CHAPTER III.—STATISTICS BY COLOR AND TENURE OF FARM OPERATOR

Introduction.—This chapter presents statistics collected in 1930 for the number of farms, the total farm acreage, the acreage of specified classes of farm land according to use in 1929, and the value of specified classes of farm property, classified according to the color of the farm operator and the tenure under which the land was held. Statistics are also presented for the number of farms of various sizes in each color and tenure class, the size grouping being based on the total acreage in individual farms. Supplemental information is given for the owned and rented acreage in those farms not wholly owned by the operator (part-owner farms), the relationship of tenants to their landlords, and the amount of farm rental paid by cash tenants classified by relationship to landlord.

The agricultural schedules, beginning with 1880, have carried inquiries concerning the tenure under which farms were operated. In 1880 and 1890, only the number of farms was classified by tenure; beginning with 1900 the number of farms, the total farm acreage, and the value of specified classes of farm property have been so classified; while in 1925 and 1930, when the land was classified according to use, several classes were distributed by tenure of operator. The number of farms in different size groups has been published by tenure for the census years 1880, 1890, 1900, 1925, and 1930 though the data are shown in this chapter for 1925 and 1930 only.

Closely related to the question of tenure, in a study of the agricultural industry, is that of the color of the farm operator, which was first used in 1900 in tabulating the census data for agriculture. Therefore, while the title of this chapter refers to color and tenure, some of the historical data must necessarily be presented by tenure only. Also, on account of their value, some of the data are given by color only. However, all historical data according to color, tenure, or color and tenure are not included in this chapter.

