COMMODITY SECTION 8

LUMBER—BUILDING—HARDWARE GROUP

The lumber—building—hardware group includes seven business classifications. The retail schedule did not provide for reporting lumber as a commodity separately from building materials. Therefore, the data for "lumber yards" and "building-materials dealers" have been combined and shown as "lumber yards and building-materials dealers." In addition, a separate United States summary is presented for each of these kinds of business.

The dealers in this group are engaged in selling, in retail quantities, such commodities as lumber, heating and plumbing equipment, paint, glass, wallpaper, electrical supplies, roofing materials and other construc-

tion supplies, tools, builders' hardware, household appliances, cutlery, and farm implements. Retail dealers sell to contractors and farmers, as well as other ultimate consumers. Distributors of lumber and building materials who sell primarily to dealers for resale are classified as wholesalers, for census purposes, and are included in the Wholesale Census reports. Descriptions of the several kinds of business in this group appear on page 914 of the appendix.

The table lists the kinds of business in the lumber—building—hardware group, and shows the size of the commodity samples.

One commodity block was provided for dealers in this group to report commodity analyses on Form 21 only; thus the commodity data do not reflect the sales of the smaller dealers and stores with annual sales under \$20,000. Block 26, which is reproduced on page 921 of the appendix, was used for each kind of business in the lumber—building—hardware group. Some of the items on the schedule, when not applicable to particular kinds of business, are combined with "other sales" in the following tables for those kinds of business. On the other hand, a break-down of "other sales" was available in a supplementary block (block 36, p. 922) from which was obtained information not listed in block 26 but shown in the following tables.

For full explanation of the method of presenting commodity data and description of the tables shown, see text beginning on page 1.

KIND OF BUSINESS	DOLLAR SALES			NUMBER OF STORES

1 The sums of the State figures differ from the United States totals because of including, to avoid disclosure, farm implement—tractor—hardware dealers in certain State figures as indicated, but not in the United States totals.

2 Includes one farm implement—tractor—hardware dealer.

3 Data not shown because the sample was inadequate.

4 Includes three farm implement—tractor—hardware dealers.

* Employees and pay roll include paid executives of corporations but not the number and compensation of proprietors of unincorporated businesses.

¹ The sums of the State figures differ from the United States totals because of including, to avoid disclosure, farm implement—tractor—hardware dealers in certain State figures as indicated, but not in the United States totals.

² Includes one farm implement—tractor—hardware dealers.

³ Includes three farm implement—tractor—hardware dealers.

* Employees and pay roll include paid executives of corporations but not the number and compensation of proprietors of unincorporated businesses.

¹ Includes two farm implement—tractor—hardware dealers.

² Includes one farm implement—tractor—hardware dealer.

COMMODITY SECTION 9

EATING AND DRINKING PLACES

This group includes four business classifications—drinking places, and three kinds of eating places. Hotel restaurants and lunch counters, and drinking places operated by hotels, are included in the Hotel Census. Restaurants and lunch counters located within other retail stores are not included in this group as separate establishments unless they are operated as leased departments by outside operators. Eating and drinking places located in clubs, institutions, and industrial plants where service is primarily limited to members or employees are not included in retail trade. Descriptions of the several kinds of business in this group appear on pages 914 and 915 of the appendix.

The following table lists the kinds of business in the eating and drinking place group, and shows the size of the commodity samples:

KIND OF BUSINESS	DOLLAR SALES			NUMBER OF ESTABLISHMENTS		
	All stores (add 000)	Establishments reporting commodity data (add 000)	Percent cover- age	All stores	Establishments reporting commodity data	Percent cover- age
Restaurants, cafeterias, lunchrooms.....	\$1,704,854	\$1,439,856	81.6	99,068	68,863	69.5
Lunch counters and stands.....	332,295	228,877	68.9	62,673	34,383	54.9
Soft drink, juice, ice cream stands.....	37,871	10,874	28.7	8,051	2,525	31.4
Drinking places.....	1,385,032	1,204,074	86.9	135,594	112,221	82.8

Two commodity blocks, which are reproduced on pages 918 and 920 of the appendix, were used by eating and drinking places to report commodity analyses. These are block 3 of Form 20, and block 14 of Form 21. The data for restaurants, cafeterias, lunchrooms, and drinking places are presented in two sales-size groups;

the figures for places with annual sales of \$20,000 or more are based upon reports for establishments using Form 21, while the figures for places with less than \$20,000 annual sales are from Form 20. The information reported in the two blocks for lunch counters and stands were combined and shown in consolidated form; the items gasoline, oil, tires, and service receipts appear only on Form 20, which is indicated by the indention of the two items under "other sales." Data for soft drink, juice, ice cream stands are presented only for those establishments reporting on Form 20.

