## PREFACE

This volume presents cross-tabulations of housing and household characteristics for all occupied rural nonfarm and farm housing units and selected characteristics of vacant rural-nonfarm units in the United States and its 121 economic subregions. The statistics are based on information collected as of April 1, 1960, in the Census of Housing, supplemented with information from the Census of Population. The report contains separate statistics for owner-occupied, renter-occupied, and vacant units, as well as limited statistics for rural units with nonwhite household heads.

Authorization for the 1960 Census of Housing was provided in the Act of Congress of August 31, 1954 (amended August 1957), which codified Title 13, United States Code. The law provides for a decennial census of housing, including utilities and equipment, to be taken in each of the 50 States, the District of Columbia, the Virgin Islands, Guam, and the Commonwealth of Puerto Rico.

The census program was designed in consultation with advisory committees and individuals to achieve a census having optimum value to users of housing statistics. The Housing Advisory Committee was organized by the Director of the Bureau of the Census and was made up of persons in private industry, universities, and local governments. It advised on various aspects of the housing census programs except the technical phases of the Residential Finance program for which the Technical Advisory Committee on Residential Finance was organized. A Federal Agency Population and Housing Census Council, organized by the Bureau of the Budget and made up of persons in Federal agencies, also advised on the basic programs. A joint staff committee, set up by the Administrator of the Housing and Home Finance Agency and the Director of the Bureau of the Census, concentrated on aspects of particular interest to the housing agencies. In addition to the committees, working groups of specialists in housing subjects assisted the Census Bureau staff in the evaluation and improvement of housing concepts. A number of other committees, groups, and individuals also made contributions to the planning of the housing census.

## ACKNOWLEDGMENTS

A number of persons both within and outside the Bureau of the Census participated in the various activities of the 1960 Census of Housing. Specific responsibilities were exercised by members of the Housing, Demographic Operations, Field, Geography, Population, and Statistical Methods Divisions of the Census Bureau. This report was planned under the direction of Wayne F. Daugherty, then Chief, and Frank S. Kristof, then Assistant Chief, Housing Division. The processing and publication were initiated by Daniel B. Rathbun, then Chief, and were completed under the general supervision of Arthur F. Young, Acting Chief, Housing Division. J. Hugh Rose, Chief, Structural Statistics Branch, developed the tabular content and, with the assistance of Beulah Washabaugh and Hazel H. Moore, organized the format of the report and prepared the text. Nathan Krevor, Chief, Coordination and Research Branch, assisted by Leonard J. Norry, coordinated the operational aspects of the preparation of the report. Naomi D. Rothwell had a major role in the enumerator training program. Other members of the Housing Division who were responsible for a specific phase of the program include Herbert Shapiro, Chief, Financial Statistics Branch, and Alexander C. Findlay, Chief, Facilities and Equipment Branch.

Important contributions were made by Glen S. Taylor, then Chief, Richard A. Hornseth, Denver K. Ingram, William E. Grubbs, Patience Lauriat, Richard J. Rice, Willard P. Hess, and Bernadette H. Marlow of the Demographic Operations Division in the processing of the data; Jefferson D. McPike, Ivan G. Munro, Paul R. Squires, and George K. Klink of the Field Division in the collection of the information; William T. Fay and Robert C. Klove of the Geography Division in the geographic work; and Joseph Steinberg, Robert H. Hanson, Herman Fasteau, George Minton, Kathern Clay, and Anthony Turner of the Statistical Methods Division in the planning of sampling and quality control procedures. William H. Hurwitz, Chief, Statistical Research Division, assisted by Harold Nisselson, Jack Silver, Leon Gilford, and William H. Cook were instrumental in the formulation of field plans. The technical editorial work was under the supervision of Mildred M. Russell of the Population Division, assisted by Louise L. Douglas. The maps appearing in the report were prepared under the direction of Robert L. Hagan and George W. Morris of the Geography Division.

Important contributions were also made by the staffs of the Administrative Service Division, Everett H. Burke, Chief; Budget and Management Division, Charles H. Alexander, Chief; Personnel Division, James P. Taff, Chief; and Statistical Reports Division, Edwin D. Goldfield, Chief.

April 1963.

