¹ Includes no interest return on own capital invested in merchandise, fixtures, or customers accounts. Does not include, of course, the cost of merchandise sold, nor profit.

² Group totals may include figures for stores which are omitted from the detail to avoid the disclosure of individual operations.

³ Undoubtedly this expense includes some production costs, especially pay roll of some employees engaged both in selling and in making candies and fancy baked goods.

TABLE 2.—THE STATE—OPERATING EXPENSES, BY KINDS OF BUSINESS—Continued

KIND OF BUSINESS	Number of stores	Total payroll reported	Value of proprietors' services at same rate as that paid full-time employees	Total wage cost (including proprietors' services)	All other reported expenses (includes rent)	Total operating expense (per cent of sales)	RENTAL COST (Included in "All other expenses" column)

1 All stores did not report as to their credit activities or whether they sell entirely for cash. This table includes stores in the State which have reported either that they sell entirely for cash or that they sell on credit. The totals agree with Table 1 except for 8,386 stores with sales of \$294,732,342, which failed to report as to their credit activities.

TABLE 8.—THE STATE—CREDIT BUSINESS, BY TYPES OF OPERATION

TYPE OF OPERATION	Number of stores reporting credit sales	Total net sales of such stores	Net credit sales of such stores	Ratio of credit sales to total sales in stores reporting credit sales	Installment sales of stores reporting installments (included also in credit sales) ¹
Total.....	32,433	\$1,265,558,827	\$672,855,091	52.34	\$126,270,146
Independent stores ²	26,475	975,542,332	526,020,680	53.92	102,888,254
Local chains.....	1,384	88,413,616	56,744,446	64.18	9,508,162
Sectional chains.....	582	21,265,794	13,155,378	61.86	4,389,638
National chains.....	262	18,402,110	9,490,902	51.58	4,855,982
Other types of operation:					
Mail-order houses (catalogue only).....	3	22,025,368	1,964,862	8.92	1,560,477
Direct-selling (house-to-house).....	34	2,090,820	2,493,677	95.66	2,450,411
Industrial stores (including commissaries).....	27	1,782,454	685,856	38.48	53,000

Manufacturer-controlled chains.....	50	5,219,841	4,255,350	81.52	1,455,820
Cooperative stores ³	19	854,011	203,813	23.87
Retailers—country buyers ³	2,992	115,660,614	38,472,453	33.26
Retailers—wholesalers ³	293	26,857,553	14,392,272	53.59
All other types.....	14	107,329	16,404	15.28

¹ Includes the initial cash payment which is usually a consideration in installment selling. Installment sales were not reported in places having less than 10,000 inhabitants, nor by any stores with total sales of less than \$60,000 annually. Therefore this column can not be related to the credit sales column because it is incomplete. Installment dealers frequently did not report as installment sales those transactions in which the customers' notes are handled through finance companies.

² Includes single-store independents, and 2 and 3 store independents.

³ These classifications are used only in rural areas and cities having less than 10,000 inhabitants. These stores are usually independently operated.

TABLE 9.—THE STATE—RECEIPTS OTHER THAN FROM THE SALE OF MERCHANDISE

A.—RECEIPTS FROM THE SALE OF MEALS ¹

KIND OF BUSINESS	Normal seating capacity	Receipts from sale of meals	KIND OF BUSINESS	Normal seating capacity	Receipts from sale of meals

Refrigerator dealers—electric only		249,849	5,085				

¹ Merchandise manufactured on sales premises is a factor in retail distribution in that, like the sale of services and meals, it represents a proportion of total retail business for which there is no corresponding purchase of merchandise in kind. Sales to other retailers include merchandise for their use, such as supplies and merchandise for resale, which is in the nature of wholesale business. Returned goods and allowances were not reported by stores in cities and places of less than 10,000 population, nor by stores with sales of less than \$60,000 annually. Blanks indicate that no returned goods were reported, not necessarily that no goods were returned.