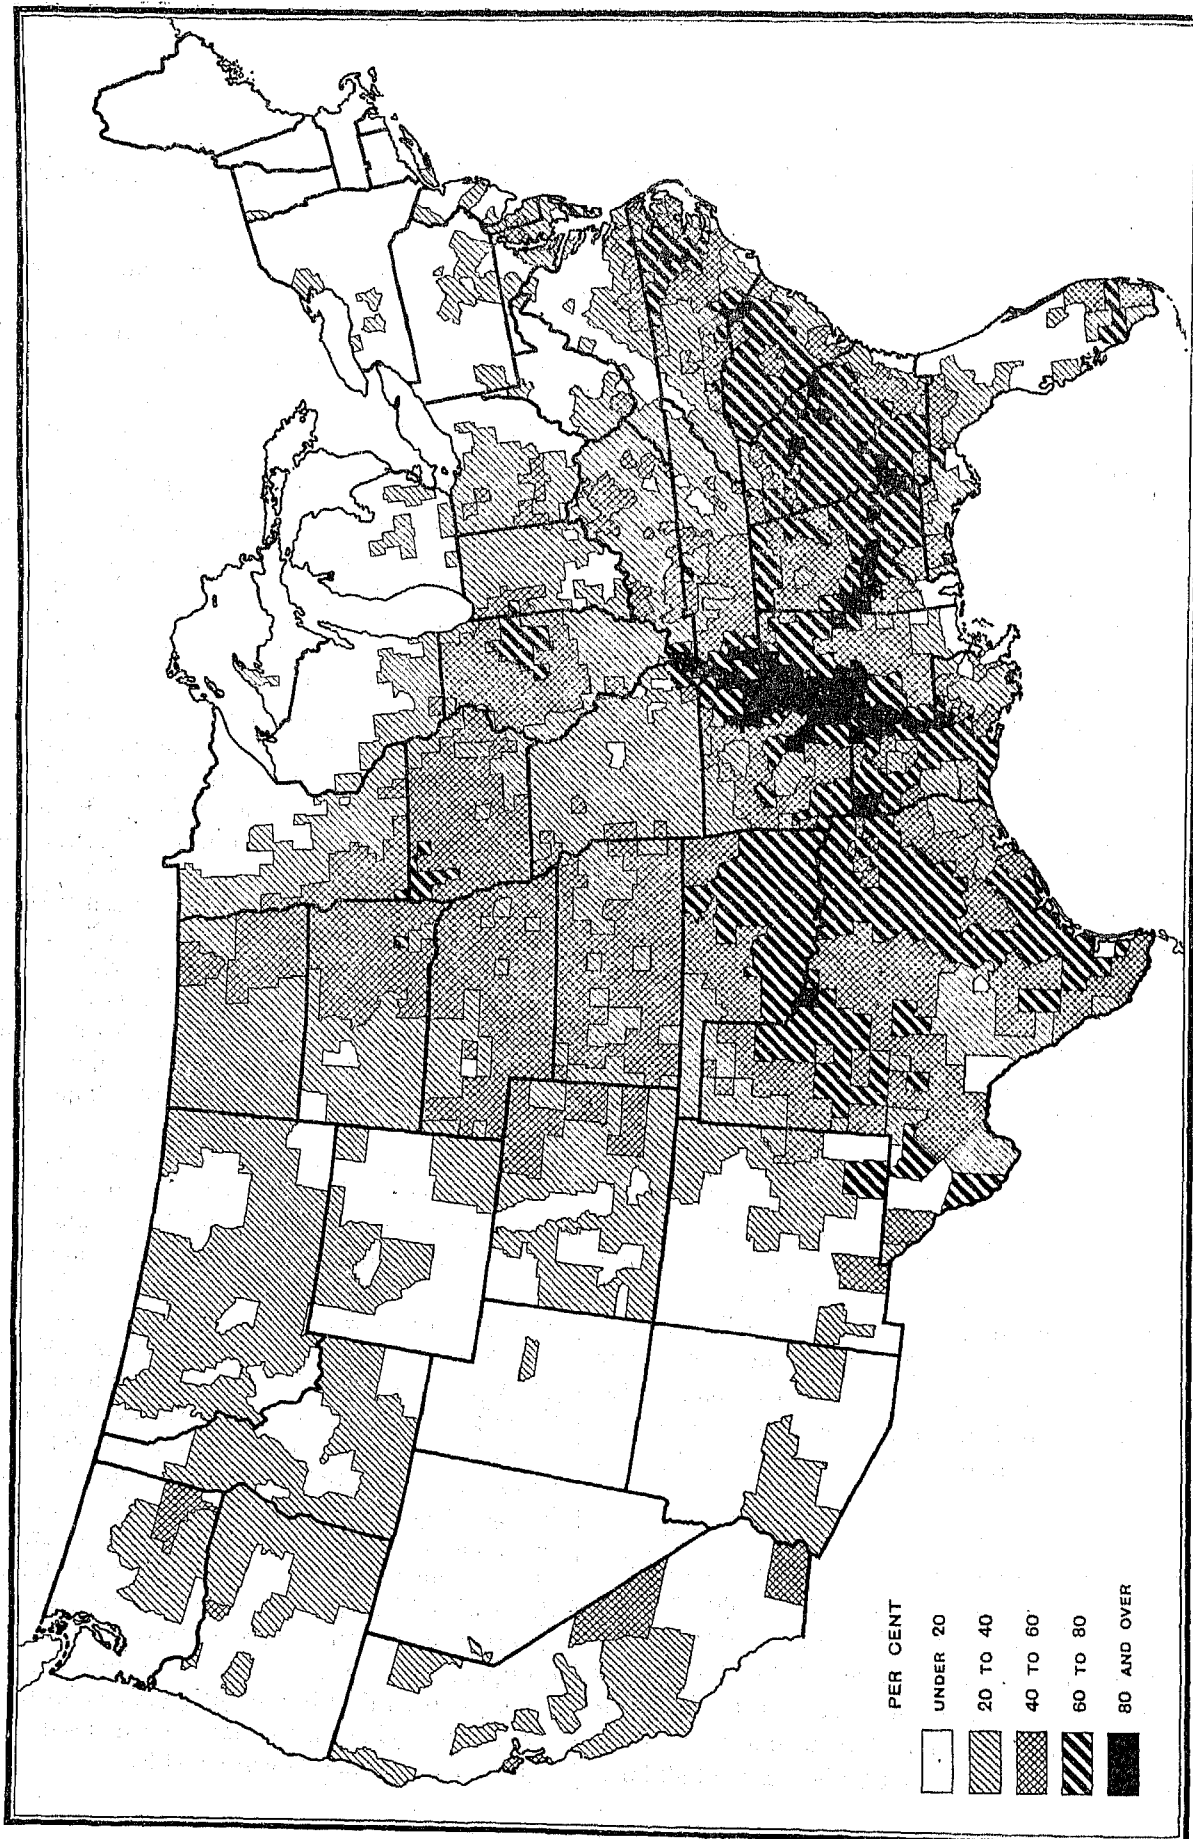

When statistics are given for any of these subjects for "All farm operators" and its two component color groups "White farm operators" and "Colored farm operators" only, the classification is termed by color; when the data are presented for the tenure classes of each of the color groups the classification is designated by color and tenure; and when information is given only for the tenure classes of all farm

operators (white and colored combined) the classification is designated by tenure.

The classification based on color and tenure is so important that appropriate data are also shown in other chapters. Thus, in Chapter IV, "Statistics by Race of Farm Operator," farm statistics are given for the individual races in the two color groups—Mexicans and Hindus being included with "White farm operators"; and Negroes, Indians, Japanese, Chinese, and other nonwhite races comprising the group "Colored farm operators"; in Chapter V, "Farm Operators by Age, Number of Years on Farm, and Days of Other Occupation," most of the statistics are given by color and tenure; in Chapter VII, "Selected Farm Expenditures, Cooperative Marketing and Purchasing, and Farm Facilities," most of the data are classified by tenure and in some cases by color and tenure; and in Chapter XIV, "Type of Farm," a summary table gives the various types of farms according to the tenure only of the farm operator.

According to the census definition, a "Farm operator" is a person who operates a farm, either performing the labor himself or directly supervising it. Therefore, the number of farm operators is the same as the number of farms, so that the two terms "number of farm operators, by tenure" and "number of farms, by tenure" are used interchangeably. The three main classes of farm operators, on the basis of tenure, are owners, managers, and tenants. Beginning with 1900, a distinction has been made between owners who operated only their own land, and those who, in addition to their own land, were operating some land rented from others. More or less arbitrary rules have been necessary to subclassify tenants as there are numerous variations in landlord-tenant contracts. From the beginning, the distribution has been made on the basis of the stipulated rent, together with the information as to whether the landlord or the tenant furnished the work animals. In the census years 1925 and 1930, cash tenants were shown for the Northern and Western States, and cash tenants and croppers for the Southern States, while all other classes of tenants, including those who failed to specify their rental, were grouped together under the heading "Other tenants." This grouping of tenants differs somewhat from that for other years so that in presenting statistics in historical series qualifying notes have been used where the figures are not exactly comparable.

PERCENTAGE OF ALL FARMS OPERATED BY TENANTS, BY COUNTIES, 1930

Farm operators—tenure classes.—The several tenure classes used in the 1930 census were as follows:

Full owners are farm operators who own all the land which they operate.

Part owners are farm operators who own part of the land which they operate, and rent and operate additional land. Part owners, therefore, have some of the characteristics of full owners and some of the characteristics of tenants.

Managers are farm operators who operate farms or ranches for the owners, receiving wages or salaries for their services.

Tenants are farm operators who operate hired land only. In the present report separate figures are shown for three classes of tenants—namely, (1) cash tenants who pay a cash rental, as \$7 per acre for crop land or \$500 for the use of the whole farm; (2) croppers (reported only for the Southern States), who are defined as share tenants, to whom landlords furnish all the work animals; and (3) all other tenants, including those giving a share of the products for the use of the land or a share for part and cash for part.

