shown for 1909 relate only to the products in their original condition.

The following table shows the quantities of the more advanced products manufactured by farmers from orchard fruits and grapes. Values were not called for on the schedule.

PRODUCT.	FARMS REPORTING, 1909.		QUANTITY PRODUCED.		
	Number.	Per cent of all farms.	Unit.	1909	1899
Cider	114	(1)	Gals...	4,803	55,566
Vinegar	572	0.1	Gals...	10,039	43,059
Wine and grape juice	731	0.2	Gals...	42,036	104,087
Dried fruits	563	0.1	Lbs....	26,189	84,630

[1] Less than one-tenth of 1 per cent.

Forest products: 1909 and 1899.—The census schedules for 1910 called for the "value of all firewood, fencing material, logs, railroad ties, telegraph and telephone poles, materials for barrels, bark, naval stores, or other forest products cut or produced in 1909, whether used on farm, sold, or on hand April 15, 1910;" and also, in a separate item, for the "amount received from sale of standing timber in 1909." There were 140,946 farms in Texas (33.7 per cent of all farms in the state) which reported forest products in 1909, the total value of such products being $8,925,662 as compared with $3,520,033 in 1899, an increase of 153.6 per cent. Of the value in 1909, $5,714,728 was reported as that of products used or to be used on the farms themselves, $2,838,114 as that of products sold or for sale, and $372,820 as the amount received for standing timber. It should be noted that forest products not produced on farms are not included in this report.

Sugar crops: 1909 and 1899.—The table below shows data with regard to sugar cane, and also for sorghum cane and sugar beets. The total value of the sugar cane products in 1909 was $1,670,000, as compared with $977,000 in 1899, and the total value of sorghum cane products was $956,000 in 1909, as compared with $555,000 in 1899.

PRODUCT.	FARMS REPORTING.		Acres.	PRODUCT.		
	Number.	Per cent of all farms.		Amount.	Unit.	Value.
Sugar beets:						
1909 [1]	161	(2)	293	611	Tons..	$5,919
1899	20	(2)	135	523	Tons..	2,451
Sorghum cane:						
Total, 1909 [3]						955,769
Cane grown	24,872	6.0	55,027	101,691	Tons..	
Sirup made	10,656	2.6		448,185	Gals...	214,313
Total, 1899						554,799
Cane grown	31,948	9.1	26,803	174,965	Tons..	
Cane sold as such				88,933	Tons..	263,518
Sirup made				877,232	Gals...	291,272
Sugar cane:						
Total, 1909						1,669,683
Cane grown	19,718	4.7	34,315	307,502	Tons..	
Cane sold as such	260	0.1		167,831	Tons..	502,661
Sugar made	7	(2)		6,910	Lbs...	289
Sirup made	19,054	4.6		2,246,774	Gals...	1,166,733
Total, 1899 [4]						977,053
Cane grown	15,694	4.5	17,824	170,485	Tons..	
Cane sold as such	4,043	1.1		54,758	Tons..	219,905
Sugar made	30	(2)		2,789,260	Lbs...	134,074
Sirup made	11,612	3.3		888,637	Gals...	365,819
Molasses made				98,950	Gals...	6,719

[1] Used as root forage.
[2] Less than one-tenth of 1 per cent.
[3] Includes cane used as coarse forage.
[4] Includes cane reserved for seed.

Miscellaneous crops: 1909.—Straw and cornstalks derived as by-products from the production of grain and corn have a considerable value for feed and other purposes. They are, however, mainly consumed on the farms producing them. The Census Bureau made no attempt to ascertain the total quantity or value of these products, but the schedules called for the quantity and value of those sold during the year 1909. The returns show that 189 farmers in Texas sold, during 1909, 2,149 tons of straw, for which they received $12,922, and that 304 farmers sold 1,688 tons of cornstalks and leaves, for which they received $12,392.

SELECTED FARM EXPENSES AND RECEIPTS.

