THE 1950 CENSUSES - HOW THEY WERE TAKEN

PRINCIPAL DATA COLLECTION FORMS

DESCRIPTION OF FORMS

Form P1 - 1950 Census of Population and Housing Schedule (page 4-7)
Size - 19" x 22", both sides
Color - white paper (25% rag with titanium dioxide added to increase opacity to 85%), green ink
Number printed - 10,000,000
Use - This schedule was the basic questionnaire used by the enumerator in collecting the information. The front includes space for population information for 30 persons with a separate line for each person enumerated. The reverse side, the Housing schedule, contains spaces for information for 12 dwelling units which housed the persons enumerated on the Population side of the form. Questions at the bottom of the schedule (21-32c) were asked for the 1 person in 5 whose name fell on the sample lines indicated in black. There were five printings to vary the sample lines. The person whose name fell on the last sample line was also asked the additional questions from 34 on.
Distribution - Included in Enumerator's portfolio.

Form P2 - Individual Census Report (page 8)
Size - 13\(\frac{1}{2}\)" x 9\(\frac{1}{2}\)", both sides
Color - white paper, blue ink
Number printed - 14,700,000
Use - Form P2 was used to obtain Census data concerning a person when the enumerator was not able to obtain the information directly. It was used for obtaining information about lodgers, for enumerating transients staying in hotels, tourist camps, "V's," flophouses, missions, etc., for persons in general hospitals and in selected types of institutions, and for persons residing in barrack type structures on military reservations. The form had a gummed flap so that it could be sealed after it was filled out and then left with a third party to be given to the enumerator. The information collected on this form was transferred to the P1 schedule.
Distribution - The form was left by the enumerator with neighbors, hotel clerks, or the heads of the various hotels and institutions mentioned above to be distributed to the persons concerned. Occasionally the form was completed by the use of records for certain classes of institutionalized or hospitalized persons.

Form P3 - Infant Card (page 9)
Size - 8" x 10\(\frac{1}{2}\)"
Color - buff card, green ink
Number printed - 3,000,000
Use - This form was used by the enumerator to obtain special information for infants born between January 1, and April 1, 1950. It was designed to be used in testing the completeness of the enumeration of infants and the completeness of birth registration, a project undertaken in cooperation with the National Office of Vital Statistics.
Distribution - Included in Enumerator's portfolio.

Form P4 - Crews of Vessels Report (page 10)
Size - 14" x 9\(\frac{1}{2}\)"
Color - yellow paper, green ink
Number printed - 1,000,000
Use - Form P4 was designed to obtain information on officers and crew members of American vessels who were living aboard ship, whether in harbor or at sea on April 1, 1950.
Distribution - Self-sealing forms were mailed directly to the captain of each government operated vessel and to the operator of each private line. The operator of the line shipped the forms to the captain of each vessel. The captain of each ship distributed the report to the crew members, each of whom filled out his own report. Upon completion, all reports for the vessel were packed and sent to Washington.

Form P6 - Confidential Report on Income (page 11)
Size - 12" x 7\(\frac{1}{4}\)"
Color - white paper, blue ink
Number printed - 5,300,000
Use - Form P6 was furnished to persons whose names fell on sample lines, who did not wish to divulge their incomes to the enumerators. The respondent was given Form P6 to fill out, seal, and mail directly to Washington.
The form was self-sealing and pre-addressed.
Distribution - Included in Enumerator's portfolio.

Form P5 - Overseas Census Report (page 12-13)
Size - 8" x 10\(\frac{1}{2}\)"
Color - white paper, green ink
Number printed - 1,300,000
Use - Form P5 was used for the enumeration of members of the Armed Forces and civilian employees stationed abroad, their families living with them outside continental United States, and civilian American citizens who were residing overseas on April 1, 1950.
Distribution - The forms were mailed to all military installations outside the territorial limits of the United States and its possessions and to foreign service offices abroad. Members of the Armed Forces, and civilian employees of the Department of Defense stationed abroad were enumerated by that Department. The Department of State handled the enumeration of all other government employees and other civilians residing abroad.

Form P8 - Indian Reservation Schedule (page 14)
Size - 16" x 10\(\frac{1}{2}\)"
Color - white paper, black ink
Number printed - 175,000
Use - This schedule, completed by the enumerator at the same time as and in addition to the regular P1, was filled for each household on a Federal Indian Reservation to provide the Bureau of Indian Affairs of the Interior Department with special information. Personnel from the Census field offices called upon the Reservation officials to make arrangements for the actual enumeration.
Distribution - Included in Enumerator's portfolio.
DATA COLLECTION FORMS

Form P50 - Letter: Survey of Residential Financing (page 18)
Size - 8 1/2 x 11" Color - white paper, black ink
Number printed - 750,000
Use - This form requested the occupants of rental properties to give the name and address of the owner or rental agent of the property. This report was self-selecting and addressed to the local Census district supervisor.
Distribution - This form was mailed to residents of renter occupied houses or apartments which were selected to be covered in the sample.

