¹Not available. ²Not including farms reporting only grapevines and/or mut trees. ³Nectarines included with peaches. ⁴Production of citrus for 1939 is for the crop harvested in the season of 1939-40 (from the bloom of 1939). ⁵These data are for Beauregard, Cameron, Jefferson, Plaquemines, St. Bernard, St. Tammany, Terrebonne, Vermilion, and Vernon Parishes only. The inquiries on the 1940 and 1930 schedules were not exactly comparable. Therefore, mandarins are included with satsumas; Parson Brown, pineapple, and "All other oranges" are reported under "Other early and midseason oranges"; and Valencia oranges only under "Valencia and other late oranges."

¹For 1934, farms reporting less than 1 acre were counted as farms reporting the annual legume crop, but were not included as farms reporting acres grown with other crops. ²For 1934 data, see "Velvetbeans, vetches, Canada and other ripe field peas" below. ³Where there are less than 3 farms reporting, data are included only in the State totals.

PARISH TABLE XIII-VEGETABLES HARVESTED FOR SALE, 1939, 1934, AND 1929; VALUE OF FARM GARDEN VEGETABLES, 1939 AND 1934; AND HORTICULTURAL SPECIALTIES, 1939

[This table is presented in two sections, the second section beginning on p. 198]

In this State, 411,859 acres of cropland harvested were irrigated, of which 404,036 acres were in rice. The bulk of the remaining irrigated cropland harvested was apparently in small fruits and vegetables, for which separate figures were not secured for the irrigated and nonirrigated acreages. Therefore, no parish data for irrigated and nonirrigated acres are shown for the various crops.