CENSUS OF DISTRIBUTION

TABLE 11A.—THE STATE—RETAIL SALES, BY CERTAIN MANUFACTURING ESTABLISHMENTS WHICH ARE INCLUDED IN THE CENSUS OF MANUFACTURES

[An (x) indicates the amounts have been withheld to avoid disclosures of individual operations, but are included in the total]

[Manufacturing bakeries included herein are those which report that 25 per cent or more of their sales are to home consumers. Planing mills included herein are those which report that they sell principally to industrial and home consumers, for utilization rather than for resale. Power laundries sales include the full amount received for work done. The cleaning and dyeing establishments' sales include both retail and wholesale, the retail sales for the State aggregating \$8,646,191]

			Confectionery and nuts.....	.5	.1

NOTE.—Both columns of percentages apply strictly to the kind of business designated. Sales of similar commodities in other kinds of stores are reported separately. Not all stores of any given classification sell every commodity listed thereunder. Thus the first percentage column represents the importance of the commodity in all of the stores of a given kind which report sales of that commodity, and in no other kind of store. The second percentage column shows the relative importance of each commodity, in relation to the total sales of all stores (included in the classification) which reported their sales by commodities. The commodity coverage shows the degree to which the total sales of the stores included in the commodity breakdown are representative of the sales of all stores (of the same kind) in the State. The percentages shown in this second column are applicable to the sales shown in Table 1. Commodities reported in the form of indented items, with percentages shown in short, are a further breakdown of the principal classification under which they are indented. That form of presentation indicates that a greater proportion of sales was reported under the principal classification (without further detail) than was reported in detail. Always the further detail represents a substantial sample but less than 50 per cent of the principal commodity classification. Several classifications in these commodity tables represent a small degree of coverage. They are included reluctantly and for the purpose not only of showing the data available but also the small degree of availability of commodity data in these kinds of business. Such percentage should be used with caution. (See General Definitions, p. 7 of this report.)

(x) indicates that a percentage for this classification is of no specific use and it has not been computed.

¹ All stores did not report as to their credit activities or whether they sell entirely for cash. This table includes stores in the city which have reported either that they sell entirely for cash or that they sell on credit. The totals agree with Table 16 except for 421 stores with sales of \$12,117,849, which failed to report as to their credit activities.

					Miscellaneous classifications (combined).....	22	23.81	76.19	
					Secondhand stores.....	29	70.95	19.43	9.62

¹ Total sales of above stores are \$125,899,000.
² Includes the initial cash payment which is usually a consideration in installment selling. Installment sales were not reported by stores with sales of less than \$60,000 annually. Installment dealers frequently did not report as installment sales those transactions in which the customers' notes are handled through finance companies. The open account sales may include some installment business of these small stores.
³ Classifications showing insignificant amounts have been eliminated from this table but are included in the totals.

TABLE 22.—HOUSTON—RECEIPTS OTHER THAN FROM THE SALE OF MERCHANDISE

			Clothing and furnishings (men's and boys')—		
			Suits		
			Overcoats		
			Hats and caps		

Note.—Both columns of percentages apply strictly to the kind of business designated. Sales of similar commodities in other kinds of stores are reported separately. Not all stores of any given classification sell every commodity listed thereunder. Thus the first percentage column represents the importance of the commodity in all of the stores of a given kind which report sales of that commodity, and in no other kind of store. The second percentage column shows the relative importance of each commodity in relation to the total sales of all stores (included in the classification) which reported their sales by commodities. The commodity coverage shows the degree to which the total sales of the stores included in the commodity breakdown are representative of the sales of all stores (of the same kind) in the city. The percentages shown in this second column are applicable to the sales shown in Table 16. Commodities reported in the form of indented items, with percentages shown in short, are a further breakdown of the principal classification under which they are indented. That form of presentation indicates that a greater proportion of sales was reported under the principal classification (without further detail) than was reported in detail. Always the further detail represents a substantial sample but less than 50 per cent of the principal commodity classification. Several classifications in these commodity tables represent a small degree of coverage. They are included reluctantly and for the purpose not only of showing the data available but also the small degree of availability of commodity data in these kinds of business. Such percentages should be used with caution. (See General Definitions, p. 7 of this report.)

(x) indicates that a percentage for this classification is of no specific use and it has not been computed.

CENSUS OF DISTRIBUTION

TABLE 23.—HOUSTON—SALES, BY COMMODITIES—Continued

COMMODITY (Read note carefully for explanation of terms)	Per cent of each commodity sold to total sales of stores selling such commodity	Per cent of each commodity sold to total sales of all stores in same classification	COMMODITY (Read note carefully for explanation of terms)	Per cent of each commodity sold to total sales of stores selling such commodity	Per cent of each commodity sold to total sales of all stores in same classification

			Used-car dealers: (Commodity coverage, 100.0 per cent)		
			Automotive parts and accessories.....		
			Gasoline.....		
			Miscellaneous merchandise.....		
			Oils and greases.....		