Farm expenses: 1909 and 1899.—The next table shows the number of farms reporting expenditures for labor, feed, and fertilizer at the census of 1910, as well as the sums expended in 1909 and 1899:

EXPENSE.	1909			1899	INCREASE.	
	Farms reporting.		Amount.	Amount.	Amount.	Per cent.
	Number.	Per cent of all farms.				
Labor	160,538	38.4	$25,784,501	$12,331,005	$13,452,596	109.1
Feed	112,800	27.0	10,800,046	(1)	.....	.....
Fertilizer	15,931	3.8	595,363	124,716	470,647	377.4

[1] Not reported at the census of 1900.

Nearly two-fifths of the farmers hire labor, the average amount expended by the farmers hiring being $161. During the decade the total expenditure for labor increased $13,453,000, or 109.1 per cent. About one-eighth of the amount reported as expended for labor is in the form of rent and board. At prior censuses no tabulation was made of the number of farmers reporting expenditures for labor.

About one farmer out of every four reports some expenditure for feed, but only about four out of every hundred purchase fertilizer. The expenditure for feed amounted to $10,800,000 in 1909, and averaged $95.69 per farm reporting. The total amount reported as paid for fertilizer has increased $471,000, or 377.4 per cent, during the decade, the average per farm reporting being $37.37.

Receipts from sale of feedable crops: 1909.—An effort was made at the census of 1910 to secure as complete a statement as possible of the sales as well as of the production of the more important feedable crops (that is, crops ordinarily fed to live stock). The following table summarizes the data reported:

CROP.	FARMS REPORTING.		QUANTITY SOLD.		Amount received.
	Number.	Percent of all farms.	Amount.	Unit.	
Total	.....	.....	.....	.....	$8,295,157
Corn	49,469	11.8	7,528,837	Bu.	4,899,808
Oats	5,488	1.3	2,388,870	Bu.	1,254,360
Barley	63	(1)	9,510	Bu.	5,920
Hay and coarse forage	12,480	3.0	201,434	Tons	2,135,060

[1] Less than one-tenth of 1 per cent.

While the total amount expended by Texas farmers for the purchase of feed in 1909 was $10,800,000, the total receipts from the sale of feed by those reporting sales amounted to $8,295,000.

COUNTY TABLES.

Tables 1 to 6, which follow, present by counties the more important agricultural data collected at the Thirteenth Census, 1910.

Table 1 shows the population, number of farms, land and farm area, value of farm property, and number and value of domestic animals and of poultry and bees, as of April 15, 1910. Comparative data for June 1, 1900, are given in italics for certain items.

Table 2 gives the number of farms, the farm acreage, and the value of farm property operated by owners, tenants, and managers, collected as of April 15, 1910. Statistics of farm mortgages are included in this table. (See explanation in text.) Comparative data for June 1, 1900, are given in italics for certain items.

Table 3 gives statistics pertaining to the products of live stock on farms (dairy products, poultry and eggs, honey and wax, and wool and mohair); also the number and value of domestic animals sold or slaughtered on farms for the year 1909.

Table 4 shows the total value of farm crops and the principal classes thereof, together with the acreage (or trees of bearing age) and production of the principal crops for the year 1909.

Table 5 gives statistics relating to selected farm expenses for 1909 and also shows the receipts from the sale of feedable crops.

Table 6 shows the number and value of domestic animals in barns and inclosures not on farms, by classes, together with the number of dairy cows and mature horses and mules, on April 15, 1910.

Change of boundaries.—In comparing the data secured in 1910 with those for 1900, the following changes in county boundaries should be considered: Reagan County was organized from a part of Tom Green County in 1903; and Terrell County was organized from a part of Pecos County in 1905.

Land in farms in specified counties.—Following the instructions to enumerators to assign all of the acreage of a farm to the county in which the residence of the operator is located, large acreages belonging to adjoining counties have been tabulated in Armstrong, Dickens, Howard, Jackson, Lamb, Mitchell, Motley, Nueces, Tom Green, and Upton Counties.

TABLE 1.—FARMS AND FARM PROPERTY,

[Comparative data for June 1, 1900, in italics.]

		THE STATE.			Anderson.	Andrews.	Angelina.	Aransas.	Archer.

TEXAS.

FARMS AND ACREAGE IRRIGATED.

