

# CONTENTS—MISSISSIPPI.

SUMMARY FOR THE UNITED STATES, BY DIVISIONS AND STATES—POPULATION, AGRICULTURE, MANUFACTURES, MINING.....	Page. 2
CENTERS OF POPULATION, 1790-1920, AND CENTERS OF FARMS, AGRICULTURAL PRODUCTS, AND MANUFACTURES, 1850-1920.....	6

## POPULATION.

NUMBER AND DISTRIBUTION OF INHABITANTS.	
SUMMARY TABLES:	Page.
Population of Mississippi: 1790 to 1920.....	7
Population of principal cities from earliest census to 1920.....	8
Urban and rural population: 1920, 1910, and 1900.....	8
DETAILED TABLES:	
1. Area and population of counties: 1850 to 1920.....	11
2. Population of counties by minor civil divisions: 1920, 1910, and 1900.....	11
3. Population of incorporated places: 1920, 1910, and 1900.....	17
4. Population of wards of cities having 5,000 inhabitants or more: 1920.....	19
5. Urban and rural population of counties: 1920, 1910, and 1900.....	19
MAPS:	
Increase or decrease of population, by counties: 1910 to 1920.....	9
Density of population, by counties: 1920.....	10
COMPOSITION AND CHARACTERISTICS OF THE POPULATION.	
SUMMARY TABLES:	
1. Color or race, nativity, parentage, and sex, for the state and urban and rural population: 1920, 1910, and 1900.....	22
2. School attendance, for the state and urban and rural population: 1920 and 1910.....	22
3. Age, for the state and urban and rural population: 1920 and 1910.....	23
4. Illiteracy, for the state and urban and rural population: 1920 and 1910.....	24
5. Population 21 years of age and over, by sex, class of population, and citizenship, for the state: 1920 and 1910.....	25
6. Country of birth of foreign-born white, for the state: 1920.....	25
7. Indians, Chinese, and Japanese: 1920, 1910, and 1900.....	25
8. Age, for cities of 10,000 or more: 1920.....	26
DETAILED TABLES:	
9. Composition and characteristics of the population, for counties: 1920.....	27
10. Composition and characteristics of the population, for cities of 10,000 or more: 1920.....	35
11. Composition and characteristics of the population, for places of 2,500 to 10,000: 1920.....	36
12. Country of birth of the foreign-born white, for counties and for cities of 10,000 or more: 1920.....	37
13. Age, by quinquennial periods, with single years for persons under 25, for the state: 1920.....	39
14. Marital condition of the population 15 years of age and over, for the state: 1920, 1910, and 1900.....	40
15. Total, white, and Negro population, with state of birth for natives, for the state: 1920.....	41
16. Country of birth of the foreign-born population, with citizenship of the foreign-born white, for the state: 1920.....	41
17. Year of immigration of the foreign-born population, for the state: 1920.....	41
18. Foreign-born white population unable to speak English: 1920.....	41
19. School attendance, by age periods, for the state: 1920.....	42
20. School attendance, by single years from 5 to 20, for the state: 1920.....	42
21. Illiteracy of the population 10 years of age and over, by age periods, for the state: 1920.....	42
22. Country of origin and mother tongue of the foreign white stock, for the state: 1920.....	43
23. Ownership of homes, for counties and places having 10,000 inhabitants or more: 1920.....	43
24. Total males and females 10 years of age and over engaged in each selected occupation, classified by color or race, nativity, and parentage, and age periods, for the state: 1920.....	44
25. Women 15 years of age and over in each principal class of the population engaged in gainful occupations, classified by marital condition, with a distribution of the married by age periods, for the state: 1920.....	47
MAP: Per cent of Negroes in total population, by counties: 1920.....	38
AGRICULTURE.	
FARMS AND FARM PROPERTY.....	49
Map showing counties, principal cities, and rivers.....	50
Explanation of terms.....	51
Number of farms, acreage, and value.....	51
Farms by size.....	52
Farms by tenure.....	52
Farms by sex, race, and nativity of farmer.....	53
Farm mortgages.....	54
Farm expenditures for labor, fertilizer, and feed.....	54
LIVE STOCK ON FARMS AND ELSEWHERE.....	54
LIVE-STOCK PRODUCTS.....	56
CROPS.....	57
MISCELLANEOUS ITEMS (from second series of tabulations):	
Age of farmers.....	60
Farmers classified by number of years on farm.....	60
Cooperative marketing and purchasing.....	60

## AGRICULTURE—Continued.

MISCELLANEOUS ITEMS—Continued.	
Farm facilities—Motor vehicles, telephones, water, and light on farms.....	60
Pure-bred live stock on farms.....	60
Calves, pigs, and lambs raised on farms.....	61
Domestic animals sold or slaughtered on farms.....	61
Sales of selected crops.....	61
Fruit products of farms.....	61
Forest products of farms.....	61
Nurseries and greenhouses.....	61
COUNTY TABLES:	
I.—Farms and farm property, 1920, with selected items for 1910 and 1900.....	62
II.—Live stock on farms and ranges, 1920; live-stock products, 1919.....	70
III.—Domestic animals not on farms or ranges: 1920.....	70
IV.—Value of all crops, and acreage and production of principal crops: 1919.....	78
V.—Mortgage debt, 1920; expenditures for labor, fertilizer, and feed, 1919.....	86
DRAINAGE.	
INTRODUCTION.....	89
MAP SHOWING APPROXIMATE LOCATION AND AREA OF OPERATING DRAINAGE ENTERPRISES.....	90
DRAINAGE ON FARMS.....	91
Explanation of terms.....	91
Farms and farm land.....	91
DRAINAGE ENTERPRISES.....	91
Explanation of terms.....	91
Operating and nonoperating enterprises.....	92
Location of enterprises.....	92
Condition of land in enterprises.....	92
Size of enterprises.....	92
Character of enterprises.....	93
Drainage works.....	94
Maintenance of works.....	95
Date of organization.....	95
Crops.....	96
COUNTY TABLES:	
I.—Drainage on farms: 1920.....	96
II.—Operating drainage enterprises: 1920.....	98
MANUFACTURES.	
EXPLANATION OF TERMS.....	103
GENERAL STATISTICS:	
General character of the state.....	105
Comparative summary.....	106
Statistics for the state, by counties.....	107
Principal industries, ranked by value of products.....	108
Persons engaged in manufacturing industries.....	108
Average number of wage earners for selected industries, with per cent, by sex and age.....	109
Average number of wage earners, by sex and age, and value of products, for cities of 10,000 inhabitants or more.....	109
Wage earners, by months.....	109
Wage earners, by months, for selected industries and for cities.....	110
Average number of wage earners, by prevailing hours of labor per week, for selected industries and for cities.....	111
Size of establishments, by average number of wage earners, for selected industries and for cities.....	112
Size of establishments, by value of products.....	112
Size of establishments, by value of products, for selected industries.....	113
Size of establishments, by value of products, for cities of 10,000 inhabitants or more.....	114
Character of ownership, for selected industries and for cities.....	114
Manufactures, by population groups, in cities of 10,000 inhabitants or more.....	115
Number and horsepower of types of prime movers.....	116
Fuel consumed.....	116
SPECIAL STATISTICS:	
Lumber and timber products.....	116
Oil and cake, cottonseed.....	117
Cotton goods.....	117
Turpentine and rosin.....	117
Fertilizers.....	117
Printing and publishing.....	118
Laundries.....	118
Dyeing and cleaning.....	118
Custom sawmills and gristmills.....	118
GENERAL TABLES:	
Table 28.—Comparative summary for selected industries and for cities: 1919, 1914, and 1909.....	119
Table 29.—Detailed statement of all industries combined and specified industries: 1919.....	120

## SUMMARY FOR THE UNITED STATES, BY GEOGRAPHIC DIVISIONS AND STATES,

POPULATION, JAN. 1, 1920.														
DIVISION AND STATE.	POPULATION, BY SEX.			NATIVE WHITE POPULATION.		FOREIGN-BORN WHITE POPULATION.		NEGRO POPULATION.		POPULATION 7 TO 20 YEARS OF AGE.		POPULATION 10 YEARS OF AGE AND OVER.		
	Total. <sup>1</sup>	Male.	Female.	Native parentage.	Foreign or mixed parentage.	Number.	Per cent of total.	Number.	Per cent of total.	Total.	Attending school.	Total.	Illiterate.	
													Num-ber.	Per cent.

<sup>1</sup> The number of whites and Negroes is less than total population, because of the inclusion in the total of other nonwhites (Indians, Chinese, Japanese, and "all other").  
<sup>2</sup> Continental United States only. The total population of the United States, including outlying possessions, is 117,823,165, as follows: Continental United States, 105,710,620; Alaska, 55,036; Hawaii, 255,912; Porto Rico, 1,299,809; American Samoa, 8,056; Guam, 13,275; Panama Canal Zone, 22,558; Philippine Islands, 10,814,310 (Dec. 31, 1918); Virgin Islands, 26,051 (Nov. 1, 1917);

## FOR POPULATION, AGRICULTURE, MANUFACTURES, AND MINES AND QUARRIES.

[Table continued on following page.]

POPULATION, JAN. 1, 1920.										AGRICULTURE.									
POPULATION 21 YEARS OF AGE AND OVER.										LAND IN FARMS, 1920									
All classes.			Native white.	Foreign-born white.			Negro.			Farm population, 1920	Number of farms, 1920	Per cent operated by tenants.	LAND IN FARMS, 1920				Per cent improved.		
Total.	Illiterate.			Total.	Naturalized.	Per cent illiterate.	Total.	Per cent illiterate.	Total (acres).				Average per farm.	Improved (acres).					
	Number.	Per cent.

<sup>1</sup> The gross value of farm products, obtained by adding the value of crops, live-stock products, etc., contains a considerable amount of duplication, on account of crops fed to live-stock. It is roughly analogous to the value of products in manufactures, with its duplication on account of the use of the products of one establishment as materials in another.

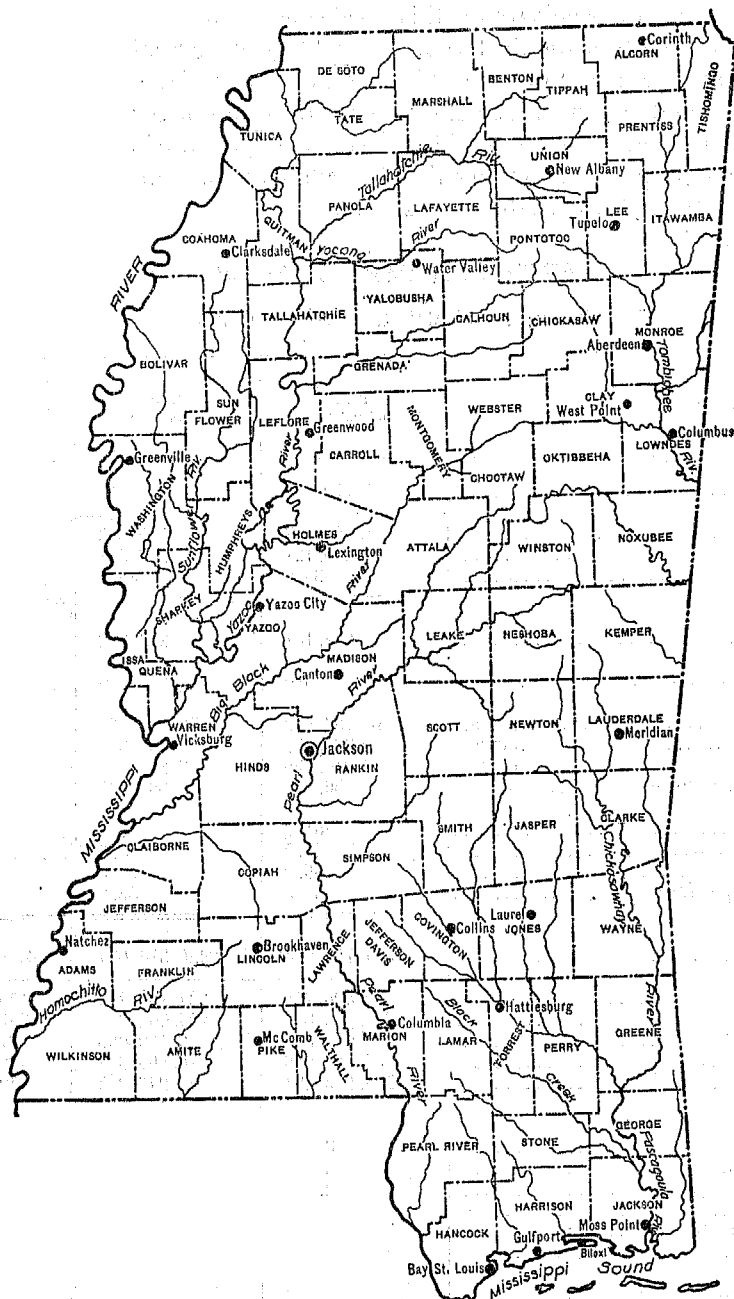

<sup>2</sup> These include dairy products, wool and mohair, eggs and chickens, and honey and wax.

