[1] Figures for both 1919 and 1909 include estimates for farms reporting chickens on hand on the census date but no eggs produced during the preceding calendar year. The returns for 1909 included all eggs produced. To obtain figures for chicken eggs alone in 1909, the quantity and value of eggs of other kinds have been estimated and deducted.

[1] Figures for both 1919 and 1909 include estimates for farms reporting chickens on hand on the census date but no chickens raised during the preceding calendar year. The returns for 1909 included all kinds of fowls raised. To obtain figures for chickens alone in 1909, the number and value of other fowls raised have been estimated and deducted.

[1] The value of domestic animals sold or slaughtered was not called for by the 1920 farm schedule. The estimate of the 1919 value was based on the ratio between the animals sold or slaughtered in 1909 and those on hand in 1910, and the changes in the number and average value of comparable classes of animals from 1910 to 1920.
