## FOREWORD

The statistics presented in Volume III of the Reports on Population, Sixteenth Decennial Census, are based on data from the Census of Population, taken in April 1940.

This volume, printed in five parts, presents the basic characteristics of the labor force of the United States as of March 1940, and includes data for the States, arranged alphabetically, together with a summary for the United States as a whole. Part 1 constitutes a summary for the United States. Part 2 presents statistics for the States from Alabama to Indiana; Part 3, from Iowa to Montana; Part 4, from Nebraska to Oregon; and Part 5, from Pennsylvania to Wyoming.

The material was first published in a series of State bulletins, each entitled "Population, Third Series, The Labor Force." These bulletins, with a few minor corrections, have been assembled and bound together as sections of the present volume.

An outline of the statistics presented in each State section is provided in the "Introduction" which precedes the section for the first State shown in this part of Volume III. These introductory materials, consisting largely of definitions of terms and explanations, are reproduced here exactly as they appeared in the individual State bulletins. A somewhat more extensive discussion is presented in Part 1 of this volume.