NOTE.—Both columns of percentages apply strictly to the kind of business designated. Sales of similar commodities in other kinds of stores are reported separately. Not all stores of any given classification sell every commodity listed thereunder. Thus the first percentage column represents the importance of the commodity in all of the stores of a given kind which report sales of that commodity, and in no other kind of store. The second percentage column shows the relative importance of each commodity, in relation to the total sales of all stores (included in the classification) which reported their sales by commodities. The commodity coverage shows the degree to which the total sales of the stores included in the commodity breakdown are representative of the sales of all stores (of the same kind) in the city. The percentages shown in this second column are applicable to the sales shown in Table 24. Commodities reported in the form of indented items, with percentages shown in short, are a further breakdown of the principal classification under which they are indented. That form of presentation indicates that a greater proportion of sales was reported under the principal classification (without further detail) than was reported in detail. Always the further detail represents a substantial sample but less than 50 per cent of the principal commodity classification. Several classifications in these commodity tables represent a small degree of coverage. They are included reluctantly and for the purpose not only of showing the data available but also the small degree of availability of commodity data in these kinds of business. Such percentages should be used with caution. (See General Definitions, p. 7 of this report.)

(x) indicates that a percentage for this classification is of no specific use and it has not been computed.

				Secondhand stores	18	44.86	55.14

¹ Total sales of above stores are \$71,465,000.² Includes the initial cash payment which is usually a consideration in installment selling. Installment sales were not reported by stores with sales of less than \$50,000 annually. Installment dealers frequently did not report as installment sales those transactions in which the customers' notes are handled through finance companies. The open account sales may include some installment business of these smaller stores.³ Classifications showing insignificant amounts have been eliminated from this table but are included in the totals

			Toilet articles and preparations.....	4.9	4.1
			Toys and games.....	1.0	1.0

Note.—Both columns of percentages apply strictly to the kind of business designated. Sales of similar commodities in other kinds of stores are reported separately. Not all stores of any given classification sell every commodity listed thereunder. Thus the first percentage column represents the importance of the commodity in all of the stores of a given kind which report sales of that commodity, and in no other kind of store. The second percentage column shows the relative importance of each commodity, in relation to the total sales of all stores (included in the classification) which reported their sales by commodities. The commodity coverage shows the degree to which the total sales of the stores included in the commodity breakdown are representative of the sales of all stores (of the same kind) in the city. The percentages shown in this second column are applicable to the sales shown in Table 32. Commodities reported in the form of indented items, with percentages shown in short, are a further breakdown of the principal classification under which they are indented. That form of presentation indicates that a greater proportion of sales was reported under the principal classification (without further detail) than was reported in detail. Always the further detail represents a substantial sample but less than 50 per cent of the principal commodity classification. Several classifications in these commodity tables represent a small degree of coverage. They are included reluctantly and for the purpose not only of showing the data available but also the small degree of availability of commodity data in these kinds of business. Such percentages should be used with caution. (See General Definitions, p. 7 of this report.)

(x) Indicates that a percentage for this classification is of no specific use and it has not been computed.

					Miscellaneous classifications (combined).....	5	70.83	29.17
					Secondhand stores	9	58.96	6.07	34.97

¹ Total sales of above stores are \$63,405,000.
² Includes the initial cash payment which is usually a consideration in installment selling. Installment sales were not reported by stores with total sales of less than \$60,000 annually. Installment dealers frequently did not report as installment sales those transactions in which the customers' notes are handled through finance companies. The open account sales include any installment business that may have been done by these smaller stores.
³ Classifications showing insignificant amounts have been eliminated from this table but are included in the totals.

TABLE 44.—FORT WORTH—RECEIPTS OTHER THAN FROM THE SALE OF MERCHANDISE
 A.—REPORTED RECEIPTS FROM THE SALE OF MEALS¹

KIND OF BUSINESS ²	Normal seating capacity	Receipts from sale of meals	KIND OF BUSINESS	Normal seating capacity	Receipts from sale of meals
Total	6,601	\$3,178,105	Other stores in which meals are served	311	\$149,003

Note.—Both columns of percentages apply strictly to the kind of business designated. Sales of similar commodities in other kinds of stores are reported separately. Not all stores of any given classification sell every commodity listed thereunder. Thus the first percentage column represents the importance of the commodity in all of the stores of a given kind which report sales of that commodity, and in no other kind of store. The second percentage column shows the relative importance of each commodity, in relation to the total sales of all stores (included in the classification) which reported their sales by commodities. The commodity coverage shows the degree to which the total sales of the stores included in the commodity breakdown are representative of the sales of all stores (of the same kind) in the city. The percentages shown in this second column are applicable to the sales shown in Table 39. Commodities reported in the form of indented items, with percentages shown in short, are a further breakdown of the principal classification under which they are indented. That form of presentation indicates that a greater proportion of sales was reported under the principal classification (without further detail) than was reported in detail. Always the further detail represents a substantial sample but less than 50 per cent of the principal commodity classification. Several classifications in these commodity tables represent a small degree of coverage. They are included reluctantly and for the purpose not only of showing the data available but also the small degree of availability of commodity data in these kinds of business. Such percentages should be used with caution. (See General Definitions, p. 7 of this report.)

x Indicates that a percentage for this classification is of no specific use and it has not been computed.

