

### CHAPTER III.—DESCRIPTION OF THE TABLES AND SUGGESTED USES

In general, the summary tables herein follow the form of corresponding tables in the State reports. In addition, most tables carry a summary by States showing the geographic distribution of the totals.

In studying the retail situation in a particular State or division, an important function of this summary is to establish readily the relation between the State or division and the balance of the country, as to any or all of the factors presented herein, before proceeding with a detailed study of the State or division of particular interest.

#### STANDARD SUMMARY OF RETAIL FACTS

At the beginning of each State report is a summary of the high lights of the retail situation within that State, arranged in a standard form for ready comparison of differences between the States. This volume presents a composite of these high lights, and a comparison between the States (p. 8). It is a primer of retail distribution in the United States.

#### TABLE 1. RETAIL DISTRIBUTION, BY KINDS OF BUSINESS

Each business classification used in the State reports is summarized in this table, as to number of stores, net sales, proportion of the retail dollar spent in each kind of store, stock on hand at the end of the reporting year, the number of full-time and part-time employees, pay roll and the number of proprietors and firm members actively engaged in retailing but not included in the count of employees. In the second half of this table the same factors are shown in the form of a comparison of State totals, without regard to kinds of business.

#### TABLE 2. OPERATING EXPENSES, BY KINDS OF BUSINESS

A valuable comparison is presented herein of the relative cost of doing business in the various kinds of stores. The average rent which each kind of business pays for its premises is indicated by the rental figures reported, which apply strictly to leased premises and are shown in relation to the sales in such leased premises. This table also indicates that in some States a much larger proportion of the business is done in leased premises than in other States, a condition which is of particular significance at this time to insurance companies, realtors, property owners and those interested in the possibility of reducing the cost of distribution. (See paragraph on page 41 headed "Tenancy.")

This table introduces another factor in the cost of store operation—that of the wage value of the services

of active proprietors. The schedules on which the census is based called for the salaries or compensation of active proprietors, but the figures reported were so varied and often fantastic that they were useless. In lieu thereof there is included in this table a column showing the value of proprietors' services computed at the same rate as that paid, in the same kind of business, to full-time employees. When a proprietor works actively in his store in lieu of an employee there is included, for expense comparison purposes, the same compensation that is paid the average full-time employee in stores of that kind, in the State. The total pay roll reported, plus the total of proprietors' services computed on the basis described, is known as the total wage cost. This table provides the basis for computing the relative wage cost in each kind of business, although the percentages are not shown.

Total wage cost, plus all other reported expenses (which include rent, and interest on borrowed money, but not interest on own invested capital), constitute total operating expense, which is shown in the table in percentage form. Occasionally an "X" in the percentage column is used to indicate that a percentage figure might be misleading because of the limited number of stores involved in the classification.

The marked differences in operating expense between different kinds of business are of particular interest, not only to the retailer but to the wholesaler and manufacturer. Except for businesses in which service income is an important factor, the expense percentage plus a 2 or 3 per cent profit allowance is approximately the gross margin. If a further allowance is added for the cost equivalent of mark-downs, or reductions inevitably required to move merchandise which fails to sell at its original price, the resulting percentages indicate almost exactly the average initial mark-up which each kind of store requires. They are of vital interest to the manufacturer in determining price policies and in selecting the kind of retailer which can best provide an outlet for the products of such manufacturer. (Initial mark-up is that proportion of the dollar of selling price which is required over and above the net prime cost of the merchandise sold. Thus a marking rate of 25 per cent would mean that the retailer could pay 75 cents for an article that is marked to sell for \$1. In such a case the retailer's expenses would be about 21 cents, the cost of subsequent mark-downs would be about 2 cents and if he is lucky he might realize a profit of 2 cents on the \$1 of sales.)

**TABLE 3. SEASONAL EMPLOYMENT**

Expressed in percentage, there is shown for each kind of business the proportion of men and women employees, the proportion of men and women proprietors, and the seasonal variation in the number of employees required in the retail industry as a whole and separately for each kind of business. There is also shown, at four specified dates representing seasons, the proportion of part-time employees to the total number of employees, to measure the seasonal variation in the demand for part-timers. This table is of interest to economists and sociologists. Its interest to retailers is that it may suggest the further use of part-timers, when a store finds itself much out of line with the proportion shown in this table as applicable to its kind of business, but such conclusions should be checked with similar tables in State reports.

