PREFACE

This report presents statistics on the farm-nonfarm residence in 1950 and 1940 of persons 1 year old and over living in continental United States at the time of the 1950 Census who were living in a different house at the end of the year from the one they had lived in at the beginning of the year. The data are based on tabulations from the Seventeenth Decennial Census of the Population of the United States, conducted as of April 1, 1950. Provision for the Seventeenth Decennial Census was made in the act providing for the Fifteenth and subsequent decennial censuses, approved June 18, 1929. The major portion of the information compiled from the Census of Population of 1950 appears in Volume I, Number of Inhabitants, and in Volume II, Characteristics of the Population. These two volumes contain statistics for regions, divisions, States, and parts of States, as well as for the country as a whole.

This is one of a series of reports (Series P-X bulletins) which comprise Volume IV, Special Reports, and supplement the information contained in Volumes I and II. The present bulletin represents Chapter C of Part 4, Mobility of the Population, of Volume IV.

The materials presented here were prepared under the supervision of Howard G. Brunsman, Chief, Population Division, and Dr. Henry S. Shryock, Jr., Assistant Chief, with the assistance of Edwin D. Goldfield, then Program Coordinator. They were prepared by Dr. Henry D. Sheldon, Chief, Demographic Statistics Branch, assisted by Charles P. Brinkman and Siegfried A. Hoermann. Valuable contributions in the early stages of the work were made by Dr. Donald J. Bogue, while on leave from the Scripps Foundation for Research in Population Problems. The compilation of the statistics was under the direction of Robert B. Voight, then Assistant Chief for Operations, assisted by Morton A. Meyer, Edward I. Lober, Lillian I. Hoffman, and Mildred A. McClung. Sampling procedures were under the direction of Joseph Steinberg, Chief, Statistical Methods Branch, assisted by Joseph Wakesberg. The technical editorial work and planning were under the supervision of Mildred M. Russell, assisted by Louise L. Douglas. The collection of the information on which these statistics were based was under the supervision of Lowell T. Galt, then Chief, Field Division, and the tabulations were under the supervision of C. F. Van Aken, Chief, Machine Tabulation Division.

The assistance of the Farm Population and Rural Life Branch, Agricultural Marketing Service, United States Department of Agriculture, in the preparation of the tables is gratefully acknowledged.
