

# STATES, COUNTIES, AND CITIES

## DESCRIPTION OF TABLES

This section of the report on Service establishments presents statistics for States, counties, and cities. The degree of detail shown in the several tables varies with the particular area and the relative importance of the individual kinds of business within the given area.

**Table 1.**—This table presents, for each State and the District of Columbia, data on the number of establishments, receipts, number of active proprietors of unincorporated businesses, average number of full-time and part-time employees, and annual pay roll. Statistics are given for those kinds of business which justify separate treatment and which can be shown without disclosing individual operations.

**Table 2.**—This table presents basic statistics (number of establishments, receipts, personnel, and pay roll) for counties, urban places of more than 2,500 population, and the remainder of each county, by States. The statistical material of this table was first presented in a series of State reports issued during 1941, and later assembled in its present form appearing in the "States, Counties, and Cities" report of Service establishments. At the time of publication, certain areas were omitted, since the preliminary population figures indicated that each of these areas had fewer than 2,500 inhabitants. It was found, however, when final population figures were available, that 130 of these areas had a population exceeding 2,500, and statistics for these are presented in table 2A, supplementing data as presented in table 2.

**Table 3.**—Basic data (number of establishments, receipts, personnel, and pay roll) for cities and towns of more than 25,000 population are included in this table. The cities are arranged alphabetically within their respective States, and the statistics for each include as many separate kinds of business as is practicable.

**Table 4.**—Monthly employment (both full-time and part-time) and sex of employees are covered in this table, for each State and the District of Columbia. Statistics are presented for "Selected kinds of business," confined to those shown in "Table 1," exclusive of "Custom industries," with a further limitation that the number of employees for the year be 100 or more.

**Table 5 series.**—This series presents critical data for all cities of more than 500,000 population, the statistics being presented in nine tables. In the case of New York City, the material is further divided into boroughs.

Table 5A shows the number of establishments, receipts, active proprietors, average number of employees (both full-time and part-time), and annual

pay roll. Statistics for each city show the more important kinds of business based on volume of receipts (United States totals). Table 5B presents statistics on monthly employment (both full-time and part-time) and sex of employees. In addition to city totals, data are shown for each kind of business, exclusive of "Custom industries," having an average of 100 or more employees for the year.

Tables 5C, 5D, and 5E show city totals for number of establishments, receipts, personnel, and pay roll, broken into size groups based on volume of receipts. Table 5F presents the same basic data broken into size groups based on the average number of employees for the year, as derived from the conversion formula given under the caption "Table 4 series," page 13. Table 5G shows the basic data for each city according to legal forms of organization.

Table 5H gives statistics on source of receipts and the number of establishments reporting merchandise sales. Table 5I presents data on proprietors making regular withdrawals from their businesses, the amount of such withdrawals, and the number of family members (full-time and part-time) employed in service establishments, and paid no stipulated wage.

**Table 6.**—This table consists of statistics for beauty parlors located in urban places of more than 5,000 population, showing for each place the number of such establishments, their receipts, number of active proprietors, average number of employees, and pay roll. The urban places for which these data are shown are arranged alphabetically within their respective States. In order to avoid disclosing individual operations, statistics for 128 urban places, which qualify on the basis of population, are omitted. The following table summarizes beauty parlor statistics for all places of more than 5,000 population, and shows their importance in relation to United States totals for this kind of business:

	Number of beauty parlors	Re- ceipts (add 000)	Active proprietors of unincorporated businesses	Number of em- ployees * (average for year)	Pay roll * (add 000)
United States, total.....	83,071	\$231,670	85,419	89,296	\$74,496
Urban places of more than 5,000 population, total.....	61,146	199,833	63,330	88,443	68,340
Shown separately in table 6, total.....	60,951	199,329	63,138	88,225	68,175
Other urban places, total.....	195	504	192	218	174
Percentage of United States repre- sented by urban places of more than 5,000 population.....	73.6	86.3	74.1	89.1	91.7

\* Employees and pay roll include paid executives of corporations but not the number and compensation of proprietors of unincorporated businesses.

## CENSUS OF BUSINESS

**Table 7.**—This table presents, for selected cities of more than 25,000 population, data on four important kinds of business in the "Automotive repairs and services" group. City totals on number of establishments, receipts, number of active proprietors, average number of employees, and pay roll, are presented for each of the four kinds of business. The cities selected are arranged alphabetically within their respective States.

**Table 8.**—Data on service establishments having Negro proprietors are presented for each city having a Negro population of approximately 50,000 or more. These statistics give basic data (establishments, receipts, personnel, and pay roll) for the more important kinds of business. It should be noted that Negro corporate activities are not covered in this table

\* Employees and pay roll include paid executives of corporations but not the number and compensation of proprietors of unincorporated businesses.

1 Includes statistics for one establishment classified as "Warehousing, cotton."

2 Less than \$500.

3 Includes custom industries, and small manufacturing plants not included in the Census of Manufactures, for the reason that the value of products of each establishment is less than the minimum necessary to be classed as a manufacturing plant.

1 Average less than one.

2 Less than \$500.

3 Includes custom industries, and small manufacturing plants not included in the Census of Manufactures, for the reason that the value of products of each establishment is less than the minimum necessary to be classed as a manufacturing plant.

\* Employees and pay roll include paid executives of corporations but not the number and compensation of proprietors of unincorporated businesses.

<sup>1</sup> Includes custom industries, and small manufacturing plants not included in the Census of Manufactures, for the reason that the value of products of each establishment is less than the minimum necessary to be classed as a manufacturing plant.

<sup>2</sup> Includes one establishment of the "Miscellaneous services" group, combined to avoid disclosure.

<sup>3</sup> Less than \$500.

Business services.....	41	638	28	146	245	Miscellaneous services.....	5	45	3	12	9

\* Employees and pay roll include paid executives of corporations but not the number and compensation of proprietors of unincorporated businesses.

<sup>1</sup> Includes custom industries, and small manufacturing plants not included in the Census of Manufactures, for the reason that the value of products of each establishment is less than the minimum necessary to be classed as a manufacturing plant.

DISTRICT OF COLUMBIA

For Washington, D. C., see District of Columbia, table 1, page 137.