In classifying tenants it was found that a few indicated that their rental payments were made, or were stipulated to be made, in cash but failed to specify the amount. In the classification of "Cash tenants" were included those reporting a fixed sum of money, those whose rentals were stipulated to be made in cash, but amount not given, and those whose payments were closely akin to cash, such as farm real-estate taxes, board for landlord, expenditures for repairs, and for upkeep of the farm. However, those who reported payment of cash together with a designated share of the products (share-cash tenants) and those who paid a stated amount of farm products for the use of the farm, as 3 bales of cotton or 500 bushels of corn (standing renters), were grouped with "Other tenants."

Number and acreage of farms, by color and tenure of operator.—Of the 6,288,648 farms in the United States in 1930, there were 3,568,394 or 56.7 per cent operated by owners, 55,889 or 0.9 per cent operated by managers, and 2,664,365 or 42.4 per cent operated by tenants. The percentage of tenancy has shown an upward trend through each succeeding census period, increasing from 25.6 in 1880 to a maximum of 42.4 in 1930. However, the rise was not uniform throughout the various periods. From 1890 to 1900 tenancy made its greatest increase, from 28.4 to 35.3 per cent. In 1920 when the percentage was 38.1, and in 1925, when it was 38.6, it appeared to be about stationary, but between 1925 and 1930 it rose again from 38.6 to 42.4, with all States showing an increase except Connecticut, New York, New Jersey, Pennsylvania, Delaware, South Carolina, and Arizona.

Farm tenancy, as the figures in the accompanying tables show, is most prevalent in the three divisions comprising the South, namely—the South Atlantic, East South Central, and West South Central Divisions—though it is also of considerable importance in the West North Central Division. Among the States, the percentages in 1930 ranged from highs of 72.2 in Mississippi and 68.2 in Georgia to lows of 4.5 in Maine and 5.3 in New Hampshire. One of the accompanying bar diagrams shows the proportion of tenancy in each State for the two census years 1930 and 1920, and also gives a picture of the percentage of tenancy in each State compared with all other States. The proportion may vary considerably within a State as is shown by the map giving the percentage of tenancy, by counties, in 1930.

AGRICULTURE

TABLE 1.—NUMBER OF FARMS AND FARM ACREAGE, 1930, 1925, AND 1920; AND SPECIFIED CLASSES OF LAND ACCORDING TO USE IN 1929 AND 1924; BY COLOR AND TENURE OF OPERATOR; FOR THE UNITED STATES

[Statistics for 1930 relate to Apr. 1, and for 1925 and 1920 to Jan. 1. Figures for divisions and States in Tables 19, 20, 21, 22, and 23. "White" includes Mexicans and Hindus. "Colored" includes Negroes, Indians, Chinese, Japanese, and all other nonwhite races]

¹ Data for white and colored operators available for the Southern States only. See Table 7.
² A minus sign (-) denotes decrease.
³ Figures for standing renters (renters paying a fixed quantity of products) were included with "Other tenants" in 1930 and 1925; in 1920 they were included with "Other tenants" for the Southern States only, and with "Cash tenants" for the Northern and Western States.
⁴ Other than plowable or woodland pasture.

In 1930, for the United States as a whole, 85.4^{per} cent of all farm operators were classed as white and 14.6 per cent as colored; in the South, 27.3 per cent were classed as colored while for the remaining States combined, only 1.1 per cent were classed as colored. Since 96.2 per cent of all colored farm operators were located in the South, the colored group is of such minor importance in other sections that many of the percentages for white farm operators and for colored farm operators are given only for Southern divisions and States, though the base figures are presented for all States. Even in those States, such as Mississippi and South Carolina, where colored farm operators were most numerous, some counties had a much higher percentage of colored than did other counties. The proportion represented by colored farm operators in 1930 is shown for all counties in one of the accompany-

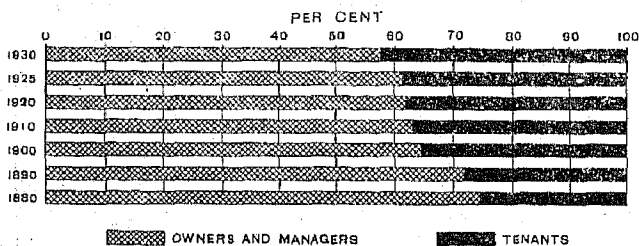

ing maps while a bar diagram is presented to compare the proportion of colored farm operators in the various States and within the same State for the two census years 1930 and 1920. Most of the colored farm operators in the South are Negroes; while in the other sections, particularly in the Western States, most of the colored reported are Indians or Asiatics. In 1925, statistics by color of farm operator are available for the Southern States only.

For the United States as a whole, in 1930, farms operated by owners averaged 173.3 acres in size; by managers, 1,109.1 acres; and by tenants, 115 acres. Each of these figures was higher than the corresponding figure for either 1925 or 1920. Though for the United States as a whole, tenant farms were smaller in size than farms of other tenures, this condition was not characteristic of the entire country, but was due mostly to special conditions in the South. In all the cotton-growing States, tenant farms were considerably smaller than owner-operator farms, while in many of the Northern States and in several of the Western States, the average acreage was larger for farms operated by tenants than for those operated by owners.

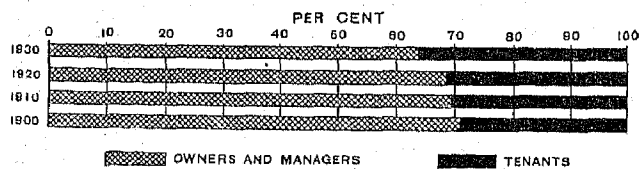

In all States, farms operated by managers were larger in size in 1930 than those operated by either owners or tenants. This is due to the fact that many extensive ranches, country estates, and large farms owned by institutions, are operated by managers, and also to the fact that managers are seldom employed to operate farms having normally low gross income.