Form P51 - Owner-Occupied: Survey of Residential Financing (page 19-19)
Size - 8 page booklet - 5 3/4" x 9 1/8"
Color - yellow paper, brown ink
Number printed - 375,000
Use - This form was used to collect data on mortgaged properties containing 1 to 4 dwelling units, at least one of which was occupied by an owner.
Distribution - This form, accompanied by return envelopes addressed to the local district office, was mailed to the owners of approximately 56,000 properties. Follow-up letters were mailed to owners whose reports were not received after one week, and again after two weeks.

Form P52 - Owner-Occupied: Survey of Residential Financing (not shown here since it is identical with the P51 except for color)
Size - 8 page booklet, 5 3/4" x 9 1/8"
Color - green paper, black ink
Number printed - 190,000
Use - This form was used for properties, reported as not mortgaged in the general enumeration which contained 1 to 4 dwelling units at least one of which was occupied by an owner. The form was used to find out how many of the properties reported as not mortgaged were later reported as mortgaged and to obtain information on the mortgaged properties.
Distribution - This form was mailed to the owners of approximately 30,500 properties with the same follow-up procedure as for Form P51.

Form P53 - Renter-Occupied: Survey of Residential Financing (not shown here since the inquiries were similar to those on Form P51)
Size - 8 page booklet, 5 5/8" x 9 1/4"
Color - white paper, green ink
Number printed - 1,000,000
Use - Form P53 was used when the property contained 1 to 4 dwelling units none of which was occupied by an owner, or when the property contained 5 or more dwelling units. In either case, any or all of the dwelling units might have been vacant.
Distribution - This form was mailed to approximately 125,000 renters with the same follow-up procedure as for Forms P51 and P52.

Form P54 - Mortgages: Survey of Residential Financing (page 20-21)
Size - 6 page booklet, 6" x 9 5/8"
Color - white paper, black ink
Number printed - 450,000
Use - This form was used to collect information from the mortgages listed on the completed Forms P51, P52 and P53.
Distribution - A list of the properties arranged by lenders was compiled from completed Forms P51, P52 and P53, and the lenders were sent a Form P54 for each property. Follow-ups were made by mail, phone, and where necessary, personal interview.

Form A1 - Agriculture Questionnaire (page 22-23)
Size - 22" x 19", both sides
Color - white paper, brown ink
Number printed - 8,486,000 regular questionnaires and 8,554,600 self-mailer questionnaires
Use - An A1 questionnaire was required for every farm, every place of 3 or more acres and for every place with certain specialized agriculture operations. The enumeration was conducted jointly with that for Population and Housing. To take account of differences in agriculture in the various parts of continental United States, 41 variations of this form were used. Each variation had five different printings to make provision for sample selection.
Distribution - The self-mailer forms, accompanied by an explanatory letter, were mailed to the farm operators in 37 states, with instructions to answer as many questions as possible before the enumerator would arrive to help complete the form. In other areas the enumerator conducted direct interviews for the entire schedule using the regular agriculture questionnaires included in his portfolio.

Form A2 - Special Agriculture Questionnaire (page 27)
Size - 11" x 8 1/2"
Color - white paper, brown ink
Number printed - 1,275,000
Use - The Form A2 was a short form used by the enumerator in urban areas to determine whether a regular agriculture questionnaire A1 was required. If the latter form was required, the place was re-visited by an enumerator trained in the use of the long form.
Distribution - Included in Enumerator's portfolio.

Form A3 - Landlord-Tenant Operations Questionnaire (page 28-29)
Size - 22" x 17", one side only
Color - white paper, brown ink
Number printed - 1,045,000
Use - This form was filled out by the enumerator for each landlord rental two or more farms to tenants in the 14 Southern States where a large proportion of the farms is operated by the tenants. The enumerator visited the landlord first and completed the A3 form before visiting each tenant to obtain the A1 questionnaire.
Distribution - Included in Enumerator's portfolio.

Form I-1 - Irrigation Questionnaire (Single-Farm) (page 30-31)
Size - 22" x 17", one side only
Color - white paper, brown ink
Number printed - 385,000
Use - The enumerator filled out the I-1 at the same time that he filled out the Agriculture and Population and Housing questionnaires. The I-1 was designed for use for farms having their own irrigation supply works which are used to get irrigation water from a source of supply into the farm's irrigation ditches and pipeline when the irrigation works supplied water for an acre or more of farm land in most years.
Distribution - Included in Enumerator's portfolio.