## PUBLICATION PROGRAM OF THE 1960 CENSUS OF HOUSING

Results of the 1960 Census of Housing are published in seven housing volumes as described below. A separate series containing the census tract reports is a joint publication, with data from both the 1960 Census of Housing and the 1960 Census of Population. A series of special reports for local housing authorities constitutes the remainder of the final reports. The source of the data is the April 1960 enumeration, except for Volumes IV and V which are based largely on the enumeration of units in a sample of land area segments, started in late 1959 and completed in 1960. Prior to the final reports, several series of preliminary and advance reports were issued. Some unpublished statistics can be obtained for the cost of preparing a copy and certain special tabulations can be prepared, on a reimbursable basis, on request to the Chief, Housing Division, Bureau of the Census, Washington 25, D.C.

*Volume I (Series HC(1) reports). States and Small Areas.* Information about all subjects covered in the April 1960 enumeration, with a separate report for the United States by regions and geographic divisions, each of the 50 States, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands of the United States. In the State reports, information is shown for the State; each standard metropolitan statistical area and its constituent parts; each urbanized area, place of 1,000 inhabitants or more, and county; and the rural-farm and rural-nonfarm parts of each county. The volume covers occupancy characteristics, structural characteristics, condition and plumbing facilities, equipment and fuels, and financial characteristics. The subjects are: Color, persons, persons per room, tenure, year moved into unit, vacancy status, and duration of vacancy; basement, bedrooms, elevator in structure, rooms, units in structure, and year structure built; bathing facilities, bathrooms, condition, sewage disposal, source of water, toilet facilities, and water supply; air conditioning, automobiles available, clothes dryer, clothes washing machine, cooking fuel, heating equipment, heating fuel, home food freezer, radio sets, telephone available, television sets, and water heating fuel; contract rent, gross rent, and value.

*Volume II (Series HC(2) reports). Metropolitan Housing.* Cross-tabulations of housing and household characteristics, with a separate report for the United States by geographic divisions, and for each of the 192 standard metropolitan statistical areas of 100,000 inhabitants or more in the United States and Puerto Rico. Separate statistics for each of the 134 places of 100,000 inhabitants or more are included in the metropolitan area reports.

*Volume III (Series HC(3) reports). City Blocks.* Separate reports for cities and other urban places having 50,000 inhabitants or more prior to and at the time of the 1960 Census, and for a number of smaller localities which arranged for block statistics. Data for a limited number of characteristics are presented by blocks. Statistics for 466 cities and localities in the United States and Puerto Rico are published in 420 separate reports.

*Volume IV (Series HC(4) reports). Components of Inventory Change.* Information on the source of the 1959 inventory and the disposition of the 1950 and 1956 inventories. Data are provided for components of change such as new construction, conversion, merger, demolition, and other additions and losses. Part 1 of the volume contains the 1950 to 1959 comparison with a separate report for the United States by regions, and each of 17 selected metropolitan areas (15 standard metropolitan statistical areas, defined as of June 8, 1959, and 2 standard consolidated areas). Part 1 is published in two sets of reports for each area. Part 1A presents basic 1950 and 1959 data, with emphasis on the counts and characteristics of the components of change; Part 1B presents additional information on characteristics of the inventory, including characteristics of the present and previous residences of recent movers. Part 2 contains the 1957 to 1959 comparison, with a separate report for the United States by regions, and separate reports for 9 of the selected areas (standard metropolitan areas defined for the 1956 inventory).

*Volume V. Residential Finance.* Information on financing of residential property, including characteristics of mortgages, properties, and homeowners. Part 1 of the volume is a report on homeowner properties for the United States by regions, and each of 17 selected metropolitan areas (15 standard metropolitan statistical areas, defined as of June 8, 1959, and 2 standard consolidated areas). Part 2 is a report on rental and vacant properties for the United States.

*Volume VI. Rural Housing.* Cross-tabulations of housing and household characteristics of rural-farm and rural-nonfarm housing units for the United States and each of the 121 economic subregions.

*Volume VII. Housing of Senior Citizens.* Cross-tabulations of housing and household characteristics of units occupied by persons 60 years old and over, for the United States, each of the 50 States and the District of Columbia, and selected standard metropolitan statistical areas.

*Series PHC(1) reports. Census Tracts.* Separate reports for 180 tracted areas in the United States and Puerto Rico. The reports contain information, by census tracts, on both housing and population subjects. (This series is the same as the tract reports included in the publication program for the 1960 Census of Population.)

