

# HOTELS: 1939

## General Explanations

**Introduction.**—Statistics on hotels compiled from data collected in connection with the 1939 Census of Business are presented in this report. The number of hotels, number of guest rooms, receipts, number of active proprietors of unincorporated businesses, average number of employees for the year, and annual pay roll are shown, both in totals and for year-round and seasonal hotels separately, for the United States by geographic divisions and States, and for both types of hotels combined for cities having a population of 10,000 or more.

Presentations are also included for (1) monthly employment and sex of employees for year-round and seasonal hotels, both combined and separately, by geographic divisions and States, and in totals for all hotels for cities of more than 500,000 population; (2) size groups based on volume of receipts; (3) size groups based on number of guest rooms; (4) legal forms of organization; (5) proprietors' withdrawals and family members employed in the business; and (6) analysis of receipts based on source. In addition, the following statistics are presented by geographic divisions and States, and for cities of more than 500,000 population, for year-round hotels having 25 or more guest rooms: Guest rooms available for transient and residential guests; employment and pay roll for a specific week by occupational groups; employees receiving meals and quarters; percentage of guest-room occupancy; and comparative statistics (1939 and 1935) for the United States, by geographic divisions and States, and for cities of more than 250,000 population.

While the schedule employed for the Hotel Census contained an inquiry on sales taxes, the irregularity in the reporting of this item was so great as to impair the significance of such totals as might have been obtained, and therefore no separate data on taxes are shown in this report.

**Scope of the census.**—The census includes establishments designating themselves as hotels and providing hotel accommodations as their major business activity. Establishments reporting a total of less than six guest rooms, or receipts from room rentals amounting to less than \$500, were excluded from the present census. Hotels having six or more guest rooms, but failing to report separately the amount of income from room rentals, were not omitted unless total receipts amounted to less than \$500. Apartment hotels were canvassed and classified as hotels, provided a substantial portion of their receipts was derived from the accommodation of transient guests. Apartment houses, residential

hotels catering exclusively to permanent guests, boarding houses, lodginghouses, tourist homes or camps, resorts, Y. M. C. A.'s, Y. W. C. A.'s, dude ranches, club dormitories, and other similar establishments furnishing lodging and/or meals to guests are not considered hotels for census purposes.

The activities of restaurants and other eating and drinking places operated on the hotel premises by the hotel are included in the hotel reports. On the other hand, similar activities operated as concessions are included in the Census of Retail Trade. Concession rentals however, are included as a part of the hotel receipts.

**Area and period covered.**—The canvass, covering the 48 States and the District of Columbia, was taken by enumerators who visited each business establishment during the first 8 months of 1940. A separate report was secured for each place of business, even though two or more establishments were under the same ownership. The activities of establishments reporting usually covered the calendar year 1939, although in a limited number of cases establishments reported on a fiscal-year basis. Seasonal establishments and new enterprises reported for that part of the year during which they were in active operation.

**Completeness of coverage.**—The canvass of hotels was conducted for the most part during the early months of 1940, at which time many of the summer hotels were inoperative. Due to the inability of the enumerators to locate some of the owners of such closed establishments for the purpose of securing reports, the canvass of seasonal hotels, particularly in the New England States and in Pennsylvania and New Jersey, is incomplete. Although incompleteness in coverage of seasonal hotels also existed in previous hotel censuses, in the absence of data which would confirm the uniformity of extent of shortage in coverage in the present and previous censuses, comparisons of 1939 data on seasonal hotels for the above-mentioned States, with data resulting from previous censuses, are not recommended.

While a check of census data for year-round hotels with hotel directories and other sources indicates that an occasional year-round establishment had been missed in the canvass, the business represented by such hotels constitutes only a very small proportion of the total amount of hotel business for the country or for the States, and in only a few instances are the figures for the community affected to any appreciable extent by such omissions.

