## CONTENTS.

SUMMARY TABLES.	Page.
1. Color or race, nativity, parentage, and sex, for the state and urban and rural population: 1920, 1910, and 1900.....	2
2. School attendance, for the state and urban and rural population: 1920 and 1910.....	2
3. Age, for the state and urban and rural population: 1920 and 1910.....	3
4. Illiteracy, for the state and urban and rural population: 1920 and 1910.....	4
5. Population 21 years of age and over, by sex, class of population, and citizenship, for the state: 1920 and 1910.....	5
6. Country of birth of the foreign-born white, for the state and cities: 1920..	5
7. Indian, Chinese, and Japanese, for counties and cities: 1920, 1910, and 1900..	5
8. Age, for cities of 10,000 or more: 1920.....	6

DETAILED TABLES.	Page.
9. Composition and characteristics of the population, for counties: 1920.....	7
10. Composition and characteristics of the population, for cities of 10,000 or more: 1920.....	14
11. Composition and characteristics of the population, for places of 2,500 to 10,000: 1920.....	15
12. Country of birth of the foreign-born white, for counties and for cities of 10,000 or more: 1920.....	17
13. Composition and characteristics of the population, by wards of Mobile: 1920.....	18
MAP.	
Per cent of Negroes in the total population, by counties: 1920.....	10

## INTRODUCTION.

Statistics as to the number of inhabitants of Alabama, by counties, municipalities, and other minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Counties and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of Alabama which are to be presented for counties and small cities. For the state as a whole and for its large cities, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes will be included in the final reports of the Fourteenth Census.

The greater part of this bulletin consists of five detailed tables (Nos. 9 to 13), which present statistics as to color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, and dwellings and families, for the state, for its counties and cities, and for the wards of Mobile. These are preceded by eight summary tables (Nos. 1 to 8), which reproduce from the detailed tables the more important state and city totals and present certain additional data, particularly in regard to age, together with comparative figures in most cases for one or more previous census years.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all

Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, it is impossible to give comparative figures for 1910 for this class of the population by individual European countries. The statistics on this subject, therefore, relate to 1920 only.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

## POPULATION—ALABAMA.

SUMMARY TABLES.	Page.
1. Color or race, nativity, parentage, and sex, for the state and urban and rural population: 1920, 1910, and 1900.....	2
2. School attendance, for the state and urban and rural population: 1920 and 1910.....	2
3. Age, for the state and urban and rural population: 1920 and 1910.....	3
4. Illiteracy, for the state and urban and rural population: 1920 and 1910.....	4
5. Population 21 years of age and over, by sex, class of population, and citizenship, for the state: 1920 and 1910.....	5
6. Country of birth of foreign-born white, for state and principal cities: 1920.....	5
7. Indians, Chinese, and Japanese, for counties and Phoenix: 1920, 1910, and 1900 .....	5
8. Age, for cities of 10,000 or more: 1920.....	5

DETAILED TABLES.	Page.
9. Composition and characteristics of the population, for counties: 1920.....	6
10. Composition and characteristics of the population, for cities of 10,000 or more: 1920.....	8
11. Composition and characteristics of the population, for places of 2,500 to 10,000: 1920.....	9
12. Country of birth of the foreign-born white, for counties and for cities of 10,000 or more: 1920.....	9
Supplemental tables for Indian population.....	10
MAP. Per cent of foreign-born white in total population, by counties: 1920.....	11

## INTRODUCTION.

Statistics as to the number of inhabitants of Arizona, by counties, municipalities, and other minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Counties and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of Arizona which are to be presented for counties and small cities. For the state as a whole and for Phoenix, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes will be included in the final reports of the Fourteenth Census.

On pages 6 to 9 of this bulletin are given four detailed tables (Nos. 9 to 12), which present statistics as to color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, and dwellings and families, for the state and for its counties and cities. These are preceded by eight summary tables (Nos. 1 to 8), which reproduce from the detailed tables the more important state and city totals and present certain additional data, particularly in regard to age, together with comparative figures in most cases for one or more previous census years. Four supplemental tables for the Indian population are also presented on page 10.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all

Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

## POPULATION—ARIZONA.

## INTRODUCTION.

Statistics as to the number of inhabitants of Arkansas, by counties, municipalities, and other minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Counties and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of Arkansas which are to be presented for counties and small cities. For the state as a whole and for its principal cities, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes will be included in the final reports of the Fourteenth Census.