*Series HC(S1) reports. Special Reports for Local Housing Authorities.* Separate reports for 139 localities in the United States. The program was requested by, and planned in cooperation with, the Public Housing Administration. The reports contain data on both owner- and renter-occupied housing units defined as substandard by Public Housing Administration criteria, with emphasis on gross rent, size of family, and income of renter families.

## DETAILED TABLES

The statistics for the United States and for each of the 121 economic subregions are presented in standard tables 1 to 5. Table 6, which contains data for units with nonwhite household heads, is also presented for the United States and for each of the 31 economic subregions (listed below) with 10,000 or more such units. Table 7, appearing only in the set of tables for the United States, presents data on vacant rural-nonfarm units for the United States and each subregion. Each economic subregion is identified by a number, from 1 to 121, in sequence throughout this volume. The subregion numbers are shown on the right-hand pages and also as prefixes to the table numbers. The subjects are the same in tables having the same basic numbers. The titles of the tables are as follows:

Table 1.—Rooms in occupied rural nonfarm and farm housing units: 1960.

Table 2.—Condition and plumbing facilities, for occupied rural nonfarm and farm housing units: 1960.

Table 3.—Income in 1959 of primary families and individuals in owner- and renter-occupied rural nonfarm and farm housing units: 1960.

Table 4.—Year structure built, for owner- and renter-occupied rural nonfarm and farm housing units: 1960.

