¹ The first part of this table indicates the extent of commodity coverage, i. e., the amount and percentage of the total net sales that have been broken down by commodities. This information is presented for each of the 24 principal kind of business classifications. In the second part of the table the commodities are arranged alphabetically. Under each commodity the sales of that commodity are shown by trades and by types of distributors operating within each trade.

² The breakdown of sales by commodities was in some cases reported on the basis of gross sales rather than net sales. For this reason the commodity sales may in some instances exceed the total net sales by the amount of returned goods and allowances.

¹ The first part of this table indicates the extent of commodity coverage, i. e., the amount and percentage of the total net sales that have been broken down by commodities. This information is presented for each of the 24 principal kind of business classifications. In the second part of the table the commodities are arranged alphabetically. Under each commodity the sales of that commodity are shown by trades and by types of distributors operating within each trade.

² The breakdown of sales by commodities was in some cases reported on the basis of gross sales rather than net sales. For this reason, the commodity sales may in some instances exceed the total net sales by the amount of returned goods and allowances.

¹ Establishments in most cases reported average number employees on pay roll during year 1929, thus figures may not agree with total on specified dates.

² Employees not classified on automobile schedules or for establishments in towns and cities under 10,000 population, but are included in total.

³ Includes also 2 establishments handling electric refrigerators.

¹ The first part of this table indicates the extent of commodity coverage, i. e., the amount and percentage of the total net sales that have been broken down by commodities. This information is presented for each of the 24 principal kind of business classifications. In the second part of the table the commodities are arranged alphabetically. Under each commodity the sales of that commodity are shown by trades and by types of distributors operating within each trade.

² The breakdown of sales by commodities was in some cases reported on the basis of gross sales rather than net sales. For this reason the commodity sales may in some instances exceed the total net sales by the amount of returned goods and allowances.