**TABLE 4. SALES BY SIZE OF BUSINESS**

Eleven size-classes are shown into which all stores in the United States are classified, in accordance with their total net sales. The tables show the number of stores in each size-class, as well as the total sales of such stores, detailed by kinds of business. This information has been sought for many years, without result heretofore. The tables bring out the relatively large number of stores with insignificant annual sales, and in contrast the relatively small proportion of the total business of the country which is done by these small stores.

Test tabulations indicate that little or no correlation exists between the size of business and the expense ratio; hence expense data are not shown in this table.

**TABLE 5. RETAIL DISTRIBUTION, BY TYPES OF OPERATION**

The usual classification of retailers, according to their types of operation, into chains and independents, is shown by this table to be meaningless for the reason that there are no such clean-cut distinctions. There are single-store, 2-store, and 3-store independents and, often, local branch systems which are all independent types of operation. Many times a local chain is developed almost unconsciously, often over a long period of years, by the expansion of a local store into a 2-store operation, then adding a third store, and finally becoming in fact a chain, although it may be owned and operated entirely by the same local men who operated the original store, and all the stores may be located in the same city.

The text in Chapter II of this volume describes each type of operation shown in detail in this table.

In any attempt to assign all retailers to one of the two types of so-called chains and so-called independents, it is necessary first to define the meaning of such terms which would become extremely difficult and controversial. Avoiding such controversy, the retail census presents the facts in the form of 15 different types of operation, each exactly defined, so that the material may be assembled by the user in any grouping desired.

For summary purposes, the totals for each State are shown in six major groups, corresponding to the six groups shown in Table 6. The first summarizes single-store independents. The second combines 2-store and 3-store independents and local-branch systems. The third applies to local chains. The fourth covers sectional chains, and the fifth covers national chains. All other types are summarized in the sixth group. All groups show the number of stores as well as sales and the percentage of the total business done by each type.

**TABLE 6. SEVENTEEN KINDS OF BUSINESS, BY TYPES OF OPERATION**

Seventeen of the more important kinds of business in which chains have become a factor are analyzed in this table according to six type classifications. As to each kind of store there are shown, for each of the six types of operation, the number of stores, total net sales, and the proportion of the total sales by the stores of each type class. It gives the first true picture of the degree of penetration of the multiunit type of operation in the principal kinds of retail business.

**TABLE 7. CREDIT BUSINESS**

For all stores together, and separately for each of 60 kinds of business in which the extension of credit to customers is a sales inducement, this table shows the number of stores which have reported that they do all of their business for cash, and the total sales of such stores; and, in contrast, the number of stores which do all or a part of their business on credit, and the total sales of such stores. The credit-granting stores are further analyzed according to the proportion of their business which is done on credit. The second part of the table summarizes data by States, without regard to the kinds of business. The third part pertains to credit-granting stores exclusively and shows, by States, the proportion of cash, open-account and installment sales in such stores.

**TABLE 8. CREDIT BUSINESS, BY TYPES OF OPERATION**

The stores shown in Table 7 as those which do all or part of their business on credit are further analyzed, in this table, according to their types of operation. There is shown the ratio of credit sales to total sales, and the table also shows the total amount of installment sales which were reported.

Due to the fact that installment credit was not reported separately by stores whose total annual sales were less than \$60,000, nor by stores in places of less than 10,000 population, the dollar figures are incomplete and can not be related to the total credit sales. In five test States, representing all parts of the country, a special compilation was prepared of all returns which included credit sales, eliminating the returns which made no provision for installment data, the purpose being to establish the relation between installment credit and total credit sales. This sampler tabulation revealed that the installment credit reported

as having been extended by the retailers constituted 38.83 per cent of total credit reported. At least for those test States, it may be assumed that about 61 per cent of the total credit reported is open-account credit and about 39 per cent is installment credit extended by the retailers.

In addition to installment credit extended by retailers, which in 1929 totaled about \$6,500,000,000, computed by the method described above, there was additional financing of retail installment contracts by finance companies to an estimated total of \$1,500,000,000. This is limited almost entirely to the financing of installment purchases of automobiles, but includes a small amount of furniture, radios, and electrical appliances. As far as the retailer is concerned, these are not regarded in certain kinds of business as credit sales because the retailer does not extend the credit.

**TABLE 9. RECEIPTS OTHER THAN FROM THE SALE OF MERCHANDISE**

Meals differ from most other merchandise in that they are not sold in the form in which they are bought. The first part of this table shows receipts from the sale of meals, as reported by the stores. In addition to restaurants and other eating places, meals constitute a secondary source of income in many stores not in the restaurant group, as shown in this table. Additional data on the subject are contained in the commodity tables. Both tables should be taken into consideration in any study of food sales.

