SUGGESTED CITATION
Volume VII, Housing of Senior Citizens.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C.,
or any of the Field Offices of the Department of Commerce—Price $2.00.
PREFACE

This volume presents data on the characteristics of housing units having persons 60 years old and over at the time of the 1960 Census, and data on the characteristics of these persons. The statistics are based on information collected as of April 1, 1960, in the Census of Housing, supplemented with information from the Census of Population. These data are presented for the elderly population in the United States and separately for the elderly population inside and outside standard metropolitan statistical areas. Similar data are presented for the nonfarm elderly population and for the nonwhite elderly population. Limited data are presented for each of the 50 States and the District of Columbia and for the largest standard metropolitan statistical area in the State. The tabulations were prepared under contract with the Housing and Home Finance Agency.

Authorization for the 1960 Census of Housing was provided in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code. The law provides for a decennial census of housing, including utilities and equipment, to be taken in each of the 50 States, the District of Columbia, the Virgin Islands, Guam, and the Commonwealth of Puerto Rico.

The census program was designed in consultation with advisory committees and individuals to achieve a census having optimum value to users of housing statistics. The Housing Advisory Committee was organized by the Director of the Bureau of the Census and was made up of persons in private industry, universities, and local governments. It advised on various aspects of the housing census programs except the technical phases of the Residential Finance program for which the Technical Advisory Committee on Residential Finance was organized. A Federal Agency Population and Housing Census Council, organized by the Bureau of the Budget and made up of persons in Federal agencies, also advised on the basic programs. A joint staff committee, set up by the Administrator of the Housing and Home Finance Agency and the Director of the Bureau of the Census, concentrated on aspects of particular interest to the housing agencies. In addition to the committees, working groups of specialists in housing subjects assisted the Census Bureau staff in the evaluation and improvement of housing concepts. A number of other committees, groups, and individuals also made contributions to the planning of the housing census.

ACKNOWLEDGMENTS

A number of persons both within and outside the Bureau of the Census participated in the various activities of the 1960 Census of Housing. Specific responsibilities were exercised by members of the Housing, Population, Demographic Operations, Statistical Methods, Field, and Geography Divisions. This volume was planned under the direction of Wayne F. Daugherty, then Chief, Housing Division, and E. Everett Ashley, III, Director, Statistical Reports Staff, Office of the Administrator, Housing and Home Finance Agency. Henry D. Shekleton, Chief, Demographic Statistics Branch of the Population Division, assisted in developing the content of the volume and prepared the analytical portion of the text relating to population characteristics. Within the Housing Division, Benihah Washabough, Special Assistant, assisted by Mildred Lam, organized the format of the volume and prepared the analytical and other portions of the text relating to housing characteristics; and Nathan Krevor, Chief, Coordination and Research Branch, assisted by Leonard J. Norry, coordinated the operational aspects of the tabulations. Other staff members who made significant contributions to the materials presented in this volume include J. Hugh Rose, Chief, Structural Statistics Branch; assisted by Meyer Zitter; Alexander C. Findlay, Chief, Facilities and Equipment Branch; Herbert Shapiro, Chief, Financial Statistics Branch; and Aaron Josowicz, Chief, Occupancy and Utilization Branch.

Important contributions were made by Morton A. Meyer, Chief, Denver K. Ingram, John E. Briner, and William E. Grubbs of the Demographic Operations Division in the processing of the data; Jefferson D. McPike, Chief, Ivan G. Munro, Paul R. Squires, and George K. Klink of the Field Division in the collection of the information; William T. Fay, Chief, Robert C. Klove, and Robert L. Hagan of the Geography Division in the geographic work; and Joseph Steinberg, Chief, Robert H. Hanson, Herman Fastenau, and Warren J. Mitofsky of the Statistical Methods Division in the sampling and quality control aspects. The technical editorial work was under the supervision of Mildred M. Russell of the Population Division, assisted by Louise L. Douglas. Robert H. Brooks of the Administrative Service Division was responsible for the printing arrangements.