The greater part of the state of Texas lies within the Great Plains, although there are some broken mountainous areas in the southwest and extensive swamp lands along the Gulf coast. In the eastern part of the state the rainfall is usually sufficient for growing crops, and throughout most of the remaining area the rainfall, though often deficient, is in most years sufficient for some crops. The normal annual precipitation ranges from about 50 inches at the eastern boundary to about 10 inches in the extreme western part of the state.

Irrigation is practiced to some extent in most sections of the state, but except in connection with rice growing, is most common in the valleys of the Rio Grande, Pecos, and Nueces rivers, about 50 per cent of the total acreage irrigated in 1909, exclusive of that in rice, being situated in the valley of the Rio Grande. In the southeastern part of the state, along the Gulf coast, about 287,000 acres were irrigated for rice growing in 1909, but data for such irrigation are not included in this bulletin, being given in the section devoted to irrigation for rice growing in the states of Louisiana, Texas, and Arkansas in Volume V.

The following table shows for the state as a whole the number of farms and acreage irrigated in 1909, exclusive of irrigation for rice growing, in comparison with the total number of farms, the total land area, the total land in farms, and the total acreage of improved land in farms in 1910, together with the areas not yet irrigated for which water has been or is being made available. Comparative figures for the census of 1900 are included as far as possible.

[7] Not reported.
[8] Less than one-tenth of 1 per cent.

Number of farms irrigated.—According to the figures given in the table, irrigation for purposes other than rice growing was practiced on only 1 per cent of the farms of the state in 1909. In 1899 the proportion was still smaller, 0.4 per cent. It is evident, therefore, that in the state as a whole irrigation has not up to the present time been an important factor in agriculture.

In three counties, Ward, El Paso, and Dimmit, more than half the farms are irrigated, the percentages being 77.1, 66.7, and 61, respectively. In two counties, Cameron and Hidalgo, the proportion is between 40 and 50 per cent; in two, Irion and Valverde, it is between 30 and 40 per cent; and in five between 20 and 30 per cent.

From 1899 to 1909 the increase in the number of farms irrigated, exclusive of those planted in rice, was 231.5 per cent for the state as a whole.

Acreage irrigated.—The total acreage reported as irrigated in 1909, exclusive of that in rice, was 164,283, as against 40,952 in 1899 and 18,241 in 1889. The percentage of increase from 1889 to 1899 was 124.5, while from 1899 to 1909 it was 301.2.

The percentage of increase between 1899 and 1909 in the acreage irrigated was considerably higher than the percentage of increase in the number of farms irrigated, the acreage irrigated per farm increasing from 32.7 in 1899 to 39.6 in 1909. This increase in the acreage irrigated per farm is probably due to the abandonment of irrigation on small tracts in the central and eastern parts of the state and the extension of irrigation in the western part of the state, where much larger areas are irrigated per farm.

In neither 1899 nor 1909 was as much as one-tenth of 1 per cent of the total land area of the state under irrigation, outside of the area in rice. In 1909 the

irrigated acreage formed slightly more than one-tenth of 1 per cent of the land in farms, but in 1899 the proportion was considerably below this. The ratio of the irrigated land to the improved land in farms increased from 0.2 per cent to 0.6 per cent during the decade.

In 1899 El Paso County had more land under ditch than any other county in the state, about 30,000 acres, but owing to shortage of water only 4,826 acres were actually irrigated, an area which was exceeded by the irrigated acreage of Reeves County, 6,757 acres. In 1909 Cameron County, at the lower end of the Rio Grande, contained the largest area of irrigated land, 29,439 acres, and El Paso County the second largest, 23,308 acres. One other county, Hidalgo, had an irrigated area of more than 20,000 acres in 1909, while in two the irrigated acreage was between 10,000 and 20,000.

The counties in which the irrigated land formed the highest percentage of the total land area were Ward and Cameron, the proportion being 3.1 per cent in the former and 1.9 per cent in the latter.

Acreage included in projects.—The foregoing table shows that in 1910 existing enterprises were ready to supply water to 340,641 acres, or 176,358 acres more than were irrigated in 1909. It is probable that after allowance is made for an increase in the area irrigated in 1910 over that irrigated in 1909 there remained at the close of 1910 under ditch but not irrigated considerably more land than was brought under irrigation in the 10 years from 1899 to 1909, and about as much as was irrigated in 1909. The acreage included in projects exceeds the acreage irrigated in 1909 by 589,416 acres, which is nearly five times the acreage brought under irrigation in the last decade and more than three times the entire acreage irrigated in 1909. This acreage represents the area which will be available for the extension of irrigation in the next few years upon the completion of existing enterprises and without new undertakings.