### Explanation of Terms

**Year-round and seasonal hotels.**—All hotels which are normally in operation at least 9 months of the year are considered year-round hotels. Hotels which normally operate less than 9 months of the year are considered seasonal hotels.

**Receipts.**—Receipts represent total revenue of the establishment. In addition to receipts from room rentals; the revenue of hotels may include receipts from the sale of meals, receipts from the sale of beverages, receipts from the sale of merchandise (such as gasoline and oil; cigars and cigarettes; and packaged liquor, wine, and beer), and receipts from other sources, including those for laundering, storage, repairs, rentals for concessions, and other space rentals.

**Active proprietors of unincorporated businesses.**—The number of active proprietors includes owners or partners of unincorporated businesses devoting the major portion of their time to the operation of the business. Proprietors are not included in the count of employees nor is their compensation included in pay roll. Salaried officers of corporations and executives are classified as employees, not as proprietors or firm members, and their compensation is therefore included in pay roll.

**Employees.**—This term represents the number of full-time and part-time paid employees, including salaried officers of corporations and executives, but excluding proprietors of unincorporated businesses and members of their families who are paid no stipulated wage or salary. The number of employees shown is an average for the year; this average was obtained by totaling the number reported monthly (full-time and part-time separately) for the period ended nearest the 15th of each month, and dividing the sum by 12.

**Full-time and part-time employees.**—Full-time employees are those who work or are paid for the full number of hours of the workweek. Also reported as full-time employees are extras and contingents who worked the full number of hours during the particular week for which employment data were requested. All other employees were reported as part-time employees.

**Pay roll.**—This includes all compensation (salaries, wages, commissions, and bonuses) paid during the year to all employees. This item does not include compensation for proprietors or firm members of unincorporated businesses. The schedule specified that pay-roll figures should not include payments in kind, such as meals and lodging. Pay roll is reported before deductions for Social Security, insurance, dues, etc.

**Sex of employees.**—The distribution of employees according to sex is based on the number of males and the number of females reported for only one pay-roll period, usually in October (see schedule in Appendixes), and not for each month of 1939.

**Rooms for transient and residential guests.**—Classification of guest rooms according to type of occupancy is based primarily on the decisions of respondents as to the total number of guest rooms usually available for transient guests and the number usually occupied by or available for residential guests. Where definition of the terms "transient" and "permanent" was requested, enumerators were instructed to define as permanent guests only those persons seeking lodging for a period of time usually more than a month and receiving as a rule reductions from the regular daily or weekly rates.

**Percentage of occupancy.**—The following formula was given to all field enumerators for use in computing the percentage of occupancy: To compute percentage of occupancy multiply number of guest rooms by 365 and divide number of occupied room-days by the result. To find number of occupied room-days for 1939, take total number of rooms occupied each day (or part of day) in the year and add these 365 totals. In the case of seasonal hotels the number of days in the annual period of operation (i. e., 60 days, 90 days, etc.) will be used instead of 365 days.

#### EXAMPLE:

Total number of rooms in hotel (8 single rooms plus a 2-room suite).....	10
	<i>Room-days</i>
1 room occupied for 50 days.....	50
2-room suite.....	200
Occupied as a suite 50 days.....	100 room-days
Occupied as single room 100 days.....	100 room-days
1 room occupied for 100 days.....	100
5 rooms occupied for 360 days.....	1,800
1 room unoccupied throughout year.....	
Total.....	2,150
[Total: 2,150 occupied room-days for 1939.]	
Total number of guest rooms (10) multiplied by 365=3,650	
Percentage of occupancy = $\frac{2,150}{3,650}$ = 59 percent.	

### Description of Tables

The statistical material presented in this report is organized into 14 series of tables, each summarizing a particular phase of the Hotel Industry. There are 36 tables in all, each of which is described under the heading of the series into which it is integrated.