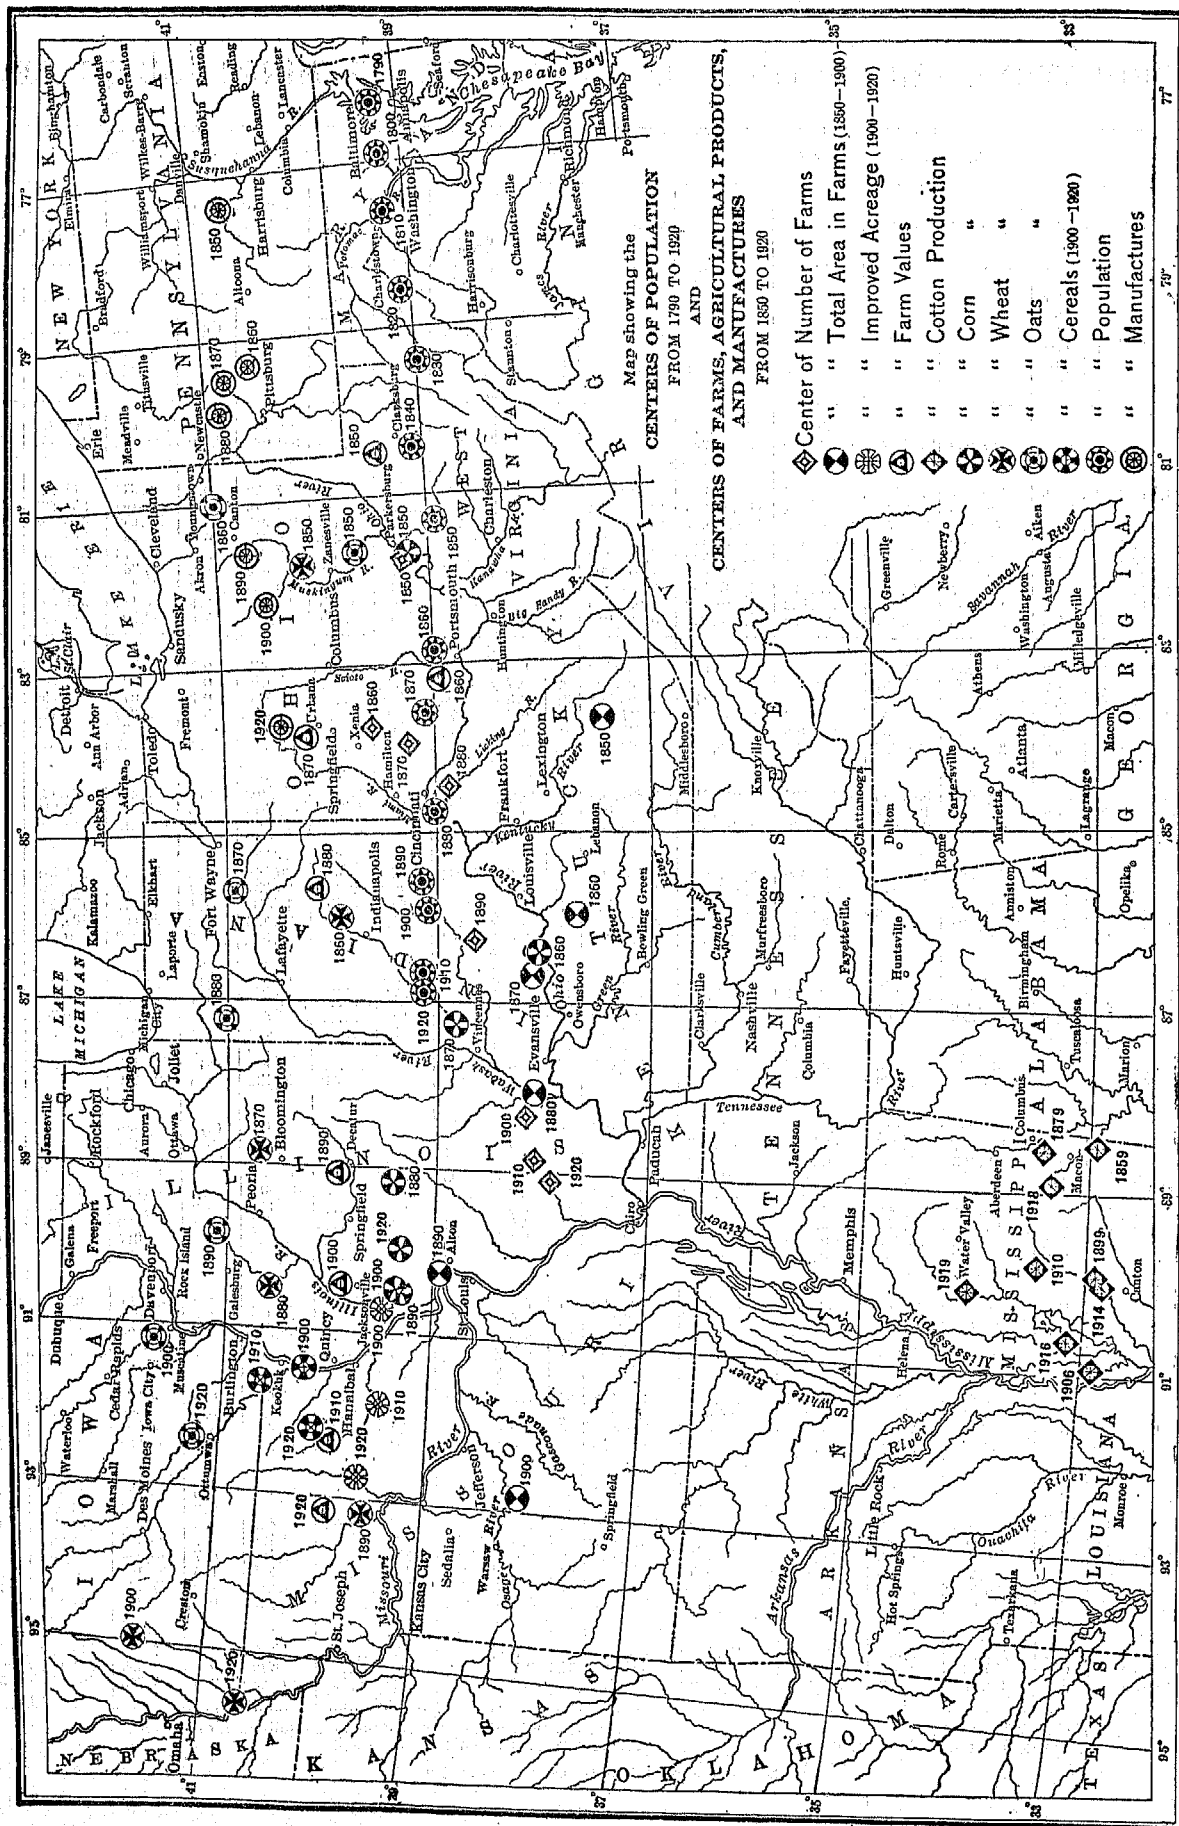

<sup>3</sup> Estimated value of domestic animals sold by farmers and animals slaughtered on the farms, whether for sale or for home consumption.

<sup>4</sup> These include forest products of farms valued (for the United States) at \$394,321,828, nursery products valued at \$20,434,389, and greenhouse products valued at \$77,380,230.

### COUNTIES, PRINCIPAL CITIES, AND RIVERS.

NOTE.—The centers for manufactures and for all crops except cotton are based on data for the year preceding the census year indicated on the map; for the centers of cotton production the exact dates are shown on the map.

# MISSISSIPPI.

## NUMBER AND DISTRIBUTION OF INHABITANTS.

**Population of the state.**—According to the Fourteenth Census, taken as of January 1, 1920, the population of Mississippi is 1,790,618, which represents a decrease of 6,496, or four-tenths of 1 per cent, since 1910. During the same period the population of the

United States increased by 14.9 per cent. The following summary shows the population of Mississippi from 1800 to 1920, inclusive, with the increase for each decade, in comparison with the per cent of increase for the United States as a whole:

POPULATION OF MISSISSIPPI: 1800 TO 1920.

[A minus sign (—) denotes decrease.]

CENSUS YEAR.	Population.	INCREASE OVER PRECEDING CENSUS.		Per cent of increase for the United States.
		Number.	Per cent.

<sup>1</sup> Population shown for 1810 includes 9,046 returned for portion taken to form Alabama territory in 1817.

<sup>2</sup> Population shown for 1800 includes 1,250 returned for area now in Alabama.

**Counties.**—Mississippi has 82 counties, of which 3—Humphreys, Stone, and Walthall—have been organized since 1910. Of the 79 counties in existence in 1910, 30 show increases and 49 decreases since that year. Five of the decreases, however, appear for counties whose area has been reduced since 1910. (See Table 1.) Because of the organization of the

three counties named from parts of eight others it has been necessary, in preparing the accompanying maps showing rates of increase or decrease in total and rural population, to make the following combinations: Holmes, Humphreys, Sharkey, Sunflower, Washington, and Yazoo Counties; Harrison and Stone Counties; Marion, Pike, and Walthall Counties.

**HISTORICAL NOTE.**—Mississippi takes its name from the river which borders it on the west. The word is of Indian origin and signifies "great river" or "father of waters."

The earliest recorded exploration within the region now constituting Mississippi was made in 1540-41 by the Spaniard, De Soto, who traversed the northeastern part on his way from Florida to the Mississippi River. In 1673 the French missionaries, Marquette and Joliet, sailed down the Mississippi to the Arkansas, and in 1682 La Salle descended the Mississippi to its mouth. The first settlement within the present limits of the state was made by the French in 1699, at Old Biloxi, across the bay from the present site of Biloxi. This site was abandoned about 1702, and some 10 years later the first permanent settlement was made at Biloxi. The French claims to the Mississippi region were formally made by La Salle, who, on completing his voyage down the river, named the whole Mississippi Valley "Louisiana" in honor of Louis XIV. England also claimed this region by virtue of discoveries along the Atlantic coast, and the territory now comprising Mississippi was included wholly or in part in the Carolina charters of 1663 and 1665 and in the Georgia charter of 1732.

In 1763 all of the French possessions east of the Mississippi, except the isle of Orleans, were ceded to Great Britain. At the same time Great Britain acquired the Spanish province of Florida, and soon afterward divided it into east and west

Florida, extending the latter westward to the Mississippi and northward to the latitude of the mouth of the Yazoo. At the close of the Revolution the former British possessions east of the Mississippi and north of the thirty-first parallel were ceded to the United States, and at the same time the Floridas were transferred to Spain. The title to the area which had been added to west Florida by Great Britain was, however, in dispute between the United States and Spain until 1795, when the latter country relinquished its claims. Three years later this area, which had been claimed by Georgia, was organized as the territory of Mississippi.

In 1804 Mississippi territory was extended northward to the southern boundary of Tennessee, thus including lands ceded to the Federal Government by South Carolina and Georgia. The tract south of the thirty-first parallel and between the Perdido River on the east and the Mississippi River on the west, was in dispute between the United States and Spain after the Louisiana Purchase in 1803. During the War of 1812 that portion of this area lying between the Perdido and Pearl Rivers was taken from Spain by the United States and added to Mississippi territory. Spain did not, however, formally relinquish its claim until the Florida cession of 1819.

In March, 1817, the territory of Alabama was organized from a part of Mississippi territory, leaving the latter with substantially its present boundaries, and in December of the same year Mississippi became the twentieth state of the Union.

**Density of population.**—The total land area of the state is 46,362 square miles. The average number of inhabitants to the square mile in 1920 is 38.6 (see Table 1), as against 38.8 in 1910 and 33.5 in 1900.

**Minor civil divisions.**—The political units into which the counties are divided are collectively termed "minor civil divisions." The primary divisions of the Mississippi counties are termed beats and are 410 in number. The secondary divisions, of which there are 333, comprise 43 cities, 175 towns, and 115 villages. One city is coextensive with the beat in which

located, and each of 5 cities, 10 towns, and 2 villages comprises 2 or more beats or parts of beats. (See Table 2.)

**Cities.**—Mississippi has 43 cities, of which Meridian, with a population of 23,399, is the largest. (See Tables 3 and 4.)

The following summary shows, for each city having 10,000 or more inhabitants in 1920, the population at each census for which figures are available, together with the number and per cent of increase during the preceding decade:

POPULATION OF PRINCIPAL CITIES FROM EARLIEST CENSUS TO 1920.

¹ Returns incomplete; slave population not reported.

² Not returned separately.

**Urban and rural population.**—The Census Bureau defines urban population as that residing in cities and other incorporated places having 2,500 inhabitants or more, and rural population as that residing outside such incorporated places.

The following summary presents, for the last three censuses, figures showing the urban and rural population of the state distributed among places grouped according to specified limits of population. The classification for each census is based upon the popula-

tion of the various places as shown by the returns of that census. Consequently the territory comprised within any one class of cities or that designated as urban or as rural does not remain fixed, because any given place may, through the growth or the decline of its population, pass from one class to another at successive censuses. The proportion of the population of Mississippi living in places of 2,500 or more increased from 7.7 per cent in 1900 to 11.5 per cent in 1910 and to 13.4 per cent in 1920.

## CHANGES IN BOUNDARIES, ETC.

**ALCORN.**—Organized from parts of Tippah and Tishomingo in 1870.  
**AMITE.**—Part taken to form part of Lincoln in 1870.  
**BENTON.**—Organized from parts of Marshall and Tippah in 1870.  
**CARROLL.**—Parts taken to form part of Grenada in 1870 and parts of Leflore and Montgomery in 1871.  
**CHICKASAW.**—Parts taken to form part of Clay in 1872 and part of Webster in 1874.  
**CHOCTAW.**—Parts taken to form part of Grenada in 1870, part of Montgomery in 1871, and part of Webster in 1874; part of Winston annexed in 1874.  
**CLAY.**—Name changed from Colfax in 1876. Organized from parts of Chickasaw, Lowndes, Monroe, and Oktibbeha in 1872.  
**COAHOMA.**—Part taken to form part of Quitman in 1877.  
**COPIAH.**—Part taken to form part of Lincoln in 1870.  
**COVINGTON.**—Part taken to form part of Jefferson Davis in 1906.  
**DE SOTO.**—Part taken to form part of Tate in 1873.  
**FORREST.**—Organized from part of Perry in 1908.  
**FRANKLIN.**—Part taken to form part of Lincoln in 1870.  
**GEORGE.**—Organized from parts of Greene and Jackson in 1910, but prior to Thirteenth Census date (Apr. 15).  
**GREENE.**—Part taken to form part of George in 1910, but prior to Thirteenth Census date (Apr. 15).  
**GRENADA.**—Organized from parts of Carroll, Choctaw, Tallahatchie, and Yalobusha in 1870.  
**HANCOCK.**—Part taken to form part of Pearl River in 1890 and part annexed to Pearl River in 1908.  
**HARRISON.**—Part taken to form Stone in 1916.  
**HOLMES.**—Part taken to form part of Humphreys in 1918.

**HUMPHREYS.**—Organized from parts of Holmes, Sharkey, Sunflower, Washington, and Yazoo in 1918.  
**ISSAQUENA.**—Part taken to form part of Sharkey in 1876.  
**ITAWAMBA.**—Part taken to form part of Lee in 1866.  
**JACKSON.**—Part taken to form part of George in 1910, but prior to Thirteenth Census date (Apr. 15).  
**JEFFERSON DAVIS.**—Organized from parts of Covington and Lawrence in 1906.  
**LAMAR.**—Organized from parts of Marion and Pearl River in 1904.  
**LAWRENCE.**—Parts taken to form part of Lincoln in 1870 and part of Jefferson Davis in 1906.  
**LEE.**—Organized from parts of Itawamba and Pontotoc in 1866; part annexed to Union in 1874.  
**LEFLORE.**—Organized from parts of Carroll and Sunflower in 1871.  
**LINCOLN.**—Organized from parts of Amite, Copiah, Franklin, Lawrence, and Pike in 1870.  
**LOWNDES.**—Part taken to form part of Clay in 1872.  
**MARION.**—Parts taken to form part of Pearl River in 1890, part of Lamar in 1904, and part of Walthall in 1914.  
**MARSHALL.**—Parts taken to form part of Benton in 1870 and part of Tate in 1873.  
**MONROE.**—Part taken to form part of Clay in 1872.  
**MONTGOMERY.**—Organized from parts of Carroll and Choctaw in 1871; part taken to form part of Webster in 1874.  
**OKTIBBEHA.**—Parts taken to form part of Clay in 1872 and part of Webster in 1874.  
**PANOLA.**—Part taken to form part of Quitman in 1877.  
**PEARL RIVER.**—Organized from parts of Hancock and Marion in 1890; part taken to form part of Lamar in 1904; part of Hancock annexed in 1908.

