PREFACE

This part of Volume II presents cross-tabulations of housing and household characteristics for units in standard metropolitan statistical areas of 100,000 inhabitants or more and in urban places of 100,000 inhabitants or more. The statistics are based on information collected as of April 1, 1960, in the Census of Housing, supplemented with information from the Census of Population. Volume II covers all housing—urban and rural, farm and nonfarm—with separate statistics for owner-occupied, renter-occupied, and available vacant units.

The chapters of Volume II were published first as a series of reports, Series HC (3). A separate report was issued for the United States, each geographic division, and each standard metropolitan statistical area of 100,000 inhabitants or more in the United States and Puerto Rico. Statistics for urban places of 100,000 inhabitants or more are contained in the chapters for the metropolitan areas. Part 1 of the volume contains the chapters for the United States and the geographic divisions; Parts 2 to 6 contain the chapters for the standard metropolitan statistical areas in the United States and Part 7 contains the chapters for the standard metropolitan statistical areas in Puerto Rico.

Authorization for the 1960 Census of Housing was provided in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code. The law provides for a decennial census of housing, including utilities and equipment, to be taken in each of the 50 States, the District of Columbia, the Virgin Islands, Guam, and the Commonwealth of Puerto Rico.

The census program was designed in consultation with advisory committees and individuals to achieve a census having optimum value to users of housing statistics. The Housing Advisory Committee was organized by the Director of the Bureau of the Census and was made up of persons in private industry, universities, and local governments. It advised on various aspects of the housing census programs except the technical phases of the Residential Finance Program for which the Technical Advisory Committee on Residential Finance was organized. A Federal Agency Population and Housing Census Council, organized by the Bureau of the Budget and made up of persons in Federal agencies, also advised on the basic programs. A joint staff committee, set up by the Administrator of the Housing and Home Finance Agency and the Director of the Bureau of the Census, concentrated on aspects of particular interest to the housing agencies. In addition to the committees, working groups of specialists in housing subjects assisted the Census Bureau staff in the evaluation and improvement of housing concepts. A number of other committees, groups, and individuals also made contributions to the planning of the housing census.

ACKNOWLEDGMENTS

A number of persons both within and outside the Bureau of the Census participated in the various activities of the 1960 Census of Housing. Specific responsibilities were exercised by members of the Housing, Demographic Operations, Field, Geography, Population, and Statistical Methods Divisions of the Census Bureau. This volume was planned under the direction of Wayne P. Daugherty, then Chief, and Frank S. Kristof, then Assistant Chief, Housing Division. J. Hugh Rose, Chief, Structural Statistics Branch, developed the tabular content of the volume; Benah Washabaugh, Special Assistant, with the help of Aneda E. France and Hazel H. Moore, organized the format of the volume and prepared the text; and Nathan Krevor, Chief, Coordination and Research Branch, assisted by Leonard J. Norry, coordinated the operational aspects of the preparation of the volume. Naomi D. Rothwell had a major role in the enumerator training program. Other members of the Housing Division who were responsible for a specific phase of the program include Herbert Shapiro, Chief, Financial Statistics Branch, and Alexander C. Findlay, Chief, Facilities and Equipment Branch.

Important contributions were made by Glen S. Taylor, then Chief, Richard A. Hornserth, Denver K. Ingram, William E. Grubbs, Patience Lauriat, Richard J. Rice, Willard P. Heas, and Bernadette H. Marlow of the Demographic Operations Division in the processing of the data; Jefferson D. McPike, Ivan G. Munro, Paul R. Squires, and George K. Klink of the Field Division in the collection of the information; William T. Fay and Robert C. Klove of the Geography Division in the geographic work; and Joseph Steinberg, Robert H. Hansen, Herman Fasteau, George Minton, Kathern Clay, and Warren J. Mitofsky of the Statistical Methods Division in the planning of sampling and quality control procedures. William N. Hurwitz, Chief, Statistical Research Division, assisted by Harold Niselson, Jack Silver, Leon Gilford, and William H. Cook were instrumental in the formulation of field plans. The technical editorial work was under the supervision of Mildred M. Russell of the Population Division, assisted by Louise L. Douglas. The maps appearing in the volume were prepared under the direction of Robert L. Hagan and George W. Morris of the Geography Division. Robert H. Brooks of the Administrative Service Division was responsible for the printing arrangements.

Important contributions were also made by the staffs of the Administrative Service Division, Everett H. Burke, Chief; Budget and Management Division, Charles H. Alexander, Chief; Census Operations Office, Robert D. Krook, Executive Officer; Personnel Division, James P. Taft, Chief; and Statistical Reports Division, Edwin D. Goldfield, Chief.