Receipts from repairs, service, and storage are reported in this table, with automotive repairs classified separately from other repairs and service. Considerably more than half of this income is not represented by a corresponding purchase of commodities from wholesalers or manufacturers.

**TABLE 10. MERCHANDISE MANUFACTURED BY RETAILERS—SALES TO OTHER RETAILERS—RETURNED GOODS**

Reported separately for each kind of business, this table reports three kinds of data as indicated by the title. Merchandise manufactured on sales premises is a factor in retail distribution in that, like the sale of services and meals, it represents a proportion of total retail business for which there is no corresponding purchase of merchandise in kind. Sales to other retailers include merchandise for their use, such as supplies, and merchandise for resale, which is in the nature of wholesale business. Returned goods and allowances were not reported by stores in cities and places of less than 10,000 population, nor by stores with sales of less than \$60,000 annually. Blanks indicate that no returned goods were reported, not necessarily that no goods were returned.

**TABLE 11. RETAIL SALES BY MANUFACTURERS AND WHOLESALERS—COUNTRY BUYING (ASSEMBLING) OF FARM PRODUCTS**

The preceding table reports sales by one retailer to another retailer, which are somewhat in the nature of wholesale transactions. There is a large volume of retail business, however, which is not transacted by retailers at all, but is sold directly to the household consumer by manufacturers and wholesalers. This business is reported in Table 11 (A and C) and should be added to the \$49,114,653,269 of total sales reported by retailers. There should be added also a total of \$126,604,308 of additional milk-dealer sales as shown in Table 11E.

On the other hand, the business reported by country stores which are also country buyers or assemblers of farm products includes the volume which results from the sale of the farm products which have been assembled, as well as the sale of other merchandise purchased through trade channels. That part of their reported business which results from their country buying or assembling of farm products is shown in one section of Table 11.

This table contains a summary of all known sales at retail, which aggregate nearly \$53,000,000,000.

**TABLE 12. FORMS OF ORGANIZATION**

Partnerships and sole proprietorships, shown together in retail census reports, constitute by far the majority of store forms of organization. The corporate form, although representing only 15.77 per cent of the total number of stores, covers 48.23 per cent of the total business done by retailers.

Cooperative associations, reported as such, form an insignificant part of the total, either of sales or of stores. These are a sort of incorporated partnership, with customers as the stockholders. It was intended originally to show as another form of organization, or as a type, the large number of cooperative merchandising groups, or "voluntary chains," which exist in such fields as foods, drugs, and hardware, but the information obtainable as to such affiliation was so incomplete and contradictory that it had to be abandoned as a separate classification.

In response to the request for more detailed data on Negro proprietorship in the retail field, a table is given herein which shows the total number of stores operated by Negroes, total sales, stocks, pay roll, employees and proprietors working in the stores. All of this is further classified by kinds of business.

In some of the Western States, and particularly in California, a large number of retail stores are owned and operated by orientals, either Chinese or Japanese. They are classified herein as oriental mutuals, and in the California report a special table is shown for them.

**TABLE 13. RETAIL DISTRIBUTION, BY COUNTIES AND INCORPORATED PLACES**

This table summarizes, by States, for each county and incorporated place having 1,000 or more inhabitants, the number of stores, proprietors and firm members, full-time employees, net sales, stocks on hand, and total pay roll.

The individual State sections of this table were published originally in the separate State reports, but have been assembled in this volume for ready reference, particularly as an aid in analyzing the marketing organization and its operation in the different sections of the country.

**TABLE 14. COUNTY DISTRIBUTION, BY KINDS OF BUSINESS**

Net sales and number of establishments are analyzed in this table by 40 kinds of business, or condensed business classifications. The information is presented, by States, for each county and incorporated place of 1,000 or more inhabitants. This table has been removed from the State reports in parts 2 and 3 of this volume and included in this volume for the reason explained above for Table 13.

**TABLE 15. SALES BY COMMODITIES**

The commodity tables are of special interest, because this is the first time there ever have been available enough facts to construct even an approximate composite picture of the commodities sold in each kind of store, such as the several kinds of apparel stores, automobile salesrooms, filling stations, drug stores, and all the other 250 or more kinds of business into which the retailers of the country are divided. The commodity figures herein are averages of percentages,<sup>1</sup> without weighting of State figures to reflect the relative importance of each State. That method was used deliberately in preference to mathematical averages based upon dollar totals, on the principle that "prevailing figures" are of more value than general averages unduly weighted by the preponderance of sales in a few of the larger States. In deciding upon the method of presentation, consideration also was given to the fact that the degree of commodity coverage varies considerably in the different States, and any other method would necessarily involve the use of a great number of assumptions, concealed in the resulting figures, which the Bureau of the Census prefers to avoid. The method adopted is clearly described in the tables, and it results in figures which are believed to be of maximum value as indicative of what commodities typically are sold in each kind of store and in what relative proportion.