Form I-2 - Irrigation Questionnaire (Multiple-Farm) (page 32-33)
Size - 22" x 17", both sides
Color - white paper, brown ink
Number printed - 210,500 regular questionnaires and 4,500 self-mailer questionnaires.
Use - The I-2 was used for the enumeration of irrigation enterprises supplying water to several farms. Irrigation technicians, recruited from the Soil Conservation Service, were used as enumerators. The list of names of enterprises supplying water to ten or more farms was compiled from various sources.
Distribution - Questionnaires were mailed to the enterprises ten days before the projects were visited, so that the information would be available at the time of the
enumerators' visit. The location of enterprises supplying water to 2 to 9 farms were obtained from the A1's and enumerated by technicians.

Form D1 - Drainage Questionnaire (County Drains) (page 36)
Size - 10¼" x 16", one side only
Color - buff paper, brown ink
Number printed - 1,200
Use - The D1 questionnaire was used in those 9 states in which the drainage of agricultural lands was performed by local county governments or similar organizations.
Distribution - Special enumerators obtained the information from county records or county officials. No direct enumeration was used in obtaining the information for this questionnaire.

Form D2 - Drainage Questionnaire (Drainage Enterprises) (page 37)
Size - 17" x 14", one side only
Color - white paper, brown ink
Number printed - 25,000
Use - The D2 was used in 31 states in which the drainage of agricultural lands was performed by corporate or private enterprises.
Distribution - Special enumerators were trained and equipped for obtaining the information needed to complete this form.

Form A 11 - Special Questionnaire for Producers of Cut Flowers and Flowering or Foliage Plants (page 38-41)
Size - 7 page booklet, 10¼" x 7½"
Color - green paper, black ink
Number printed - 260,000

Form A 12 - Special Questionnaire for Nurseries (not reproduced - detail is similar to that shown on Form A 11)
Size - 7 page booklet, 10 1/4" x 7 7/8"
Color - buff paper, black ink
Number printed - 135,000

Form A 13 - Special Questionnaire for Bulb Farms (not reproduced - detail is similar to that shown on Form A 11)
Size - 4 page booklet, 10 1/4" x 7 7/8"
Color - white paper, green ink
Number printed - 25,000

Form A 14 - Special Questionnaire for Flower Seed Farms (not reproduced - detail is similar to that shown on Form A 11)
Size - 4 page booklet, 10 1/4" x 7 7/8"
Color - pink paper, black ink
Number printed - 1,500
Use - These forms were used to obtain information on four specialized horticulture operations.
Distribution - The questionnaires were mailed to the respective farms on the basis of mailing lists, compiled initially on the basis of state inspection records and trade association membership, which were checked against the A1 agriculture questionnaires received for the operators of nurseries, greenhouses, and similar enterprises.

OTHER FORMS USED IN THE 1950 CENSUSES
In addition to the major forms listed above, the following forms were also used in the enumeration:

Experimental Areas
Four basic population and housing questionnaires were used in experimental tests of alternative enumeration procedures:
P10 - Population and Housing Schedule (Household)
P11 - Population and Housing Schedule (Household)
P12A, P12B, P12C - Population and Housing Schedules
P13A, P13B, P13C - Population and Housing Schedules
The letter designations for the P12 and P13 indicate the different methods in which the form was used. The questions were designed to yield the same information as those on the P1 schedule (page 4-7).

Post-Enumeration Survey
A post-enumeration survey was designed to determine the completeness of the national count and the accuracy of the Census with respect to various characteristics.

PE-101 - Coverage Questionnaire
The PE-101 was designed to obtain information on household size, possible missed persons, and possible missed agricultural operations.

PE-102 - Housing Questionnaire
The PE-102 was designed to inquire about selected housing characteristics and was used to enumerate missed households.

PE-103 - Individual Questionnaire (long form)
The PE-103 was designed to check the data for "sample persons."

PE-104 - Individual Questionnaire (short form)
The PE-104 was designed to check information on "non-sample persons."

PE-105 - Agriculture Questionnaire
The PE-105 combined coverage and content checks for places having agricultural operations.