May 1963.
PUBLICATION PROGRAM OF THE 1960 CENSUS OF HOUSING

Results of the 1960 Census of Housing are published in seven housing volumes as described below. A separate series containing the census tract reports is a joint publication with data from the 1960 Census of Population. A series of special reports for local housing authorities constitutes the remainder of the final reports. The source of the data is the April 1960 enumeration, except for Volumes IV and V which are based largely on the enumeration of units in a sample of land area segments, started in late 1959 and completed in 1960. Prior to the final reports, several series of preliminary and advance reports were issued. Some unpublished statistics can be obtained for the cost of preparing a copy and certain special tabulations can be prepared, on a reimbursable basis, on request to the Chief, Housing Division, Bureau of the Census, Washington 25, D.C.

Volume I (Series HC(1) reports). States and Small Areas. Information about all subjects covered in the April 1960 enumeration, with a separate report for the United States by regions and geographic divisions, each of the 50 States, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands of the United States. In the State reports, information is shown for the State; each standard metropolitan statistical area and its constituent parts; each urbanized area, place of 1,000 inhabitants or more, and county; and the rural-farm and rural-nonfarm parts of each county. The volume covers occupancy characteristics, structural characteristics, condition and plumbing facilities, equipment and fuels, and financial characteristics. The subjects are: Color, persons, persons per room, tenure, year moved into unit, vacancy status, and duration of vacancy; basement, bedrooms, elevator in structure, rooms, units in structure, and year structure built; bathing facilities, bathrooms, condition, sewage disposal, source of water, toilet facilities, and water supply; air conditioning, automobiles available, clothes dryer, clothes washing machine, cooking fuel, heating equipment, heating fuel, home food freezer, radio sets, telephone available, television sets, and water heating fuel; contract rent, gross rent, and value.

Volume II (Series HC(2) reports). Metropolitan Housing. Cross-tabulations of housing and household characteristics, with a separate report for the United States by geographic divisions, and for each of the 195 central standard metropolitan statistical areas of 100,000 inhabitants or more in the United States and Puerto Rico. Separate statistics for each of the 195 places of 100,000 inhabitants or more are included in the metropolitan area reports.

Volume III (Series HC(3) reports). City Blocks. Separate reports for cities and other urban places having 50,000 inhabitants or more prior to and at the time of the 1960 Census, and for a number of smaller localities which arranged for block statistics. Data for a limited number of characteristics are presented by blocks. Statistics for 466 cities and localities in the United States and Puerto Rico are published in 420 separate reports.

Volume IV (Series HC(4) reports). Components of Inventory Change. Information on the source of the 1950 inventory and the disposition of the 1950 and 1956 inventories. Data are provided for components of change such as new construction, conversion, merger, demolition, and other additions and losses. Part I of the volume contains the 1950 to 1959 comparison, with a separate report for the United States by regions, and each of 17 selected metropolitan areas (15 standard metropolitan statistical areas, defined as of June 8, 1959, and 2 standard consolidated areas). Part II is published in two sets of reports for each area. Part IA presents basic 1950 and 1959 data, with emphasis on the counts and characteristics of the components of change; Part IB presents additional information on characteristics of the inventory, including characteristics of the present and previous residences of recent movers. Part 2 contains the 1957 to 1959 comparison, with a separate report for the United States by regions, and separate reports for 9 of the selected areas (standard metropolitan areas defined for the 1956 inventory).

Volume V. Residential Finance. Information on financing of residential property, including characteristics of mortgages, properties, and homeowners. Part I of the volume is a report on homeowner properties for the United States by regions, and each of 17 selected metropolitan areas (15 standard metropolitan statistical areas, defined as of June 8, 1959, and 2 standard consolidated areas). Part 2 is a report on rental and vacant properties for the United States.

Volume VI. Rural Housing. Cross-tabulations of housing and household characteristics for the 121 economic subregions of the United States, for rural-farm and rural-nonfarm housing units.

Volume VII. Housing of Senior Citizens. Cross-tabulations of housing and household characteristics of units occupied by persons 60 years old and over, for the United States, each of the 50 States and the District of Columbia, and selected standard metropolitan statistical areas.

Series PHC(1) reports. Census Tracts. Separate reports for 180 tracted areas in the United States and Puerto Rico. The reports contain information on census tracts, on both housing and population subjects. (This series is the same as the tract reports included in the publication program for the 1960 Census of Population.)