¹ Total sales of above stores are \$33,235,000.

² Includes the initial cash payment which is usually a consideration in installment selling. Installment sales were not reported by stores with total sales of less than \$60,000 annually. Installment dealers frequently did not report as installment sales those transactions in which the customers' notes are handled through finance companies. The open account sales include any installment business that may have been done by these smaller stores.

³ Classifications showing insignificant amounts have been eliminated from this table but are included in the totals.

All stores did not report as to their credit activities or whether they sell entirely for cash or that they sell on credit. The totals agree with Table 1 except for 1,194 stores with sales of \$43,178,205 which failed to report as to their credit activities.

CENSUS OF DISTRIBUTION

TABLE 8.—THE STATE—CREDIT BUSINESS BY TYPES OF OPERATION

TYPE OF OPERATION	Number of stores reporting credit sales	Total net sales of such stores	Net credit sales of such stores	Ratio of credit sales to total sales in stores reporting credit sales	Installment sales of stores reporting installments (included also in credit sales) ¹	TYPE OF OPERATION	Number of stores reporting credit sales	Total net sales of such stores	Net credit sales of such stores	Ratio of credit sales to total sales in stores reporting credit sales	Installment sales of stores reporting installments (included also in credit sales) ¹
Total	2, 128	\$105, 431, 366	\$56, 691, 125	53. 77	\$15, 142, 248	Other types of operation—Con. Manufacturer-controlled chains.....	5	\$508, 206	\$366, 823	72. 18	\$106, 336
Independent stores ²	1, 851	90, 415, 542	48, 792, 203	53. 96	12, 858, 523	Cooperative stores ³	6	342, 639	84, 455	24. 65	-----
Local chains.....	68	2, 920, 076	1, 817, 160	62. 23	225, 406	Retailers—country buyers ³	58	1, 930, 738	486, 031	25. 20	-----
Sectional chains.....	45	2, 572, 703	1, 795, 115	69. 78	674, 772	Retailers—wholesalers ³	11	344, 326	177, 454	51. 54	-----
National chains.....	46	2, 803, 999	1, 175, 367	41. 92	512, 911	All other types.....	14	2, 161, 716	814, 348	37. 67	402, 403
Other types of operation: Utility-operated retail stores.....	24	1, 431, 416	1, 181, 564	82. 54	361, 895						

¹ Includes the initial cash payment which is usually a consideration in installment selling. Installment sales were not reported in places having less than 10,000 inhabitants, nor by any stores with total sales of less than \$50,000 annually. Therefore this column can not be related to the credit-sales column because it is incomplete. Installment dealers frequently did not report as installment sales those transactions in which the customers' notes are handled through finance companies.
² Includes single-store independents, and 2 and 3-store independents.
³ These classifications are used only in rural areas and cities having less than 10,000 inhabitants. These stores are usually independently operated.

TABLE 9.—THE STATE—RECEIPTS OTHER THAN FROM THE SALE OF MERCHANDISE

¹ Merchandise manufactured on sales premises is a factor in retail distribution in that, like the sale of services and meals, it represents a proportion of total retail business for which there is no corresponding purchase of merchandise in kind. Sales to other retailers include merchandise for their use, such as supplies, and merchandise for resale which is in the nature of wholesale business. Returned goods and allowances were not reported by stores in cities and places of less than 10,000 population nor by stores with sales of less than \$60,000 annually. Blanks indicate that no returned goods were reported, not necessarily that no goods were returned.

CENSUS OF DISTRIBUTION

TABLE 11A.—THE STATE—RETAIL SALES, BY CERTAIN MANUFACTURING ESTABLISHMENTS WHICH ARE INCLUDED IN THE CENSUS OF MANUFACTURES

[Manufacturing bakeries included herein are those which report that 25 per cent or more of their sales are to home consumers. Planing mills included herein are those which report that they sell principally to industrial and home consumers, for utilization rather than for resale. Power laundry sales include the full amount received for work done. The cleaning and dyeing establishments' sales include both retail and wholesale, the retail sales for the State aggregating \$766,548.]