Although farm tenants in the United States constituted 42.4 per cent of all farm operators in 1930, and their crop acreage included 41.9 per cent of the total acreage from which crops were harvested, their farms comprised only 31.1 per cent of the total land in farms. The relative importance of crop production and livestock in farm operations of tenants was indicated by the fact that while they cultivated 41.9 per cent of all crop land in the United States, their plowable pasture land amounted to 27.5 per cent of all plowable pasture and 19.6 per cent of other pasture (excluding plowable and woodland).

ALL FARM OPERATORS IN THE UNITED STATES, PER CENT DISTRIBUTION, BY TENURE: 1880 TO 1930

WHITE FARM OPERATORS IN THE UNITED STATES, PER CENT DISTRIBUTION, BY TENURE: 1900 TO 1930

COLORED FARM OPERATORS IN THE UNITED STATES, PER CENT DISTRIBUTION, BY TENURE: 1900 TO 1930

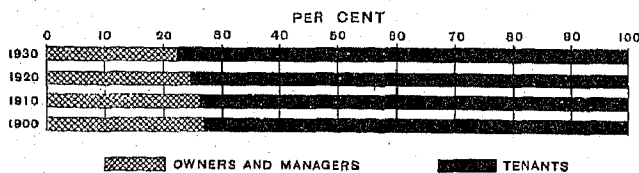

TABLE 2.—AVERAGE ACREAGE PER FARM, AND OF SPECIFIED CLASSES OF LAND (BASED ON ALL FARMS), BY COLOR AND TENURE OF OPERATOR, FOR THE UNITED STATES: CENSUSES OF 1930, 1925, AND 1920

[Statistics for 1930 relate to Apr. 1, and for 1925 and 1920 to Jan. 1. All averages based on figures in each color and tenure class in Table 1; see notes on that table. Figures for divisions and States in Tables 21 and 22]

¹ A minus sign (-) denotes decrease.

² Figures for standing renters (renters paying a fixed quantity of products) were included with "Other tenants" in 1930; in 1920 they were included with "Other tenants" for the Southern States only, and with "Cash tenants" for the Northern and Western States; and in 1910 they were included with "Cash tenants" for all States.

TABLE 6.—PER CENT DISTRIBUTION OF FARMS AND OF FARM ACREAGE, BY COLOR OF OPERATOR, FOR THE UNITED STATES: 1900 TO 1930

[Statistics for 1930 relate to Apr. 1; for 1920 to Jan. 1; for 1910 to Apr. 15; and for 1900 to June 1. Percentages for 1930 and 1920, based on figures in Table 1; see headnote relating to color. Figures for divisions and States in Table 24]

PERCENTAGE OF ALL FARMS OPERATED BY COLORED FARMERS, BY COUNTIES, 1930

Farm operators—minor tenure classes.—Of the total number of owner-operators an increasing proportion was reported as part owners renting additional land, each census year, with exception of 1910, since 1900. This proportion rose from 12.4 per cent in 1900, and 14.3 per cent in 1925 to 18.4 per cent in 1930.

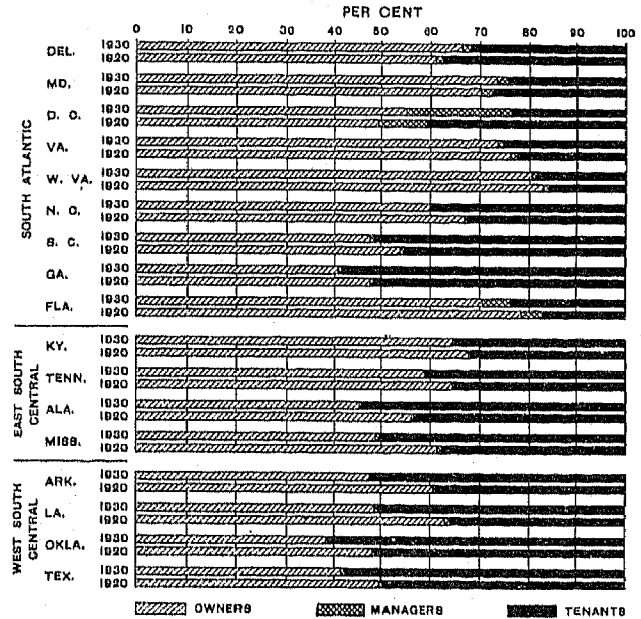

The increase in part owners amounting to 101,908 since 1925, is more noteworthy in view of the fact that the number of full owners decreased 401,846 in that period, and furthermore, that the rate of increase was much greater than that of tenants.

The number of cash tenants represented 18.4 per cent of all tenants in 1930, as compared with 16 per cent in 1925 and 19.6 per cent in 1920; in the latter year the number included a few standing renters in the Northern and Western States. Renting farms on a cash basis was the most common method of rental in 1930 in the New England and Pacific Divisions where the percentages were respectively 67.6 and 53.6. Cash tenants were also relatively numerous in the Middle Atlantic, East North Central, and West North Central Divisions, but were of considerably less importance in the three Southern divisions.