Any interpretation drawn from the data contained in the report must be conditioned by the fact that the Hotel Industry, for the purposes of this census, comprises two distinct types of establishments; the first, year-round hotels, are operated continuously (or at least 9 months of the year), while the second, seasonal hotels, are operated for a limited time only (by definition, less than 9 months). Obviously, the prevalence or lack of seasonal hotels will affect the data for any given area.

While no attempt has been made to present any detailed analyses of the data given in these tables, brief analytical comments have been introduced, as well as tables showing the percent distribution of the various critical data.

**Table 1 series.**—The first three tables in this series present basic statistics (number of hotels, number of guest rooms, receipts, number of active proprietors of unincorporated businesses, average number of employees for the year, and annual pay roll), by geographic divisions and States. Table 1A presents data for all hotels, while tables 1B and 1C present data for year-round hotels and seasonal hotels, respectively. Hotels classified as year-round hotels numbered 25,036 representing 89.5 percent of the total number of hotels reported, 90.9 percent of the total number of guest rooms, 94.6 percent of the total receipts, 95.4 percent of the average employment, and 95.9 percent of the annual pay roll.

Seasonal hotels (those operating less than 9 months of the year) numbered 2,951, and reported receipts of \$46,657,000. Five States (Florida, New York, New Jersey, California, and Maine) reported 1,819 of this number, or 61.6 percent, with receipts of \$31,648,000 or 67.8 percent. Kansas, Nebraska, North Dakota, and the District of Columbia reported no seasonal hotels.

Table 1D presents basic statistics for all hotels, combining year-round and seasonal hotels, for cities of more than 500,000 population. The combined totals for the 14 cities shown separately in this table represent 12 percent of the total number of hotels, 29.1 percent of the total number of guest rooms, 38.4 percent of the total receipts, 35.2 percent of the average employment for the year, and 43.9 percent of the annual pay roll.

**Table 2.**—This table presents basic statistics for 528 cities of more than 10,000 population, combining data for year-round and seasonal hotels. Aggregate totals for these cities represent 48.6 percent of the total number of hotels reported, 70 percent of the total number of guest rooms, and 78.3 percent of the total receipts. Statistics for certain cities having a population of 10,000 or more were not included in the table to avoid disclosure of individual operations. Statistics for a few additional cities were also withheld because of incompleteness of coverage.

**Table 3 series.**—Presents statistics on monthly employment and sex of employees by geographic divisions and States as follows: (1) All hotels (combining year-round and seasonal hotels); (2) year-round hotels; and (3) seasonal hotels. Table 3D presents similar data for cities of more than 500,000 population, combining statistics for year-round and seasonal hotels.

Some consideration should be given to the following factors which unquestionably have a bearing on the monthly employment data, and consequently on the average number of employee data presented: (1) That the pay period nearest the 15th of each month for some hotels may not have been representative of the average employment situation for the month; (2) possible misunderstanding by some respondents of the terms "full-time employees" and "part-time employees" as

defined for the purpose of the census; (3) the inability of some respondents to make the necessary segregation of part-time and full-time employees, in which case all employees would probably have been reported as either "full-time" or "part-time"; (4) possibility of erroneous inclusion by some respondents of proprietors or unpaid members of their families in the reported monthly employment data.

Inasmuch as the division of employees according to sex is based on the number of males and the number of females reported for only one pay-roll period and not for each month of 1939, the data on number of men and number of women presented in this report do not represent actual averages for the year. While the sex ratio of employees for any one pay-roll period in October may be assumed to be generally representative of sex distribution throughout the entire year, it should be borne in mind that seasonal and other influences, which may affect the personnel structure of establishments during the year, have not been taken into account in determining the sex distribution of employees for the purpose of the Business Census.

**Table 4 series.**—Table 4A presents basic statistics (number of hotels, number of guest rooms, receipts, active proprietors of unincorporated businesses, average number of employees, and annual pay roll) by geographic divisions and States, for six size groups based on volume of receipts, ranging from "Less than \$20,000" to "\$300,000 or more." Table 4C presents similar data for cities of more than 500,000 population. Table 4B further subdivides hotels reporting receipts of less than \$20,000 into six size groups, presenting statistics by geographic divisions and States, while table 4D gives corresponding data for cities of more than 500,000 population.