Acreage irrigated, classified by character of enterprise.—The following table gives the distribution of the acreage irrigated for purposes other than rice growing in 1909, according to the character of the enterprise controlling the irrigation works:

CHARACTER OF ENTERPRISE.	ACREAGE IRRIGATED IN 1909.	
	Amount.	Per cent distribution.
All classes	164,283	100.0
Cooperative enterprises	41,186	25.1
Commercial enterprises	73,440	44.7
Individual and partnership enterprises	49,657	30.2

In Texas no land is irrigated by the United States Reclamation Service or by the United States Indian Service. The Carey Act does not apply to this state, and no irrigation districts had been organized in 1909. Cooperative enterprises and individual and partnership enterprises, both of which classes are controlled by the water users, supplied about 55 per cent of the total acreage irrigated in 1909, while commercial enterprises controlled the water supply for the remainder of the land irrigated. Some of the latter enterprises, however, supply water under contracts providing that the works shall become the property of the water users when the water rights sold are paid for.

Acreage irrigated, classified by source of water supply.—The following table shows the distribution of the acreage irrigated, exclusive of that in rice, in 1909, according to the source of water supply:

SOURCE OF SUPPLY.	ACREAGE IRRIGATED IN 1909.	
	Amount.	Per cent distribution.
All sources	164,283	100.0
Streams	134,692	82.0
Lakes	458	0.3
Wells	9,802	6.0
Springs	13,068	8.0
Reservoirs	6,203	3.8

While more than four-fifths of the acreage irrigated in 1909 was supplied from streams, there has been considerable utilization of other sources of supply. The state has many large springs, the water from which is being used for irrigation.

IRRIGATION WORKS.

The following statement summarizes the data collected relating to works for supplying water for irrigation in 1910, other than those for rice irrigation. As the report for the census of 1900 does not segregate works used for rice irrigation, no comparison with the results of that census is made.

Independent enterprises	number	2,161
Ditches, total length	miles	1,663
Main ditches	number	636
Length	miles	941
Capacity	cubic feet per second	12,818
Lateral ditches	number	616
Length	miles	722
Reservoirs	number	288
Capacity	acre-feet	72,051
Flowing wells	number	122
Capacity	gallons per minute	36,039
Pumped wells	number	1,412
Capacity	gallons per minute	121,631
Pumping plants	number	1,784
Engine capacity	horsepower	20,915
Pump capacity	gallons per minute	1,455,285

Assuming that the enterprises in operation in 1909 were identical with those reported in 1910, the average acreage irrigated per enterprise was 76, and the acreage irrigated per mile of main ditch was 174.6.

As shown by the table, there has been considerable utilization of underground water for irrigation in Texas, 122 flowing wells and 1,412 pumped wells being reported. The area irrigated from wells in 1909 was 9,862 acres, or 6 per cent of the total irrigated acreage of the state, exclusive of that irrigated for rice growing.

Pumping for irrigation is common, 40 per cent of the acreage irrigated in 1909, other than that in rice, being supplied with pumped water. About two-thirds of the area thus supplied is along the lower Rio Grande in Cameron and Hidalgo Counties.

Cost of construction, operation, and maintenance.—The following table presents statistics in regard to the cost of construction, operation, and maintenance of irrigation enterprises:

	CENSUS OF—	
	1910	1900
Cost of irrigation enterprises	[1] $7,346,708	[2] $705,608
Average per acre	[3] $21.57	[4] $17.23
Estimated final cost of existing enterprises	$8,613,533	(5)
Average per acre included in projects	$11.43	(5)
Operation and maintenance:		
Acreage for which cost is reported	109,697	(5)
Total cost reported	[6] $356,260	(5)
Average cost per acre	$3.25	(5)

[1] Reported July 1.
[2] Cost of construction of systems operated in 1899, exclusive of estimated cost for those operated in connection with rice growing.
[3] Based on acreage enterprises were capable of irrigating in 1910.
[4] Based on acreage irrigated in 1899.
[5] Not reported.
[6] For 1909.