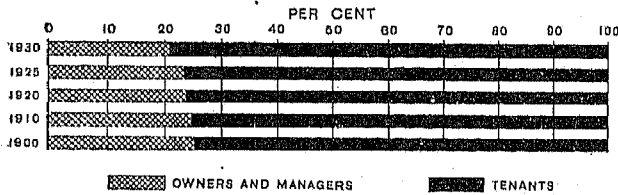

Farm tenure in the South.—A considerable proportion of the tenants in the South occupy a very different

with living quarters, land, work stock, and perhaps tools, fertilizer, and cash advances for living expenses; and receives for the work of himself and family a share of the crop at the end of the season. The cropper

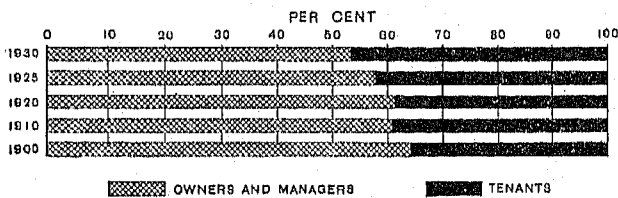

WHITE FARM OPERATORS, PER CENT DISTRIBUTION, BY TENURE, FOR THE SOUTHERN STATES: 1930 AND 1920

WHITE FARM OPERATORS IN THE SOUTH (AS A WHOLE), PER CENT DISTRIBUTION, BY TENURE: 1900 TO 1930

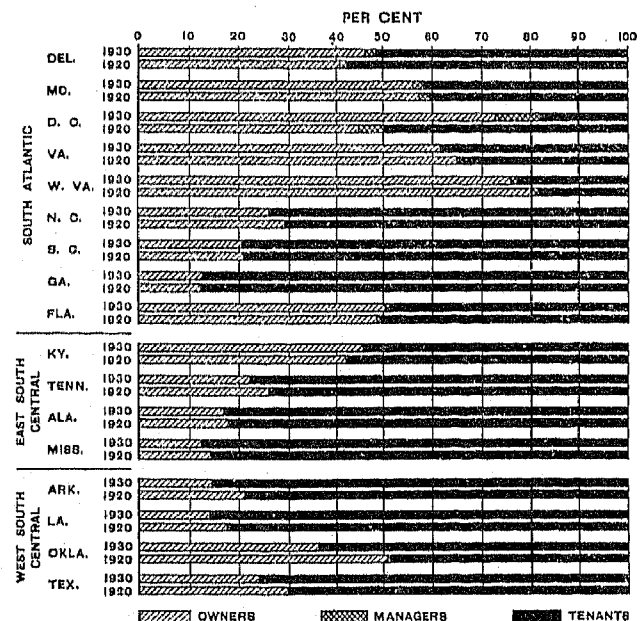

COLORED FARM OPERATORS IN THE SOUTH (AS A WHOLE), PER CENT DISTRIBUTION, BY TENURE: 1900 TO 1930

economic position from that usually occupied by tenants in other parts of the country. In the North and the West, the tenant farmer is normally working toward buying a farm and his tenancy thus represents merely a stage on the way to ownership. In the South, on the other hand, there are large numbers of tenants who do not look forward to ownership and for whom tenancy is the normal economic condition. This is particularly true of "Croppers" who in most cases are a direct product of the plantation system of farming. Such tenants are classified separately in the South in order to adequately portray that characteristic type of tenancy. The cropper contract is usually an agreement whereby the laborer is furnished

system came into being partly as a means of stabilizing the labor supply and partly because a certain class of agricultural workers needed operating capital and a certain degree of supervision in crop management.

COLORED FARM OPERATORS, PER CENT DISTRIBUTION, BY TENURE, FOR THE SOUTHERN STATES: 1930 AND 1920

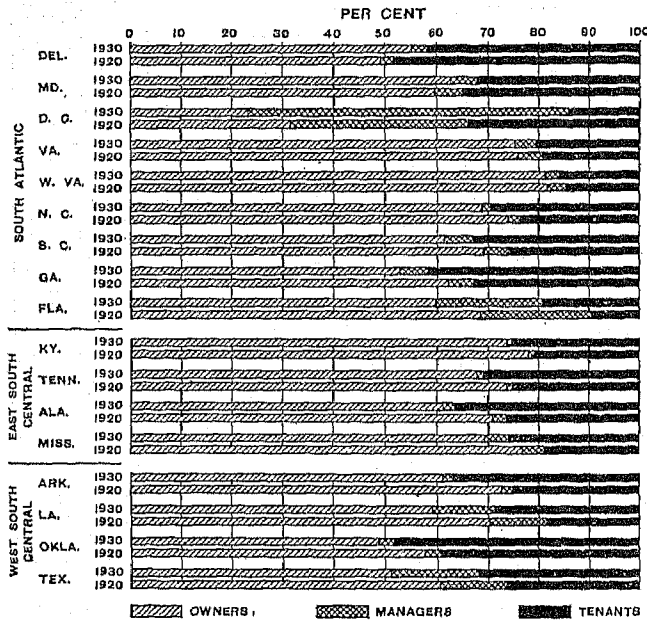

In the South, 55.5 per cent of the farm operators in 1930 were tenants renting 36.6 per cent of the total farm acreage. Tenants reported 53.2 per cent of the total acreage from which crops were harvested in 1929.

Even with croppers eliminated, the percentage of tenancy was higher in this section than in the rest of the country.