\* Less than one-tenth of 1 per cent.

## POPULATION—MISSISSIPPI.

TABLE 1.—AREA AND POPULATION OF COUNTIES: 1850 TO 1920—Continued.

## CHANGES IN BOUNDARIES, ETC.

PERRY.—Part taken to form Forrest in 1908.  
 PIKE.—Parts taken to form part of Lincoln in 1870 and part of Walthall in 1914.  
 PONTOTOC.—Parts taken to form part of Lee in 1866 and part of Union in 1870.  
 PRENTISS.—Organized from part of Tishomingo in 1870.  
 QUITMAN.—Organized from parts of Coahoma, Panola, Tallahatchie, and Tunica in 1877.  
 SHARKEY.—Organized from parts of Issaquena, Warren, and Washington in 1876; part taken to form part of Humphreys in 1918.  
 STONE.—Organized from part of Harrison in 1916.  
 SUNFLOWER.—Parts taken to form part of Leflore in 1871 and part of Humphreys in 1918.  
 TALLAHATCHIE.—Parts taken to form part of Grenada in 1870 and part of Quitman in 1877.  
 TATE.—Organized from parts of De Soto, Marshall, and Tunica in 1873.

TIPPAH.—Parts taken to form parts of Alcorn, Benton, and Union in 1870.  
 TISHOMINGO.—Parts taken to form parts of Alcorn and Prentiss in 1870.  
 TUNICA.—Parts taken to form part of Tate in 1873 and part of Quitman in 1877.  
 UNION.—Organized from parts of Pontotoc and Tippah in 1870 and part of Lee annexed in 1874.  
 WALTHALL.—Organized from parts of Pike and Marion in 1914.  
 WARREN.—Part taken to form part of Sharkey in 1876.  
 WASHINGTON.—Parts taken to form part of Sharkey in 1876, and part of Humphreys in 1918.  
 WEBSTER.—Name changed from Sumner in 1882. Organized from parts of Chickasaw, Choctaw, Montgomery, and Oktibbeha in 1874.  
 WINSTON.—Part annexed to Choctaw in 1874.  
 YALOBUSHA.—Part taken to form part of Grenada in 1870.  
 YAZOO.—Part taken to form part of Humphreys in 1918.

TABLE 2.—POPULATION OF COUNTIES BY MINOR CIVIL DIVISIONS: 1920, 1910, AND 1900.

[Counties showing no totals for 1910 or 1900 have been organized at some time between the censuses; counties showing totals but no comparative figures for beats for 1910 or 1900 have been redistricted at some time between the censuses. For other changes in boundaries, etc., between 1910 and 1920, see footnotes; for those between 1900 and 1910, see Reports of the Thirteenth Census: 1910, Vol. II, Table 1, p. 1023. For population of incorporated places, see Table 3.]

<sup>1</sup> Comprises all counties in which there were no incorporated places having 2,500 inhabitants or more in 1920. These counties are Amite, Attala, Benton, Bolivar, Calhoun, Carroll, Choctaw, Claiborne, Clarke, Copiah, Covington, De Soto, Franklin, George, Greene, Holmes, Humphreys, Issaquena, Itawamba, Jasper, Jefferson, Jefferson Davis, Kemper, Lafayette, Lamar, Lawrence, Leake, Marshall, Neshoba, Newton, Noxubee, Panola, Pearl River, Perry, Pontotoc, Prentiss, Quitman, Rankin, Scott, Sharkey, Simpson, Smith, Stone, Sunflower, Tate, Tippah, Tishomingo, Tunica, Walthall, Wayne, Webster, Wilkinson, and Winston.

## COMPOSITION AND CHARACTERISTICS OF THE POPULATION.

This section gives detailed statistics as to the composition and characteristics of the population on January 1, 1920. It contains detailed tables which present statistics of color or race, nativity, parentage, sex, age, school attendance, citizenship, illiteracy, dwellings and families, and country of birth, for the state, and for its counties and cities. There are, besides, eight summary tables which reproduce from the detailed tables the more important state and city totals, and, also, tables which cover the following subjects, not included in the second series of state bulletins: Marital condition, state of birth, year of immigration, inability to speak English, country of origin, mother tongue, and ownership of homes. The full presentation of all these subjects is contained in Volume II of the Fourteenth Census Reports.

The principal occupations, as reported for persons 10 years of age and over, are given by sex, color or race, nativity, parentage, and age periods, followed by a summary, by marital condition and age groups, of women gainfully occupied.

Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race, and for the white population according to nativity and parentage. Classification according to nativity and parentage has not been deemed necessary for the other races, since nearly all Negroes and Indians are natives of native parentage, while nearly all Chinese and Japanese are either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

The presentation of statistics on country of birth of the foreign-born white population is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented here.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of their population, the two classes

are shown separately in connection with several of the subjects. Urban population, as defined by the Census Bureau, is that residing in cities and other incorporated places having 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

The statistics of marital condition relate only to persons 15 years of age and over, as the number of persons under 15 who are married, widowed, or divorced is naturally insignificant. The terms refer only to the marital status of the population on the census date.

The returns as to state of birth are valuable mainly for the light they throw on the migration of the native population within the United States; they show, for each state, the population residing there on January 1, 1920, distributed as born in the state or elsewhere.

Since the foreign-born population consists mainly of foreign-born whites, the statistics for citizenship relate to this class only. The classification embraces four groups, namely, persons reported as naturalized, persons reported as having taken out first papers, persons reported as aliens, and persons for whom citizenship was not reported.

The inquiry as to year of immigration supplies a means for determining what proportion of the immigrants who arrived during a given year or period of years were still alive and residing in this country on the census date.

The foreign white stock comprises the total of three classes, the foreign-born whites, the native whites of foreign parentage (both parents born abroad), and the native whites of mixed parentage (one parent native and the other foreign born). The term "country of origin," as used in this report, signifies the country of birth of the father of a foreign-born person or the foreign-born parent or parents of a native. The term "mother tongue" means the language of customary speech in the homes of immigrants before immigration.

# AGRICULTURE—MISSISSIPPI.

## INTRODUCTION.

In the following pages are presented all of the published results of the 1920 census of agriculture for this state and its counties, except certain detailed tabulations for the state which appear in Volume V of the Fourteenth Census Reports and a few minor items which have been published in special bulletins. The statistics of farms and farm property, including live stock, relate to January 1, 1920; those of live-stock

products, crops, and farm expenditures are for the calendar year 1919. In order to show the present tendency in agriculture, comparative figures for the census of 1910 are given throughout; and to show the general trend of the agricultural industry over a considerable period of time, all general farm information available is presented for the different censuses since 1850.

## FARMS AND FARM PROPERTY.

TABLE 1.—SUMMARY: 1920 AND 1910.

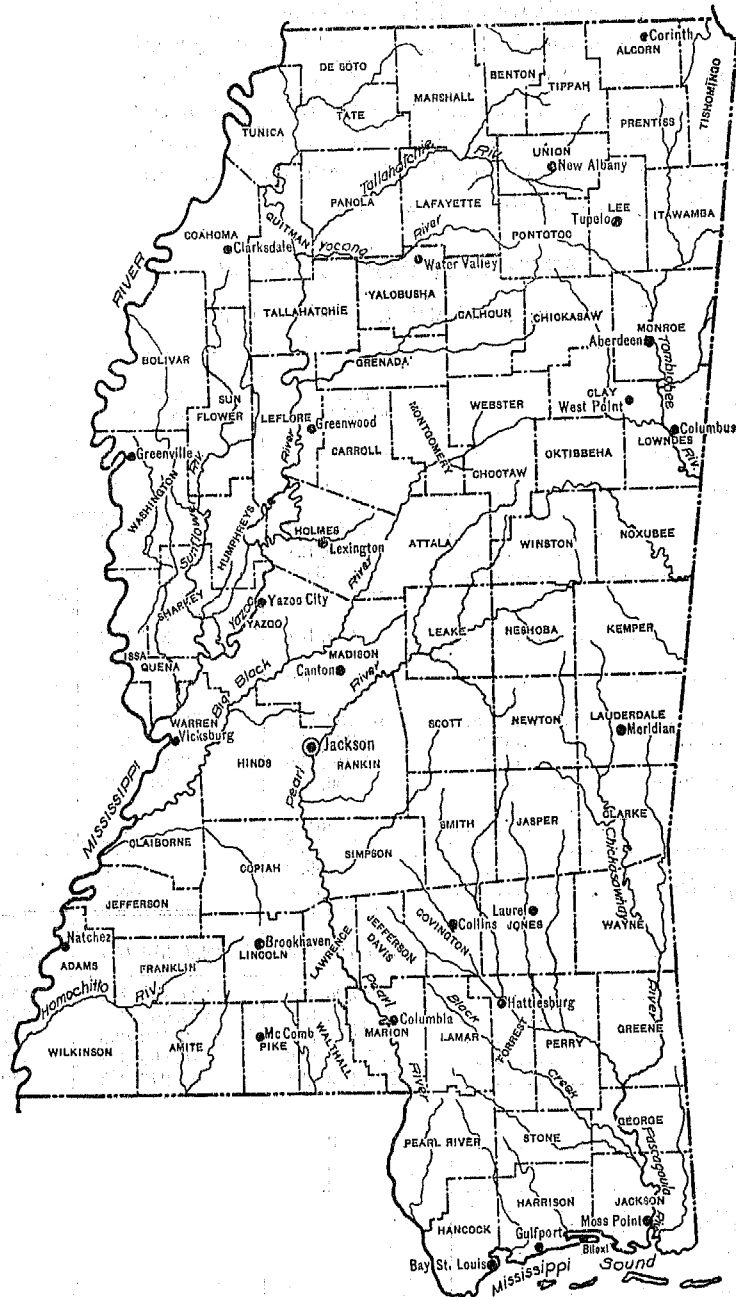

ITEM.	1920 (January 1)	1910 (April 15)	INCREASE. <sup>1</sup>	
			Amount.	Per cent.
Population, total.....	1, 790, 618	1, 797, 114	—6, 496	—0. 4
Rural <sup>2</sup> .....	1, 550, 497	1, 589, 803	—39, 306	—2. 5
Urban.....	240, 121	207, 311	32, 810	15. 8
Per cent rural.....	86. 6	88. 5		
Number of farms.....	272, 101	274, 382	—2, 281	—0. 8
Approximate land area of the state..... acres..	29, 671, 680	29, 671, 680		
All land in farms..... acres..	18, 196, 979	18, 557, 533	—360, 554	—1. 9

<sup>1</sup> A minus sign (—) denotes decrease.

<sup>2</sup> Population residing outside of incorporated places having 2,500 inhabitants or over. The rate of increase (or decrease) in the rural population between the two censuses is affected somewhat by the fact that certain places classified as rural in 1910 had become urban by 1920. The population in 1910 of the territory classified as rural in 1920 was 1,584,367. For this territory, the population shows a decrease between 1910 and 1920 amounting to 2.1 per cent, which percentage indicates the rate of decline in the rural population, leaving out of consideration the changes in classification of territory.

# MISSISSIPPI

COUNTIES, PRINCIPAL CITIES, AND RIVERS.

EXPLANATION OF TERMS.

To assist in securing comparability for its statistics of agriculture, the Bureau of the Census provided the enumerators with certain definitions and instructions, the more important of which were essentially as given below.

**Farm.**—A "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term, referring to the work of growing crops, producing other agricultural products, and raising domestic animals, poultry, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. When a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm."

In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, and also any tract containing less than 3 acres which produced at least \$250 worth of farm products in the year 1919, or required for its agricultural operations the continuous services of at least one person.

**Farmer.**—A "farmer" or "farm operator," according to the census definition, is a person who directs the operation of a farm. Hence owners of farms who do not themselves direct the farm operations are not reported as "farmers." Farmers are divided by the Bureau of the Census into three general classes according to the character of their tenure, namely, owners, managers, and tenants.

**Farm owners** include (1) farmers operating their own land only and (2) those operating both their own land and some land hired from others. The latter are sometimes referred to in the census reports as "part owners," the term "full owners" being then used for those owning all their land.

**Managers** are farmers who are conducting farm operations for the owner for wages or a salary.

**Farm tenants** are farmers who, as tenants, renters, or croppers, operate hired land only. They were reported in 1920 in five classes: (1) Share tenants—those who pay a certain share of the products, as one-half, one-third, or one-quarter, for the use of the farm but furnish their own farm equipment and animals; (2) croppers—share tenants who do not furnish their work animals; (3) share-cash tenants—those who pay a share of the products for part of the land rented by them and cash for part; (4) cash tenants—those who pay a cash rental, as \$7 per acre of crop land or \$500 for the use of the whole farm; (5) standing renters—those who pay a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn. In some cases the character of the tenancy was not ascertained by the enumerator; such tenants are designated "unspecified."

**Farm land.**—Farm land is divided into (1) improved land, (2) woodland, and (3) other unimproved land.

**Improved land** includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

**Woodland** includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

**All other unimproved land** includes brush land, rough or stony land, swamp land, and any other land which is not improved or in forest.

The census classification of farm land as "improved land," "woodland," and "other unimproved land" is one not always easy for the farmers or enumerators to make, and the statistics, therefore, must be considered at best only a close approximation.

\* Includes farmers with country of birth not reported, as follows: For 1920, 2,891; for 1910, 75.

TABLE 17.—NUMBER OF FARMERS, CLASSIFIED BY TENURE, COLOR, AND NATIVITY: 1920 AND 1910.

TENURE.	ALL FARMERS.		NATIVE WHITE. <sup>1</sup>		FOREIGN-BORN WHITE.		COLORED.	
	1920	1910	1920	1910	1920	1910	1920	1910
Total....	272,101	274,382	110,279	108,909	603	736	161,219	164,737
Owners.....	91,310	92,066	67,759	66,828	372	412	23,179	25,025
Managers.....	959	825	779	709	18	10	192	106
Tenants.....	179,802	181,491	41,741	41,572	213	314	137,548	139,605

<sup>1</sup> Includes farmers with country of birth not reported.

## FARM MORTGAGES.

TABLE 18.—MORTGAGED FARMS: 1920 AND 1910.

[Owned farms only; includes all farms owned in whole or in part by the operator.]