The cost of the irrigation systems operated in 1899, exclusive of those operated in connection with rice culture, was $705,608. The corresponding cost in 1910 was $7,346,708, or more than 10 times as great, and the average cost per acre likewise shows some increase, though much less in degree. The average cost per acre shown for the census of 1910 is based on the acreage enterprises were capable of irrigating in that year, but since the corresponding acreage for 1900 was not reported, the figure for average cost at the earlier census is based on the acreage actually irrigated in 1899. If computed on the basis of the acreage irrigated in 1909, the average cost in 1910 would be $44.72, representing an increase of 159.5 per cent over the figure given for average cost at the census of 1900.

Of the counties for which separate figures are given in the table, the one showing the lowest average cost per acre enterprises were capable of irrigating in 1910, $1.76, is Loving. The highest average cost per acre, $57.44, is in Comal County. Since, however, neither of these counties has a large irrigated acreage, these extremes do not materially affect the average for the state.

The acreage for which cost of operation and maintenance in 1909 was reported constitutes 66.8 per cent of the total acreage reported as irrigated in 1909, and 95.7 per cent of the acreage reported as irrigated by other than individual and partnership enterprises. The cost reported can be said, therefore, to represent fairly the average annual expense for all but individual and partnership enterprises.

CROPS.

The next table shows the acreage, yield, and value of the principal crops reported as grown under irrigation in 1909, except rice.

CROP.	IRRIGATED CROPS: 1909				
	Acreage.	Yield.			Value.
		Unit.	Amount.	Average per acre.	
Cereals:					
Corn	9,608	Bu.	191,474	21.1	$162,467

Other tame or cultivated grasses [1]	5,009	Tons.	6,655	1.33	80,460
Wild, salt, or prairie grasses	593	Tons.	773	1.30	10,743
Coarse forage	4,651	Tons.	14,108	3.03	153,626
Sundry crops:					
Cotton	7,474	Bales.	2,299	0.31	143,157
Sugar cane	1,759	Tons.	30,665	20.84	90,170
Potatoes	961	Bu.	90,089	93.7	81,052
Onions	1,842				297,440
Cabbages	1,416				143,671
Other vegetables	4,178				646,651

[1] Includes millet.

In addition 531 acres in orchards not bearing were irrigated, but no single crop other than those shown in the table covered an irrigated area of 500 acres.

Acreage.—The crop most extensively grown on irrigated land is alfalfa, its acreage representing 24.7 per cent of the total for the irrigated crops given. Corn is next, with 16.3 per cent of this total, and is followed by cotton, with 13.4 per cent. The greater part of the irrigated cotton acreage is in Cameron and Ward Counties.

The area devoted to the raising of vegetables under irrigation in 1909 amounted to 8,397 acres, comprising 1,842 acres of onions, 1,416 acres of cabbages, 961 acres of potatoes, and 4,178 acres of other vegetables. Of the irrigated land in onions, more than two-thirds was in La Salle, Hidalgo, Cameron, and Dimmit Counties; of that in cabbages more than 94 per cent was in Cameron and Hidalgo Counties; and of that in potatoes about 43 per cent was in Bexar County. Other vegetables were grown on a commercial scale by means of irrigation in Webb, Cameron, Hidalgo, Bexar, and El Paso Counties.

COUNTY TABLE.

The next table gives in detail, for the state and principal counties, the data summarized in this section, except those relating to crops.

Change in boundaries.—In comparing the data secured in 1910 with those for the preceding census, it should be borne in mind that a part of Tom Green County was taken to form Reagan County in 1903, and a part of Pecos County was taken to form Terrell County in 1905.

Land in farms in specified counties.—In accordance with the instructions to enumerators to assign all of the acreage of a farm to the county in which the residence of the operator was located, large acreages in adjoining counties have been tabulated as in Nueces and Tom Green Counties.

ACREAGE IRRIGATED, EXTENT AND COST OF IRRIGATION ENTERPRISES, AND COST OF OPERATION AND MAINTENANCE, BY COUNTIES: 1909 AND 1910.