PE-106 - Supplementary Agriculture Questionnaire

PE-109 - Individual Census Report

Territories and Possessions
The forms listed below were variations of the regular enumeration forms and were adapted to serve the particular needs of the area being enumerated:

Alaska -
P62 - Population and Housing Schedule
P63 - Individual Census Report
P64 - Infant Card
A5 - Agriculture Questionnaire

Hawaii -
P87 - Population and Housing Schedule
P88 - Individual Census Report
P89 - Infant Card
A8 - Agriculture Questionnaire

Puerto Rico -
P93 - Population and Housing Schedule
P94 - Individual Census Report
P95 - Infant Card
A9a - Agriculture Questionnaire for Farms
A9b - Agriculture Questionnaire for Parcels

Virgin Islands -
P97 - Population and Housing Schedule
P98 - Individual Census Report
P99 - Infant Card
A10 - Agriculture Questionnaire

American Samoa -
P80 - Population Schedule
P81 - Individual Census Report
A6 - Agriculture Questionnaire

Gren -
P85 - Population Schedule
P86 - Individual Census Report
A7 - Agriculture Questionnaire

Panama Canal Zone -
P91 - Population Schedule
P92 - Individual Census Report

Small Overseas Island Possessions of the United States (Canton, Midway, Johnston, Swan, and Wake) -
P100 - Population Schedule
P90 - Individual Census Report

### EXPLANATIONS AND INSTRUCTIONS

**This questionnaire is to be used in the following States:**
- Alaska
- Idaho
- Montana
- North Dakota
- South Dakota
- Utah
- Wyoming

**W H E N  T O  T A K E  T H I S  Q U E E S T I O N A I R E:**

- **Intake and Distribution:**
  - This questionnaire is to be filled for fresh water in the above States for which the answer to question 227 in the Agriculture Questionnaire is "Yes," with the following exceptions:
    - If the average irrigated by the farm's own irrigation supply works in more years is less than 1 acre, omit.
    - If the farm's own irrigation supply works consists only of a supply ditch from line less than 1 mile in length and is not used to get water to the farm from a partnership, ditch company, or other irrigation enterprise; or,
    - If the farm's own irrigation supply works consists only of a small reservoir or "overground pond" that merely regulates the daily delivery of water to the farm from an irrigation enterprise.

- Do fill this questionnaire for **ANY** irrigation works including any length of ditch or pond line, that are operated by this farm individually to obtain water from a stream, well, or other original source irrespective of 1 acre or more in most years.

**If the answer to question 227 in the Agriculture Questionnaire is "Yes," make sufficient inquiries to determine whether the above exceptions apply before filling out this questionnaire.**

Report in a single 2-1 Questionnaire all individually operated irrigation supply works used to obtain irrigation water for any land reported in a single Agriculture Questionnaire. For example, if water is pumped from a well on one part of the farm and other water is obtained by gravity on another part, both areas of irrigation works should be reported in one 2-1 Questionnaire for the farm.

**SECTION II—IRRIGATION SUPPLY WORKS AND EQUIPMENT, 1949**

Report irrigation works and equipment as of January 1, 1949.

- **Do not include ditches, pumps, or other works used primarily for drainage, but do include works, such as pumps, that are used primarily to utilize drainage water for irrigation.**
- **Include works or equipment maintained by the farmer for irrigation, even if not used for irrigation last year; in such cases make a note under REMARKS as to whether the works or equipment were not used in 1948, and why.**

**A D I S T R I B U T I O N D A M (q u e s t i o n 6) is an obstruction placed in a natural stream to divert the water into a ditch or to form a pool of water for pumping. Report as a diversion dam any cause or directing water by gravity from one stream to another. However, if the reservoir exists only as a means of opening up the bank of the stream with a channel. Do not report improvements or diversion dams in canals on ditches or diversion dams.**

- **Also do not report STORAGE dams (dams used to form reservoirs) as diversion dams.**

**SECTION III—SOURCE OF WATER, 1949**

- **The water supply may come from two or more sources—for example, part from a stream and part from a well. If the supply was from more than one source, check each of the sources in question 13. If stored water was obtained from a reservoir (artificial lake or enlarged natural lake), report as the source the principal STREAM from which the stored water came. Check "Natural stream" for water from any natural run-off channel, even though water flow in the channel only during or after storms. If the stream or channel name has no suffix, report "No name."

- **Stored water (question 14) is water that must be held in a reservoir to make the water available for use when needed. Stored water does not include natural flow water that merely flows through a reservoir or water released from a reservoir to replace natural flow water.**

**The information on works reported in Section II and the information on sources of water reported in Section III must be consistent. For example, if water from a stream is reported in question 13 of Section II, either a diversion dam or pump to get the water out of the stream should be reported in Section II, or question 15 should show water obtained from another enterprise that has a diversion dam or pump to get the water out of the stream.**

**SECTION IV—CAPITAL INVESTMENT**

- **Do not include purchase cost of works or equipment used more for other purposes than for irrigation—for example, do not include a trash can used for pumping irrigation water if it was used more for other farm work.**

- **If diversion dams, pumps, or other works or equipment are merely replaced with same costs of similar type, do not report the cost as new capital investment. But if these are replaced with new ones of materially different or improved type, report the additional cost over and above the cost of merely installing a replacement of similar type.**

**For example, if a trash diversion dam is replaced with a new brush diversion dam, do not report the cost as new investment. But if it is replaced with a concrete dam, report as new investment the part of the cost in excess of the cost of a brush dam.**

**The estimated value of prevailing wage rates of any work done by the farm operator since January 1, 1940, in new construction or enlargement or improvements of irrigation supply works. Do not include costs for the farm distribution system within the farm boundaries.**

**SECTION V—FARMS AND ACREAGE IRRIGATED, 1949**

In question 28, only the average actually irrigated last year with water supplied by these irrigation works should be reported as "Irrigated." Do not report land in ready, ditches, or other use in which water was not applied.