CLASS.	NUMBER OF OWNED FARMS.		INCREASE. <sup>1</sup>		PER CENT OF TOTAL.	
	1920	1910	Number.	Per cent.	1920	1910
Total.....	91,310	92,066	-756	-0.8	100.0	100.0
Free from mortgage....	53,073	60,543	-7,470	-12.3	58.1	65.8
Mortgaged.....	23,990	29,693	-5,703	-19.2	26.3	32.3
Unknown.....	14,247	1,830	12,417	678.5	15.6	2.0

<sup>1</sup> A minus sign (-) denotes decrease. The comparative figures shown for farms free from mortgage and mortgaged are affected somewhat by the fact that more farms were tabulated as "unknown" in 1920 than in 1910.

TABLE 19.—MORTGAGED FARMS (OR FARM HOMES): 1890 TO 1920.

CLASS.	OWNED FARMS.		OWNED FARM HOMES.		PER CENT OF TOTAL.			
	1920	1910	1900	1890	1920	1910	1900	1890
Total.....	91,310	92,066	79,913	60,777	100.0	100.0	100.0	100.0
Free from mortgage....	53,073	60,543	55,400	50,090	58.1	65.8	69.3	82.3
Mortgaged.....	23,990	29,693	20,606	4,681	26.3	32.3	25.8	7.7
Unknown.....	14,247	1,830	3,907	.....	15.6	2.0	4.9	.....

TABLE 20.—MORTGAGE DEBT: 1920 AND 1910.

ITEM.	OWNED FARMS MORTGAGED. <sup>1</sup>		INCREASE. <sup>2</sup>	
	1920	1910	Amount.	Per cent.
Number of farms reporting amount of debt.....	21,844	22,844	-1,000	-4.4
Value of land and buildings.....	\$99,143,925	\$42,200,412	\$56,882,513	134.6
Amount of mortgage debt.....	\$30,046,272	\$13,381,306	\$16,664,966	124.5
Ratio of debt to value, per cent.....	30.3	31.7	.....	.....
Average rate of interest paid, per cent.....	6.5	.....	.....	.....
Average value per farm.....	\$4,539	\$1,850	\$2,689	145.4
Average debt per farm.....	\$1,375	\$586	\$789	134.6
Average equity per farm.....	\$3,163	\$1,264	\$1,899	150.2

<sup>1</sup> Includes only farms consisting wholly of owned land and reporting amount of debt. In considering the comparative figures it should be borne in mind that the mortgage debt may have been more completely reported at one census than at the other.<sup>2</sup> A minus sign (-) denotes decrease.

## FARM EXPENDITURES FOR LABOR, FERTILIZER, AND FEED.

TABLE 21.—FARMS REPORTING EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	NUMBER OF FARMS REPORTING.		INCREASE. <sup>1</sup>		PER CENT OF ALL FARMS.	
	1919	1909	Number.	Per cent.	1919	1909
Labor.....	43,151	65,628	-22,477	-34.2	15.9	23.9
Fertilizer.....	71,296	78,677	-7,381	-9.4	26.2	28.7
Feed.....	77,718	73,758	3,960	5.4	28.6	26.9

<sup>1</sup> A minus sign (-) denotes decrease.

TABLE 22.—AMOUNT OF EXPENDITURES FOR LABOR, FERTILIZER, AND FEED: 1919 AND 1909.

ITEM.	AMOUNT EXPENDED.		INCREASE. <sup>1</sup>

## LIVE STOCK ON FARMS AND ELSEWHERE.

(DOMESTIC ANIMALS, POULTRY, AND BEES.)

**Domestic animals: 1920 and 1910.**—The census of 1920 was taken as of January 1 and that of 1910 as of April 15. Since a great many domestic animals are born during the period between January 1 and April 15 and, on the other hand, a considerable number of older animals are slaughtered or die during the same period, the numbers of the different classes of animals for the two censuses are not fully comparable. In addition to the change in the date of enumeration, there have been certain changes in the age and sex classifications. The 1910 figures presented in the following tables are therefore restricted to those classes of domestic animals which are least affected by these changes and for which the figures are fairly comparable with the 1920 returns.

**Dairy cows: 1920 and 1910.**—In 1910 the census called for "cows and heifers kept for milk" and "cows and heifers not kept for milk." The instructions read: "Report as cows kept for milk those whose milk is used in some form for human food. Cows milked for three months during the year should be reported as *kept for milk*, although a part of the year they run with their calves."

In 1920 the census called for "dairy cattle" and "beef cattle." Dairy cattle were defined as those "kept mainly for milk production," and the following instructions were given the enumerators: "Classify all cattle as beef cattle or as dairy cattle according to the principal purpose for which they are kept." It is believed that under this rule the fully established dairy and beef breeds have been properly reported, with few errors, and that cattle of the dual-purpose breeds or of no definite breeding have been placed in one class or the other, according to the principal purpose for which they are kept.

In states where cattle are raised extensively for beef production the result of this new classification will be to reduce materially the proportion of cows classified as dairy cows, and even in states having few strictly beef cattle the 1920 classification may be expected to give a somewhat smaller proportion of dairy cows than the 1910 classification.

In Mississippi the number of "dairy cows," including heifers 1 year old and over, reported for January 1,

1920, was 530,274, as compared with 429,587 "cows kept for milk" reported for April 15, 1910. This represents an increase of 100,687, or 23.4 per cent. The number of "beef cows" reported for January 1, 1920, was 261,682, as compared with 138,930 "cows not kept for milk" reported for April 15, 1910, representing an increase of 122,752, or 88.4 per cent. The percentage of increase in the number of beef cows would have been much smaller except for the change in classification mentioned above, and the increase in the number of dairy cows somewhat larger.

Farms reporting domestic animals: 1910.—Horses were reported by 128,650 farms in Mississippi in 1910, mules by 147,852 farms, cattle by 195,338, sheep by 5,727, and swine by 193,529. In comparing these figures with the 1920 figures given in the table below, due allowance should be made for the fact that the total number of farms in Mississippi decreased from 274,382 in 1910 to 272,101 in 1920.

## LIVE-STOCK PRODUCTS.

Farm value of live-stock products: 1919 and 1909.—The Thirteenth Census schedule called for the total value as well as the total quantity of all live-stock products, whether sold or consumed on the farm. The 1909 values are therefore based directly on the reported figures. But in the Fourteenth Census schedule the question as to value in the case of dairy products, eggs, and chickens was restricted to the amounts sold. The 1919 value of butter made on farms has been computed on the basis of the average value received per pound for butter sold; the values of eggs produced and chickens raised have been computed in a similar way. The values of cheese made on farms and of honey and wax produced have been computed on the basis of average values per pound secured through the Bureau of Crop Estimates of the Department of Agriculture. The method of obtaining these average values was the same as that used for securing average values for the important crops, which is described in a later paragraph.

Dairy products.—It is difficult to secure reports of the total quantity of milk produced during a given year, especially from farmers who keep cows chiefly to supply milk and butter for family use. Since such farmers usually keep no records, they are able to make only rough estimates of the milk production and frequently underestimate the quantity of milk produced for home use. Many farmers, too, either because they are unwilling to make any estimates or for other reasons, fail to report their milk production, even though they report butter or other dairy products as well as dairy cows.

For several decades past the Bureau of the Census has made estimates for such incomplete reports, where the farmer reported "cows kept for milk" but failed to report the amount of milk produced, these estimates being based on the average production per cow as shown by the complete reports. Since farmers with first-class dairy herds and up-to-date methods are

more likely to make complete reports than those with cows of a lower grade, the estimates obtained in this way have probably been somewhat above the actual production. With the new basis of classification for dairy cows in use for 1920, however, as already noted, the estimates should be more satisfactory than heretofore, since milk will be estimated only for cows kept mainly for milk production.

In the table which follows, both the actual reported quantity of milk produced and the estimated total are given. The latter includes, in addition to the milk reported, an estimate of the amount of milk produced on farms which reported dairy cows but failed to report any milk. A certain quantity of milk, on the other hand, was reported from farms which reported no dairy cows. This is included in the total and may represent either milk produced by beef cows milked a part of the year on farms having no dairy cows or milk produced on farms which kept dairy cows sometime during the year 1919 but had none on January 1, 1920.

1909.				

## CROPS.

**Summary: 1919 and 1909.**—This section summarizes the census data relative to all of the farm crops of 1919 and 1909, including the percentage of increase for the decade in acreage, production, and value.

In comparing one year with another it should be borne in mind that the acreage of crops (or the number of fruit trees) and the number of farms reporting are on the whole a better index of the general changes or tendencies in agriculture than either the quantity or the value of the crops, since variations in quantity may be due mainly to favorable or unfavorable seasons, and variations in the value of the crops may result largely from changes in prices.

The combined acreage of crops harvested in Mississippi in 1919 for which the acreage was reported was 6,359,385, which represents 68.2 per cent of the total improved land in farms (9,325,677 acres). The total crop acreage reported for 1909 was 6,158,147, or 68.4 per cent of the improved land in farms (9,008,310 acres). Most of the remaining improved land doubtless consisted of improved pasture, land lying fallow, house and farm yards, and land occupied by orchards and vineyards, the acreage of which was not reported.

In addition to the crops regularly harvested in 1919, as shown in the tables, there were reported 27,202 acres of mature crops grazed or "hogged off" and 81,691 acres in velvet beans, the latter including the total acreage on which velvet beans were grown for any purpose, either alone or mixed with other crops.

**Farm value of crops.**—At the census of 1920 the farm schedule called for the value of all farm property, including live stock, and the value of live-stock products sold.

In the case of farm crops, however, wherever a unit value could be used, such as the value per bushel or per ton, the farmer was asked to report the acreage and production of each crop but not the value. To supplement the information obtained from the farmers, the Bureau of Crop Estimates of the United States Department of Agriculture secured by special schedule from its crop reporters average values for such crops. These special schedules were tabulated by the Bureau of the Census, and the resulting averages, approved by the Bureau of Crop Estimates as representing a fair average of the farm value per unit, were used in computing most of the crop values presented in the accompanying tables.

For some products it was not possible to find any satisfactory unit on which to base a computation of the total value. Values were therefore obtained on the 1920 census schedule for vegetables, other than potatoes and sweet potatoes, and for the farm garden.

TABLE 32.—SUMMARY FOR ALL CROPS: 1919 AND 1909.

<sup>1</sup> A minus sign (—) denotes decrease. Per cent not shown when base is less than 100 or when per cent is more than 1,000.

<sup>2</sup> Excluding 29,497 acres reported for corn cut for forage, which is practically all duplicated in the acreage shown for corn harvested as grain.

<sup>3</sup> Includes small quantities of mixed crops (1919) and of emmer and spelt and barley (1909).

<sup>4</sup> Less than one-tenth of 1 per cent.

<sup>5</sup> Includes small quantities of sorghum seed (1919 and 1909) and of velvet beans (1909). A considerable part of the acreage in soy beans, peas, and possibly some other crops is probably a duplication of other crop acreage.

<sup>6</sup> The 1909 figures include small quantities of flower and vegetable seeds (value only), timothy seed, "other grass seed," and millet seed. The entire acreage from

which the grass and clover seeds were secured is believed to be included in the acreage given elsewhere for hay and forage.

<sup>7</sup> Corn cut for forage was not reported to any extent in 1909; hence no close comparison between 1919 and 1909 can be made, either for the hay and forage totals or for the bracketed group in which corn cut for forage appears.

<sup>8</sup> Includes millet and Hungarian grass.

<sup>9</sup> The 1919 figures represent vegetables raised for sale only.

<sup>10</sup> In 1909 the value of the farm garden was largely included in the value of "other vegetables."

<sup>11</sup> These crops comprise chufas (1919 and 1909), hemp (1919), and ginseng (value only, 1909).

TABLE 33.—ACREAGE OF IMPORTANT CROPS HARVESTED: 1879 TO 1919.

CROP.	1919	1909	1899	1889	1879
Corn.....	2,657,009	2,172,612	2,276,313	1,706,352	1,570,550

Hay and forage.....	1,483,544	231,056	90,261	66,159	9,319
Sweet potatoes and yams.....	69,394	56,045	38,169	44,188	41,874
Cotton.....	2,948,387	3,400,210	2,897,920	2,883,278	2,106,215

<sup>1</sup> Includes 29,497 acres in corn cut for forage. This crop was not included to any extent in the hay and forage totals prior to 1919. If its acreage be deducted, to make the 1919 figures more closely comparable with those of earlier years, the remaining area in hay and forage will be 454,047 acres.

TABLE 34.—PERCENTAGES AND AVERAGES FOR IMPORTANT CROPS: 1919 AND 1909.

<sup>1</sup> Includes apricots, quinces, and (for 1910) mulberries. Since these fruits were not called for by the 1920 schedule, the returns for that year are somewhat incomplete.

<sup>2</sup> The figures for 1910 and 1909 include lemons, pomegranates, kumquats, and bananas.

<sup>3</sup> Less than one-tenth of 1 per cent.

<sup>4</sup> The figures for 1910 and 1909 include almonds, and also black walnuts and several other varieties of nuts not called for by the 1920 schedule.

Age of farmers.—A farmer or farm operator, as defined for census purposes, is a person who operates a farm. The number of farm operators, for which the age distribution is shown in the following table, is therefore the same as the number of farms.

TABLE 40.—FARM OPERATORS CLASSIFIED ACCORDING TO AGE, COLOR, AND TENURE: 1920 AND 1910.

Farmers classified by number of years on farm.—In the following table the farmers of the state are classified according to the number of years they had been on the farms which they were operating when the census was taken. The purpose of this classification is to show the relative stability of the different classes.

TABLE 41.—FARM OPERATORS CLASSIFIED ACCORDING TO NUMBER OF YEARS ON FARM, BY COLOR AND TENURE: 1920 AND 1910.

NOTE.—In 1920 the date of enumeration (January 1) came just before the period during which changes from one farm to another are commonly made in most localities, and hence at a time when many farmers had almost, but not quite, completed one, two, or more years on their farms. Considerable numbers of these farmers reported one, two, or more full years, in place of reporting the correct number of months (or years and months). In 1910, however, the enumeration date (April 15) was late enough so that, in localities where the common moving time was in the early part of the year, the number of years of occupancy was accurately reported. These differences seriously affect the comparability of the returns, especially for the first two years of occupancy. Hence these two years, which were tabulated separately and are so published in Volume V of the Fourteenth Census Reports, have been combined in the following table.

NUMBER OF YEARS ON FARM AND COLOR.	TOTAL.		OWNERS.		MAN-AGERS.		TENANTS.

