

POPULATION : VIRGINIA

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WILLIAM C. HUNT, Chief Statistician for Population

CONTENTS.

SUMMARY TABLES.	Page.	DETAILED TABLES.	Page.
1. Color or race, nativity, parentage, and sex, for the state and urban and rural population: 1920, 1910, and 1900.....	2	9. Composition and characteristics of the population, for counties and independent cities: 1920.....	7
2. School attendance, for the state and urban and rural population: 1920 and 1910.....	2	10. Composition and characteristics of the population, for cities of 10,000 or more: 1920.....	20
3. Age, for the state and urban and rural population: 1920 and 1910.....	3	11. Composition and characteristics of the population, for places of 2,500 to 10,000: 1920.....	21
4. Illiteracy, for the state and urban and rural population: 1920 and 1910.....	4	12. Country of birth of the foreign-born white, for counties and independent cities: 1920.....	23
5. Population 21 years of age and over, by sex, class of population, and citizenship, for the state: 1920 and 1910.....	5	13. Composition and characteristics of the population, for wards of cities of 50,000 or more: 1920.....	24
6. Country of birth of foreign-born white, for state and principal cities: 1920.....	5	MAP.	
7. Indians, Chinese, and Japanese, for counties and independent cities: 1920, 1910, and 1900.....	5	Per cent of Negroes in total population, by counties: 1920.....	22
8. Age, for cities of 10,000 or more: 1920.....	6		

INTRODUCTION.

Statistics as to the number of inhabitants of Virginia, by counties, municipalities, and other minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Counties and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of Virginia which are to be presented for counties and small cities. For the state as a whole and for its principal cities, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes will be included in the final reports of the Fourteenth Census.

The greater part of this bulletin consists of five detailed tables (Nos. 9 to 13), which present statistics as to color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, and dwellings and families, for the state, for its counties and cities, and for the wards of cities of 50,000 or more. These are preceded by eight summary tables (Nos. 1 to 8), which reproduce from the detailed tables the more important state and city totals and present certain additional data, particularly in regard to age, together with comparative figures in most cases for one or more previous census years.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all

Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

POPULATION—VIRGINIA.

SUMMARY TABLES.	Page.	DETAILED TABLES.	Page.
1. Color or race, nativity, parentage, and sex, for the state and urban and rural population: 1920, 1910, and 1900.....	2	9. Composition and characteristics of the population, for counties: 1920.....	7
2. School attendance, for the state and urban and rural population: 1920 and 1910.....	2	10. Composition and characteristics of the population, for cities of 10,000 or more: 1920.....	11
3. Age, for the state and urban and rural population: 1920 and 1910.....	3	11. Composition and characteristics of the population, for places of 2,500 to 10,000: 1920.....	12
4. Illiteracy, for the state and urban and rural population: 1920 and 1910.....	4	12. Country of birth of the foreign-born white, for counties and for cities of 10,000 or more: 1920.....	13
5. Population 21 years of age and over, by sex, class of population, and citizenship, for the state: 1920 and 1910.....	5	13. Composition and characteristics of population, for wards of Tacoma: 1920.....	14
6. Country of birth of foreign-born white, for state and principal cities: 1920....	5	Supplemental tables for Indian, Chinese, and Japanese population.....	15
7. Indians, Chinese, and Japanese, for counties and cities: 1920, 1910, and 1900..	5	MAP.	
8. Age, for cities of 10,000 or more: 1920.....	6	Per cent of foreign-born white in total population, by counties: 1920.....	17

INTRODUCTION.

Statistics as to the number of inhabitants of Washington, by counties, municipalities, and other minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Counties and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of Washington which are to be presented for counties and small cities. For the state as a whole and for its principal cities, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes will be included in the final reports of the Fourteenth Census.

The greater part of this bulletin consists of five detailed tables (Nos. 9 to 13), which present statistics as to color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, and dwellings and families, for the state, for its counties and cities, and for the wards of Tacoma. These are preceded by eight summary tables (Nos. 1 to 8), which reproduce from the detailed tables the more important state and city totals and present certain additional data, particularly in regard to age, together with comparative figures in most cases for one or more previous census years. Four supplemental tables for Indian, Chinese, and Japanese population are also presented on pages 15 and 16.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians

are natives of native parentage, while nearly all Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

POPULATION—WASHINGTON.