<sup>1</sup> The percentage shown for any commodity is the average of the percentages shown for that commodity in the several State tables.

United States averages are presented in Table 15 herein, and their use should be limited to the purposes for which they are designed. These national averages were built up from corresponding averages for each of the nine geographic divisions. The divisional tables are too voluminous to be included in this publication, but may be obtained from the Bureau of the Census in booklet form at a nominal cost. It is suggested that such divisional averages be used to estimate sales by commodities in those sections of the country in which the user is generally interested, and that the several State reports (which also contain city figures) be used for sections in which the user is particularly interested, as the variations between the States within a geographic division are often as significant as the variations between divisions.

**TABLES 16, 17, AND 18. ALL CITIES OF MORE THAN 30,000 POPULATION, COMBINED**

In the State reports, all cities of more than 30,000 population were analyzed in detail, in three or more tables each. For this United States Summary all such cities have been combined in one set of three tables. One table shows the combined sales analyzed by kinds of business. The second table shows sales analyzed by types of operation. The third table shows 17 kinds of business analyzed according to types of operation. As to each of these specific kinds, the table shows how much of the business, in these larger cities as a group, is done by sectional and national chains in comparison with the single-store and multi-unit independents. For the purposes of this summary, all the cities mentioned are grouped as if they were one immense city. See Tables 13 and 14 for figures for each city separately reported.

**TABLES 19, 20, AND 21. ALL CITIES OF 10,000 TO 30,000 POPULATION, COMBINED**

These three tables are similar to Tables 16, 17, and 18, respectively, except that they cover cities of a different size, as indicated. Each State report includes three tables similar in form to Tables 19, 20, and 21 but applying only to the cities within each such State. See Tables 13 and 14 in this report for figures for each city separately reported.

**TABLES 22, 23, AND 24. ALL PLACES OF LESS THAN 10,000 POPULATION, COMBINED**

These three tables are also similar to Tables 16, 17, and 18, respectively, except that they cover small cities and all places of less than 10,000 population. Each State report includes three tables similar in form to these tables, but applying only to the places of this size within each such State. Reference should be made to Table 25 of this volume, and to Tables 13 and 14 of each State report, for more data concerning these smaller places, which play such an important part in the processes of retail distribution in the United States.

TABLE 25. PLACES OF LESS THAN 10,000 POPULATION, GROUPED IN FOUR SIZE CLASSIFICATIONS, BY STATES

In Table 25 all places are grouped, separately for each State, into four size classifications, as follows:

All places of 5,000 to 10,000 population.

All places of 2,500 to 5,000 population.

All places of 1,000 to 2,500 population.

All places of less than 1,000 population. The table answers a long-standing question as to how much of the total business of the country is done in the smaller cities and towns, and in what size of town. In connection with the kind-of-business data shown in Table 14, it also reveals for the first time the proportion of each kind of business.

TABLE 1A.—THE UNITED STATES—RETAIL DISTRIBUTION, BY KINDS OF BUSINESS  
NUMBER OF STORES, PERSONNEL, PAY ROLL, STOCKS, AND SALES