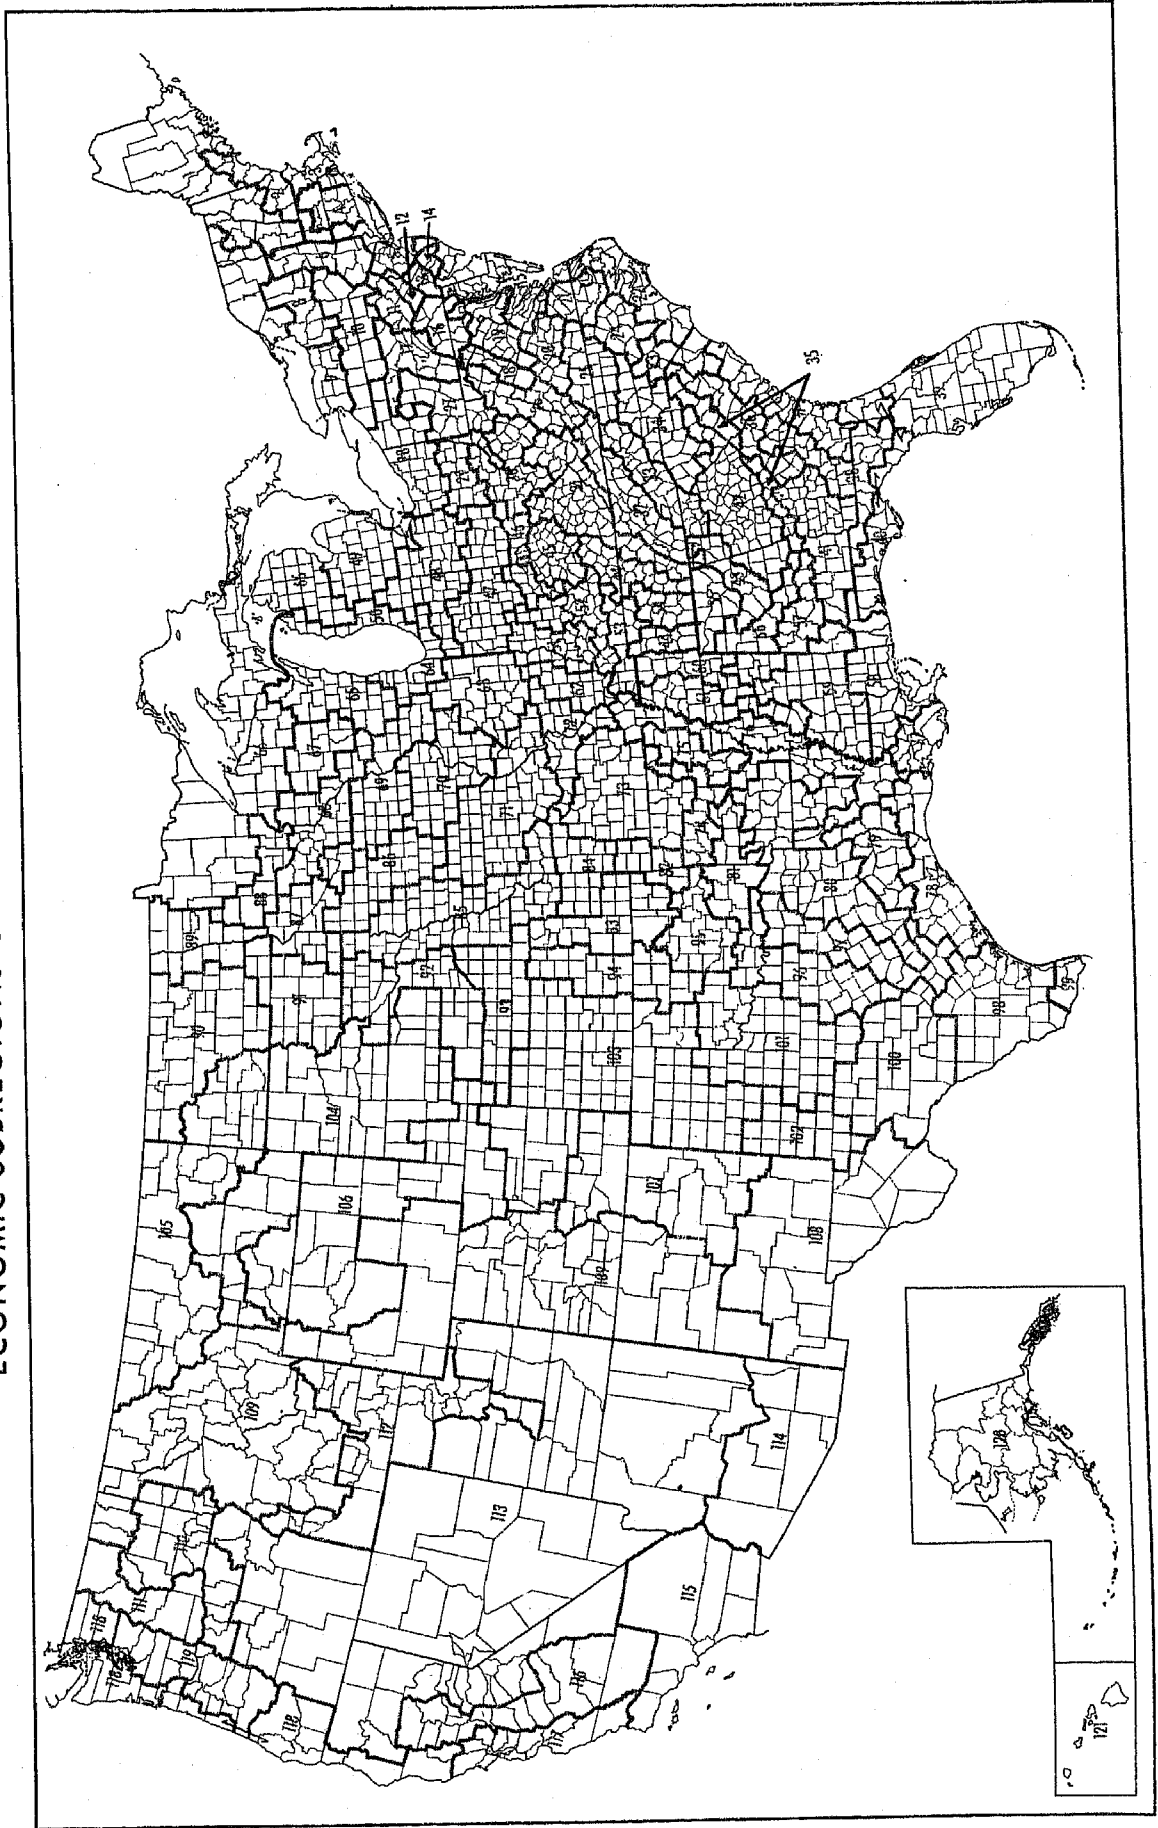

Table 5.—Rooms in renter-occupied rural nonfarm and farm housing units: 1960.

Table 6.—Condition and plumbing facilities for owner- and renter-occupied rural nonfarm and farm housing units with nonwhite household heads: 1960.

Table 7.—Characteristics of vacant rural nonfarm housing units, by economic subregions: 1960.

The numbers of the economic subregions for which table 6 is presented are: 15, 19, 20, 21, 22, 23, 24, 25, 31, 34, 35, 36, 37, 38, 39, 41, 42, 43, 53, 57, 58, 59, 61, 76, 77, 78, 79, 80, 97, 113, 121.