1. Color or race, nativity, parentage, and sex, for the state and urban and rural population: 1920, 1910, and 1900.....	2	9. Composition and characteristics of the population, for counties: 1920.....	7
2. School attendance, for the state and urban and rural population: 1920 and 1910.....	2	10. Composition and characteristics of the population, for cities of 10,000 or more: 1920.....	12
3. Age, for the state and urban and rural population: 1920 and 1910.....	3	11. Composition and characteristics of the population, for places of 2,500 to 10,000: 1920.....	13
4. Illiteracy, for the state and urban and rural population: 1920 and 1910.....	4	12. Country of birth of the foreign-born white, for counties and for cities of 10,000 or more: 1920.....	14
5. Population 21 years of age and over, by sex, class of population, and citizenship, for the state: 1920 and 1910.....	5	13. Composition and characteristics of the population, for wards of cities of 50,000 or more: 1920.....	15
6. Country of birth of foreign-born white, for state and principal cities: 1920.....	5		
7. Indians, Chinese, and Japanese, for counties and cities: 1920, 1910, and 1900.....	5	MAP.	
8. Age, for cities of 10,000 or more: 1920.....	6	Per cent of Negroes in total population, by counties: 1920.....	17

INTRODUCTION.

Statistics as to the number of inhabitants of West Virginia, by counties, municipalities, and other minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Counties and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of West Virginia which are to be presented for counties and small cities. For the state as a whole and for its principal cities, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes will be included in the final reports of the Fourteenth Census.

The greater part of this bulletin consists of five detailed tables (Nos. 9 to 13), which present statistics as to color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, and dwellings and families, for the state, for its counties and cities, and for the wards of cities of 50,000 or more. These are preceded by eight summary tables (Nos. 1 to 8), which reproduce from the detailed tables the more important state and city totals and present certain additional data, particularly in regard to age, together with comparative figures in most cases for one or more previous census years.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all

Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

POPULATION—WEST VIRGINIA.

8. Age, for cities of 10,000 or more: 1920.....	6	Per cent of foreign-born white in total population, by counties: 1920.....	25

INTRODUCTION.

Statistics as to the number of inhabitants of Wisconsin, by counties, municipalities, and other minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Counties and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of Wisconsin which are to be presented for the counties and small cities. For the state as a whole and for its principal cities, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes will be included in the final reports of the Fourteenth Census.

The greater part of this bulletin consists of five detailed tables (Nos. 9 to 13), which present statistics as to color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, and dwellings and families for the state, for its counties and cities, and for the wards of cities of 50,000 or more. These are preceded by eight summary tables (Nos. 1 to 8), which reproduce from the detailed tables the more important state and city totals and present certain additional data, particularly in regard to age, together with comparative figures in most cases for one or more previous census years. Four supplemental tables for the Indian population are also presented on page 24.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and

Indians are natives of native parentage, while nearly all Chinese and Japanese are either foreign-born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

POPULATION—WISCONSIN.

2. School attendance, for the state and urban and rural population: 1920 and 1910.....	2	10. Composition and characteristics of the population, for cities of 10,000 or more: 1920.....	9
3. Age, for the state and urban and rural population: 1920 and 1910.....	3	11. Composition and characteristics of the population, for places of 2,500 to 10,000: 1920.....	9
4. Illiteracy, for the state and urban and rural population: 1920 and 1910.....	4	12. Country of birth of the foreign-born white, for counties and for cities of 10,000 or more: 1920.....	10
5. Population 21 years of age and over, by sex, class of population, and citizenship, for the state: 1920 and 1910.....	5	Supplemental tables for Indian population.....	11
6. Country of birth of the foreign-born white, for the state: 1920.....	5	MAP.	
7. Indians, Chinese, and Japanese, for counties: 1920, 1910, and 1900.....	5	Per cent of foreign-born white in total population, by counties: 1920.....	12
8. Age, for cities of 10,000 or more: 1920.....	5		

INTRODUCTION.

Statistics as to the number of inhabitants of Wyoming, by counties, municipalities, and other minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Counties and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all the topics of the population census of Wyoming which are to be presented for counties and cities. For the state as a whole, statistics as to marital condition, state or territory of birth, year of immigration, country of birth of parents, mother tongue, inability to speak English, occupations, and ownership of homes will be included in the final reports of the Fourteenth Census.

