Table 1.—TOTAL POPULATION BY RACE, NATIVITY, PARENTAGE, AND SEX, FOR THE UNITED STATES: 1890 TO 1940

1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white and for nonwhite are from a complete count. 1940 figures for total population and total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures presented elsewhere. See introductory text for discussion of sampling reliability. Figures for white population in 1930 have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. A minus sign (-) denotes decrease

Table 2.—WHITE POPULATION BY NATIVITY AND PARENTAGE, FOR THE UNITED STATES, BY REGIONS, DIVISIONS, AND STATES: 1890 TO 1940—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. A minus sign (-) denotes decrease. Percent not shown where less than 0.1]

Table 2.—WHITE POPULATION BY NATIVITY AND PARENTAGE, FOR THE UNITED STATES, BY REGIONS, DIVISIONS, AND STATES: 1890 TO 1940—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. A minus sign (-) denotes decrease. Percent not shown where less than 0.1]

Table 2.—WHITE POPULATION BY NATIVITY AND PARENTAGE, FOR THE UNITED STATES, BY REGIONS, DIVISIONS, AND STATES: 1890 TO 1940—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. A minus sign (-) denotes decrease. Percent not shown where less than 0.1]

Table 2.—WHITE POPULATION BY NATIVITY AND PARENTAGE, FOR THE UNITED STATES, BY REGIONS, DIVISIONS, AND STATES: 1890 TO 1940—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. A minus sign (-) denotes decrease. Percent not shown where less than 0.1]

Table 2.—WHITE POPULATION BY NATIVITY AND PARENTAGE, FOR THE UNITED STATES, BY REGIONS, DIVISIONS, AND STATES: 1890 TO 1940—Con.

1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. A minus sign (-) denotes decrease. Percent not shown where less than 0.1

Table 2.—WHITE POPULATION BY NATIVITY AND PARENTAGE, FOR THE UNITED STATES, BY REGIONS, DIVISIONS. AND STATES: 1890 TO 1940—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. A minus sign (-) denotes decrease. Percent not shown where less than 0.1]

Table 5.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR DIVISIONS, URBAN AND RURAL: 1940 AND 1930

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports]

Table 5.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR DIVISIONS, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports]

Table 5.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR DIVISIONS, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 6.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR STATES, URBAN AND RURAL: 1940 AND 1930—Con.

[1940 statistics for native white by parentage are based on a 5-percent sample. 1940 statistics for foreign-born white are from a complete count. 1940 figures for total white, involving the addition of native and foreign born, are composite and therefore differ from corresponding figures published elsewhere. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports. Percent not shown where less than 0.1]

Table 8.—WHITE POPULATION BY NATIVITY, PARENTAGE, AND SEX, FOR CITIES OF 100,000 TO 500,000 INHABITANTS: 1940 AND 1930—Con.

[1940 statistics for native white of foreign or mixed parentage are based on a 5-percent sample. 1940 statistics for total white, foreign-born white, and total native white are from a complete count. 1940 figures for native white of native parentage are composite as they involve subtraction of native of foreign or mixed parentage from total native white. See introductory text for discussion of sampling reliability. 1930 figures have been revised to include Mexicans who were classified with "Other races" in the 1930 reports]