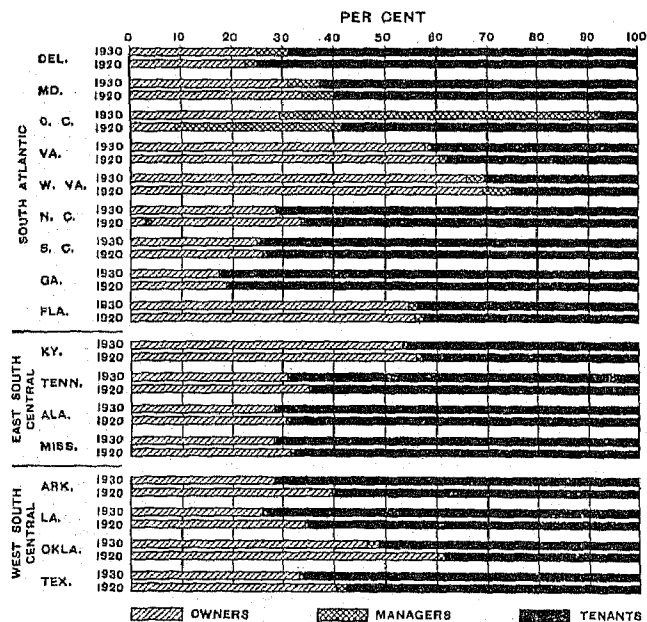

Many of the tenants in this area rent only a portion of a plantation, and that part rented is often all

ALL LAND IN FARMS OPERATED BY WHITE FARM OPERATORS, PER CENT DISTRIBUTION, BY TENURE, FOR THE SOUTHERN STATES: 1930 AND 1920

or nearly all plowable land. This is particularly true of croppers; thus in 1930, the percentage of all

ALL LAND IN FARMS OPERATED BY COLORED FARM OPERATORS, PER CENT DISTRIBUTION, BY TENURE, FOR THE SOUTHERN STATES: 1930 AND 1920

land in each tenure group representing land from which crops had been harvested in 1929 was: Full owners, 25.2; part owners, 28.2; managers, 7.5; cash tenants, 23.2; croppers, 61.7; and other tenants, 48.6.

The percentage of crop land harvested in 1929 by white croppers was 55.1, and by colored croppers was 72.4. When a plantation is rented out as a number of small farms, the rented portion usually includes a large part or the whole of the plowable acreage, so that the other land is reported as a part of the "home farm," usually operated by owner or manager. Partly for that reason and partly because farms of tenants, particularly "croppers," are often limited in area to the amount of cotton land which a family can work, farms of owners were much larger than farms of tenants.

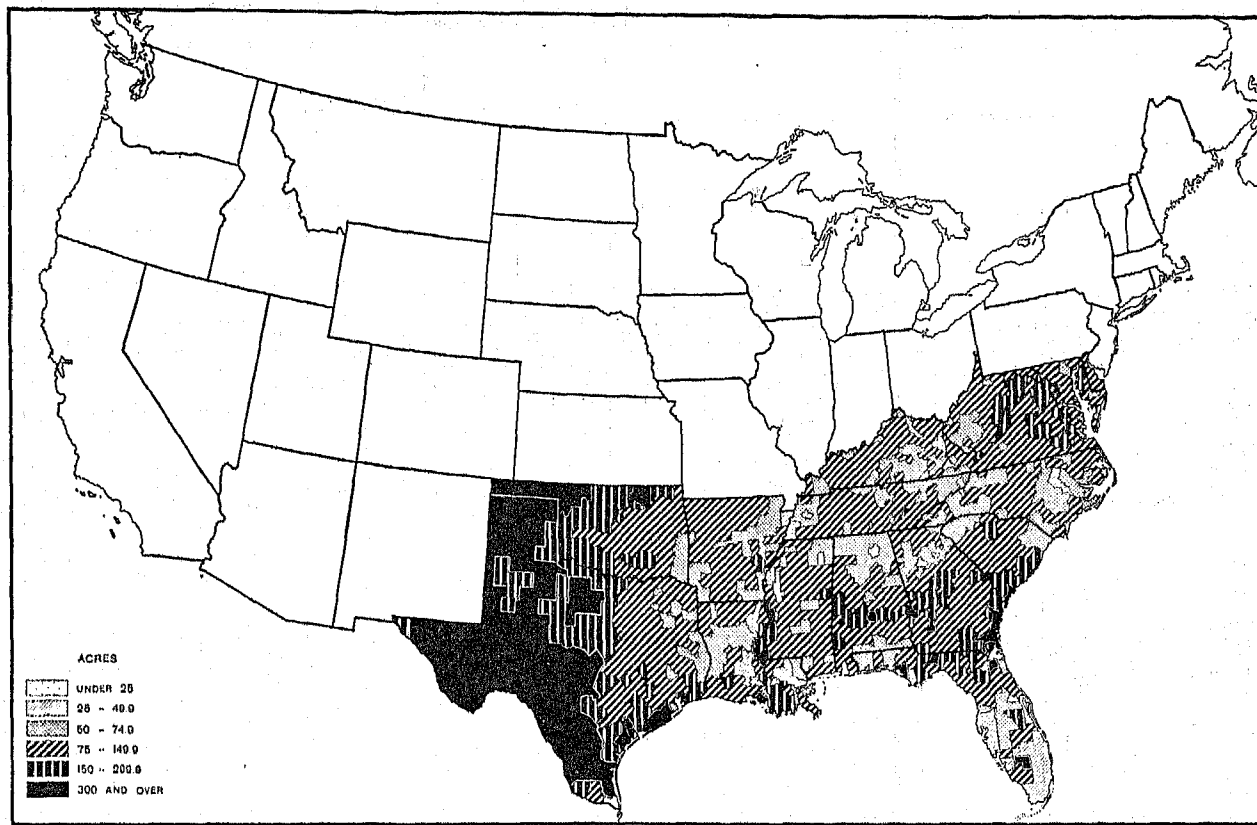

Table 7 is presented for the South as a whole, showing the number of farms, farm acreage, and acreage of land from which crops were harvested, with averages and percentages. Also, a series of bar diagrams are presented to show comparisons between the number of farms and farm acreage of white and colored operators.

Number of farms by size, and by color and tenure of operator.—The number of farms of various sizes is presented in this chapter according to the color and tenure of operator for 1930, and according to tenure only, for 1925. In presenting the 1930 data, 12 available size groups are used, while 7 groups only are available and used in presenting the 1925 figures. Figures are given in Table 25, by divisions and States, for 1930 and 1925, for the 3 major tenure classes and 7 size groups, but without the color classification; while, in Table 26, data are given for all tenure classes and all size groups for both white and colored for 1930 only. If more detail is desired for all farm operators in 1930, combinations can be made of the tenure classes in the two color groups in Table 26.