Cooperative marketing and purchasing.—Cooperative marketing of farm products or cooperative purchasing of supplies through farmers' organizations in 1919 was reported by 5,999 farms in Mississippi, including 620 farms which reported both sales and purchases, 4,654 farms which reported sales only, and 725 farms which reported purchases only.

TABLE 42.—COOPERATIVE MARKETING AND PURCHASING THROUGH FARMERS' ORGANIZATIONS: 1919.

Water piped into house.....	2,983	1.1		
Gas or electric light.....	2,896	1.1		

Pure-bred live stock on farms.—The inquiry relating to pure-bred live stock called for registered animals only, but it seems evident, from a study of the returns, that some animals merely eligible for registry (but not actually registered) were included in the reports.

The number of farms in Mississippi in 1920 was 272,101, of which number 248,810 reported domestic animals of some kind, and 12,759 reported pure-bred live stock.

TABLE 44.—PURE-BRED LIVE STOCK CLASSIFIED ACCORDING TO BREED: 1920.

NOTE.—Pure-bred horses reported in Mississippi represented 0.1 per cent of all horses on farms (see Table 23); pure-bred cattle, 1.3 per cent of the total; pure-bred sheep, 0.3 per cent; and pure-bred swine, 3.1 per cent.

<sup>1</sup> Includes animals reported as pure bred, with breed not specified.

Calves, pigs, and lambs raised on farms.—The figures presented include young animals born in 1919, which were retained on the farm, sold to others, or slaughtered for food, but do not include young animals purchased or those that died.

TABLE 45.—CALVES, PIGS, AND LAMBS RAISED.

ITEM.	FARMS REPORTING.		ANIMALS RAISED.	
	Number.	Per cent of all farms.	Number.	Average per farm.

Lambs.....	2,000	0.7	31,312	15.7

Domestic animals sold or slaughtered on farms.—The number of cattle, swine, and sheep slaughtered on farms was reported for both 1919 and 1909, but the farm schedule for 1919 carried no inquiry with regard to the value of the animals slaughtered, or with regard to the number or value of the animals sold by farmers. The total value of domestic animals sold or slaughtered on farms in Mississippi in 1919 has been estimated, however, at \$29,600,000, as compared with \$12,265,297 the value reported for 1909.

TABLE 46.—DOMESTIC ANIMALS SLAUGHTERED ON FARMS: 1919 AND 1909.

<sup>1</sup> Includes vinegar other than that made from cider.

Forest products of farms.—Forest products, as defined on the farm schedule, include firewood, fence posts, crossties, pulp wood, saw logs, poles, etc., and standing timber sold and cut during the years indicated. The figures cover only forest products of farms and do not represent by any means the total value of all forest products cut in the state during the census years.

# DRAINAGE—MISSISSIPPI.

## INTRODUCTION.

The following pages present the statistics of drainage for Mississippi collected at the census of 1920. The figures relate to conditions on January 1, 1920, except where indicated otherwise. No census of drainage has been taken heretofore, so there are no comparable figures for previous years. The data relate to the artificial drainage of land in farms and of other land that ultimately will be used for agricultural purposes. The organized drainage enterprises include considerable areas of timbered and other unimproved land not yet

in farms. The statistics for drainage on farms were collected in the general census of agriculture, while the statistics for drainage enterprises were obtained in a special canvass of those enterprises. Since drainage on farms may be either inside or outside an organized enterprise, and the drains that each individual owner installs upon his own farm may be either supplemental to or entirely independent of the works installed by an enterprise, the figures for the two parts of the drainage census are presented separately.

TABLE 1.—SUMMARY FOR THE STATE: 1920.

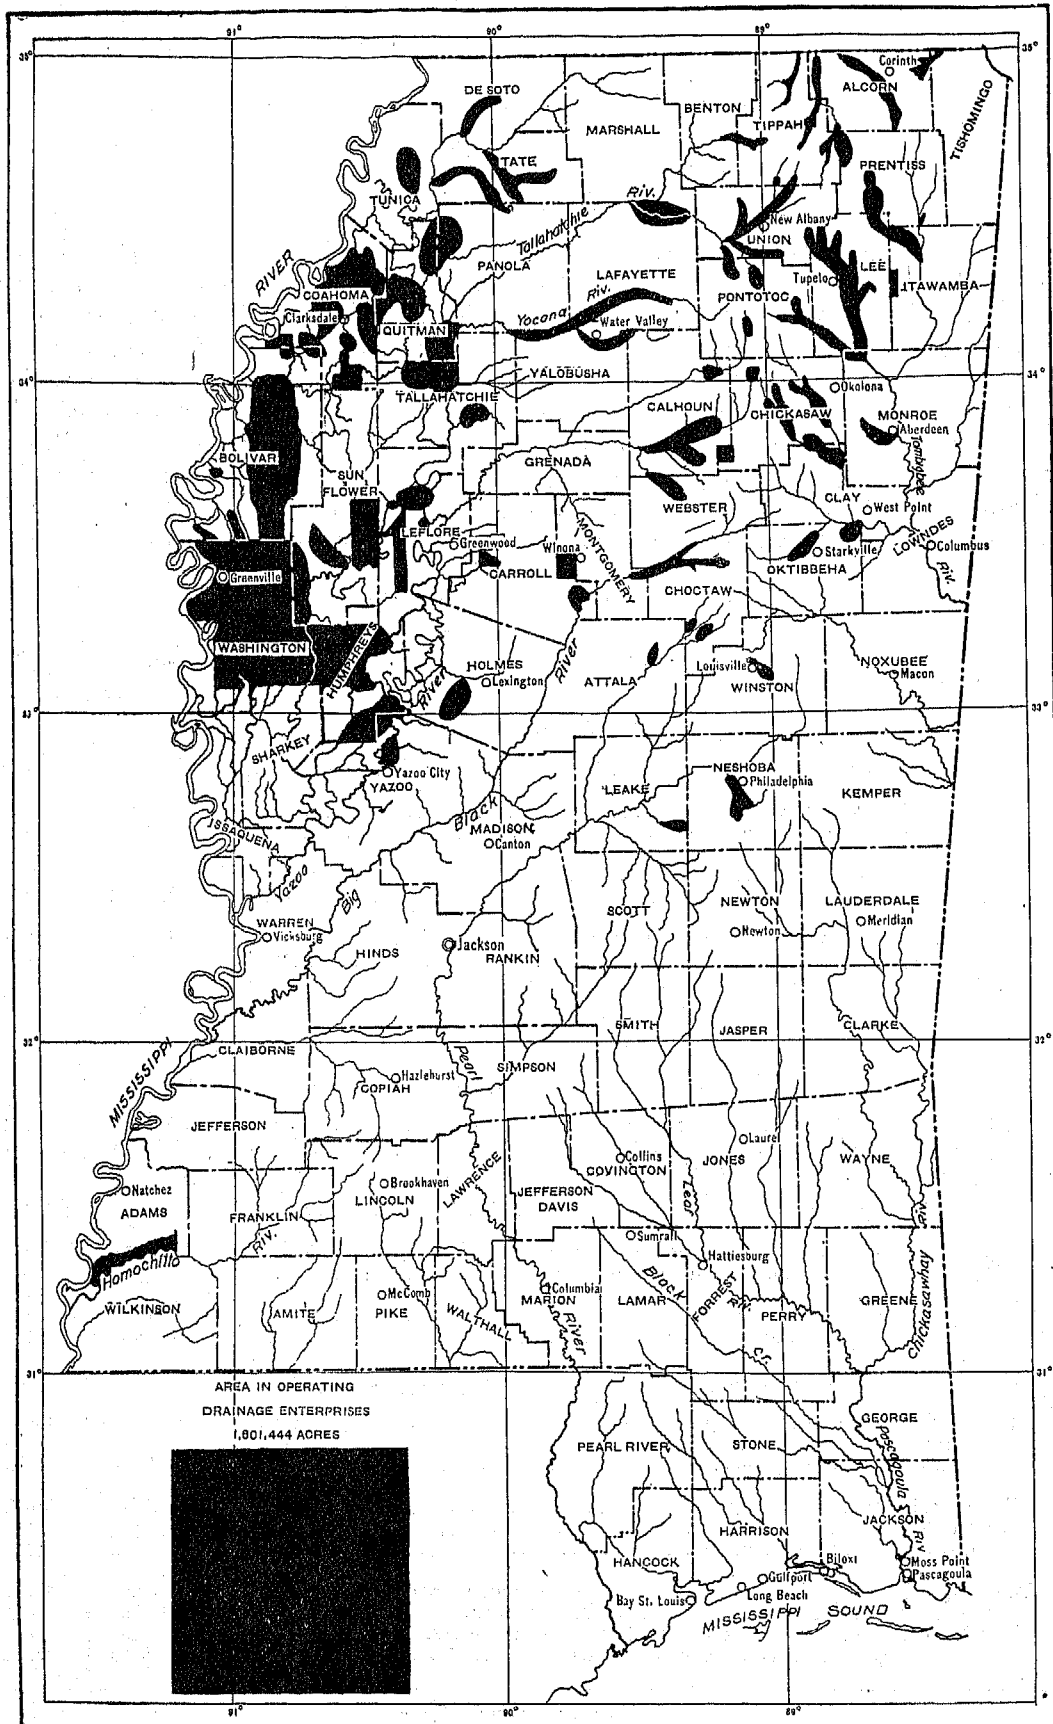

ITEM.	Amount.	Per cent of total.
<b>DRAINAGE ON FARMS.</b>		
Number of all farms in the state.....	272, 101	100. 0
Farms reporting land having drainage.....	34, 926	12. 8
Farms reporting land needing drainage.....	29, 872	11. 0
All land in farms.....acres..	18, 196, 979	100. 0
Improved land in farms.....acres..	9, 325, 677	51. 2
Farm land reported as provided with drainage.....acres..	825, 878	4. 5
Farm land reported as needing drainage.....acres..	1, 455, 534	8. 0
Needing drainage only.....acres..	151, 179	0. 8
Needing drainage and clearing.....acres..	1, 304, 355	7. 2
<b>DRAINAGE ENTERPRISES.</b>		
Approximate land area of the state.....acres..	29, 671, 680	100. 0
All land in operating drainage enterprises.....acres..	1, 601, 444	5. 4
Improved land.....acres..	941, 239	3. 2
Per cent of all improved land in farms.....	10. 1	
Timber and cut-over land.....acres..	631, 964	2. 1
Other unimproved land.....acres..	28, 241	0. 1
Swampy, subject to overflow, seeped, or alkali.....acres..	261, 126	0. 9
Suffering a loss of crops from defective drainage.....acres..	12, 207	( <sup>1</sup> )
Improved land prior to drainage.....acres..	506, 828	1. 7
Increase since drainage began.....acres..	434, 411	1. 5
Land in nonoperating enterprises.....acres..	277, 557	0. 9
Open ditches in operating enterprises.....miles..	2, 038. 7	100. 0
Completed.....miles..	1, 815. 1	89. 0
Additional under construction.....miles..	223. 6	11. 0
Tile drains in operating enterprises.....miles..	293. 0	100. 0
Completed.....miles..	238. 8	81. 5
Additional under construction.....miles..	54. 2	18. 5
Total capital invested in and required for completion of operating enterprises..	\$8, 561, 264	100. 0
Capital invested in these enterprises to Dec. 31, 1919.....	7, 076, 164	82. 7
Additional capital required to complete these enterprises.....	1, 485, 100	17. 3
Average cost per acre when completed.....	5. 35

# MISSISSIPPI

APPROXIMATE LOCATION AND AREA OF OPERATING DRAINAGE ENTERPRISES.

## DRAINAGE ON FARMS.

**Explanation of terms.**—To secure uniformity in the returns relating to drainage on farms, the Bureau of the Census supplied its enumerators with certain definitions, which are substantially as follows:

**Drainage of agricultural land** was defined, for census purposes, as the act or process of drawing off an excess of water by underground conduits, pipes, or tiles, or by open or covered trenches in the surface of the ground, for the purpose of improving the condition of the soil and crops.

**The area provided with drainage, in farms,** is the acreage actually benefited or made of more value for agricultural purposes by artificial drainage, but does not include land on which only temporary work has been done, such as "bedding" the fields or laying out "dead furrows" to hasten the surface flow.

**The area needing drainage, in farms,** comprises the additional land not now suitable for crops which could be made available for cultivation (1) "by drainage only," which is the acreage needing no clearing or which is covered with grass, weeds, or other annual growth, and (2) "by drainage and clearing," which is the acreage covered with trees, stumps, or perennial woody shrubs.

**Improved land in farms** includes all land regularly tilled or mowed, land in pasture which has been cleared or tilled, land lying fallow, land in gardens, orchards, vineyards, and nurseries, and land occupied by farm buildings.

**Woodland in farms** includes all land covered with natural or planted forest trees which produce, or later may produce, firewood or other forest products.

**Farms in drainage and levee districts** are those for which the operators have answered affirmatively the question, "Has any part of this farm been afforded drainage or protection against overflow by a drainage or levee district, or by the state, the county, or a private company or individual." Levee districts, however, generally are not included in the enterprises for which data are given in this report (see definition of drainage enterprises, below).

**Farms and farm land.**—The acreage shown for drainage on farms represents land where drainage is actually in operation and which has actually become more fully available for growing crops by reason of the drainage. This is to be distinguished from the area merely provided with outlet facilities by organized drainage enterprises. Drainage on farms represents in most cases the result of work done by the farm owner, either independently or supplemental to the work done by a drainage enterprise, but the acreage would include also any farm land receiving similar benefits directly from the works of an enterprise.

## DRAINAGE ENTERPRISES.

**Explanation of terms.**—The more important terms used in connection with the census of drainage enterprises were defined as follows:

**Drainage enterprises** comprise public corporations and local improvement districts formed under state laws, commercial enterprises draining swamp or overflowed land for sale, other organizations that may be engaged in extensive land-drainage work, and also tracts of 500 acres or more drained by individual owners. Enterprises such as levee districts that have not authorized the construction of open ditches or tile drains are not included.

**Enterprises located in more than one county** were divided, for tabulation, and the part in each county treated as a separate enterprise, though the capacities of drainage pumping plants are given only in the counties in which the plants are located.

**Operating enterprises,** as designated in this bulletin, are those that had completed the drainage works authorized, or had at any rate begun actual construction work, on or before January 1, 1920; enterprises that had been established but had not begun construction are termed "nonoperating."

**Land in drainage enterprises** comprises the area that has been benefited or is to be benefited by the improvement works constructed by the enterprises. In the case of overlapping enterprises, deduction has been made for the amount of duplication.

**All land in drainage enterprises** is divided, without regard to drainage condition, into (a) improved land; (b) timber and cut-over land, which would require clearing to be thoroughly fit for cultivation; and (c) all other unimproved land, which would not require expensive clearing before cultivation.