### ENUMERATOR'S RECORD

- **Date:**

- **Agriculture Questionnaire No.:**
- **Certified by:**
- **Checked by:**

**SECTION VI—COST OF IRRIGATION WATER, 1949**

Report all costs or water obtained through these works last year, including water delivered to other farms.

**In question 28, include the estimated value at prevailing wage rates of any work done by the farm operator in the maintenance or repair of these works. Do NOT INCLUDE costs of distributing and applying the water to the land, nor of maintaining the farm distribution system. If an unusually large expenditure was made for repairs or replacements, explain what it was for under "REMARKS."**

**IRRIGATION QUESTIONNAIRE**

**Questionnaire for Multiple-Farm Irrigation Enterprises (Includes ranches as farms)***

Surveyed December 31, 1950

**Definition:** An IRRIGATION ENTERPRISE is a business, either private or public, that operates irrigation works to supply water for irrigation. (The irrigation works of the enterprise do not include the farm ditches or pipe lines that are used to distribute and apply the water on the farms.)

**THIS QUESTIONNAIRE IS TO BE USED IN THE 17 WESTERN STATES AND ARKANSAS, LOUISIANA, AND FLORIDA TO REPORT EACH SEPARATELY MANAGED IRRIGATION ENTERPRISE OTHER THAN OPERATED BY SINGLE FARMERS. PLEASE READ THE EXPLANATIONS AND INSTRUCTIONS ON THE BACK OF THIS FORM.**

If water was delivered through such enterprises:

(a) **What is the name of each separately operated lateral or other enterprise (or name of owner) and how many farms received water from said enterprise?**
   - Name: ____________________________
   - Number of farms: ______

(b) **(Continue under REMARKS if necessary. If continued, check here □)***

- **26. How many farms received water direct from this enterprise?**
  - □ None
  - Number of farms: ______

- **27. What was the total net amount irrigated by this enterprise last year (in the farm reported in question 26) that received water DIRECT FROM THIS ENTERPRISE?**
  - □ None
  - Acres irrigated: ______

- **28. How much of the land irrigated last year (reported in question 27) has been cultivated or abandoned?**
  - □ None
  - Acres irrigated: ______

Re:绘制

- **29. How many acres of land in question 28 used additional crops, besides that land used in the same in 1930?**

### Section VI - Cost of Water to Farms, 1940

- **30. How much was paid to this enterprise last year for the water received?**

REPORT EITHER:

- Total payments: $__________ (blank blank)
- Payment per acre actually irrigated: ______

- Payment per acre actually irrigated: ______

**REMARKS:**

- **32. How much of these payments (as reported in questions 30 and 31) was for purposes such as construction or purchase of control devices, or interest or sinking fund?**

- **33. What were the first and last months in which water was supplied by this enterprise last year?**
  - First month: ______
  - Last month: ______

- **34. What part of the water was measured to the individual farms?**
  - □ All
  - □ Part

- **35. What was the total quantity of water delivered last year to farms (reported in question 33) that received water DIRECT?**

  - aрес-فق., or... million gallons
  - or cu. ft. per sec. for... hours
  - or gal. per sec. for... hours
  - or min. lek by... hours

### Section VII - Quantities of Water, 1940

- **36. How many acres of water were obtained in each of the following ways last year?**
  - □ By diversion or pumping from surface water sources
  - □ By pumping from underground water sources
  - □ From other enterprises (listed in question 28)
  - □ Total supply of water

### Section VIII - Location of Land and Water, 1940

- **37. Are either the irrigation works of this enterprise or the land irrigated direct reported in question 27) located in more than one county?**
  - □ Yes
  - □ No

- **38. Write name of county in column County.**
  - County County County County County

### Enumerator's Record

Form I-2 - Irrigation Questionnaire - (Back)

EXPLANATIONS AND INSTRUCTIONS

All questions are to be answered. If exact information is not available, please give the best possible estimate. Use the space for REMARKS when additional space is needed to explain the answer to any question; number the explanation to correspond to the question. Any unusual or abnormal answer should be explained. The shaded blocks in the questionnaire are for Census Office use.

