<sup>1</sup> The total number of places in certain classes for the United States as a whole is less than the sum of the numbers shown for the individual states or divisions, for the reason that each of three cities lies in two adjoining states and one in two divisions. Each of these cities is counted in each state and each division. For full explanation, see note 1, Table 31, p. 50, Vol. I, Fourteenth Census Reports.

## TO SIZE OF CITIES, 1920, WITH PER CENT OF INCREASE, 1910-1920.

For example, the combined population of the 68 cities which had 100,000 inhabitants or more in 1920 1910 only 50 of these cities had 100,000 inhabitants or more.]

TABLE 66.—ELEMENTS OF POPULATION ESTIMATED BY DIFFERENT METHODS:  
1900 AND 1920.

ELEMENT.	WHITE POPULATION: 1900			
	FIRST COMPUTATION:  Elimination of foreign stock from native element.	SECOND COMPUTATION:  Growth of native stock estimated on basis of rate of increase for Southern states.	THIRD COMPUTATION:  Growth of native stock measured by proportion of persons in Massachusetts having native grandfathers.	Average.
Total white.....	66,809,196	66,809,196	66,809,196	66,809,196
Native element <sup>1</sup> .....	43,495,762	43,495,762	43,495,762	43,495,762
Native stock.....	37,290,000	35,620,000	33,730,000	35,549,000
Foreign stock.....	6,210,000	7,880,000	9,770,000	7,940,000
Foreign element <sup>2</sup> .....	21,313,434	23,313,434	23,313,434	23,313,434
Total foreign stock <sup>3</sup> .....	29,520,000	31,160,000	33,080,000	31,240,000

  

ELEMENT.	WHITE POPULATION: 1920			
	FIRST COMPUTATION:  Elimination of foreign stock from native element.	SECOND COMPUTATION:  Growth of native stock estimated on basis of rate of increase for Southern States.	Average.	
Total white.....		94,820,915	94,820,915	94,820,915
Native element <sup>2</sup> .....		61,960,586	61,960,586	61,960,586
Native stock.....		47,330,000	46,250,000	46,790,000
Foreign stock.....		14,630,000	15,710,000	15,170,000
Foreign element <sup>3</sup> .....		32,860,329	32,860,329	32,860,329
Total foreign stock <sup>4</sup> .....		47,490,000	48,570,000	48,030,000

<sup>1</sup> In making the estimate by this method it was assumed that the rate of natural increase of the native white stock prior to 1870 was the same for the country as a whole as for the Southern States, and that subsequently to 1870 the rate for the remainder of the country was equal to one-half that for the Southern States.

<sup>2</sup> All whites of native parentage plus one-half of all whites of mixed parentage.

<sup>3</sup> All whites of foreign parentage plus one-half of all whites of mixed parentage.

<sup>4</sup> Foreign element plus foreign stock in native element.
