SUGGESTED IDENTIFICATION

PREFACE

This Key to published and tabulated data for small areas presents in tabular form an index to the statistics based on the 1950 Censuses of Population and Housing which will be published, or will be available in the form of tabulated but unpublished data, for various types of areas smaller than States. While the "small areas" include blocks, wards, and minor civil divisions which are, relatively speaking, small in size, they also include such types of areas as urban places and standard metropolitan areas without any upper limits on size. The published reports to be issued in 1951 and 1952 containing data for small areas usually will include summaries for the larger areas such as States, divisions, regions, and the United States as a whole.

In general, the population and housing characteristics described in this Key will be the most detailed available for small areas. Later phases of the tabulation and publication program of the 1950 Censuses of Population and Housing will provide more complex cross-classifications and additional data for large cities and standard metropolitan areas, and for States, divisions, regions, and the United States as a whole.

This Key has been issued prior to the completion of the tabulations it covers. It is possible that some minor changes may be made in the tabulation or publication programs subsequent to the issue of this report.

This report was prepared by Charles Merzel, under the supervision of Howard G. Brunsman, Chief, and Edwin D. Goldfield, Program Coordinator, Population and Housing Division.

August 1951.