The concentration of the Hotel Industry in the larger size groups is evidenced by the fact that 63.4 percent of the total receipts were reported by hotels having receipts of over \$100,000, while the average employment and pay roll represented 63.9 and 70.8 percents of the total employment and pay roll reported by the industry. Of the total number of hotels (27,987), only 505 or 1.8 percent reported receipts of over \$300,000, but the combined receipts of this group amounted to \$372,257,000 or 43.1 percent of the total receipts. The "Less than \$20,000" group accounted for 86.8 percent of the total number of active proprietors of unincorporated businesses reporting, 78.1 percent of the total number of hotels, and 44.4 percent of the total number of guest rooms.

**Table 5 series.**—Basic statistics (number of hotels, number of guest rooms, receipts, active proprietors of unincorporated businesses, average number of employees, and annual pay roll) are presented in this series, by geographic divisions and States, for cities of more than 500,000 population, and for selected cities of less than 500,000 population, by size groups based on the number of guest rooms.

The following table gives the percent distribution for all hotels (year-round and seasonal combined) for the United States, by size groups based on the number of guest rooms:

	Number of hotels	Total number of guest rooms	Re-ceipts	Active proprietors of unincorporated businesses	Number of employees <sup>1</sup> (average for year)	Total pay roll <sup>1</sup>
United States.....	100.0	100.0	100.0	100.0	100.0	100.0
Hotels having—						
300 guest rooms or more.....	2.0	18.9	39.8	.1	38.9	46.1
100 to 299 guest rooms.....	9.0	27.1	30.0	3.8	32.1	31.4
50 to 99 guest rooms.....	16.5	21.5	18.9	13.9	14.1	12.4
25 to 49 guest rooms.....	29.1	19.5	9.1	32.1	6.0	6.4
Less than 25 guest rooms.....	43.4	13.0	7.2	50.1	6.0	3.7

<sup>1</sup> Employees and pay roll include paid executives of corporations but not the number and compensation of proprietors of unincorporated businesses.

Hotels having 100 or more guest rooms, while numbering only 3,069 or 11 percent of the total number of hotels reported, account for 46 percent of the total number of guest rooms, 69.8 percent of the total receipts, 71 percent of the average employment, and 77.5 percent of the pay roll. Hotels reporting less than 25 guest rooms represent 43.4 percent of the total number of hotels reported, and 50.1 percent of all active proprietors of unincorporated businesses. However, their receipts amounted to only 7.2 percent of the total receipts.

**Table 6.**—Basic data (number of hotels, number of guest rooms, receipts, active proprietors of unincorporated businesses, average number of employees, and annual pay roll) by geographic divisions and States, by legal forms of organization, are presented in this table. For census purposes, legal forms of organization comprise the following: (1) Individual proprietorships; (2) partnerships; (3) corporations; and (4) other forms of organization, including receiverships trusteeships, and similar forms.

Of the 27,987 hotels which reported, 23,320 or 83.3 percent were operated as unincorporated businesses—individual proprietorships alone represented 72.1 percent of the total number, and accounted for 43.2 percent of the total number of guest rooms. Incorporated companies reported 70 percent of the total receipts, 71.8 percent of the average employment for the year, and 77.8 percent of the annual pay roll. Average wages for corporations amounted to \$780 as compared with \$532 for hotels operating as individual proprietorships.

**Table 7 series.**—Presents statistics for paid proprietors and firm members, that is, proprietors and firm members whether active or inactive in the business, who were paid a regular salary or drawing account. Data are also given on the number of family members (both full-time and part-time) employed in hotels who were paid no stipulated wage. Statistics are presented for geographic divisions and States and for cities of more than 500,000 population.