The greater part of this bulletin consists of five detailed tables (Nos. 9 to 13), which present statistics as to color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, and dwellings and families, for the state, for its counties and cities, and for the wards of Little Rock. These are preceded by eight summary tables (Nos. 1 to 8), which reproduce from the detailed tables the more important state and city totals and present certain additional data, particularly in regard to age, together with comparative figures in most cases for one or more previous census years.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all

Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

## POPULATION—ARKANSAS.

Percent of foreign-born white in total population, by counties: 1920.....	20

## INTRODUCTION.

Statistics as to the number of inhabitants of California, by counties, municipalities, and other minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Counties and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of California which are to be presented for counties and small cities. For the state as a whole and for its principal cities, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes will be included in the final reports of the Fourteenth Census.

The greater part of this bulletin consists of five detailed tables (Nos. 9 to 13), which present statistics as to color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, and dwellings and families, for the state, for its counties and cities, and for assembly districts of cities of 50,000 or more. These are preceded by eight summary tables (Nos. 1 to 8), which reproduce from the detailed tables the more important state and city totals and present certain additional data, particularly in regard to age, together with comparative figures in most cases for one or more previous census years. Five supplemental tables for the Indian, Chinese, and Japanese population are also presented on pages 24 to 28.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed neces-

sary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

## POPULATION—CALIFORNIA.

MAP. Per cent of foreign-born white in total population, by counties: 1920.....	16

## INTRODUCTION.

Statistics as to the number of inhabitants of Colorado, by counties, municipalities, and other minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Counties and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of Colorado which are to be presented for counties and small cities. For the state as a whole and for its principal cities, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes will be included in the final reports of the Fourteenth Census.

The greater part of this bulletin consists of four detailed tables (Nos. 9 to 12), which present statistics as to color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, and dwellings and families, for the state and for its counties and cities. These are preceded by eight summary tables (Nos. 1 to 8), which reproduce from the detailed tables the more important state and city totals and present certain additional data, particularly in regard to age, together with comparative figures in most cases for one or more previous census years.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all

Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

PER CENT OF FOREIGN-BORN WHITE IN TOTAL POPULATION, BY COUNTIES: 1920.

## POPULATION : CONNECTICUT

## COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WILLIAM C. HUNT, Chief Statistician for Population

## CONTENTS.

## SUMMARY TABLES.

	Page.
1. Color or race, nativity, parentage, and sex, for the state and urban and rural population: 1920, 1910, and 1900.....	2
2. School attendance, for the state and urban and rural population: 1920 and 1910.....	2
3. Age, for the state and urban and rural population: 1920 and 1910.....	3
4. Illiteracy, for the state and urban and rural population: 1920 and 1910.....	4
5. Population 21 years of age and over, by sex, class of population, and citizenship, for the state: 1920 and 1910.....	4
6. Country of birth of the foreign-born white, for the state and New Haven: 1920.....	5
7. Indians, Chinese, and Japanese, for counties and cities: 1920, 1910, and 1900.....	5
8. Age, for cities and boroughs of 10,000 or more: 1920.....	5

	Page.
9. Composition and characteristics of the population, for counties: 1920.....	7
10. Composition and characteristics of the population, for cities and boroughs of 10,000 or more: 1920.....	8
11. Composition and characteristics of the population, for places of 2,500 to 10,000: 1920.....	10
12. Country of birth of the foreign-born white, for counties and for cities and boroughs of 10,000 or more: 1920.....	11
13. Composition and characteristics of the population, for wards (or voting districts) of cities of 50,000 or more: 1920.....	12
MAP.	
Per cent of foreign-born white in total population, by counties: 1920.....	10

## INTRODUCTION.

Statistics as to the number of inhabitants of Connecticut, by counties, municipalities, and other minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Counties and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of Connecticut which are to be presented for counties and small cities. For the state as a whole and for its principal cities, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes will be included in the final reports of the Fourteenth Census.

The greater part of this bulletin consists of five detailed tables (Nos. 9 to 13), which present statistics as to color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, and dwellings and families, for the state, for its counties and cities, and for the wards of cities of 50,000 or more. These are preceded by eight summary tables (Nos. 1 to 8), which reproduce from the detailed tables the more important state and city totals and present certain additional data, particularly in regard to age, together with comparative figures in most cases for one or more previous census years.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all

Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

## POPULATION—CONNECTICUT.

TABLE 1.—COLOR OR RACE, NATIVITY, PARENTAGE, AND SEX, FOR THE STATE AND URBAN AND RURAL POPULATION: 1920, 1910, AND 1900.