KIND OF BUSINESS (Not synonymous with commodities sold—see Table 15)	Number of stores	Proprietors and firm members (not on pay roll)	NUMBER OF EMPLOYEES		PAY ROLL		STOCKS ON HAND, END OF YEAR (at cost)	NET SALES (1929)	
			Full time	Part time	Total (full time and part time)	Part time only		Amount	Per cent of total sales
United States, total.....	1,643,158	1,510,607	3,833,581	678,559	\$5,189,699,980	\$181,337,515	\$7,262,582,920	\$49,114,653,269	100.00
Food group.....	481,891	468,301	668,832	158,775	767,207,352	35,554,773	601,480,920	10,897,421,555	22.07
Candy and confectionery stores:									
Candy stores—nut stores.....	2,653	1,832	4,143	938	4,365,305	205,260	1,019,720	34,013,320	.07
Confectionery stores (candy and fountain)	60,007	65,714	42,929	14,590	41,358,924	3,400,563	42,170,000	536,036,045	1.00
Dairy products stores:									
Dairy products stores (including ice cream)	4,488	3,879	9,332	1,505	13,582,948	380,650	5,485,140	165,905,010	.34
Egg and poultry dealers.....	3,258	3,513	2,573	1,012	3,319,766	244,700	1,424,100	70,858,063	.14
Milk dealers.....	3,900	4,063	52,976	900	101,027,019	249,716	3,958,130	500,995,747	1.14
Deli-casson stores.....	11,100	12,184	6,058	2,154	10,008,081	508,206	14,447,160	194,820,080	.40
Fruit stores and vegetable markets.....	22,904	25,106	16,368	5,898	20,583,348	1,384,228	0,771,160	308,379,850	.63
Grocery stores (without meats) <sup>1</sup> .....	101,870	171,991	148,413	54,484	183,430,001	11,818,024	201,010,370	3,449,120,144	7.02
Combination stores (groceries and meats):									
Grocery stores with meats.....	91,888	87,420	148,819	40,700	192,504,127	9,281,000	179,059,970	3,025,304,722	6.16
Meat markets with groceries.....	23,661	25,866	44,907	11,305	61,769,350	2,014,219	44,162,070	878,357,845	1.79
Meat markets (including sea foods):									
Fish markets—sea foods.....	6,077	6,571	6,202	1,846	7,500,379	446,639	1,632,400	83,008,479	.17
Meat markets.....	43,788	45,248	55,318	12,841	84,898,268	3,383,742	24,472,840	1,263,250,544	2.55
Bakeries—caterers:									
Bakeries—bakery goods stores (except manufacturing bakeries)	11,903	11,698	24,571	3,577	29,327,722	866,775	6,019,890	103,503,093	.40
Caterers.....	110	84	1,180	797	1,732,729	214,181	234,930	7,529,680	.02
Other food stores:									
Coffee, tea, spice dealers.....	1,236	854	4,914	323	7,437,642	77,472	3,861,450	44,038,342	.00
Farm products stores.....	974	1,023	455	307	455,775	48,461	435,260	8,042,183	.02
General food stores (miscellaneous)	686	666	653	210	617,617	47,871	939,240	8,598,165	.02
Bottled waters and beverage dealers.....	621	559	1,842	199	2,698,401	36,010	777,620	11,533,231	.02
General stores.....	104,089	121,366	107,023	30,031	116,511,168	5,821,373	548,205,480	2,670,744,006	5.23
General stores—groceries with apparel.....	5,423	6,200	4,532	1,600	4,910,272	301,523	21,080,240	111,074,603	.23
General stores—groceries with dry goods.....	40,159	46,204	20,350	10,002	29,095,400	1,814,084	150,423,760	713,220,435	1.46
General stores—groceries with general merchandise.....	58,504	68,962	73,141	19,200	81,400,490	3,705,766	308,161,480	1,746,442,908	3.55

<sup>1</sup> For further data see special report on milk dealers.

<sup>2</sup> See also Feed stores with groceries in "Other Retail Stores Group."

<sup>3</sup> A special trade report on the petroleum industry shows that filling stations constitute 40 per cent of the total number of retail outlets for gasoline.

<sup>4</sup> See also Electrical shops (without radio) in "Lumber and building group."

<sup>5</sup> See also Music stores (without radio) in "Other Retail Stores Group."

<sup>6</sup> See also Coal and feed stores, above.

<sup>7</sup> For a list of the kinds of stores included in this combined classification, see Definitions, p. 37. An appropriate breakdown may be computed from data contained in Table 1 of the State Series of reports for Connecticut, Massachusetts, and Ohio.

## RETAIL DISTRIBUTION

TABLE 1B.—THE UNITED STATES—RETAIL DISTRIBUTION, BY STATES AND GEOGRAPHIC DIVISIONS  
NUMBER OF STORES, PERSONNEL, PAY ROLL, STOCKS, AND SALES

DIVISION AND STATE	Number of stores	Proprietors and firm members (not on pay roll)	NUMBER OF EMPLOYEES		PAY ROLL		STOCKS ON HAND, END OF YEAR (at cost)	NET SALES (1920)	
			Full time	Part time	Total (full time and part time)	Part time only		Amount	Per cent of total sales
UNITED STATES, total.....	1,548,158	1,610,607	3,833,581	678,559	\$5,189,669,960	\$161,337,515	\$7,262,582,920	\$49,114,653,209	100.00