**Tables 8 and 9 series.**—These two series present an analysis of receipts based on source, by geographic divisions and States, for cities having a population of more than 500,000, and for selected cities of less than 500,000 population. Since many hotels were unable to segregate their meal receipts from their receipts derived from room rentals, the tables in the "8" series give an analysis of receipts combining room rentals and sale of meals. The tables in the "9" series, however, present statistics for 10,105 hotels which were able to give separate figures for receipts from room rentals and sale of meals. Since the total receipts of these hotels represented 79 percent of the total receipts reported by all hotels, it is felt, that the sample is sufficiently large to be indicative of trends in the industry. In this connection, it is noted that of the total receipts reported by these hotels, 45.7 percent was derived from room rentals, 30.6 percent from sale of meals, 14.7 percent from sale of beverages, 2.1 percent from sale of merchandise, and 6.9 percent from other sources.

**Table 10 series.**—Presents data for year-round hotels of 25 guest rooms or more, showing the number of hotels, number of guest rooms available for transient and residential guests, by size groups based on the number of guest rooms, by geographic divisions and States, and for cities of more than 500,000 population. For census purposes, these groups consist of hotels having 300 guest rooms or more, 100 to 299 guest rooms, 50 to 99 guest rooms, and 25 to 49 guest rooms.

**Table 11 series.**—Presents employment and pay-roll data for a specific week by occupational groups for year-round hotels of 25 guest rooms or more, by geographic divisions and States and for cities of more than 500,000 population. (Data were requested for the week ended Oct. 21, 1939, or other more representative pay period.) The following table gives the percent distribution by occupational groups for year-round hotels of 25 guest rooms or more:

	FULL-TIME EMPLOYMENT		PART-TIME EMPLOYMENT	
	Number of employees	Pay roll	Number of employees	Pay roll
United States.....	100.0	100.0	100.0	100.0
Executives and salaried corporation officers.....	2.2	8.1	—	—
Office and clerical employees.....	11.7	15.4	4.3	5.3
Waiters and waitresses.....	14.4	9.1	45.4	31.9
Other dining room, kitchen, and bar employees.....	19.7	21.8	15.9	18.2
Housekeeping employees.....	27.6	21.2	16.9	20.6
All other employees.....	24.5	24.5	17.4	23.8

**Table 12 series.**—Presents data for year-round hotels having 25 guest rooms or more, by geographic divisions and States, and for cities of more than 500,000 population, on the number of employees receiving meals and/or quarters in addition to cash wages, for a specific week. (Data were requested for the week ended Oct. 21, 1939, or other more representative pay period.) The

count of employees receiving one meal daily includes those employees receiving a single meal only, and does not include those employees receiving two or three meals daily. Similarly, the number of employees reported as receiving two meals daily is exclusive of those receiving three meals per day. The count of employees receiving quarters is independent of the count of employees receiving meals, although some of the employees receiving quarters may also receive meals.

Nine thousand and fifty-two of the total number of year-round hotels having 25 guest rooms or more (14,084) reported the furnishing of either meals and/or quarters to employees in addition to cash wages. Of the 303,621 employees of year-round hotels having 25 guest rooms or more, 22,186 or 7.3 percent were furnished one meal daily; 45,485 or 15 percent, 2 meals daily; 60,952 or 20.1 percent, 3 meals daily; and 35,130 or 11.6 percent were furnished living quarters.

