DESCRIPTION OF KINDS OF BUSINESS

Kind-of-business classifications are not interchangeable with commodity classifications. Food stores, for instance, sell more than food, and food also is sold in other kinds of stores, including variety, general, and department stores. Likewise, apparel, furniture, and drugs are sold in many stores not classified as apparel, furniture, or drug stores. For the purpose of this classification it is necessary to include each establishment in a particular group on the basis of the activity from which it derives the principal part of its receipts. Many establishments sell such a wide range of articles that they cannot be classified on a basis of commodity sales; in such cases establishments are classified on the basis of usual trade designations, such as drug stores, delicatessens, and variety stores.

Retail trade is classified by 99 kinds of business, each of which is shown in table 2A in the appendix of this volume. Commodity analyses are shown for each of these kinds of business except "other food stores", "other women's accessories stores", "other apparel stores", "other home-furnishings stores", "other retail stores" and the six kinds of "second-hand" stores. These 99 kinds of business have been combined into 64 kinds of business for presentation of the various size analyses.

Kinds of business, which are defined below, are arranged by groups in the same order as they appear in table 2A. In most cases these definitions consist of listing the principal commodity or commodities sold by stores in the classification. In using these definitions the reader is cautioned that commodities not listed may also be sold by establishments in a given kind of business. The classification refers to the primary sales emphasis of the stores included.

FOOD GROUP

The Food Group includes 13 classifications. Establishments primarily engaged in selling prepared foods and meals for consumption on the premises, such as eating and drinking places, are included in classifications under those names, and stores primarily engaged in selling packaged liquor are also classified elsewhere.

GROCERY STORES (WITHOUT FRESH MEATS).—These stores are primarily engaged in selling at retail all sorts of canned foods, such as soups, vegetables, fruits, and meats, in addition to dry groceries, either packaged or in bulk, such as tea, coffee, cocoa, dried fruits, spices, sugar, flour, and crackers. They may carry smoked and prepared meats, and fresh fish and poultry in limited quantities, but not fresh meats. Usually fresh vegetables and fruits are carried.

COMBINATION STORES (GROCERIES-MEATS).—These stores are primarily engaged in selling the same line of merchandise as grocery stores, in combination with fresh meats.

DAIRY PRODUCTS STORES.—These establishments are primarily engaged in selling at retail such dairy products as milk, cream, butter, cheese, and related products. The dairy products store is engaged in over-the-counter sales to customers and this classification is differentiated from milk dealers in method of distribution and not by kind of commodity. Farmers' stands are excluded.

MILK DEALERS.—These establishments are primarily engaged in selling milk and cream, by daily delivery to the home. This classification is differentiated from the dairy products store in method of distribution and not by kind of commodity. The retail census excludes dairy farms, even though such farms sell milk at retail by daily delivery to the home. Dairy farms are included in the Census of Agriculture. Dealers who sell primarily to retailers or hotels and restaurants are considered, for census purposes, as engaged in wholesaling and are included in Wholesale Census reports.

MEAT MARKETS.—These stores are primarily engaged in selling fresh meats. They also sell cured meats, poultry, fish, dairy products, eggs, and other commodities.

FISH (SEA FOOD) MARKETS.—Included in this classification are stores and markets primarily engaged in selling fresh fish,

oysters, and other sea foods.

CANDY, NUT STORES.—These stores are engaged in selling, primarily, boxed or bulk candy, or boxed or bulk nuts.

CONFECTIONERY STORES.—These stores sell other kinds of confections, in addition to boxed and bulk candies and nuts. Operation of a soda fountain or lunch counter is common.

DELICATESSEN STORES.—These stores handle a wide range of products, many of which, such as meats and salads, are cooked foods ready for consumption in the home without further preparation. This classification is based largely on the trade designation and the stores included are, with few exceptions, those which designate themselves as delicatessens.

FRUIT STORES, VEGETABLE MARKETS.—These stores, stands, and markets sell primarily fresh fruits or fresh vegetables or both. They are frequently found in public or municipal markets or are operated as roadside stands.

BAKERIES, CATERERS.—This classification includes the retail bakery goods store that purchases its goods from a manufacturing bakery, and the retail branch of a manufacturing bakery. This classification also includes the manufacturing bakery whose business amounts to less than \$5,000 for the year. Caterers represent a specialized business in which service plays an important part, whose primary source of revenue is from the preparation of food and the serving of that food elsewhere than at the place of business. Manufacturing bakeries with annual production of \$5,000 or more are included in the Census of Manufactures, and are not included either as retail or wholesale establishments in Business Census reports.

EGG AND POULTRY DEALERS.—These stores are engaged in selling, primarily, eggs and live or dressed poultry. Dairy products are frequently handled.

OTHER FOOD STORES.—Included in this classification are stores and house-to-house distributors of coffee, tea, and spices; stores handling health foods, and other specialty food stores.

GENERAL STORES (WITH FOOD)

These stores sell a general line of merchandise, such as hardware, farm supplies, apparel and notions, with a substantial volume of food. These stores frequently sell gasoline and related automotive supplies and accessories. They are located typically but not exclusively in the smaller communities, and are frequently known as general merchandise stores. Many general stores designated as such on their schedules but shown by their commodity sales analysis to be predominantly food stores are therefore classified as grocery or combination stores. Others were found to be feed stores, or filling stations, or general merchandise stores, and are so classified.

GENERAL MERCHANDISE GROUP

The General Merchandise Group includes five classifications; these stores selling a number of lines of merchandise such as dry goods, apparel and accessories, furniture and home furnishings, small wares, hardware, and often food. Automotive distributors, the greater part of whose sales are to dealers, are excluded from this group, and are included in the Census of Wholesale Trade. A distributor of automobiles whose sales are primarily at wholesale is included in the Census of Wholesale Trade even though he may be the principal retailer in the area. The effect of this factor is important enough to cause an understatement of retail automobile sales in many areas. Establishments primarily engaged in selling trucks and motorized industrial equipment are, for census purposes, classified as wholesale establishments.

The stores which come under this group have been included on the basis of their usual trade designation rather than the more strict interpretation of the commodities handled. These stores sell prescriptions, drugs, or patent medicines, in combination with lines such as cosmetics, toiletries, tobacco, magazines and books, and novelty merchandise. In some States bottled wines and liquors constitute an important part of drug store sales.