Interested enterprises.—In many cases, two or more enterprises are closely related in their source of water, area irrigated, use of works, or otherwise. For example, an irrigation district may supply water to one or more lateral companies that deliver the water to farms, or one enterprise may own an interest in a reservoir or canal operated by another enterprise. A separate report is to be made for each separately managed enterprise that operates irrigation works to deliver water either to farms or to other irrigation enterprises. In order to assure complete enumeration and also to prevent duplication, all relationships to other enterprises should be clearly shown in questions 18, 24, and 25, or explained under REMARKS. A report should be made for an enterprise even though it delivers no water directly to farms, if it supplies water to one or more other irrigation enterprises.

Even though no irrigation water was delivered last year because of water shortage or other reasons, an enterprise should be reported if it is a going concern, has works capable of delivering water, and normally does deliver water for irrigation. In such cases omit the questions in Sections III, V, VI, and VII.

SECTION I.—NAME AND TYPE OF ENTERPRISE, 1950

Questions 1 and 2.—If the enterprise itself has no name, give the name or names of the owners.

Question 3.—Give the name or names of the person or persons supplying the information and the titles or positions if any of the enterprise, or their relationship to it, such as "Partner," "Part owner," or "Water user."

Question 4.—Cooperative or mutual enterprises are those controlled and operated by two or more water users primarily to supply water to their own farms, with the exception of "District" enterprises that are organized under special State laws. If 50 percent or more of the acreage irrigated is not in the farms of the water users that control and operate the enterprise, the enterprise should be classified as "Commercial." Cooperative or mutual enterprises include the operation of irrigation supply works or equipment by two or more farms in "partnership"; by groups of water users informally associated under verbal or written agreements; by mutual irrigation companies or water companies; by water-user associations; by "lateral" companies; and by the community ditches or "acequias" in the Southwest that were organized originally in accordance with old Spanish, Mexican, or Indian customs. Cooperative or mutual enterprises may be either unincorporated or incorporated.

"District" enterprises are public corporations established under special State laws. Included are irrigation districts, and also types of districts such as water improvement, water conservation, and reclamation, which in some States are in addition to irrigation districts and in other States are in lieu of them. Reclamation districts, organized under State laws, should not be confused with U. S. Bureau of Reclamation projects.

Commercial enterprises are privately operated (by individuals, partnerships, or corporations) and more than 50 percent of the acreage irrigated is in farms of water users that do not share in the control and operation of the enterprise. In some cases commercial enterprises are public utilities regulated by a State commission or by the governing board of a county.

U. S. Office of Indian Affairs enterprises are those operated by the U. S. Office of Indian Affairs.

State enterprises are those operated by a State agency of any kind.

City enterprises are those operated by a city or town, usually in combination with a domestic water supply. If a city water enterprise supplies water for irrigation of 100 acres or more of farm land, a report should be made for it as an irrigation enterprise.

SECTION II.—IRRIGATION WORKS AND EQUIPMENT, 1950

Report irrigation works and equipment as of January 1, 1950.

Canals, pumps, or other works used only for drainage should be included, but works, such as pumps, that are used to reclaim drainage water for irrigation should be reported. Joint ownership of works with any other enterprise should be clearly explained in question 15, and multiple uses of works in question 16, with supplemental explanation under REMARKS if necessary.

Include irrigation works or equipment not used last year but maintained for future use.

Question 5.—A diversion dam is an obstruction placed in a natural stream to divert the water into a ditch or to form a pool of water for pumping. Diversion dams vary from a few loose rocks to permanent concrete structures. Do not report headgates or diversion boxes in canals or ditches as diversion dams. Also do not report storage dams (dams used to form reservoirs) as diversion dams.

SECTION III.—SOURCE OF WATER, 1949

Question 17.—The water supply may come from two or more sources—for example, part from a stream and part from a well. If the supply was from more than one source, check each of these sources in question 17. If stored water was obtained from a reservoir (artificial lake or enlarged natural lake), report as the source the principal stream from which the stored water came. Check "Natural stream" for water from any natural stream channel, even though water flows in the channel only during or after storms. If the stream or channel has no name, report "No name."

Question 18.—Stored water is water that must be held in a reservoir to make it available for use when needed. It does not include natural flow water that merely flows through a reservoir or water released from a reservoir to replace natural flow water.

The information on works reported in Section II and the information on sources of water reported in Section III, must be consistent. For example, if water from a stream is reported in question 17 of Section III, either a diversion dam or pump to get the water out of the stream should be reported in Section II or question 20 should show water obtained from another enterprise that has the diversion dam or pump to get the water out of the stream.

