TABLE 8.-THE STATE-CREDIT BUSINESS, BY TYPES OF OPERATION

¹ Includes the initial cash payment which is usually a consideration in installment solling. Installment sales were not reported in places having less than 0,000 inhabitants, nor by any stores with total sales of less than \$60,000 annually. Therefore this column can not be related to the credit sales column because it is incomplete Installment dealers frequently did not report as installment sales those iransactions in which the customer's notes are handled through finance companies.
 ² These classifications used only in rural areas and in cities having less than 10,000 population. These stores are usually independently operated.

TABLE 9.-THE STATE-RECEIPTS OTHER THAN FROM THE SALE OF MERCHANDISE

DIESSINAK BIS		- ,		I news dealers			of total retail

¹ Merchandise manufactured on sales premises is a factor in retail distribution in that, like the sale of services and meals, it represents a proportion of total retail business for which there is no corresponding purchase of merchandise in kind. Sales to other retailers include merchandise for their use, such as supplies, and merchandise for resale, which is in the nature of wholesale business. Returned goods and allowances were not reported by stores in cities and places of less than 10,000 population, nor by stores with sales of less than \$60,000 annually. Blanks indicate that no returned goods were reported, not necessarily that no goods were returned.

TABLE 11A.—RETAIL SALES BY MANUFACTURING ESTABLISHMENTS WHICH ARE INCLUDED ONLY IN THE CENSUS OF MANUFACTURES

(Manufacturing bakeries included herein are those which report that 25 per cent or more of their sales are to home consumers. Planing mills included herein are those which report that they sell principally to industrial and home consumers, for utilization rather than for resale. Power laundry sales include the full amount received for work done. Sales of cleaning and dysing establishments include both retail and wholesale sales, the retail sales for the State aggregating \$16,323,715)

Notz.—Both columns of preentages apply strictly to the kind of business designated. Sales of similar commodities in other kinds of stores are reported separately. Not all stores of any given classification sell every commodity in an other kind of store. The second preentage column represents the importance of the commodity in all of the stores of a given kind which report sales of that commodity in all of the stores of the stores included in the commodity by the kind of store. The second preentage column represents the importance of the commodity in all of the stores of the stores included in the commodity by the kind of store. The second preentage column represents the importance of the commodity in all of the stores of the stores included in the commodity by the kind of store. The second preentage column represents the shows the degree to which the total sales of the stores included in the commodity breakdown are representative of the sales of all stores (of the same kind) in the State. Percentages the week of the stores of the stores included in the commodity breakdown are representative of the sales of all stores (of the same kind) in the State. Percentages the which the total sales of the stores included in the commodity are indented. That form of presentation indicates that a greater proportion of sales was reported in detail. Always the further detail represents a substantial sample but less than 50 per cent of the principal commodity classification. Several classifications in these commodity tables represent a small degree of coverage. They are included reluctantly and for the purpose not only of general definitions, p. 7 of this report.)
(x) Indicates that a percentage for this classification is of no specific use and it has not been computed.

¹ Not all stores have reported as to their credit activities or whether they make sales entirely for cash. This table includes all stores in the city which have reported either that they sell entirely for cash or that they sell on credit. It agrees with Table 16 except for 3,347 stores with sales of \$189,453,909 which failed to report as to their credit activities.

¹Total sales of these stores are \$1,085,354,665. ¹Includes the initial cash payment which is usually a consideration in installment selling. Installment sales were not reported by stores with total sales of less than ⁴C000 annually. Installment dealers frequently did not report as installment sales these transactions in which the customers' notes are handled through finance companies. ⁴Clessifications showing insignificant amounts have been eliminated from this table but are included in the totals.

Nors.-Both columns of percentages apply strictly to the kind of business designated. Sales of similar commodities in other kinds of stores are reported separately. Not all stores of any given classification soil every commodity listed thereunder. Thus the *first percentage column* represents the importance of the commodity in all of the stores of a given kind which report sales of that commodity, and in no other kind of store. The scond percentage column shows the relative importance of each commodity. In classification which reports alls of the stores of all stores (included in the classification) which reported their sales of all stores (included in the classification) which reported their sales by commodities. The commodity coverage shows the degree to which the total sales of all stores (included in the classification) which reported their sales by commodities. The control the classification of the second column of this testers included in the commodity breakdown are representative of the sales of all stores (included to make the principal classification under which they are indented. That form of presentation indicates that a greater proportion of sales was reported under the principal classification. Several classifications in these commodity tables represents a substantial sample but less than 50 per cent of the principal commodity classification. Several classifications in these commodity tables represent a small degree of coverage. They are included reluctantly and for the purpose not only of showing the data available but also the small degree of availability of commodity data in these kinds of business. Such percentages should be used with caution. (See General efficience, product). In difference, show the apercentage of this classification is of no specific use and it has not been computed.

¹Total sales of these stores are \$40,767,594. ¹Includes the initial cash payment which is usually a consideration in installment selling. Installment sales were not reported by stores with total sales of less than \$60,000 annually. Installment dealers frequently did not report as installment sales those transactions in which the customers' notes are handled through finance com-pariles. The open-account sales include any installment business that may have been done by these smaller stores. ¹Classifications showing insignificant amounts have been eliminated from this table, but they are included in the totals.

TABLE 29.-PEORIA-RECEIPTS OTHER THAN FROM THE SALE OF MERCHANDISE