As shown in the commodity blocks, provision was made for eating and drinking places to report the sale of bottled beer and wine and packaged liquors, as well as fountain or bar sales. These items were not always properly reported, some places reporting as "beer, wine (bottled or canned)" and "liquors (packaged goods)," all sales of these beverages which were made in the original container, even though the goods were consumed on the premises.

Because of this irregular reporting, the three commodity items "fountain or bar sales"; "beer, wine (bottled or canned)"; and "liquors (packaged goods)" have been combined for drinking places and shown as "beer, wine, liquors." For eating places, each of the three items is shown separately as reported. Use of the data for these kinds of business should be made with the qualification that the sale of packaged beer, wine, or liquor is not adequately reported as between goods consumed on the premises and goods sold for consumption off the premises.

For full explanation of the method of presenting commodity data and description of the tables shown, see text beginning on page 1.

TABLES

TABLE 18A.—Summary analysis of commodity sales by geographic divisions and States, and for cities of over 500,000 population.

TABLE 18.—Commodity sales, by States, and for cities of over 500,000 population.

TABLE 2C.—Establishments, sales, personnel, pay roll, and stocks by geographic divisions and States, and for cities of over 500,000 population.

COMMODITY SECTION 10

DRUG STORES

The drug store group consists of two business classifications—drug stores with fountain and drug stores without fountain. Of the 39,452 stores classified as drug stores with fountain, 24,181 or 61.3 percent reported commodity analyses. The sales of these stores amounted to \$730,629,000 (60.6 percent) of the \$1,205,241,000 total sales of all drug stores with fountain.

Analyses were received from 8,954 drug stores without fountain, having sales of \$182,757,000. These stores represent 56.2 percent of the 18,451 stores and 51.5 percent of the \$357,261,000 total sales of all drug stores in this classification. Descriptions of these kinds of

business appear on page 915 of the appendix.

Two commodity blocks, which are reproduced on pages 918 and 920 of the appendix, were used by drug stores for reporting their analyses of sales. These are block 4 of Form 20, and block 15 of Form 21. The data are presented by two sales-size groups, the figures for stores with annual sales of \$20,000 or more being based upon reports for stores using Form 21, while the figures for stores with less than \$20,000 annual sales are from Form 20.

For full explanation of the method of presenting commodity data and description of the tables shown, see text beginning on page 1.

CENSUS OF BUSINESS

DRUG STORES WITHOUT FOUNTAIN

TABLE 18A.—SUMMARY ANALYSIS OF COMMODITY SALES
BY GEOGRAPHIC DIVISIONS AND STATES

(Limited to stores which report an analysis of their sales by commodities. Ratio of commodity coverage indicates sales size of sample.)

DIVISION AND STATE	STORES WITH ANNUAL SALES OF \$20,000 OR MORE													STORES WITH ANNUAL SALES OF LESS THAN \$20,000												
	All stores		Total sales analyzed		Commodity sales as percent of total analyzed									All stores		Total sales analyzed		Commodity sales as per- cent of total analyzed								
	Number	Sales (add 000)	Percent coverage	Amount (add 000)	Prescriptions	Drugs medicines, chemi- cals, compounds	Drug sundries, rubber goods, surgical supplies	Toilet preparations, toilet articles, soaps	Cigars, cigarettes, tobacco	Beer, wine (bottled or canned)	Liquors (packaged goods)	Candy, nuts, groceries, soft drinks, etc.	Other sales	Number	Sales (add 000)	Percent coverage	Amount (add 000)	Prescriptions	Drugs, sundries, cosmetics, toiletries, etc.	Cigars, cigarettes, tobacco	Beer, wine (bottled or canned)	Liquors (packaged goods)	Other sales (including candy soft drinks, etc.)