SECTION IV.—NEW CAPITAL INVESTMENT; FINANCING

Question 21.—If there are no records of investment costs during the period January 1, 1940, to December 31, 1949, or if the owner did all or part of the construction work, the best possible estimate of cost should be reported, including the estimated value of work done by the owners. Include any filing and legal fees for acquisition of water rights and the purchase price of water rights, if any were purchased. Do not include investment cost of works used only for drainage, but include the cost of pumps or other works used to reclaim drainage water for irrigation. If any of the new works are used for other purposes, such as domestic water supply, hydroelectric power, or drainage, as well as for irrigation, report only the estimated part of the investment cost chargeable to irrigation.

If works are merely replaced with new ones of similar type, do not report the cost as new capital investment. But if items are replaced with new ones of materially different or improved type, report the additional cost over and above the cost of merely making a replacement of similar type. For example, if a brush diversion dam is replaced with a new brush diversion dam, do not report the cost as new investment. But if it is replaced with a concrete dam, report as new investment the part of the cost in excess of the cost of a brush dam.

SECTION V.—FARMS AND ACREAGE IRRIGATED, 1949

If precise information as to the number of farms or the acreage irrigated is not available, please give estimates.

Question 24.—If a landowner has one or more tenants or managers, the land operated by each is considered a farm.
IRRIGATION

Form I-2 - Irrigation Questionnaire - (Back)

Questions 25 and 26.—Farms to which this enterprise supplies water, but to which the water is delivered through independently operated lateral or some other enterprise, are to be reported in question 25 and not reported in question 26. This will prevent duplicate reporting. These farms will be reported in question 26 of the questionnaire of the independently operated laterals or other enterprises. For the same reason questions 27 to 36 are to be answered only for the farms, reported in question 26, on which this enterprise delivered water directly into the farm distribution systems. Give estimated figures for these farms, if necessary. If this enterprise delivers all water to independently operated laterals or other enterprises, the answers to questions 26 to 36 inclusive should be "None."

Question 27.—Irrigated land is land to which water was applied for agricultural purposes by artificial means at any time during the year 1949. It includes land on which water was applied to the surface of the ground and land on which water was applied beneath the surface by subirrigation. Land flooded during high-water periods should be classed as irrigated only if water was purposely applied to the land for agricultural purposes by dam, sluice, or other works. Regulation of the "water table" of land by drainage works should not be included as irrigation.

Section VI.—COST OF WATER TO FARMS, 1949

Question 29.—Report all payments to this irrigation enterprise last year by the water users on the farms to which this enterprise delivered water direct (the farms in question 26) including all water assessments, taxes, tolls, etc. Do not include payments for the farms reported in question 25 for water delivered by this enterprise to other irrigation enterprises, even though the payments were made direct to this enterprise by the water users on those farms.

Question 31.—Report any payments made by the farms reported in question 26 to other enterprises (reported in question 29) that delivered water over to these farms through this enterprise, or for any other cost to these farms last year incidental to obtaining the water.

Section VII.—QUANTITIES OF WATER, 1949

Question 34.—Measurement of water to individual farms must use an averaging device, such as a weir or meter, to measure the water delivered to each individual farm.

Question 35.—Quantity of water should be reported in acre-feet if possible, but alternative rates are provided in question 35 for reporting in the unit of measure commonly used by the enterprise. Commonly used units of measure of quantity of water are acre-feet and gallons. One acre-foot is the quantity sufficient to cover 1 acre to a depth of 1 foot, or 43,560 cubic feet. Commonly used units of measure of rate-of-flow of water are cubic-feet-per-second (sometimes expressed as "second-feet") or "c.f. per second"; gallons-per-minute, and miner's inches (sometimes expressed merely "inches") of water. Quantity of water cannot be determined from these units of rate-of-flow unless the length of time of the flow is known also; so, if these units are used in answering question 35, the number of hours of flow must be given. If the time of flow is given in days, give also the average number of hours of flow per day.

The quantity of water to be reported in question 35 is the quantity delivered into the distribution system of the farms reported in question 26. If the quantity delivered to farms is not known, but the quantity diverted otherwise obtained is known, deduct estimated conveyance loss of water to arrive at the estimated quantity delivered to farms.

In some cases the most feasible basis of estimating quantity of water delivered to farms may be to estimate the average depth in feet, of water applied, and to multiply this by the total acreage irrigated to obtain total acre-feet.

Question 36.—If water was obtained from a reservoir, report the quantity of water withdrawn from the reservoir, not the quantity diverted into the reservoir. Report the quantity withdrawn as obtained from (a) surface sources, (b) ground water, or (c) other enterprises, as the case may be, according to the source from which the water was obtained when diverted into the reservoir, either during last year or in a previous year.

Section VIII.—LOCATION OF LAND AND WORKS, 1950

Question 38.—If precise information is not available as to the part of any item located in each county, give either the estimated amount or the estimated percent of the item in each county.

# DRAINAGE QUESTIONNAIRE

## Definitions and General Explanations

This section relates only to the drainage of agricultural lands. 