**Table 13 series.**—Table 13A presents statistics on number of hotels, receipts, number of guest rooms, and number of rooms available for transient guests, by percentage of occupancy groups, by geographic divisions and States. Table 13B gives similar data for cities having more than 500,000 population. The method used in determining the percentage of occu-

pancy is explained in detail in the paragraph "Percentage of occupancy," page 567. The following table gives percent distribution of year-round hotels of 25 guest rooms or more, by percentage of occupancy groups:

	Num- ber of hotels	Re- ceipts	Total number of guest rooms	Rooms for transient guests
United States.....	100.0	100.0	100.0	100.0
Hotels having—				
91 or more percent occupancy.....	2.7	2.5	3.4	1.7
81 to 90 percent occupancy.....	9.7	8.8	11.3	5.8
71 to 80 percent occupancy.....	19.4	20.0	20.7	16.4
61 to 70 percent occupancy.....	19.0	22.9	21.0	21.4
51 to 60 percent occupancy.....	16.8	22.0	17.8	21.5
41 to 50 percent occupancy.....	15.0	15.5	14.0	17.7
31 to 40 percent occupancy.....	8.8	4.9	6.4	8.3
30 or less percent occupancy.....	8.7	3.4	5.5	7.3

**Table 14 series.**—Presents comparative statistics for 1939 and 1935 for year-round hotels having 25 guest rooms or more, by geographic divisions and States, and for cities of more than 250,000 population.

Due to the fact that the 1935 Hotel report presents no data for California (year-round hotels having 25 guest rooms or more), the totals for the United States and the Pacific Division are not comparable with those for 1939.

## HOTELS: 1939

571

TABLE 1A.—HOTELS, GUEST ROOMS, RECEIPTS, PERSONNEL, AND PAY ROLL  
BY GEOGRAPHIC DIVISIONS AND STATESUNITED STATES  
SUMMARY

# TOURIST COURTS AND TOURIST CAMPS: 1939

## General Explanations

**Introduction.**—This report contains data on Tourist Courts and Tourist Camps which were collected in connection with the 1939 Census of Business. Detailed statistics (number of establishments, receipts, number of active proprietors of unincorporated businesses, average number of employees, annual pay roll, and number of cabins and rental units) are presented for the United States by geographic divisions and States.

Data are also presented by geographic divisions and States for (1) monthly employment and sex of employees; (2) size groups based on volume of receipts; (3) size groups based on number of rental units; (4) receipts based on source; (5) proprietors' withdrawals and family members employed in the business.

While the schedule employed for the Tourist Court and Tourist Camp Census contained an inquiry on sales taxes, the irregularity in the reporting of this item was so great as to impair the significance of such totals, and therefore, separate data are not presented in this report. The total receipts, however, include sales taxes collected directly from customers by reporting establishments.

**Scope of the census.**—The census includes those places of business engaged primarily in furnishing temporary lodging accommodations to tourists (largely motorists) in cabins or other similar structures. It does not include tourist homes (private residences furnishing accommodations to tourists), nor does it include trailer camps, dude ranches, tourist courts or camps operated by communities, or cottage colonies, catering to vacationists rather than tourists. Establishments reporting annual receipts of less than \$100, or those operating less than three rental units, are also excluded.

**Tourist courts and camps classified as retail establishments.**—Establishments primarily engaged in retail trade (filling stations, restaurants, drinking places, etc.), although maintaining tourist cabins, are classified in the Census of Retail Trade, providing their sales of merchandise represented over 50 percent of their total annual receipts. Since the Retail report does not publish separate statistics for such retail establishments, the following table presents data for tourist courts and camps reported by retail establishments having annual receipts of less than \$20,000 which operated tourist cabins as a secondary activity. Statistics were compiled from data returned on the short form retail schedule (Form 20). The schedule for retail establishments reporting receipts of more than \$20,000 (Form 21) made no provision for tourist camp data. Retail chain units,

regardless of the form reported on, submitted no tourist camp data. Statistics as given below supplement the data presented in other tables of this report, but are not included in the other tables.

NUMBER OF ESTABLISHMENTS AND ANALYSIS OF RECEIPTS OF RETAIL ESTABLISHMENTS REPORTING RECEIPTS FROM CABINS AND ROOM RENTALS, BY STATES: 1939

**Area and period covered.**—The canvass, covering the 48 States and the District of Columbia, was made by enumerators who visited each business establishment during the first 8 months of 1940. The activities of establishments reporting usually covered the calendar year 1939, although in some cases establishments reported on a fiscal-year basis. Seasonal establishments

and new enterprises reported for that part of the year during which they were in active operation.