<sup>1</sup> In comparing this table with the Chain Store Summary shown on page 30 it should be realized that many chains operate some stores of a kind different from the kind-of-business classification applicable to the chain itself. The percentages shown above are the true ratios and the chain figures include the sales of all chain units, regardless of how the chains are classified. Thus, chains do more family clothing store business than the total sales of all chains classified as family clothing chains, because some large family clothing stores are operated by women's apparel chains and others by general merchandise chains. On the other hand, many small general merchandise stores are operated by chains classified as family clothing chains. In the shoe field, manufacturer-controlled chains are an important factor and must be added to the local, sectional, and national chains to reconcile shoe-store sales in this table with the sales of shoe chains. In practically all chain classifications (p. 30) some units are different in character from the predominating character of the chain and take a kind-of-business classification different from the classification which applies to the chain as a whole. This carry-over, from one business classification to another, accounts for what otherwise would appear to be discrepancies between the chain figures in this table and the chain figures on p. 30, although both tables are correct.

## RETAIL DISTRIBUTION

TABLE 7A.—THE UNITED STATES—CREDIT BUSINESS  
 NUMBER OF STORES AND AMOUNT OF SALES, CLASSIFIED ACCORDING TO DEGREE OF CREDIT, FOR SELECTED KINDS OF BUSINESS  
 [Sales expressed in thousands of dollars]

KIND OF BUSINESS	TOTAL		STORES SELLING ENTIRELY FOR CASH		STORES SELLING ON CREDIT AND PROPORTION OF CREDIT BUSINESS

<sup>1</sup> All stores did not report as to their credit activities or whether they sell entirely for cash. This table includes stores which have reported either that they sell entirely for cash or that they sell on credit. The totals agree with table 1 except for 240,604 stores with sales of \$5,894,081,269 which failed to report as to their credit activities.

TABLE 7A.—THE UNITED STATES—CREDIT BUSINESS—Continued  
 NUMBER OF STORES AND AMOUNT OF SALES, CLASSIFIED ACCORDING TO DEGREE OF CREDIT, FOR SELECTED KINDS OF BUSINESS  
 [Sales expressed in thousands of dollars]

KIND OF BUSINESS	STORES SELLING ON CREDIT AND PROPORTION OF CREDIT BUSINESS											
	31 to 40 per cent credit		41 to 50 per cent credit		51 to 60 per cent credit		61 to 70 per cent credit		71 to 80 per cent credit		Over 80 per cent credit

1 All stores did not report as to their credit activities or whether they sell entirely for cash. This table includes stores which have reported either that they sell entirely for cash or that they sell on credit. The totals agree with Table 1 except for 240,604 stores with sales of \$5,894,631,269 which failed to report as to their credit activities.

<sup>1</sup> All stores did not report as to their credit activities or whether they sell entirely for cash. This table includes stores which have reported either that they sell entirely for cash or that they sell on credit. The totals agree with Table 1 except for 240,604 stores with sales of \$5,894,681,269 which failed to report as to their credit activities.

<sup>2</sup> Sales on credit are further analyzed in Table 7c.

UNITED STATES SUMMARY: 1929

<sup>1</sup> Includes the initial cash payment which is usually a consideration in installment selling. Installment sales were not reported in places having less than 10,000 inhabitants, nor by any stores with total sales of less than \$60,000 annually. Therefore this column can not be related to the credit sales column because it is incomplete. Installment dealers frequently did not report as installment sales those transactions in which the customer's notes are handled through finance companies.

<sup>1</sup> Merchandise manufactured on sales premises is a factor in retail distribution in that, like the sale of services and meals, it represents a proportion of the total retail business for which there is no corresponding purchase of merchandise in kind.  
<sup>2</sup> Sales to other retailers include merchandise for their use, such as supplies, and merchandise for resale which is in the nature of wholesale business.  
<sup>3</sup> Returned goods and allowances were not reported by stores in places of less than 10,000 population, nor by stores with sales of less than \$60,000 annually. Blanks in the last column indicate that no returned goods were reported, not necessarily that no goods were returned.

## RETAIL DISTRIBUTION

Montana	426,858		426,858				

<sup>1</sup> The schedules of certain milk dealers were not gathered by field enumerators owing to the difficulty of recognizing such establishments in the retail field. They were obtained subsequently by direct correspondence and are reported herein, but some were received too late to be included in their proper place in the State and Summary reports. Additional sales shown above may be added to the sales shown in Table 1 and other tables. A special trade report has been prepared on this subject.