On pages 6 to 10 of this bulletin are given four detailed tables (Nos. 9 to 12), which present statistics as to color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, and dwellings and families, for the state and for its counties and cities. These are preceded by eight summary tables (Nos. 1 to 8), which reproduce from the detailed tables the more important state and city totals and present certain additional data, particularly in regard to age, together with comparative figures in most cases for one or more previous census years. Four supplemental tables for the Indian population are also presented on page 11.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all

Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

Distribution of Indians by linguistic stock: 1920.....	following	2
Per cent of Indians in total population, by judicial districts: 1920.....		12

INTRODUCTION.

Statistics as to the number of inhabitants of Alaska, for judicial districts, recorders' districts, towns, villages, stations, and forts, without classification as to sex, age, etc., have been published separately in a bulletin entitled "Number of Inhabitants, by Judicial Districts and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all phases of the population census of Alaska except occupations, for which topic statistics will be published in a separate bulletin.

This bulletin consists of 22 tables, of which 19 (Nos. 1 to 19, inclusive) give detailed figures for Alaska as a whole and 3 (Nos. 20 to 22, inclusive) give separate figures, in somewhat less detail, for each of the four judicial districts into which the territory is divided. (See map, p. 12.) These tables present statistics as to color or race, nativity, parentage, sex, age, marital condition, school attendance, illiteracy, inability to speak English, dwellings and families, tenure of homes, state or territory of birth, country of birth, citizenship, and year of immigration.

Color or race.—Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race. The term "white" as here used refers to pure-blooded white persons. Persons of mixed blood are classified according to the nonwhite racial strain, or, if the nonwhite blood itself is mixed, according to the predominant nonwhite

strain. For example: A person of mixed white and Indian descent or of mixed white and Negro descent is classified as an Indian or as a Negro, as the case may be, regardless of the amount of white blood; and a person of mixed Indian and Negro blood or of mixed white, Indian, and Negro blood is classified either as Indian or as Negro, according to which of these two strains predominates over the other, regardless of the amount of white blood, if any.

Indian stock.—No attempt was made at the Fourteenth Census to classify Indians by tribe, as was done at the Thirteenth Census by means of a special schedule for Indians, but Table 2 (p. 2) and the map following, which were prepared from data supplied by Mr. W. T. Lopp, in charge of the census of Alaska, show the distribution of the Alaskan Indians according to linguistic stock.

Nativity and parentage.—All persons born in continental United States or in any of its outlying possessions are treated as natives and all other persons as foreign born. Classification according to nativity and parentage has not, in general, been deemed necessary for the nonwhite races, since nearly all Indians and Negroes are natives of native parentage, while most Chinese, Japanese, and others are foreign born. Moreover, the numbers of the nonwhite elements, aside from the Indians, are so small as to be of no great significance. In Table 3, however, separate figures as to nativity, and in Table 4 separate figures as to nativity and parentage, are given for each of the several races.

POPULATION—ALASKA.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States or in any of its outlying possessions; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

Country of birth for the foreign born.—The presentation of statistics on country of birth for the foreign-born white population for 1920 is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Year of immigration.—In the distribution of the foreign-born population by year of immigration, as given in Table 7, the calendar year is the basis of the classification, and the date given is the year of immigration to the United States or to any of its possessions—not necessarily the year of arrival in Alaska.

Marital condition.—The census classification with regard to marital condition covers four groups, namely, single, married, widowed, and divorced. As these terms refer only to the marital status of the population on the census date, a person who had been widowed or divorced but had remarried would be reported as married. The explanation of the much larger proportion single among males than among

females is found in the great preponderance of males in the adult population, and in the fact that women as a rule marry at younger ages than men.

School attendance.—The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

Illiteracy.—The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

Dwellings and families and tenure of homes.—In census usage a "dwelling" is any building or structure in which one or more persons reside. It may house a single family, as in the case of a private house, or a number of families, as in the case of an apartment building. The term "family" as here used means a group of persons, whether related by blood or not, who live together as one household, usually sharing the same table. One person living alone is counted as a family, and, on the other hand, the occupants or inmates of a hotel or institution, however numerous, are also treated as forming a single family. Thus the census family in some cases differs greatly from the natural family. The structure or part of a structure occupied by each census family is, for census purposes, a "home," and the number of families shown in Table 19 is therefore equal to the total number of homes for which statistics as to tenure are given in that table.