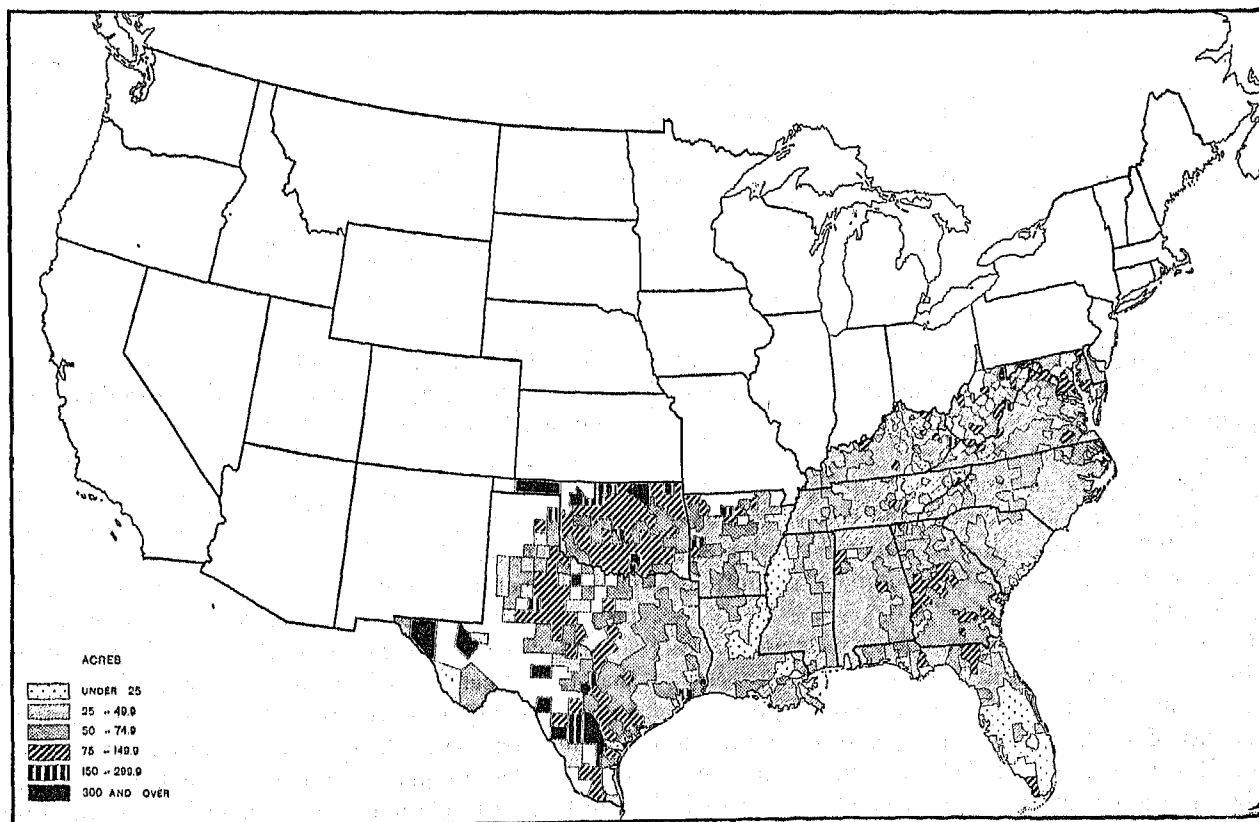

Owned and rented land in part-owner farms.—Table 8 shows for the United States, and Table 28 for geographic divisions and States, the number of farms operated by part owners and the total acreage in these farms divided into the part owned by the operator and that rented from other parties. Separate values were not secured for the owned and rented portions. The data for the owned and rented acreage are available only for 1930 and 1925.

The average size of part-owner farms, for the country as a whole, was 374.5 acres in 1930 compared with 354.9 acres in 1925. Approximately one-half of the acreage in farms of this tenure class was rented from others, the percentages being 50.9 for 1930 and 48.9 for 1925.

Value of specified classes of farm property, by color and tenure of operator.—The value of farm land and buildings and its component parts, all farm buildings and farm land exclusive of buildings; and the value of implements and machinery, are given in this chapter, by tenure of operator, for the years 1930, 1925, and 1920. The data for values, by color and tenure of operator, are confined almost entirely to 1930 and 1920.

A total of the values of these classes does not represent the total investment in farms and farm property, as the values of livestock and livestock products, inventories of feed, growing crops, and other miscellaneous items, are not included. For this reason and, also, because some tenants do not own all of their tools and livestock, the capital investment of operators of different tenures can not be compared.

The value of dwellings of farm operators and the number of farms reporting each of the specified classes of farm property are available and presented only for 1930. It is, therefore, possible to give only average values for each class of farm property, by color and tenure of operator, for 1930, when based on all farms and when based on the number of farms reporting each class of farm property. In comparing the relative proportions of farms of each tenure reporting the several classes of farm property, it may be noticed that the percentage of croppers reporting implements and machinery is lower than that for other tenures. This may be due to the fact that on plantations, where many of the croppers were located, tools were usually furnished by the landlord, and when kept at the plantation headquarters they were, probably, included with the equipment reported on the "home farm."