**Completeness of coverage.**—The canvass was made during the first 8 months of 1940, when enumerators visited each identifiable place of business for the purpose of securing a report. It is known, however, that the coverage of tourist courts and camps is incomplete, due largely to the fact that in many localities the operations are of a seasonal nature, and at the time of the canvass many establishments were closed and, therefore, the enumerators were unable to secure reports. In comparing census data with data of other agencies collecting statistics on tourist courts and camps, the reader's attention is called to the fact that census data include only establishments primarily engaged in operating tourist courts and camps, and exclude data for concerns which operate tourist cabins as a secondary activity.

**Comparison of 1939 and 1935 statistics.**—In order to present comparative statistics for number of establishments and receipts for the two census periods as presented in the following table, statistics for tourist camps with filling stations, and those without filling stations, have been combined for 1935, since the schedule for 1939 made no provision for separate data on the two types of establishments.

Six States (Kansas, Kentucky, New Hampshire, Ohio, Pennsylvania, and South Carolina) show decreases in receipts during the 4-year period, while the remainder of the States show marked increases (seven States having increases of over 100 percent). However, the larger increases are probably the result of a more complete canvass for 1939, rather than excessive increases in the business activities.

<sup>1</sup> Delaware and District of Columbia combined with Maryland, to avoid disclosure.  
<sup>2</sup> Rhode Island combined with Vermont, to avoid disclosure.

### Explanation of Terms

**Establishments.**—The term "Establishment" as used in this report represents the number of concerns primarily engaged in furnishing temporary lodging accommodations to tourists, in cabins or other similar structures. As stated in a previous paragraph, if more than 50 percent of the total operating revenue of the concern reporting, represented receipts from the sales of merchandise, such establishment is included in the Census of Retail Trade, and excluded from the Census of Tourist Courts and Tourist Camps. For this reason, the number of establishments classified as tourist courts or camps does not equal the total number of establishments engaged in the activity.

**Number of cabins and units.**—The term "Number of cabins" indicates the number of buildings used for furnishing tourist court and camp accommodations, while the term "Number of units" indicates the number of rooms, apartments, single cabins, or other rental units, which are available for rental accommodations. In most cases, the number of units exceeded the number of cabins reported.

**Receipts.**—Figures listed under the caption "Receipts" in all tables of this report represent total operating receipts and include (1) receipts from rental units and tourist cabins; (2) receipts from sale of meals; (3) receipts from sale of beverages, including bar and fountain, packaged liquor, wine, and beer; (4) receipts from sale of merchandise (gasoline and oil, cigars, cigarettes, etc.); and (5) receipts from other sources. Sales taxes, either local, State, or Federal, if collected from the individual customer and paid directly by the establishment to the taxing agency, are included in the "Receipts" item.

**Active proprietors of unincorporated businesses.**—The number of active proprietors includes owners or partners of unincorporated businesses devoting the major portion of their time to the operation of the business, and is not included in the count of employees. Salaried officers of corporations and executives are classified as employees, not as proprietors or firm members.

**Employees.**—This term represents the number of full-time and part-time paid employees, including salaried officers of corporations and executives, but excluding proprietors of unincorporated businesses and members of their families who are paid no stipulated wage or salary. The number of employees shown is an average for the year; this average was obtained by totaling the number reported monthly (full-time and part-time separately) for the period ended nearest the 15th of each month, and dividing the sum by 12.

**Full-time and part-time employees.**—Full-time employees are those who work or are paid for the full number of hours of the workweek. Also reported as full-time employees are extras and contingents who worked the full number of hours during the particular week for which employment data were requested. All other employees were reported as part-time employees.

