LETTER OF TRANSMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., Aug. 10, 1932.

SIR: I transmit herewith Volume I of the reports of the Census of Manufactures for 1929. This census, which was taken in 1930 as a part of the Fifteenth Decennial Census, is also the fifth of the biennial series of censuses of manufactures.

The manufactures reports for 1929 comprise three volumes. Volume I is a general report giving statistics by subjects for the United States as a whole, by industries and by States; Volume II is an assembly of the detailed reports for the 326 manufacturing and printing and publishing industries covered by the census; and Volume III will be an assembly of detailed reports for the 48 States and the District of Columbia. Each of these volumes includes a summary covering all industries and all States.

The statistics were compiled and published under the supervision of LeVerne Beales, chief statistician for manufactures, assisted by John F. Daly, executive chief of division. Certain special features of Chapter II, General Summary, were prepared by Tracy E. Thompson, of the Ohio State University, temporarily employed in the Bureau of the Census as expert on the presentation and analysis of manufactures-census data.

Respectfully

W. M. STEUART,
Director of the Census.

Hon. ROY D. CHAPIN,
Secretary of Commerce.