INTRODUCTION.

Statistics as to the number of inhabitants of Hawaii, by islands, counties, and minor civil divisions, without classification as to sex, age, etc., have already been published in a bulletin entitled "Number of Inhabitants, by Islands, Counties, and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all topics of the population census of Hawaii, except occupations, for which statistics will be published later in a separate bulletin.

This bulletin consists of 21 tables, of which 18 (Nos. 1 to 18, inclusive) give detailed figures for Hawaii as a whole and in certain cases for Honolulu and Hilo separately, and 3 (Nos. 19 to 21, inclusive) give separate figures, in somewhat less detail, for the five counties into which the territory is divided and for Honolulu and Hilo. (See map, p. 23.) These tables present statistics as to race, nativity, parentage, sex, age, marital condition, school attendance, illiteracy, inability to speak English, dwellings and families, tenure of homes, state or territory of birth, country of birth, citizenship, and year of immigration.

Race.—Because of the wide differences in characteristics among the various classes of the population, the statistics on most subjects are shown according to race. The racial classification is as follows: Hawaiian (pure Hawaiian); Caucasian Hawaiian (mixture of Caucasian and Hawaiian stock); Asiatic Hawaiian (mixture of Asiatic and Hawaiian stock); Caucasian (comprising Portuguese, Porto Rican, Spanish, and

"Other Caucasian" subgroups); Chinese; Japanese; Korean; Filipino; Negro; and "All other."

Urban and rural.—The Census Bureau treats as urban territory those cities, towns, villages, etc., having 2,500 inhabitants or more, all other territory being classed as rural. On the basis of this definition, the only urban communities in Hawaii are Honolulu district (generally considered as Honolulu city) and the city of Hilo. Because of the marked differences which often exist between urban and rural communities in regard to the composition and characteristics of their population, the two classes are shown separately in Table 1; and in certain other tables separate figures are given for Honolulu and Hilo.

Nativity and place of birth.—All persons born in continental United States or in any of its outlying possessions are treated as natives, and all other persons as foreign born. The place of birth shown in Tables 4 and 5 does not correspond in all cases with the racial classification given in Table 1. For example, a person of Caucasian ancestry born in the Philippine Islands would be classified in Table 1 as a Caucasian and in Table 4 as of Philippine birth. Again, a person born in Hawaii but of Filipino ancestry would be classed in Table 1 as a Filipino and in Table 4 as of Hawaiian birth. The presentation of statistics on country of birth of the foreign-born population for 1920 is made on the basis of the post-war map. Because of the many political changes which have resulted from the war, comparative

POPULATION—HAWAII.

figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Year of immigration.—In the distribution of the foreign-born population by year of immigration, as given in Table 6, the calendar year is the basis of the classification, and the date given is the year of immigration to the United States or to any of its possessions—not necessarily the year of arrival in Hawaii.

Marital condition.—The census classification with regard to marital condition covers four groups, namely, single, married, widowed, and divorced. As these terms refer only to the marital status of the population on the census date, a person who had been widowed or divorced but had remarried would be reported as married. The explanation of the much larger proportion single among males than among females is found in the great preponderance of males in the adult population, and in the fact that women as a rule marry at younger ages than men.

School attendance.—The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind

of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

Illiteracy.—The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

Dwellings and families and tenure of homes.—In census usage a "dwelling" is any building or structure in which one or more persons reside. It may house a single family, as in the case of a private house, or a number of families, as in the case of an apartment house. The term "family" as here used means a group of persons, whether related by blood or not, who live together as one household, usually sharing the same table. One person living alone is counted as a family, and, on the other hand, the occupants or inmates of a hotel or institution, however numerous, are also treated as forming a single family. Thus the census family in some cases differs greatly from the natural family. The structure or part of a structure occupied by each census family is, for census purposes, a "home," and the number of families shown in Table 20 is therefore equal to the total number of homes for which statistics as to tenure are given in that table.

Per cent black and mulatto in total population, by municipalities: 1920..... 26

INTRODUCTION.