# FOURTEENTH CENSUS OF THE UNITED STATES: 1920

DEPARTMENT  
OF COMMERCE

## BULLETIN

BUREAU OF  
THE CENSUS

### POPULATION : DELAWARE

#### COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WILLIAM C. HUNT, Chief Statistician for Population

#### CONTENTS.

##### SUMMARY TABLES.

1. Color or race, nativity, parentage, and sex, for the state and urban and rural population: 1920, 1910, and 1900.....	2
2. School attendance, for the state and urban and rural population: 1920 and 1910	2
3. Age, for the state and urban and rural population: 1920 and 1910.....	3
4. Illiteracy, for the state and urban and rural population: 1920 and 1910.....	4
5. Population 21 years of age and over, by sex, class of population, and citizenship, for the state: 1920 and 1910.....	5
6. Country of birth of the foreign-born white, for the state and Wilmington: 1920	5
7. Indian, Chinese, and Japanese, for counties and Wilmington: 1920, 1910, and 1900.....	5
8. Age, for Wilmington: 1920.....	5

Page.

##### DETAILED TABLES.

9. Composition and characteristics of the population, for counties: 1920.....	6
10. Composition and characteristics of the population, for Wilmington: 1920....	7
11. Composition and characteristics of the population, for places of 2,500 to 10,000: 1920.....	7
12. Country of birth of the foreign-born white, for counties and Wilmington: 1920.....	8
13. Composition and characteristics of the population, for wards of Wilmington: 1920.....	9
MAP. Per cent of Negroes in the total population, by counties: 1920.....	8

Page.

#### INTRODUCTION.

Statistics as to the number of inhabitants of Delaware, by counties, municipalities, and other minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Counties and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of Delaware which are to be presented for counties and small cities. For the state as a whole and for its large cities, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes will be included in the final reports of the Fourteenth Census.

On pages 6 to 9 of this bulletin are given five detailed tables (Nos. 9 to 13), which present statistics as to color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, and dwellings and families, for the state, for its counties and cities, and for the wards of Wilmington. These are preceded by eight summary tables (Nos. 1 to 8), which reproduce from the detailed tables the more important state and city totals and present certain additional data, particularly in regard to age, together with comparative figures in most cases for one or more previous census years.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all Chinese

and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, it is impossible to give comparative figures for 1910 for this class of the population by individual European countries. The statistics on this subject, therefore, relate to 1920 only.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

# FOURTEENTH CENSUS OF THE UNITED STATES: 1920

DEPARTMENT  
OF COMMERCE

## BULLETIN

BUREAU OF  
THE CENSUS

### POPULATION : DISTRICT OF COLUMBIA

#### COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WILLIAM C. HUNT, Chief Statistician for Population

#### CONTENTS.

##### SUMMARY TABLES.

1. Color or race, nativity, parentage, and sex: 1920, 1910, and 1900.....	2
2. School attendance: 1920 and 1910.....	2
3. Age: 1920 and 1910.....	3
4. Illiteracy: 1920 and 1910.....	3
5. Population 21 years of age and over, by sex, class of population, and citizenship: 1920 and 1910.....	4

Page.	
6. Country of birth of the foreign-born white, for census districts: 1920.....	4
7. Indian, Chinese, and Japanese, for census districts: 1920 and 1910.....	4
DETAILED TABLE.	
8. Composition and characteristics of the population, for census districts: 1920..	5
MAP.	
Per cent of Negroes in the total population, by districts: 1920.....	6

#### INTRODUCTION.

Statistics as to the number of inhabitants of the District of Columbia, by census districts and police precincts, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of the District of Columbia which are to be issued in the form of separate publications. The final reports of the Fourteenth Decennial Census, however, will present, for the District of Columbia as a whole, in addition to the statistical material in this bulletin, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes.

This bulletin consists of eight tables, which present statistics as to color or race, nativity, parentage, sex, school attendance, age, illiteracy, citizenship and country of birth of the foreign-born white population, and dwellings and families. Tables 6, 7, and 8 present statistics not only for the District of Columbia, which is coextensive with the city of Washington, but for the nine districts into which it has been divided for census purposes. The boundaries of these districts are shown by the map on page 6.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativ-

ity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

## MAP.

## INTRODUCTION.

Statistics as to the number of inhabitants of Florida, by counties, municipalities, and other minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Counties and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of Florida which are to be presented for counties and small cities. For the state as a whole and for its principal cities, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes will be included in the final reports of the Fourteenth Census.

The greater part of this bulletin consists of five detailed tables (Nos. 9 to 13), which present statistics as to color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, and dwellings and families, for the state, for its counties and cities, and for the wards of its largest two cities. These are preceded by eight summary tables (Nos. 1 to 8), which reproduce from the detailed tables the more important state and city totals and present certain additional data, particularly in regard to age, together with comparative figures in most cases for one or more previous census years.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians

are natives of native parentage, while nearly all Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.