**Pay roll.**—This includes all compensation (salaries, wages, etc.) paid during the year to all employees. This item does not include compensation for proprietors or firm members of unincorporated businesses, nor compensation for members of the family who received no stipulated wage, nor does it include amounts received by employees in the form of tips. The schedule specified that pay-roll figures should not include payments in kind, such as meals and lodging.

**Sex of employees.**—The distribution of employees according to sex is based on the number of males and the number of females reported for only one pay-roll period, usually in October (see schedule in Appendixes), and not for each month of 1939. Consequently the data on number of men and number of women presented in this report do not represent actual averages for the year. While the sex ratio of employees for any one pay-roll period may be assumed to be generally representative of the entire year, it should be borne in mind that seasonal and other influences which may affect the personnel structure of establishments during the year have not been taken into account in determining the sex distribution of employees for census purposes.

#### Description of Tables

The report consists of six United States summaries by geographic divisions and States, which present statistics on tourist courts and tourist camps as compiled from the returns of a field canvass made in 1940, covering the 1939 operations of establishments reporting.

**Table 1.**—Presents data on number of establishments, cabins, and rental units; receipts; number of active proprietors of unincorporated businesses; and average number of employees and annual pay roll (full-time and part-time).

The combined total receipts for the West South Central Division (Arkansas, Louisiana, Oklahoma, and Texas), the Mountain Division (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, and Nevada), and the Pacific Division (Washington, Oregon, and California) amounted to \$22,831,000 or 62.2 percent of the entire receipts reported, while the 7,074 establishments reported for these three divisions represented 52.3 percent of the total number of establishments. California ranks first both in the number of establishments reporting (2,081) and in volume of receipts (\$7,930,000); Texas ranks second with 1,392 establishments reporting receipts of \$4,571,000.

**Table 2.**—Presents data for monthly employment (both full-time and part-time) and sex of employees. Tourist court and camp operations are, in most localities, of a seasonal nature, which is indicated by the large employment reported for the months of June, July, August, and September as compared with the other months. While the sex distribution of persons employed is practically the same (50.9 percent women and 49.1 percent men), for the United States as a whole, it is noted, however, in over half of the States, the percent of women employed represents over 50 percent of the State total.

**Table 3.**—Presents totals on number of establishments, number of rental units, and receipts, divided into size groups based on the volume of receipts of the reporting establishments. The number of establishments reported for the two groups with receipts of less than \$2,000 represented 63.6 percent of the total number of establishments reporting, while receipts of these two groups amounted to only 19.4 percent of total receipts. Establishments reporting receipts of \$5,000 or more numbered 1,796 or 13.3 percent of the total number of establishments reporting, while the receipts reported by such establishments amounted to \$19,887,000 or 54.2 percent.

**Table 4.**—Presents totals on number of establishments, number of units, and receipts, divided into size groups based on the number of rental units of the reporting establishments. Establishments reporting less than 10 rental units accounted for 52.4 percent of the total number of establishments, while their receipts amounted to only 21.3 percent of total receipts. Establishments reporting 30 or more units represented only 4.9 percent of the total number of establishments reporting, but their receipts accounted for 23.1 percent of the total receipts.

**Table 5.**—Presents data on receipts based on source. While the schedule requested separate data on receipts from rentals of tourist cabins and receipts from sale of

meals, it was found on examination of the reports submitted, that few concerns were able to furnish separate figures on these two items, and it was, therefore, necessary to present combined totals. The revenue received from sale of meals, however, represents a relatively small percent of the item.

**Table 6.**—Presents data on proprietors making regular withdrawals from their businesses, the amount of

such withdrawals, and number of family members (full-time and part-time) employed in tourist courts and camps and paid no stipulated wage. Tourist courts and tourist camps are generally unincorporated, and owned and operated by individual proprietors. This is evidenced by the fact that 13,365 active proprietors were reported by the 13,521 establishments in the United States.