**The assessed acreage** for any single enterprise is the same as the area in that enterprise. However, the total assessed acreage may be considerably greater than the total land in enterprises, for in summing up the assessed acreage in the county or state, deduction was not made for acreage assessed in more than one enterprise.

**Improved land in drainage enterprises** consists very largely of improved farm land, though it may include some other improved land receiving benefit from the works of the enterprises.

**Timber and cut-over land** includes farm woodland of natural or planted forest trees as well as other timber land or areas that would need clearing of trees, stumps, or perennial woody shrubs.

**Land designated as swampy or subject to overflow** includes all land permanently or generally too wet for cultivation, land subject to periodical inundation by stream floods, seeped and alkali land in irrigated regions, and all other land unfit for cultivation by reason of insufficient drainage. This classification is without respect to the conditions as to improvement or timber.

**The area suffering loss of crops** is intended to include only land devoted to planted crops which suffer damage, either partial or complete, because of defective drainage. Land which would be cultivated if drained or protected against overflow is not included.

**Capital invested,** for the purpose of this investigation, was defined as cost, including charges for engineering, organization, rights of way, construction of drainage works, damages, land and buildings except those held for sale or farming, and any other expenditures properly chargeable to drainage and paid by the enterprise.

**The drainage works of an enterprise** include all varieties of underground conduits, pipes, or lines of tile, or drains of stone, wood, or other material; also open ditches and canals, together with accessory levees, dikes, dams, weirs, pumping machinery, gates, and other devices for the draining away or control of surface and soil waters.

**Tile,** as the term is here used, includes pipes of earthenware, concrete, or other material buried beneath the surface in such a way as to permit the excess water to flow away. The size, if circular, is expressed by the inside diameter in inches.

**Ditches** include all open artificial trenches, usually with sloping sides. The width is that of the bottom.

**The type of drainage** shows whether the drainage water from an enterprise is discharged by gravity or by pumping.

**A pumping district** is one where all or a part of the water from the drains collecting at a low point must be raised by some form of machinery in order that it may be removed from the area.

**Drainage pumps** include all kinds of machinery and devices for lifting the drainage water.

**Pumping engines** include all kinds of engines and motors for operating the drainage pumps.

**Operating and nonoperating enterprises.**—In most of the tables that follow, statistics are given for operating enterprises only. These enterprises, as already defined, include both those which have completed their drainage works and those with such works under construction; among the latter might be any that had completed the original plan of reclamation some years ago but were constructing extensions or enlargements on January 1, 1920. The nonoperating enterprises have a legal existence, though they have not yet accomplished any drainage. They may include districts that on the census date had completed their plans, sold bonds to cover the cost of the undertakings, and let contracts for the construction work, and also districts for which the order of establishment had just been issued and which were still subject to considerable change in area, plan of drainage works, and cost.

TABLE 2.—LAND AND CAPITAL INVESTED IN ALL ENTERPRISES, CLASSIFIED AS BETWEEN OPERATING AND NONOPERATING ENTERPRISES: 1920.

CLASS.	LAND.		CAPITAL. <sup>1</sup>			
	Acreage.	Per cent of total.	To Dec. 31, 1919.		Additional required to complete.	
			Amount.	Per cent of total.		
All organized enterprises..	1,879,001	100.0	\$7,192,907	100.0	\$4,060,333	
Operating enterprises.....	1,601,444	85.2	7,076,164	98.4	1,485,100	
With works completed.....	1,175,776	62.6	5,522,944	76.8		
With works under construction.....	425,668	22.7	1,553,220	21.6	1,485,100	
Nonoperating enterprises.....	277,557	14.8	116,743	1.6	2,575,233	

<sup>1</sup> The inquiry asked for the "total cost of the enterprise to Dec. 31, 1919," and for an "estimate of additional investment to complete."

**Location of enterprises.**—Practically all of the drainage enterprises are in the northern half of the state, and about three-fourths of the land in such enterprises is situated in 10 counties near Mississippi River.

TABLE 3.—LAND AND CAPITAL INVESTED IN ALL ENTERPRISES, CLASSIFIED BY DRAINAGE BASIN: 1920.

DRAINAGE BASIN.	LAND.		CAPITAL.			
	Acreage.	Per cent of total.	To Dec. 31, 1919.		Additional required to complete.	
			Amount.	Per cent of total.

Mississippi River.....	89,464	4.6	325,223	4.5	3,000	
Nonoperating enterprises.....	277,557	14.8	116,743	1.6	2,575,233	
Pearl River.....	6,102	0.3	6,081	0.1	90,959	
Pascagoula River.....	4,583	0.2	4,700	0.1	81,300	
Tombigbee River.....	11,828	0.6	6,750	0.1	105,500	
Yazoo River.....	235,447	12.5	87,212	1.2	2,201,833	
Mississippi River.....	7,462	0.4	10,800	0.2	48,800	
Gulf of Mexico.....	12,135	0.6	1,200	( <sup>1</sup> )	46,791	

<sup>1</sup> Less than one-tenth of 1 per cent.

For both operating and nonoperating enterprises, approximately 85 per cent of the acreage is drained into Yazoo River.

**Condition of land in enterprises.**—The drainage enterprises in the region between Yazoo and Mississippi Rivers are principally for the reclamation of level swamp areas. This region is of alluvial formation, and was subject to inundation by overflow from the Mississippi until construction of the extensive system of levees along that stream. Storm run-off from the higher rolling land on the east also overflowed parts of the delta land. The characteristic high banks of the natural watercourses greatly interfere with drainage of the surface water into the channels that exist. In the counties east of Yazoo River, the drainage problem generally is one of relieving the bottom land along the streams from overflow by floods of short duration.

The usual purpose of an organized enterprise is merely to provide adequate outlets into which the landowners of the district may drain their farms and to afford relief from overflow for the district as a unit. Therefore the fact that an enterprise which has completed the construction of the drainage works authorized contains land still swampy or subject to overflow, or land that suffers damage to crops, does not show that the improvement works are inadequate.

TABLE 4.—LAND IN ALL ENTERPRISES, CLASSIFIED BY CONDITION: 1920.

CONDITION OF LAND	OPERATING ENTERPRISES.				Non-operating enterprises (acres).
	Total.		Works completed (acres).	Works under construction (acres).	
	Acreage.	Per cent of all land.			
All land in enterprises.....	1,601,444	100.0	1,175,776	425,668	277,557
Improved land.....	941,230	58.8	768,105	173,134	107,852
Timber and cut-over land.....	631,964	39.5	388,633	248,331	137,496
Other unimproved land.....	28,241	1.8	24,038	4,203	32,209
Swampy or subject to overflow.....	261,126	16.3	210,422	50,704	108,211
Suffering a loss of crops.....	12,207	0.8	7,167	5,040	948

**Size of enterprises.**—Presentation of the statistics by counties requires that an enterprise located in more than one county be divided and the part in each county be considered a separate enterprise. In this way, 167 operating drainage enterprises are counted in Mississippi, with an average area of 9,608 acres assessed. The assessed acreage exceeds the land in enterprises by 3,040 acres, which is the amount of overlapping. The land in enterprises and the assessed acreage on each line of Table 5 refer to the same enterprises. From the total area of each enterprise, designated as the assessed acreage, deduction was made for the amount of overlapping with enterprises organized previously, to determine the acreage to be tabulated as land in enterprises.

TABLE 5.—LAND IN OPERATING ENTERPRISES, CLASSIFIED BY SIZE OF AREA ASSESSED: 1920.

SIZE GROUP.	Land in enterprises (acres).	ASSESSED AREA.	
		Acreage.	Per cent of total.
All operating enterprises.....	1,601,444	1,004,484	100.0
200 to 499 acres.....	1,804	1,894	0.1
500 to 999 acres.....	8,959	9,789	0.6
1,000 to 4,999 acres.....	199,000	201,240	12.5
5,000 to 9,999 acres.....	157,416	157,415	9.3
10,000 to 49,999 acres.....	664,285	664,285	41.4
50,000 to 99,999 acres.....	320,400	320,400	20.0
100,000 to 499,999 acres.....	249,460	249,460	15.5

**Character of enterprises.**—The drainage enterprises in Mississippi are swamp land districts and drainage districts established by the county boards of supervisors, by the chancery courts, or by county boards of drainage commissioners in accordance with the general drainage laws of the state, and private undertakings by individual landowners.

Swamp land districts for the reclamation of wet, swamp, or overflowed land are formed in accordance with an act of February 19, 1902 (ch. 70), which now forms sections 371 to 391 (ch. 17) of the Mississippi Code of 1906 of the public statute laws. A petition for establishment, signed by a majority of the resident landowners owning at least one-third of the land to be drained, is filed with the board of supervisors of the county where the proposed district is situated. Three commissioners named in the petition determine what land will be drained by the same system of connecting channels, and the county supervisors may decree the district established. A special tax upon the district is levied by the supervisors, not exceeding 50 cents per acre in any year, and when a sufficient amount has been collected the commissioners let contracts for constructing the drains. Right of way may be obtained by condemnation. Upon petition from one-third of the landowners, the county supervisors may issue bonds in anticipation of the full amount of taxes authorized to be levied for not exceeding 30 years.

Drainage districts may be established by the county boards of supervisors under a law of March 1, 1912 (ch. 195), or under one of March 16, 1912 (ch. 198). The former act, as amended, requires that a petition for establishment be signed by 10 per cent of the landowners in the proposed district. The supervisors appoint an engineer, and may appoint three temporary commissioners also, to make a report as to the land that will be benefited and the probable cost of the drainage improvements. Hearings are held upon the petition and upon the engineer's report, before the supervisors decree the district established. The executive officers of the enterprise are three commissioners appointed by the board of supervisors, though the selection may be determined by petition signed by a majority of the landowners. The plan of drainage

works and the assessments of damages and benefits are made by the commissioners, the assessments being subject to confirmation by the board of supervisors and to appeal to the chancery court. The assessments for cost are made by the county supervisors against the real property in the district, in proportion to the benefits. Bonds may be issued by the commissioners to run not more than 30 years. For a district in more than one county, proceedings are before the chancery court instead of the county supervisors. Subdistricts may be formed in accordance with an act of February 26, 1914 (ch. 269), wholly or partly within a drainage district organized under the act of March 1, 1912 (ch. 195). The manner of establishment is similar to that for an original district, but the petition must be signed by one-third of the landowners owning a majority of the acreage or by a majority of the owners owning a third of the acreage or real property. The commissioners of the main district serve also for the subdistrict. An independent district may be formed wholly or partly within another district, under the statute of 1914, upon petition similar to that required for a subdistrict.

The establishment of a drainage district under the act of March 16, 1912 (ch. 198), requires a petition to the county supervisors from a majority of the resident landowners who shall own one-third of the land. Three commissioners named in the petition are the officers of the district to determine the plan of drainage and to assess damages if any are claimed. The cost of construction has been paid by a uniform tax upon the land benefited. However, three-fourths of the owners holding half or more of the land may petition for assessments according to benefits, and then the commissioners must divide the land into five classes to be assessed, per acre, in the ratio 5:4:3:2:1. Public hearings are held upon the petition and upon the commissioners' plan of improvement, and appeals regarding classification of the land may be taken to the chancery court. Rights of way may be condemned. Bonds may be issued upon petition from a majority of the landowners owning a majority of the acreage, to be paid by special tax levies not exceeding \$1 per acre in any year.

Drainage districts under the chancery courts, except intercounty districts formed under the act of March 1, 1912, are established in accordance with a law of April 12, 1906 (ch. 132), which is now chapter 39 of the Mississippi Code of 1906. This statute as amended provides for a board of three drainage commissioners for the county, to be elected by the drainage taxpayers of the county, if 20 per cent of the owners of real property affected by constructed or proposed drainage works petition for such commissioners. Before 1916, this board was elected by the county supervisors when petition for the first drainage district had been approved by the chancery court. Petition for a district

under this law must be filed with the chancery court of the county containing the greatest part of the proposed district, signed by a majority of the landowners owning at least one-third of the land to be affected or by one-third of the owners holding a majority of the acreage. The drainage commissioners investigate regarding the practicability of the project, and after public hearing upon their report the chancery court may decree the district established. The commissioners determine the plan of drainage, and assess damages and benefits subject to confirmation by the court after public hearing. Rights of way may be secured as in eminent domain cases. Bonds may be issued by the commissioners, payable in 1 to 20 years.

An act of March 13, 1912 (ch. 197), also provides for a county board of three drainage commissioners for each county embracing all or a part of one or more drainage districts, to have jurisdiction over all such districts within the county organized under this act. These commissioners are appointed by the chancellors of the chancery districts. Petition for establishment of the drainage district must be signed by 10 per cent of the landowners of the proposed district, in number, acreage, or value, and be filed with the clerk of the chancery court of the county containing the greater part of that district. If the petition is sufficient, the county drainage commissioners refer it to three district drainage commissioners whom they appoint to investigate regarding the feasibility and utility of the project. The district is established by the county drainage commissioners after public hearing upon the district commissioners' report, if the proposed work will be beneficial to the landowners. The county drainage commissioners are the corporate authority of the district. The cost of the enterprise is apportioned against the tracts of land in proportion to benefits. Damages and benefits are assessed by the district commissioners and confirmed by the county drainage commissioners, subject to appeal to the chancery court. Rights of way may be obtained by proceedings before the courts of eminent domain. Bonds may be issued by the county commissioners for not exceeding 30 years.

A private drain may be constructed across land of an objecting owner, if necessary, by petition to the county supervisors and payment of damages assessed, under an act of March 15, 1918 (ch. 206).

The first drainage law of Mississippi was passed in 1886, applicable only in Lee County, authorizing the county supervisors to drain swamp and overflowed land upon petition from the owners of a majority of the acreage. A law of February 11, 1898 (ch. 39), authorized the issue of bonds for reclamation work upon petition from landowners, by counties having authority to levy taxes on swamp and overflowed land. An act of March 6, 1900, applicable in all counties, was similar to the swamp land district act of 1902,

which repealed both the act of 1900 and that of 1898. A few counties were excepted from the provisions of chapter 39 of the Code of 1906 until 1912. Of the many amendments to the drainage laws of the state, the few that affect the character of the enterprises have been incorporated in the foregoing statement.

**Drainage works.**—The total works completed by the drainage enterprises to December 31, 1919, comprised 1,815.1 miles of open ditches, 238.8 miles of tile drains, and 6.7 miles of accessory levees; the additional lengths under construction were 223.6 miles of ditches, 54.2 miles of tile drains, and 36.8 miles of levees. These figures do not include drains or levees installed by individual farm owners supplemental to the works of the enterprises, nor the works of flood-protection or levee districts that had not undertaken the construction of ditches or tile drains. There is one pumping district for land drainage among the enterprises under construction in Mississippi. Part of the drainage water from 44,000 acres is to be removed by two centrifugal pumps of 78,000 gallons per minute capacity, operated by internal-combustion engines capable of developing 250 horsepower.