Series HC(81) reports. Special Reports for Local Housing Authorities. Separate reports for 138 localities in the United States. The program was requested by, and planned in cooperation with, the Public Housing Administration. The reports contain data on both owner- and renter-occupied housing units defined as substantial by Public Housing Administration criteria, with emphasis on gross rent, size of family, and income of renter families.
VOLUME II

This volume comprises seven parts. Data for the United States and each geographic division (separately by inside and outside standard metropolitan statistical areas) and data for each standard metropolitan statistical area of 100,000 inhabitants or more in the United States and Puerto Rico are presented as separate chapters. The standard metropolitan statistical areas (SMSA's) are arranged alphabetically; data for urban places of 10,000 inhabitants or more are contained in the chapters for the SMSA's in which the places are located. For divisions and SMSA's, a description or map of the area is given on page 2 of the individual chapter. The divisions, SMSA's, and places are listed by chapter number; the urban places are indented under the names of the SMSA's.

## DETAILED TABLES

Statistics for standard metropolitan statistical areas of 100,000 inhabitants or more, and for places of 100,000 inhabitants or more within the areas, are presented in a series of standard tables. The tables are arranged by area and the subjects are the same in the tables having the same basic number. Tables for a standard metropolitan statistical area (SMSA) constitute a chapter. The prefix letter "A" has been assigned to the tables for the total SMSA; tables for places, which follow in alphabetical order, have the prefix letter "B," "C," etc. Tables 1 to 10 are presented in each chapter for SMSAs in the United States. Tables 11 to 14, which contain data for units with nonwhite household heads, are presented for SMSAs and places in the United States having 25,000 or more such units. Tables 1 to 14 are listed below. Tables 15 to 18, with the same content as tables 11 to 14, are presented for units with white household heads of Spanish surname or for units with household heads of Puerto Rican birth or parentage for SMSAs and places in the United States having 25,000 or more such units (see page vii). The subjects covered by the tables are given on page vii. The specific tables for an area and the page numbers are listed on page 1 of the chapter for the area, and a map of the SMSA appears on page 2.

In the chapters for the United States and divisions, tables 1 to 14 are provided for total, inside SMSAs and outside SMSAs (except that tables 11 to 14 are omitted for outside SMSAs in the New England Division). Tables 15 to 18 are not provided for the United States and divisions.

### Table 1.—Value of owner-occupied housing units.
### Table 2.—Gross rent of renter-occupied housing units.
### Table 3.—Income in 1959 of primary families and individuals in owner- and renter-occupied housing units.
### Table 4.—Condition and plumbing facilities for owner- and renter-occupied housing units.
### Table 5.—Rooms in owner- and renter-occupied housing units.
### Table 6.—Units in structure for owner- and renter-occupied housing units.
### Table 7.—Household composition for owner- and renter-occupied housing units.
### Table 8.—Occupied housing units sharing or lacking specified facilities.
### Table 9.—Duration of vacancy for available vacant housing units.
### Table 10.—Rent asked for vacant housing units available for rent.
### Table 11.—Value of owner-occupied housing units with nonwhite household heads.
### Table 12.—Gross rent of renter-occupied housing units with nonwhite household heads.
### Table 13.—Income in 1959 of primary families and individuals in owner- and renter-occupied housing units with nonwhite household heads.
### Table 14.—Condition and plumbing facilities for owner- and renter-occupied housing units with nonwhite household heads.

## CHAPTER NUMBER AND TABLE PREFIX LETTER

[The chapter number appears as a prefix to the page number for each page. The table prefix letter for the total standard metropolitan statistical area is "A"; the table prefix letters for places are shown below]

</table>

---

1. Excludes certain units (such as units on farms); see text.
2. Available in Volume II for total occupied units for incorporated places of 100,000 inhabitants or more in the United States; not available for the SMSA's, divisions, or the United States.
3. Access to the unit, kitchen or cooking equipment, bathtub or shower inside structure, flush toilet inside structure. Cross-tabulations of these facilities in tables 12 to 14 are restricted to units in which any sharing occurs; cross-tabulations in table 18 are for units which lack facilities as well as units which share facilities.
4. Median rooms not included in the cross-tabulation.

NOTE.—Tables 11 to 14 present data for units with nonwhite household heads for each SMSA and place in the United States having 25,000 or more such units. Tables 15 to 18 (with same content as tables 11 to 14) present data for units with white household heads of Spanish surname for each SMSA and place in the United States having 25,000 or more such units (El Paso, Texas, SMSA and El Paso city; Los Angeles-Long Beach, Calif., SMSA and Los Angeles city; San Antonio, Texas, SMSA and San Antonio city; and San Francisco-Oakland, Calif., SMSA and for units with household heads of Puerto Rican birth or parentage for each SMSA and place having 25,000 or more such units (New York, N. Y., SMSA and New York City). Tables 11 to 14 are provided for the United States and each division, inside and outside standard metropolitan statistical areas (unless there are fewer than 25,000 units with nonwhite heads); tables 15 to 18 are not provided for the United States or for the divisions.
