¹ The total for this age interval of persons not in the labor force obtained from the 5-percent cross section of the population, multiplied uniformly by 20, exceeds the total population for the age interval obtained from a 100-percent tabulation. The inconsistency is due to sampling variation. Percentages shown for this age interval are based on the

¹ The total for this age interval of persons not in the labor force obtained from the 5-percent cross section of the population, multiplied uniformly by 20, exceeds the total population for the age interval obtained from a 100-percent tabulation. The inconsistency is due to sampling variation. Percentages shown for this age interval are based on the total for persons not in the labor force instead of on the total population.