Statistics as to the number of inhabitants of Porto Rico, by municipalities, barrios, and cities and towns, without classification as to sex, age, etc., have been published separately in a bulletin entitled "Number of Inhabitants, by Municipalities and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all topics of the population census of Porto Rico except occupations, for which statistics will be published in a separate bulletin.

This bulletin consists of 24 tables, of which 19 (Nos. 1 to 19, inclusive) give detailed figures for Porto Rico as a whole and 5 (Nos. 20 to 24, inclusive) give separate figures, in somewhat less detail, for municipalities, cities, and towns. These tables present statistics as to color or race, nativity, parentage, country of allegiance, sex, age, marital condition, school attendance, illiteracy, inability to speak English, dwellings and families, tenure of homes, state or territory of birth, country of birth, citizenship, and year of immigration.

Color or race, nativity, and parentage.—Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. All persons born in continental United States or in any of its outlying possessions are treated as natives, and all other persons as foreign born. Classification according to nativity and parentage has not, in

general, been deemed necessary for the nonwhite races, since nearly all blacks and mulattoes are natives of native parentage, while most Chinese, Japanese, and others—whose numbers are so small as to be insignificant in any event—are foreign born. In Table 2, however, separate figures as to nativity, and in Table 3 separate figures as to nativity and parentage, are given for each of the several races.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States or in any of its outlying possessions; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

Urban and rural.—Pursuant to the plan of presentation of the statistics for the states, figures are given separately for the urban and rural population in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities, towns, and villages having 2,500 inhabitants or more, the remainder being classified as rural.

Country of birth of the foreign born.—The presentation of statistics on country of birth of the foreign-born white population for 1920 is made on the basis of the postwar map. Because of the many political

POPULATION—PORTO RICO.

changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Year of immigration.—In the distribution of the foreign-born population by year of immigration, as given in Table 6, the calendar year is the basis of the classification, and the date given is the year of immigration to the United States or to any of its possessions, not necessarily the year of arrival in Porto Rico.

School attendance.—The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

Illiteracy.—The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

Marital condition.—The census classification with respect to marital condition covers five groups, namely, single, married, consensually married (that is, living together as husband and wife by mutual consent), widowed, and divorced. As these terms refer only to the marital status of the population on

the census date, a person who had been widowed or divorced but had remarried would be reported as married. The explanation of the larger proportion single among males than among females and of the much larger proportion widowed among females than among males is found in the fact that women as a rule marry at younger ages than men. Thus, as shown by Table 13, the proportion single is much greater for males than for females in the younger age groups, while for those in middle life and old age the proportion single is, as a rule, smaller for men than for women. On the other hand, the proportion widowed in nearly every age group is much greater for women than for men. This is due to the fact that, since as a rule husbands are older than their wives, the marriage relation is more frequently broken by the death of the husband than by the death of the wife. Moreover, women as a rule live to somewhat greater age than men. The difference between the number of married men and of married women may be due in part to the incorrect return of a few single, widowed, or divorced women as married, but an explanation is also to be found in the practical certainty that in some cases a married woman was living in Porto Rico at the time of the census, while her husband was living elsewhere.

¹ Ratio not shown where number of females is less than 100.

² Less than one-tenth of 1 per cent.

³ Comprises 1 Filipino and 1 Hindu.

COMPOSITION AND CHARACTERISTICS.

3

Country of allegiance.—Under the act of March 2, 1917, all persons born in Porto Rico are treated as citizens of the United States unless they (or their parents in case of minors) have declared their intention to retain Porto Rican citizenship, Spanish citizenship, or citizenship of other countries.

Dwellings and families and tenure of homes.—In census usage a "dwelling" is any building or structure in which one or more persons reside. It may house a single family, as in the case of a private house, or a number of families, as in the case of an apartment house. The term "family" as here used means a group of persons, whether related by blood or not,

who live together as one household, usually sharing the same table. One person living alone is counted as a family, and, on the other hand, the occupants or inmates of a hotel or institution, however numerous, are also treated as forming a single family. Thus the census family in some cases differs greatly from the natural family. The structure or part of a structure occupied by each census family is, for census purposes, a "home," and the number of families shown in Tables 19 and 24 is therefore equal to the total number of homes for which statistics as to tenure are given in those tables.