			Luggage	.9	.8
			Miscellaneous merchandise	(x)	.1
			Paints, varnishes, glass, and painters' supplies	2.1	.4

NOTE.—Both columns of percentages apply strictly to the kind of business designated. Sales of similar commodities in other kinds of stores are reported separately. Not all stores of any given classification sell every commodity listed thereunder. Thus the first percentage column represents the importance of the commodity in all of the stores of a given kind which report sales of that commodity, and in no other kind of stores. The second percentage column shows the relative importance of each commodity, in relation to the total sales of all stores (included in the classification) which reported their sales by commodities. The commodity coverage shows the degree to which the total sales of the stores included in the commodity breakdown are representative of the sales of all stores (of the same kind) in the State. The percentages shown in the second column are applicable to the sales shown in Table I. Commodities reported in the form of indented items, with percentages shown in short, are a further breakdown of the principal classification under which they are indented. That form of presentation indicates that a greater proportion of sales was reported under the principal classification (without further detail) than was reported in detail. Always the further detail represents a substantial sample but less than 50 per cent of the principal commodity classification. Several classifications in these commodity tables represent a small degree of coverage. They are included reluctantly and for the purpose not only of showing the data available but also the small degree of availability of commodity data in these kinds of business. Such percentages should be used with caution. (See General Definitions, p. 7 of this report.)

(x) indicates that a percentage for this classification is of no specific use and it has not been computed.

CENSUS OF DISTRIBUTION

TABLE 15.—THE STATE—SALES BY COMMODITIES—Continued

COMMODITY (Read note carefully for explanation of terms)	Per cent of each commodity sold to total sales of stores selling such commodity	Per cent of each commodity sold to total sales of all stores in same classification	COMMODITY (Read note carefully for explanation of terms)	Per cent of each commodity sold to total sales of stores selling such commodity	Per cent of each commodity sold to total sales of all stores in same classification

¹ Total sales of above stores are \$45,994,000.

² Includes the initial cash payment which is usually a consideration in installment selling. Installment sales were not reported by stores with total sales of less than \$60,000 annually. The open account sales include any installment business that may have been done by these smaller stores. Installment dealers frequently did not report as installment sales those transactions in which the customers' notes were handled through finance companies.

³ Classifications showing insignificant amounts have been eliminated from this table but are included in the totals.

TABLE 21.—SALT LAKE CITY—RECEIPTS OTHER THAN FROM THE SALE OF MERCHANDISE

A.—REPORTED RECEIPTS FROM THE SALE OF MEALS¹

¹ All stores did not report as to their credit activities or whether they sell entirely for cash. This total includes all stores in the State which have reported either that they sell entirely for cash or that they sell on credit. The totals agree with Table I except for 245 stores with sales of \$6,807,358 which failed to report as to their credit activities.

Industrial stores.....	3	377,286	74,159	19.66							

¹ Includes the initial cash payment which is usually a consideration in installment selling. Installment sales were not reported in places having less than 10,000 inhabitants, nor by any stores with total sales of less than \$66,000 annually. Therefore this column can not be related to the credit sales column because it is incomplete. Installment dealers frequently did not report as installment sales those transactions in which the customer's notes are handled through finance companies.

² Includes single-store independents and 2 or 3 store independents.

³ These classifications used only in rural areas and in cities having less than 10,000 inhabitants. These stores are usually independently operated.

¹ Merchandise manufactured in sales premises is a factor in retail distribution in that, like the sale of services and meals, it represents a proportion of total retail business for which there is no corresponding purchase of merchandise in kind. Sales to other retailers include merchandise for their use, such as supplies, and merchandise for resale, which is in the nature of wholesale business. Returned goods and allowances were not reported by stores in cities and places of less than 10,000 population, nor by stores with sales of less than \$50,000 annually. Blanks indicate that no returned goods were reported, not necessarily that no goods were returned.

TABLE 11A.—RETAIL SALES, BY CERTAIN MANUFACTURING ESTABLISHMENTS WHICH ARE INCLUDED ONLY IN THE CENSUS OF MANUFACTURES

(Manufacturing bakeries included herein are those which report that 25 per cent or more of their sales are to home consumers. Planing mills included herein are those which report that they sell principally to industrial and home consumers, for utilization rather than for resale. Power-laundry sales include the full amount received, work done.)

	MANUFACTURING BAKERIES		PLANING MILLS		POWER LAUNDRIES		CLEANING AND DYEING ESTABLISHMENTS