STATISTICS BY COLOR AND TENURE OF FARM OPERATOR

157

TABLE 9.—VALUE OF SPECIFIED CLASSES OF FARM PROPERTY,¹ BY TENURE OF OPERATOR, 1930, 1925, AND 1920; AND BY COLOR AND TENURE OF OPERATOR, 1930 AND 1920; FOR THE UNITED STATES

(Statistics for 1930 relate to Apr. 1, and for 1925 and 1920 to Jan. 1. Figures for divisions and States in Tables 20 and 30. "White" includes Mexicans and Hindus. "Colored" includes Negroes, Indians, Chinese, Japanese, and all other nonwhite races)

¹ Value of livestock by tenure of operator for 1920 is shown in Volume V of the Fourteenth Census Reports. Data for livestock by tenure not available for 1930 or 1925.

² Data for white and colored operators available for the Southern States only, see Table 15.

³ A minus sign (-) denotes decrease.

⁴ Figures for standing renters (renters paying a fixed quantity of products) were included with "Other tenants" in 1930 and 1925; in 1920 they were included with "Other tenants" for the Southern States only, and with "Cash tenants" for the Northern and Western States.

In 1930, when tenant farms in the country as a whole comprised 42.4 per cent of all farms and 31.1 per cent of the total farm area, they reported 34.2 per cent of the value of land and buildings, 37 per cent of the value of land excluding buildings, 26.8 per cent of the value of all buildings, 26.4 per cent of the value of all buildings, 26.4 per cent of the value of farm operators' dwellings, and 30.1 per cent of the

value of farm implements and machinery. Buildings formed a higher proportion of the value of farms operated by owners than those operated by managers or tenants. However, the value of the operators' dwellings formed about the same percentage of all farm buildings (including dwellings) in all tenures, with the exception of managers.

TABLE 10.—PER CENT DISTRIBUTION OF THE VALUE OF SPECIFIED CLASSES OF FARM PROPERTY AND PERCENTAGE OF REAL-ESTATE VALUES REPRESENTED BY SUBCLASSES, BY COLOR AND TENURE OF OPERATOR, FOR THE UNITED STATES: 1930, 1925, AND 1920

[Statistics for 1930 relate to Apr. 1, and for 1925 and 1920 to Jan. 1. All percentages based on figures in Table 9; see notes on that table. Figures for divisions and States in Tables 31 and 34]

Relationship of farm tenants to their landlords.—In 1930, in response to the question "Do you rent this farm from your own or your wife's parent, grandparent, brother, or sister?", an affirmative answer was given by 19.2 per cent of all tenants. The corresponding percentage for cash tenants was 19.6, for all other tenants 19.1. These data are presented for the United States in Table 17, for divisions and States in Table 37.

TABLE 17.—NUMBER OF TENANTS ACCORDING TO RELATIONSHIP TO LANDLORD, FOR THE UNITED STATES, 1930

(Statistics for divisions and States in Table 37)

ITEM	All tenants	Cash tenants	Other tenants
Total.....	2,604,365	480,210	2,175,155
Number related to landlord.....	510,500	95,804	414,780
Per cent of total.....	19.2	19.9	19.0
Number not related to landlord.....	1,905,432	342,031	1,563,401
Per cent of total.....	71.5	71.5	71.0
Number not reporting relationship.....	248,343	51,375	196,968
Per cent of total.....	9.3	10.5	9.0

Tables 18 and 38 are presented to show, respectively, for the United States and for divisions and States, the number of cash tenants, the acreage in their farms, and the total amount of rent paid with the average rental per acre. These averages should be used with

due consideration to the following facts: In some areas, mostly suburban, farms are rented mainly for residential use, which tends to make the "per acre" rents high in such areas; while in other sections, farms are rented mainly for agricultural purposes, which, of course, usually results in a lower rental per acre. Also, the average rental per acre may be affected when some farms have a large percentage of their area in rough or waste land, and others have a large percentage in improved land.

TABLE 18.—NUMBER OF CASH TENANTS ACCORDING TO RELATIONSHIP TO LANDLORD, WITH ACREAGE IN FARMS AND AMOUNT OF RENT PAID, FOR THE UNITED STATES, 1930

(Statistics for divisions and States in Table 38)

ITEM	Number	Land in farms (acres)	CASH RENT	
			Amount	Average per acre
All cash tenants.....	480,210	71,869,056		
Reporting amount of rent paid.....	485,880

STATISTICS BY COLOR AND TENURE OF FARM OPERATOR

TABLE 21.—AVERAGE ACREAGE PER FARM AND PER CENT DISTRIBUTION OF ALL LAND IN FARMS, 1930, 1925, AND 1920; AND OF SPECIFIED CLASSES OF LAND ACCORDING TO USE IN 1929 AND 1924 (BASED ON ALL FARMS); BY TENURE OF OPERATOR; BY DIVISIONS AND STATES

[Statistics for 1930 relate to Apr. 1, and for 1925 and 1920 to Jan. 1. All averages and percentages based on figures in Table 10, see notes on that table; corresponding data for white and colored operators in Table 22. Croppers are shown for Southern divisions and States only]

STATISTICS BY COLOR AND TENURE OF FARM OPERATOR

TABLE 31.—PER CENT DISTRIBUTION OF THE VALUE OF SPECIFIED CLASSES OF FARM PROPERTY AND PERCENTAGE OF REAL-ESTATE VALUES REPRESENTED BY SUBCLASSES, BY TENURE OF OPERATOR, BY DIVISIONS AND STATES: 1930, 1925, AND 1920

[Statistics for 1930 relate to Apr. 1, and for 1925 and 1920 to Jan. 1. All percentages based on figures in Table 20. Corresponding data for white and colored operators in Table 34]

DIVISION OR STATE AND TENURE	PER CENT DISTRIBUTION OF VALUES												PER CENT OF VALUE OF LAND AND BUILDINGS REPRESENTED BY—						Dwellings, per cent of value of all buildings, 1930	
	Land and buildings			Land alone			All buildings			Dwellings of farm operators, 1930	Implements and machinery			Land alone			All buildings