Important contributions were also made by the staffs of the Administrative Service Division, Everett H. Burke, Chief; Budget and Management Division, Charles H. Alexander, Chief; Census Operations Office, Robert D. Krock, Executive Officer; Personnel Division, James P. Taff, Chief; Statistical Reports Division, Edwin D. Goldfield, Chief; and Statistical Research Division, William N. Hurwitz, Chief.

October 1962.
PUBLICATION PROGRAM OF THE 1960 CENSUS OF HOUSING

Results of the 1960 Census of Housing are published in seven housing volumes as described below. A separate series containing the census tract reports is a joint publication with data from the 1960 Census of Population. A series of special reports for local housing authorities constitutes the remainder of the final reports. The source of the data is the April 1960 enumeration, except for Volumes IV and V which are based largely on the enumeration of units in a sample of land area segments, started in late 1959 and completed in 1960. Prior to the final reports, several series of preliminary and advance reports were issued. Some unpublished statistics can be obtained for the cost of preparing a copy and certain special tabulations can be prepared, on a reimbursable basis, on request to the Chief, Housing Division, Bureau of the Census, Washington 25, D.C.

Volume I (Series HC(1) reports). States and Small Areas. Information about all subjects covered in the April 1960 enumeration, with a separate report for the United States by regions and geographic divisions, each of the 50 States, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands of the United States. In the State reports, information is shown for the State; each standard metropolitan statistical area and its constituent parts; each urbanized area, place of 1,000 inhabitants or more, and county; and the rural-farm and rural-nonfarm parts of each county. The volume covers occupancy characteristics, structural characteristics, condition and plumbing facilities, equipment and fuels, and financial characteristics. The subjects are: Color; persons; persons per room, tenure, year moved into unit; vacancy status; and duration of vacancy; basement; bedrooms; elevator; structure built; bathing facilities; bathrooms; condition; sewage disposal; source of water; toilet facilities; and water supply; air conditioning; automobiles available; clothes dryer; clothes washing machine; cooking fuel; heating equipment; heating fuel; home food freezer; radio sets; telephone available; television sets; and water heating fuel; contract rent; gross rent; and value.

Volume II (Series HC(2) reports). Metropolitan Housing. Cross-tabulations of housing and household characteristics, with a separate report for the United States by geographic divisions, and for each of the 192 standard metropolitan statistical areas of 100,000 inhabitants or more in the United States and Puerto Rico. Separate statistics for each of the 134 places of 100,000 inhabitants or more are included in the metropolitan area reports.

Volume III (Series HC(3) reports). City Blocks. Separate reports for cities and other urban places having 50,000 inhabitants or more prior to and at the time of the 1960 Census, and for a number of smaller localities which arranged for block statistics. Data for a limited number of characteristics are presented by blocks. Statistics for 466 cities and localities in the United States and Puerto Rico are published in 420 separate reports.

Volume IV (Series HC(4) reports). Components of Inventory Change. Information on the source of the 1950 inventory and the disposition of the 1950 and 1960 inventories. Data are provided for components of change such as new construction, conversion, merger, demolition, and other additions and losses. Part 1 of the volume contains the 1950 to 1959 comparison, with a separate report for the United States by regions, and each of 17 selected metropolitan areas (15 standard metropolitan statistical areas, defined as of June 8, 1959, and 2 standard consolidated areas). Part 1 is published in two sets of reports for each area. Part 1A presents basic 1950 and 1959 data, with emphasis on the counts and characteristics of the components of change; Part 1B presents additional information on characteristics of the inventory, including characteristics of the present and previous residences of recent movers. Part 2 contains the 1957 to 1959 comparison, with a separate report for the United States by regions, and separate reports for 9 of the selected areas (standard metropolitan areas defined as the 1956 inventory).