The average depth of the main or outlet ditch was reported for each enterprise. The maximum reported for any enterprise in the state and the maximum in each county are shown in line 15 of County Table II. The maximum length, width, and depth of outlet shown in that table for any county may not refer to the same enterprise.

In County Table II, line 16 shows the mean depth of branch ditches (open ditches only), which is a very crude indication of the depth of soil drainage that may be obtained in the enterprises as determined by the depth of outlet provided for farm drains. The mean depth was computed by giving each separate depth a weight in proportion to the acreage it serves. As most enterprises reported depths in whole numbers only, the occasional decimals were omitted in making these computations. Depths less than 3 feet and those 10 feet and greater were omitted as it seemed they do not represent so well the average depths of outlet provided for all the farms in those districts; to include these groups, computed as 3 feet and 10 feet, respectively, would show the mean depth for the state 6.9 instead of 6.8 feet.

**TABLE 9.—LAND IN OPERATING ENTERPRISES, CLASSIFIED BY AVERAGE DEPTH OF BRANCH DITCHES: 1920.**

DEPTH OF BRANCH DITCHES.	Acreage.	Per cent of total.
All operating enterprises.....	1,601,444	100.0

9.0 to 9.9 feet.....	.....	.....
10 feet and more.....	65,000	4.1
Not reporting branches.....	406,131	25.4

**Maintenance of works.**—The statutes provide for maintenance of the improvement works of all the public drainage enterprises in Mississippi. The county supervisors are charged with protecting and keeping in repair the drainage works of swamp land districts organized under chapter 17 of the Code of 1906, and

are authorized to levy assessments against the districts to pay for that work. The commissioners of drainage districts established under chapters 195 and 198 of the laws of 1912 are authorized to borrow money to pay for maintenance of the drainage works, payment to be made from taxes levied against the districts by county supervisors. In districts under chapter 195, notice and hearing must be given before any levy is made; in those under chapter 198, the levy must not exceed 25 cents per acre in any year. Chapter 39 of the Code of 1906 provides that the boards of drainage commissioners may do any and all acts necessary in repairing and maintaining any drain or other work for which they have been appointed, and may make additional assessments to pay the cost involved. For districts formed in accordance with chapter 197 of the laws of 1912, the district drainage commissioners may, with the approval of the county board of drainage commissioners, do anything necessary for repairing and maintaining the works of the district, and the county supervisors shall levy taxes against the districts each year, if requested by the drainage commissioners, to pay for the maintenance work. The county board of drainage commissioners supervises the maintenance of the districts in case there are no district drainage commissioners.

**TABLE 10.—LAND AND CAPITAL INVESTED IN OPERATING ENTERPRISES, CLASSIFIED BY METHOD OF MAINTENANCE: 1920.**

METHOD OF MAINTENANCE.	LAND.		CAPITAL.		
	Acreage.	Per cent of total.	To Dec. 31, 1919.		Additional required to complete.
			Amount.	Per cent of total.	
All operating enterprises..	1,601,444	100.0	\$7,076,164	100.0	\$1,485,100

By contract.....	460,185	28.7	2,151,353	30.4	20,000
By landowners.....	45,920	2.9	481,000	6.8	242,000
No maintenance provided.....	316,572	19.8	1,148,730	16.2	213,500

**Date of organization.**—The progress in drainage development is shown only roughly by the dates of the organization of the enterprises, which are the dates when the districts were established by the courts or by the county supervisors or drainage commissioners, since there may be a period of a year or more between the decree of establishment and the beginning of actual construction, and since the work of construction may occupy several years in a large district. It was not practicable, however, for the census to secure data as to the time of the beginning or the completion of the drainage works. Under the date of organization are tabulated the entire area, works, and capital of each enterprise, even including any extensions made after the original plan of reclamation was completed.

Crops.—The principal crops grown upon the drained land in the drainage enterprises are cotton and corn. Data were not secured to show the part of each enterprise planted to any crop, so the enterprises have been classified according to the principal crop, and the total area of improved land is shown thus classified, in County Table II. No data were secured at the general census of agriculture to separate the crops grown upon land drained artificially from those produced upon land drained naturally.

# MANUFACTURES—MISSISSIPPI.

## EXPLANATION OF TERMS.

**Scope of census.**—Census statistics of manufactures are compiled primarily for the purpose of showing the absolute and relative magnitude of the different branches of industry covered and their growth or decline. Incidentally, the effort is made to present data throwing light upon character of ownership, size of establishments, and similar subjects. When use is made of the statistics for these purposes it is imperative that due attention be given to their limitations, particularly in connection with any attempt to derive from them figures purporting to show average wages, cost of production, or profits.

The census did not cover establishments which were idle during the entire year or for which products were valued at less than \$500, or the manufacturing done in educational, eleemosynary, and penal institutions.

**Period covered.**—The returns relate to the calendar year 1919, or the business year which corresponded most nearly to that calendar year, and cover a year's operations, except for establishments which began or discontinued business during the year.

**The establishment.**—As a rule, the term "establishment" represents a single plant or factory, but in some cases it represents two or more plants which were operated under a common ownership or for which one set of books of account was kept. If, however, the plants constituting an establishment as thus defined were not all located within the same city, county, or state, separate reports were secured in order that the figures for each plant might be included in the statistics for the city, county, or state in which it was located. In some instances separate reports were secured for different industries carried on in the same establishment.

**Classification by industries.**—The establishments were assigned to the several classes of industries according to their products of chief value. The products reported for a given industry may thus, on the one hand, include minor products different from those covered by the class designation, and, on the other hand, may not represent the total product covered by this designation, because some of this class of product may be made in establishments in which it is not the product of chief value.

As a rule, the same designation is used for the industry wherever it appears, although all of the products indicated by this designation were not manufactured in the state or city for which these statistics are presented. In some instances the wording is changed so as to more correctly describe the products represented. For a number of industries subclasses are shown which indicate more definitely the kind of products.

**Selected industries.**—The general tables at the end of this section give the principal facts separately for the industries of the state. A selection has been made of certain leading industries of the state for more detailed consideration. Sometimes an industry of great importance has to be omitted because it comprises so few establishments that a detailed presentation would reveal the operations of individual concerns.

**Comparisons with previous censuses.**—Owing to changes in industrial conditions it is not always possible to classify establishments by industries in such a way as to permit accurate comparison with preceding censuses. At the census of 1909 the figures for kindred industries were combined. This practice has been followed in compiling the statistics for 1919 and 1914 when placed in com-

parison with those for 1909 and prior years. The comparative summary for 1919, 1914, and 1909, therefore, does not show separately all the industries given for 1919 in the detailed statement for the state.

**Influence of increased prices.**—In comparing figures for cost of materials, value of products, and value added by manufacture in 1919 with the corresponding figures for earlier censuses, account should be taken of the general increase in the prices of commodities during recent years. To the extent to which this factor has been influential the figures fail to afford an exact measure of the increase in the volume of business.

**Persons engaged in the industry.**—The following general classes of persons engaged in the manufacturing industries were distinguished: (1) Proprietors and firm members, (2) salaried officers of corporations, (3) superintendents and managers, (4) clerks (including other subordinate salaried employees), and (5) wage earners. In the reports for the censuses of 1904 and 1899 these five classes were shown according to the three main groups: (1) Proprietors and firm members, (2) salaried officials, clerks, etc., and (3) wage earners. In comparative tables covering the census of 1904 it is of course necessary to group the figures according to the classification that was employed at the earlier censuses.

The number of persons engaged in each industry, segregated by sex, and, in the case of wage earners, also by age (whether under 16 or 16 and over), was reported for a single representative day. The 15th of December was selected as representing for most industries normal conditions of employment, but where this date was not a representative day an earlier date was chosen.

In the case of employees other than wage earners the number thus reported for the representative date has been treated as equivalent to the average for the year, since the number of employees of this class does not ordinarily vary much from month to month. In the case of wage earners the average has been obtained in the manner explained in the next paragraph.

In addition to the more detailed report by sex and age of the number of wage earners on the representative date, a report was obtained of the number employed on the 15th of each month, by sex, without distinction of age. From these figures the average number of wage earners for the year has been calculated by dividing the sum of the numbers reported for the several months by 12. The importance of the industry as an employer of labor is believed to be more accurately measured by this average than by the number employed at any one time or on a given day.

The number of wage earners reported for the representative day, though given in certain tables for each separate industry, is not totaled for all industries combined for any state, because, in view of the variations of date, such a total is not believed to be significant. It would involve more or less duplication of persons working in different industries at different times, would not represent the total number employed in all industries at any one time, and would give an undue weight to seasonal industries as compared with industries in continual operation. This total, however, is shown for the different cities, because the limited area and greater regularity of employment largely overcame the objection incident to its publication for the separate states or the United States.

In order to determine as nearly as possible the age distribution of the average number of wage earners for a given state as a whole, the per cent distribution by age of the wage earners in each industry for December 15, or the nearest representative day, has been calculated from the actual numbers reported for that date. The percentages thus obtained have been applied to the average number of wage earners for the year in that industry to determine the average numbers 16 years and over, and under 16, employed. These calculated averages for the several industries have been added to give the average distribution for each state as a whole and for the entire country.

**Salaries and wages.**—Under these heads are given the total payments during the year for salaries and wages, respectively. The Census Bureau has not undertaken to calculate the average annual earnings of either salaried employees or wage earners. Such averages would possess little real value, because they would be based on the earnings of employees of both sexes, of all ages, and of widely varying degrees of skill. Furthermore, so far as wage earners are concerned, it would be impossible to calculate accurately even so simple an average as this, since the number of wage earners fluctuates from month to month in every industry, and in some cases to a very great extent. The Census Bureau's figures for wage earners, as already explained, are averages based on the number employed on the 15th of each month, and while representing the number according to the pay rolls to whom wages were paid on that date, no doubt represent a larger number than would be required to perform the work in any industry if all were continuously employed during the year.

**Prevailing hours of labor.**—No attempt was made to ascertain the number of wage earners working a given number of hours per week. The inquiry called merely for the prevailing practice followed in each establishment. Occasional variations in hours in an establishment from one part of the year to another were disregarded, and no attention was paid to the fact that a few wage earners might have hours differing from those of the majority. All the wage earners of each establishment are therefore counted in the class within which the establishment itself falls. In most establishments, however, practically all the wage earners work the same number of hours, so that the figures give a substantially correct representation of the hours of labor.

**Capital.**—The instructions on the schedule for securing data relating to capital were as follows:

"The answer should show the total amount of capital, both owned and borrowed, on the last day of the business year reported. All the items of fixed and live capital may be taken at the amounts carried on the books. If land or buildings are rented, that fact should be stated and no value given. If a part of the land or buildings is owned, the remainder being rented, that fact should be so stated and only the value of the owned property given. Do not include securities and loans representing investments in other enterprises."

These instructions were identical with those employed at the censuses of 1914 and 1909. The data compiled in respect to capital, however, at both censuses, as well as at all preceding censuses of manufactures, have been so defective as to be of little value except

as indicating very general conditions. In fact, it has been repeatedly recommended by the census authorities that this inquiry be omitted from the schedule. While there are some establishments whose accounting systems are such that an accurate return for capital could be made, this is not true of the great majority, and the figures therefore do not show the actual amount of capital invested.

**Materials.**—The statistics as to cost of materials relate to the materials used during the year, which may be more or less than the materials purchased during the year. The term "materials" covers fuel, rent of power and heat, mill supplies, and containers, as well as materials which form a constituent part of the product.

**Rent and taxes.**—The taxes include certain Federal taxes and state, county, and local taxes. Under "Federal taxes" there are included the internal-revenue tax on manufactures (tobacco, beverages, etc.), excise taxes when included in values reported for products, corporation capital stock tax, and corporation income tax, but not the income tax for individuals and partners.

**Value of products.**—The amounts given under this heading represent the selling value or price at the factory of all products manufactured during the year, which may differ from the value of the products sold.

**Value added by manufacture.** The value of products is not always a satisfactory measure of either the absolute or the relative importance of a given industry, because only a part of this value is actually created by the manufacturing processes carried on in the industry itself. Another part, and often by far the larger one, represents the value of the materials used. For many purposes, therefore, the best measure of the importance of an industry, from a manufacturing standpoint, is the value created by the manufacturing operations carried on within the industry. This value is calculated by deducting the cost of the materials used from the value of the products. The figure thus obtained is termed in the census reports "value added by manufacture."

**Cost of manufacture and profits.**—The census data do not show the entire cost of manufacture, and consequently can not be used for the calculation of profits. No account has been taken of depreciation or interest, rent of offices and buildings other than factory or works, insurance, ordinary repairs, advertising, and other sundry expenses.

**Primary horsepower.**—This item represents the total primary power generated by the manufacturing establishments plus the amount of power, principally electric, rented from other concerns. It does not cover the power of electric motors taking their current from dynamos driven by primary power machines operated by the same establishment, because the inclusion of such power would obviously result in duplication. The figures for primary horsepower represent the rated capacity of the engines, motors, etc., and not the amount of power in actual daily use.

**Fuel.**—Statistics of the quantity of fuel used are shown only for anthracite and bituminous coal, coke, fuel oils, gasoline and other volatile oils, and gas—natural and manufactured—and represent the quantity used during the year. As only the principal kinds of fuel are shown, comparison as to the total cost of all fuel is impracticable. A comparison, however, of the total quantities of the several kinds of fuel used in 1919 and 1914 is given.

## GENERAL STATISTICS.

**General character of the state.**—Mississippi has a gross area of 46,865 square miles, of which 46,362 represent land surface. The inhabitants of the state in 1900 numbered 1,551,270; in 1910, 1,797,114; and in 1920, 1,790,618. In total population Mississippi ranked twenty-third among the states in 1920, and in density of population twenty-sixth. The number of inhabitants per square mile in 1910 was 38.8, the corresponding figures for 1920 being 38.6.

There were in the state in 1920 nine cities having more than 10,000 inhabitants—Biloxi, Columbus, Greenville, Hattiesburg, Jackson, Laurel, Meridian, Natchez, and Vicksburg. These nine cities, with a combined population in that year of 136,201, or 7.6 per cent of the total population for Mississippi, reported 24.9 per cent of the value of the state's manufactured products in 1919.