DRAINAGE OF AGRICULTURAL LANDS is the act of process of drawing off an excess of water for the purpose of improving the conditions of the land. It is accomplished by means of underground conduits, pipes, or ditches by open or covered trenches in the surface of the ground, or, by pumps to lower the ground-water table. Land protected from oversea by barriers, dikes, or embankments is not considered as drained but unless some form of drainage works has been constructed on the protected land.

A drainage enterprise, for the purpose of this section, is an area of 500 acres or more:

- (a) Organized as one drainage district;
- (b) Amended for the same public bonds; or
- (c) Drained by works operated as one undertaking under private or corporate ownership.

A questionnaire should be filled for each drainage enterprise. If an enterprise in located in more than one county, a separate questionnaire should be prepared for each county. Do not fill a questionnaire for an enterprise that has been organized but on which construction had not started January 1, 1950.

This questionnaire is to be used in the following States:
- Alabama
- Georgia
- Mississippi
- Missouri
- New Jersey
- Texas
- Arkansas
- Delaware
- Missouri
- Montana
- North Carolina
- Tennessee
- California
- Kansas
- Nebraska
- Ohio
- Washington
- Colorado
- Louisiana
- Nevada
- South Carolina
- Wisconsin
- Connecticut
- New York
- South Dakota
- Wisconsin
- Florida
- New Mexico
- Wyoming

## Section IV - Location of Enterprise, January 1, 1950

1. What is the name of this drainage enterprise?  (_Enter name here)_

Section V - Land in Enterprise, January 1, 1950

1. What is the total area of this enterprise?  (Enter area here)_

### Section VI - Type of Enterprise, January 1, 1950

4. Which of the following types of organizations does this enterprise? (Check all that apply):

- (a) Drainage district
- (b) Irrigation project—Nonfederal
- (c) County drain
- (d) Commercial development project
- (e) Township drain
- (f) State project
- (g) Irrigation project—Federal
- (h) Other

5. In what year was this enterprise organized?  (Enter year here)_

6. Was this enterprise begun by a different enterprise, or under a different type of organization, than the present enterprise?  (Yes/No)

### Section VII - Cost of Drainage, Indebtedness, and Assessments

17. For each year, answer the two questions that pertain to this drainage enterprise:

- (a) What was the total cost of construction and maintenance for the drainage works for this enterprise?  (Enter cost here)
- (b) What portion represents expenditures for drainage works for lands not previously drained?  (Enter percentage here)

### Section VIII - Drainage Works, January 1, 1950

22. Have any of the following types of land drainage works been constructed by this enterprise in this county, since January 1, 1950?

- (a) Open ditch?
- (b) Trench or ditch?
- (c) Levee or dike?

### Section IX - Purpose of Drainage, January 1, 1950

2. What was the principal purpose for which this drainage enterprise was organized? (Check all that apply):

- (a) Reduction or improvement of land
- (b) Protection of land against overflow
- (c) Removal of sewer or sewage from irrigated land

   (a) Did this establishment grow and sell $1,000 or more of nursery stock in 1949?  
   (If the answer is “Yes” it is necessary for you to fill in a questionnaire for nurseries. If Form No. A12 for nurseries is not enclosed, write to the Bureau of the Census, Washington 25, D.C., requesting a copy.)  
   (b) Did this establishment grow and sell $1,000 or more of bulbs in 1949?  
   (If the answer is “Yes”, it is necessary for you to fill in a questionnaire for bulb farms. If Form No. A13 for bulb farms is not enclosed, write to the Bureau of the Census, Washington 25, D.C., requesting a copy.)  
   (c) Did this establishment grow and sell $1,000 or more of flower seed in 1949?  
   (If the answer is “Yes”, it is necessary for you to fill in a questionnaire for flower seed farms. If Form No. A14 for flower seed farms is not enclosed, write to the Bureau of the Census, Washington 25, D.C., requesting a copy.)  
   (d) Did this establishment grow and sell $1,000 or more of cut flowers and flowering or foliage plants grown under glass or cloth or in the open (including propagated mushrooms and vegetables under glass) in 1949?  
   (If the answer is “Yes”, it is necessary for you to fill in the following parts of this questionnaire. If the answer is “No”, sign your name on page 7 and return this questionnaire to the Bureau of the Census, Washington 25, D.C.)

The following questions relate only to the production and sale of cut flowers and flowering or foliage plants (including propagated mushrooms and vegetables under glass). If you grew and sold $1,000 or more of nursery stock, bulbs or flower seed (as indicated by having answered “Yes” to questions 5(a), 5(b), 5(c), or 5(d), check “No” for each of these questions, sign your name on page 7 and return this questionnaire to the Bureau of the Census, Washington 25, D.C.)