Volume V. Residential Finance. Information on financing of residential property, including characteristics of mortgages, properties, and homeowners. Part 1 of the volume is a report on homeowner properties for the United States by regions, and each of 17 selected metropolitan areas (15 standard metropolitan statistical areas, defined as of June 8, 1959, and 2 standard consolidated areas). Part 2 is a report on rental and vacant properties for the United States.

Volume VI. Rural Housing. Cross-tabulations of housing and household characteristics for the 121 economic subregions of the United States, for rural-farm and rural-nonfarm housing units.

Volume VII. Housing of Senior Citizens. Cross-tabulations of housing and household characteristics of units occupied by persons 60 years old and over, for the United States, each of the 50 States and the District of Columbia, and selected standard metropolitan statistical areas.

Series HC(1) reports. Census Tracts. Separate reports for 180 tracted areas in the United States and Puerto Rico. The reports contain information, by census tracts, on both housing and population subjects. (This series is the same as the tract reports included in the publication program for the 1960 Census of Population.)

Series HC(S) reports. Special Reports for Local Housing Authorities. Separate reports for 139 localities in the United States. The program was requested by, and planned in cooperation with, the Public Housing Administration. The reports contain data on both owner- and renter-occupied housing units defined as substandard by Public Housing Administration criteria, with emphasis on gross rent, size of family, and income of renter families.
CONTENTS

SUMMARY

Living arrangements of elderly persons. XI
Number of elderly persons in household. XI
Size of household. XI
Relationship to head. XI
Individual income. XII

DETAILED TABLES

For list of tables and page numbers, see below.

APPENDIX TABLES

Table 1.—Total population in housing units and population 60 years old and over in housing units, by tenure, for the United States, States, and selected SMSA’s: 1960

Table 2.—All occupied housing units and units having household member 60 years old or over, by tenure, for the United States, States, and selected SMSA’s: 1960

**LIST OF DETAILED TABLES**

Statistics are presented in a series of standard tables, arranged by area in three chapters. The content is the same in tables having the same basic number. Tables 1 to 5, 8, and 9 are presented in chapter 1 for the United States, inside standard metropolitan statistical areas (SMSA’s), and outside standard metropolitan statistical areas. Tables 1 to 10 are presented in chapter 2 for nonfarm persons and housing units in the United States, inside SMSA’s and outside SMSA’s. In chapters 1 and 2, the tables are repeated for nonwhite persons and their housing units. The prefix letter “A” has been assigned to tables for the United States, “B” to tables for inside SMSA’s, and “C” to tables for outside SMSA’s. Tables 1 and 4 are presented in chapter 3 for each State and the District of Columbia and for the largest SMSA in the State; the prefix letter “A” designates tables for the State and “B” designates tables for the SMSA. The suffix letter “a” designates tables for nonwhite persons and households.

Table 1.—Number of persons in household by number of persons 60 years old and over, by age of head and household composition, by tenure: 1960.

Table 2.—Age of persons 60 years old and over by household composition and relationship to head of oldest other member, by tenure: 1960.

Table 3.—Household income for households with member 60 years old or over, by age of head and household composition, by tenure: 1960.

Table 4.—Individual income of household head 60 years old or over by household composition, and income of oldest other member by sex, age, and relationship to head: 1960.

Table 5.—Condition and plumbing facilities and persons per room, for households with member 60 years old or over, by age of head, age of oldest other member, and income: by tenure: 1960.

Table 6.—Gross monthly rent of renter-occupied units, for households with member 60 years old or over, by age of head, age of oldest other member, and income: 1960.

Table 7.—Value of owner-occupied units, for households with member 60 years old or over, by age of head, age of oldest other member, and income: 1960.

Table 8.—Units in structure for owner- and renter-occupied units, for households with member 60 years old or over, by age of head and age of oldest other member: 1960.

Table 9.—Year structure built by year head moved into unit, for households with member 60 years old or over, by age of head and age of oldest other member: 1960.

Table 10.—Household income by rent-income ratio, for 1- and 2-person renter households with member 60 years old or over: 1960.