**Importance and growth of manufactures** (Table 1).—The large increases in wages, cost of materials, and value of products, as presented in Table 1, are largely due to the change in industrial conditions brought about by the World War, and, therefore, can not properly be used to measure the growth of manufactures during the census period 1914–1919. However, the increases in the average number of wage earners and horsepower are significant evidences of the growth of the manufacturing activities of the state. The addition of the Federal income tax since 1914 will account for the exceptional increase in "rent and taxes."

**Statistics for the state, by counties** (Table 2).—Figures are not available for comparison of county totals for other censuses with those for 1919.

**Principal industries, ranked by value of products** (Table 3).—The ranking of industries by value of products may not always be satisfactory as indicating their importance from a manufacturing standpoint. The ranking of many industries would change materially if based upon the average number of wage earners or value added by manufacture.

**Persons engaged in manufacturing industries** (Table 4).—The age classification of the average number of wage earners in this and other tables is an estimate obtained by the method described in the "Explanation of terms." The classification by sex for 1919, was reported separately, but for 1914 and 1909 was obtained in the same manner as the distribution by age. Figures for individual industries will be found in Table 29.

**Average number of wage earners for selected industries** (Table 5).—The industries covered by this table are those which employed 200 or more wage earners in 1919, and for which statistics can be shown without the possibility of disclosing the operations of individual establishments.

**Average number of wage earners, by sex and age, and value of products, for cities of 10,000 inhabitants or more** (Table 6).—The proportion of female wage earners in the state is small, but 5.2 per cent in 1919. Biloxi is the only city in the state showing a larger proportion of female wage earners (59.6 per cent) in 1919 than of males; this is due to the extensive employment of females in the canning industry in that city.

**Wage earners, by months** (Table 7).—The statistics for wage earners are intended to show the steadiness of employment, or the reverse, in accordance with the industrial conditions existing during the several census years.

**Wage earners, by months, for selected industries and for cities** (Table 8).—In addition to the number of wage earners employed by months, similar data are given for males and females for all industries combined and for the nine cities having 10,000 inhabitants or more. Although there were several industries in the state in which the females predominated, the canning industry is the only one of importance in this class.

**Prevailing hours of labor** (Table 9).—The figures presented in this table show a shortening of the working day since the census of 1914. In that year 7.2 per cent of the wage earners was included in the group "48 and under" as against 18.5 per cent in 1919, while in the "60" and "over 60" groups there was 75.2 per cent of the total average number of wage earners in 1914, as compared with 67.7 per cent in 1919.

**Size of establishments, by average number of wage earners, for selected industries and for cities** (Table 10).—The predominance of the number of small establishments, when based on the number of wage earners employed, is evidenced in this table by the fact that of the total number of establishments in the state, 95.3 per cent was in the several classes having fewer than 101 wage earners, while such establishments employed only 42.2 per cent of the total number of wage earners. On the other hand, the number of establishments having more than 100 wage earners formed only 4.7 per cent, but reported 57.8 per cent of the average number of wage earners in the state.

Size of establishments, by value of products (Table 11).—At the censuses of 1909 and 1914 establishments with products valued at \$100,000 to \$1,000,000 constituted one group, but at the census of 1919 this group was subdivided into "\$100,000 to \$500,000" and "\$500,000 to \$1,000,000." Separate figures for the number of establishments and value of products have been compiled, however, from the returns for 1914. The table, therefore, gives combined figures for all items for 1909, and for the average number of wage earners and value added by manufacture for 1914.

Size of establishments, by value of products, for selected industries (Table 12).—In the preparation of this table it was necessary in several instances to combine the establishments of one group with those of another group, to avoid the possibility of disclosing the operations of individual establishments.

Size of establishments, by value of products, for cities of 10,000 inhabitants or more (Table 13).—This table illustrates the fact that the number of establishments of itself is no real index of manufacturing activities.

Character of ownership (Table 14).—Corporate ownership in 1914 reported 22.3 per cent of the total number of establishments in the state, 74.7 per cent of the average number of wage earners, and 79.2 per cent of the value of products. The corresponding proportions for 1919 were 20.3 per cent, 72.8 per cent, and 75.5 per cent, respectively. There was an increase of

7,018, or 20.1 per cent, in the average number of wage earners under corporate ownership, while the value of products increased \$86,390,163, or 137.2 per cent, from 1914 to 1919.

Manufactures, by population groups, in cities of 10,000 inhabitants or more (Table 15).—This table shows relatively the importance of the manufactures in the nine cities in the state as to value of products. Combined these cities reported 24.9 per cent of the total for the state in 1919, as compared with 23.4 per cent in 1914. The proportion of wage earners for the nine cities was also greater in 1919, being 20.5 per cent, as against 17.4 per cent in 1914.

Number and horsepower of types of prime movers (Table 16).—There was an increase in both the owned and rented power from 1914 to 1919, and although rented power formed but a small proportion of the total power in the state, the percentage that rented power formed of the total was greater in 1919 than in 1914. During this five-year period the owned power increased 7,503 horsepower, or 4.2 per cent, and rented power 6,877 horsepower, or 101 per cent.

Fuel consumed (Table 17).—This table shows the principal kinds of fuel used by the manufacturing plants in the state in 1919 and 1914, and gives separately for 1919 the amounts consumed by a number of important industries which use considerable quantities of fuel.

TABLE 1.—COMPARATIVE SUMMARY: 1919, 1914, 1909, 1904, AND 1899.

	MANUFACTURING INDUSTRIES.					PER CENT OF INCREASE. <sup>1</sup>

## SPECIAL STATISTICS.

For a number of important industries the Census Bureau collects, by means of special schedules, certain details which do not appear on the general schedule. Data for six of these industries in Mississippi are here presented.

Lumber and timber products (Table 18).—This table presents statistics pertaining to the chief products of the lumber industry for 1919, 1914, and 1909. Measured by the value of products, this is the most important manufacturing industry in the state, contributing 44.3 per cent of the total value of all manufactured products in 1919.

For a number of years Mississippi has been one of the leading lumber-producing states, ranking fourth in the production of this commodity in 1919 and third for both 1914 and 1909.

In 1919 yellow pine contributed 1,980,395 M feet, board measure, or 82.9 per cent of the total lumber cut in the state; red gum 168,226 M feet, or 7 per cent; and oak 132,804 M feet, or 5.6 per cent. Other important woods cut were cottonwood, cypress, hickory, ash, elm, yellow poplar, tupelo, and maple.

TABLE 18.—PRODUCTION OF LUMBER, LATH, AND SHINGLES: 1919, 1914, AND 1909.

PRODUCT.	QUANTITY.		
	1919	1914	1909

Lath..... thousands..	96,204	( <sup>2</sup> )	90,926
Shingles..... thousands..	34,002	( <sup>2</sup> )	151,308

<sup>1</sup> Data for custom mills not included.

<sup>2</sup> Not reported.

**Oil and cake, cottonseed (Table 19).**—This table shows the quantities of the chief products of the industry for 1919, 1914, and 1909. The statistics for 1919 relate to the crushing season of 1918-19—that is to the handling of the seed from the crop of 1918. They cover the operation of only those establishments which were engaged primarily in the cottonseed industry. The crude products reported do not include those intermediate products, which were used in further manufacture.

Mississippi ranked sixth among the states in cottonseed products manufactured. While there has been an increase in the total value of products, there has been an actual decrease in the quantity of seed handled, the amount in 1919 being less than in 1914 and 1909.

TABLE 19.—OIL AND CAKE, COTTONSEED: 1919, 1914, AND 1909.

MATERIAL AND PRODUCT.	QUANTITY.		
	1919	1914	1909
Cottonseed, crushed..... tons (2,000 lbs.)..	438,725	506,190	559,357
Crude products manufactured:			
Oil..... gallons..	18,255,656	21,312,278	24,386,289
Meal and cake..... tons (2,000 lbs.)..	219,204	232,126	244,738
Hulls..... tons (2,000 lbs.)..	106,690	138,669	181,797
Linters..... pounds..	43,739,388	35,682,381	24,237,536

**Cotton goods (Table 20).**—This table presents detailed statistics as to materials and products of the cotton-goods industry in Mississippi for 1919, 1914, and 1909. It will be seen from the details for materials used that the mills in the state largely produced their own yarn, raw cotton representing 87.2 per cent of the total cost of all materials in 1919.

TABLE 20.—COTTON GOODS: 1919, 1914, AND 1909.

Looms, number.....	8,883	3,587	4,783

<sup>1</sup> Not reported.

The total value of products increased by \$5,277,762, or 189.2 per cent, from 1914 to 1919, notwithstanding a decrease in yardage. Woven goods was the principal product and constituted 81.2 per cent of the total value for the industry in 1919. The total output of woven goods was 45,596,264 square yards in 1909, 42,901,210 square yards in 1914, and 38,727,354 square yards in 1919. The decrease in the production of woven goods for the last five-year period was 9.7 per cent, and for the last ten-year period 15.1 per cent.

**Turpentine and rosin (Table 21).**—The quantities and values of turpentine and rosin produced by 45 establishments in 1919, 61 in 1914, and 64 in 1909, are shown in this table.

The working unit in the gathering of crude gum is called a crop, which consists of 10,500 boxes or cups. In 1919 there were 822 crops worked in the state. Of these, 275 were from "virgin" trees, or trees worked the first year; 257 from "yearling," or trees worked the second year; and 290 from "pulling," or trees worked the third and subsequent years. Of the foregoing, 69 were worked from back-boxed timber—20 "virgin," 15 "yearling," and 34 "pulling."

In 1919 only the cup system was reported as being used for gathering crude gum in the state. In 1909 and 1914 both the box system and cup system were used. In the former year 831 crops out of a total of 1,053 and in the latter year 17 crops out of a total of 1,138 were gathered by the box system.

TABLE 21.—PRODUCTION AND VALUE OF TURPENTINE AND ROSIN: 1919, 1914, AND 1909.

PRODUCT.	1919	1914	1909
Total value.....	\$5,547,813	\$1,997,139	\$1,474,629
Spirits of turpentine:

All other products, value.....	\$457,205	\$197,941	\$399,773

<sup>1</sup> In addition, there were produced in cottonseed-oil mills and other industries 18,742 tons of fertilizer, valued at \$740,512, in 1919; 29,794 tons, valued at \$521,174, in 1914; and 33,971 tons, valued at \$616,052, in 1909.

**Printing and publishing (Table 23).**—This table shows the publications in Mississippi, by number and aggregate circulation per issue, classified according to period of issue for the years 1919, 1914, and 1909.

The decrease shown in the total number of publications and of circulation is due to the disappearance of a number of weekly newspapers—a decrease also accentuated at the census of 1914.

The increase in circulation of daily newspapers—23.3 per cent for the five-year period from 1914 to 1919, and 18.9 per cent for the decade—was accompanied by a small decrease in number of publications for both periods.

Of the dailies, 11 were published in the afternoon, a decrease of 1 from 1914 to 1919, the circulation increasing slightly. The increase in the circulation of morning newspapers, the number of which decreased by 2 during the five-year period, was 10,518, or 66.3 per cent. The circulation of Sunday newspapers increased 4,784 during the same period, or 14.7 per cent. All publications were printed in the English language.

TABLE 23.—PRINTING AND PUBLISHING: 1919, 1914, AND 1909.

PERIOD OF ISSUE.	NUMBER OF PUBLICATIONS.			AGGREGATE CIRCULATION PER ISSUE.		
	1919	1914	1909	1919	1914	1909

## GENERAL TABLES.

Table 28 gives the number of establishments, average number of wage earners, primary horsepower, wages, cost of materials, and value of products for all industries combined and for selected industries in the state, and for all industries combined for the cities of Columbus, Greenville, Hattiesburg, Jackson, Laurel, Meridian, Natchez, and Vicksburg for 1919, 1914, and

1909. Certain kindred industries are combined in some instances for comparison with 1909.

Table 29 presents, for 1919, statistics in detail for the state as a whole and for each industry that can be shown without the disclosure of individual operations, and for all industries combined in the nine cities of 10,000 inhabitants or more.

TABLE 28.—COMPARATIVE SUMMARY FOR SELECTED INDUSTRIES AND FOR CITIES: 1919, 1914, AND 1909.

INDUSTRY.	Census year.	Number of establishments.	Wage earners (average number).	Primary horse-power.	Wages.	Cost of materials.	Value of products.	INDUSTRY.	Census year.	Number of establishments.	Wage earners (average number).	Primary horse-power.	Wages.	Cost of materials.	Value of products.

\*All other industries embrace—

Agricultural implements.....	2	Clothing, men's.....	1	Flavoring extracts.....	5
Belted leather.....	1	Coffins, burial cases, and undertakers' goods.....	2	Furniture.....	1
Cars, steam-railroad, not including operations of railroad companies.....	1	Cordage and twine.....	1	Knit goods.....	1
		Druggists' preparations.....	1	Millinery, trimmed hats and hat frames.....	1

1 Includes water wheels and turbines (irrespective of ownership of water supply) and water motors (operated by water from city mains).

2 Chiefly electric motors operated by rented (or purchased) current; other power included (chiefly shaft-belt or transmitted power from neighboring power plants).

3 No figures given for reasons stated under "Explanation of terms."

## COMBINED AND SPECIFIED INDUSTRIES: 1919.

EXPENSES.								Value of products.	Value added by manufacture.	POWER.					
Salaries and wages.			For contract work.	Rent and taxes.		For materials.				Primary horsepower.					Electric horsepower generated in establishments reporting.
Officials.	Clerks, etc.	Wage earners.		Rent of factory.	Taxes, Federal, state, county, and local.	Principal materials.	Fuel and rent of power.			Total.	Owned.				
										Steam engines (not turbines).	Steam turbines.	Internal-combustion engines.	Water power. <sup>1</sup>	Rent. <sup>2</sup>

Models and patterns, not including paper patterns.  
Paper and wood pulp.  
Pickles and sauces.  
Saws.

1 Scales and balances.  
1 Shipbuilding, steel.  
1 Slaughtering.  
1 Sugar, cane.  
1 Tools, not elsewhere specified.  
1 Vinegar and cider.  
1 Wood distillation.  
1 Wood, turned and carved.

\* Same number reported for one or more other months.  
\* None reported for one or more other months.  
\* Same number reported throughout the year.

## MANUFACTURES—MISSISSIPPI.

TABLE 29.—DETAILED STATEMENT OF ALL INDUSTRIES.

INDUSTRY.	Number of establishments.	PERSONS ENGAGED IN THE INDUSTRY.								WAGE EARNERS DEC. 15, OR NEAREST REPRESENTATIVE DAY.				Capital.	
		Total.	Proprietors and firm members.	Salaried officers, superintendents, and managers.	Clerks, etc.		Wage earners.			Total.	16 and over.		Under 16.		
					Male.	Female.	Average number.	Number, 15th day of—			Male.	Female.	Male.		Female.
								Maximum month.	Minimum month.
